THE A. T. ANDREAS PUBLISHING COMPANY.
"URBS RECONDITA."

HISTORY
OF
CHICAGO.

FROM THE
EARLIEST PERIOD TO THE PRESENT TIME.

IN THREE VOLUMES.

VOLUME III.—FROM THE FIRE OF 1871 UNTIL 1885.

BY A. T. ANDREAS.

CHICAGO:
1886.
We herewith present to the public the third volume of the History of Chicago. The publishers, in the preceding volumes, acknowledged their indebtedness to the hearty cooperation of many leading citizens and to various societies, and they take pleasure in saying that similar favors have been extended in the preparation of the third volume. The mere enumeration of such obligations would not do them justice, no matter how amply they might be detailed.

A glance at the index will make manifest the comprehensiveness of the work, and give some idea of the amount of labor necessary in the preparation of this volume. It is a matter of pride to the publishers, and it is hoped to the patrons of the work also, that all the labor has been performed by Chicago men; from the gathering of facts, to the printing, engraving, electrotyping and binding of the books. It is a history of Chicago, by its people, and for its people.

At the commencement of the work, there were many who predicted a failure of the enterprise, from a lack of public spirit in our citizens. A sufficient refutation of that statement is found in the appearance of this volume. It is natural that a people who redeemed Chicago from a morass in 1836, and made it, in some respects, the greatest city on the Continent in 1886, should desire to peruse a narration of the causes that led to such a result. We trust a perusal of this work will satisfy that desire.

In reviewing the events that occurred during the epoch covered by this volume, it has been the desire of the publishers to avoid invidious criticism or unjust discrimination. In many cases, the golden mean was hard to preserve, not from an individual preference on the part of the writer, but from a partisan view perceptible in the source of information. In such instances, we have always given a plain statement of facts, leaving the reader to make his own deductions.

As historians and compilers, we leave the public to judge of the merits of our work, but we feel that unstinted eulogium is due to the people the recital of whose magnificent achievements reads more like a fable than a narrative of actual accomplishment.

To the people of Chicago, unsurpassed in their loyalty in war, indefatigable in their benevolence in peace, irrepressible in their energy and enterprise in commerce and trade, these volumes are dedicated.

THE A. T. ANDREAS COMPANY.
TABLE OF CONTENTS

St. Peter's, 768—St. Mary's, 768—St. John's, 769—St. Paul's, 769—Immaculate Conception, 769—St. Michael's, 770—St. Patrick's, 770—St. Francis Xavier's, 770—Notre Dame de Chicago, 772—St. Procopius, 773—St. Elizabeth's, 773—St. Malachi's, 773—St. Adelbert's, 777—

History of Chicago.

The Re-building of Chicago.

History, in any worthy sense of the term, should be more than a bare statement of facts—of dates and names and numbers and events. It should ask the deeper questions as to why things have come to pass? And it should also give some reason for the order and the manner of their appearing.

The re-building of Chicago is an accomplished fact; and to give the number of laborers employed and the material required, and the time occupied in that great work, might be interesting as details; but it would offer no explanation of the causes that led up to, and made possible so great a result. And when one asks for these, he is led to ask still another question, and that is what were the causes that led to the building of the first Chicago? In the answer to these will be found most of the reasons for the re-building.

Why, then, was there, and is there, a Chicago? It is not a sufficient explanation to say, that the early settlers were men of foresight and energy. That they were such may be cheerfully admitted; but any power of foreseeing, however large, would have been of but little value had there not been something to be seen; and energy, however great and tireless, could have accomplished no such wonderful results had there not been the pre-existent conditions for its successful exertion. The world abounds with men of prevision, of will-power and strength; but cities can be founded and built up only where nature, by supplying the necessary conditions, has made their existence possible.

Any one studying the general geography, the physical structure and outlines of our continent, may see that in the nature of things its great cities and its special and mixed characters of population and industries have been the result of natural surroundings, rather than of the will or choosing of the people. A continent lying between two oceans and with a vast sea-coast would naturally have sea-coast cities, and the forms of industries and commerce and the kind of a population necessary to all these manifold forms of business and labor. One, studying the great mountain ranges of our country, with their wealth of coal and iron and precious metals, must see that these conditions will call for the corresponding forms of business and social development. And so, the long rivers and the great valleys of our country invite every form of agriculture; and the vast forests attract the lumber interests; and the upland prairies, less suited to farming, become the great cattle ranges and the home of the herdsman.

And with these suggestions before us we may begin to see the great cities and the vast industries and the increasing population of our country, all taking shape, not by accident, nor as arbitrarily determined by men, but in accordance with the plans and the ordination of nature. It was not the fact of the Dutch landing at New York, that made that great city, but the greater fact of the East and the Hudson River and the Long Island Sound forming a natural harbor, and thus inviting the ships and the commerce of two continents. Nor did William Penn, nor Lord Baltimore, nor the French, cause Philadelphia and Baltimore and New Orleans to take their places; nor did the Puritans build Boston. Nature located all these splendid cities long before the feet of the white man had touched our shores. It is true that our civilization and the character of the people have been the great factors in the growth and development of these cities, but a power higher than man, and a wisdom beyond that of the civil engineer, determined their location; and the same is true of San Francisco, the leading city of California. That State, for nearly a thousand miles, lies along the Pacific coast, and its mountain ranges are so disposed as to form, of its one hundred and sixty thousand square miles, a basin whose largest diameter is from north to south, and this, by its natural drainage system, forms the two great rivers, the Sacramento and the San Joaquin, which receive the waters from the mountain streams and carry them to an inland sea, the Bay of San Francisco, and thence, by the Golden Gate, to the Pacific. And thus, long before the soldiers of Cortez landed in Mexico, nature had determined the location of San Francisco.

From these general observations it should now appear evident that certain things must occur along the great line between the East and the West. As civilization pressed back the savage life there would come to be a great highway between the two oceans. This might be determined by water-courses or the best routes for constructing railways, or other conditions. And here come in also the influences of climate and production upon the number and character of a population. But without entering at length upon this large question, it may be sufficient for our present purpose to state the general fact, that the great historic movements of our world have been along the belt lying between the 30th and the 50th degrees of latitude north; and that the greater activities have been upon the northern half of the latitudes named. This may be accounted for on the ground of the more even balance between the winters and the summers, the less enervating effects of a colder climate, and the wider range of industries and the greater needs of life. All these combine to produce and develop a healthy industrious and progressive people.

A line drawn directly east from New York leads to Gibraltar; but owing to the effect of the warmer ocean currents, the temperature that would equal that of New York is found ten or more degrees further north; and with it the greater industry and progress of the countries of Europe, and there is still another fact to be considered in reference to the natural water communication of our country. The Mississippi, with its tributaries, the Missouri and the Ohio rivers, is the one great outlet to the South of that wonderful valley lying between the Allegheny and the Rocky mountains. The Northern water-way to the Atlantic is by the great chain of lakes and the St. Lawrence River. The head of Lake Michigan is the head of this vast water communication, and is on an almost direct line between New York and San Francisco; also, in the line and
region of the largest and most general productiveness of our country and of the greatest activity of our people.

And now, when these facts are considered, it will be seen that Chicago is in the direct line of communication between London and New York, and between New York and our other great Eastern cities and San Francisco. And hence Chicago is directly on the line of the great National highway between the two oceans that bound our country on the East and the West. And hence nature which in the plan of a continental development settled the question long before the ships of Columbus set sail, that here there should be a great city.

Having said these things, we have given a suggestive answer as to why the first Chicago came to be. It came as a natural and a necessary part of the development of the country. There may be, and are, other lines of communication between the two oceans; but in the nature of things, that by Chicago is, and must be, the greatest. And what nature decreed, man has come along to fulfill. The beginnings of Chicago were necessarily small; and no one, fifty years ago, even dreamt of what was soon to be. Nor did any one at that time imagine what was to be the wonderful growth of the great Northwest. The city naturally kept pace in its growth with the growth of the country. In 1837, there was a population of only four thousand one hundred and seventy; and in 1854, only twenty-nine thousand nine hundred and sixty-three; and ten years later it numbered but one hundred and nine thousand two hundred and six.

In 1870, or a year before the city was burned, the population had increased to three hundred and six thousand six hundred and five. And when we consider the relative growth of the country in these years, and what the growth of the city meant in the way of business and in the increase of railroad and lake commerce, and the large amount of money and labor and the number of public buildings required to handle all this commerce, and transact this vast business, we must perceive that the burning of the city, whilst it must affect outlying interests, could not destroy the conditions that called it into existence, and upon which it depended. The location was left, and the ruins of what had been were on the line of the Nation's great highway; and not only the city but also its railroads and the river traffic were destroyed. The three hundred thousand people who were here; and the eighteen great trunk lines of railroads, with their nearly ten thousand miles of direct connection, were not destroyed. The country was all around us; its sympathies were aroused and help came; and the energy that had helped build the city, though almost paralyzed for a time, quickly recovered and stood up and faced the presence of a loss so great, and faced resolutely the larger task of the years of hard struggle that would be required to make good what, on that one terrible night, had been swept away.

We can form some conception of the extent of the buildings and the property destroyed by the number of acres burned over, which were—on the West Side, one hundred and ninety-four acres; South Side, four hundred and sixty acres; North Side, one thousand and four hundred and seventy acres; making a total area of two thousand one hundred and twenty-four acres, or nearly three and a half square miles, being about four miles in length and from one to one and a half miles in width. The number of buildings destroyed was seventeen thousand four hundred and fifty; and nearly one hundred thousand persons were left homeless. The custom-house, the court-house, the post-office, the chamber of commerce, the hotels, the depots, many churches and the great business blocks, the banks, the theaters, and the newspaper offices, all went down together in the awful conflagration. Some further idea may be formed from the statement that seventy-three miles of street frontage were burned, and the total loss of property could not have been less than $200,000,000.

The first thought of all was, the relief of the suffering; and through the generous donations of the people of almost every land—amounting in all to nearly $5,000,000, and by a system of distribution soon set in motion, this immediate necessity was met. And then came the first thoughts of re-building. It was a dreary waste of tottering walls and smouldering ruins to look upon, and enough to almost discourage the stoutest heart. But courage revived, and soon—before the ashes were cold—hundreds of men began to venture around where had stood their stores and offices, and to search for safes, books and papers.

Then they began to prepare temporary quarters; but all this time the thought of a permanent and speedy re-building, as an imperative necessity, was present to every mind. All felt, all knew, and all said, the city must be re-built. The vast railroad, and lake and commercial interests of such a great business center demanded it; the generous confidence of the capitalists of the Eastern cities gave assurance of help in so costly an undertaking. Delay was impossible. Every great business interest must in some way be set in motion.

How vast these interests were may be approximately estimated by a special reference to some of the more important. The estimate of these, for the year 1873, aggregated a total of $180,000,000; and when it is remembered that the grain, meat and lumber markets of Chicago are, and even then were, the largest in the world, it will be seen that the speedy re-building of Chicago was a commercial necessity. This vast business, in which the railroads and the lake commerce and the whole country were interested, could not be abandoned; nor could it in any large sense be diverted. It had to be continued, and it had to be carried on, in, and through, Chicago; and had the entire city been destroyed and all the inhabitants burned up, a new city must have soon arisen, and other people have come to fill its streets and carry on its work.

When it is said that the largest grain, meat and lumber markets in the world were a part of the vast business of Chicago at the time of the fire, it must not be supposed that these forms of business meant no more than the handling of such products on their way for distribution and consumption in other and smaller cities and towns. It is true that for a large amount of grain and lumber and greatest numbers of cattle, Chicago is a wholesale market; but this, of itself, represents but a small part of the business and labor that these lines of commerce bring to the city. Chicago was and is a vast manufacturing center.

That this is, and must be so, will appear evident from the consideration of a few facts. In the State of Illinois there are over thirty thousand square miles of coal, and the richest mines thereof are not distant from the city, and many of them are on the direct lines of the great railways and the others are easily reached by branch lines. The lakes afford ready and cheap communication with the vast lumber regions of Wisconsin and Michigan, and also the iron and copper and red-stone districts of Lake Superior. And hence in
Permission of Inland Architect and Builder.

TEMPLE OF ZION CONGREGATION.
the nature of things, Chicago had become a center of large and varied manufacturing interests. The lumber brought here was dried and dressed for flooring and sidings and made ready for use in building before it was shipped to other points. There were also many large establishments for making doors and sash and blinds; and others still were heavily engaged in the manufacture of every line and quality of furniture, and organs and pianos. The great slaughter-houses were extensively engaged in packing and curing meats; and not only were the hides tanned here, but even at that time Chicago was largely engaged in the manufacture of boots and shoes; and as one result of the energy of the people in the speedy and grand re-building of the city, this form of industry has so increased that Chicago is to-day the largest boot and shoe manufacturing center on the continent. And naturally, too, the cheap water connections made this a center of iron manufactories for engines and steel rails and car-wheels and reapers and mowers, and all machinery needed for the farms, the shops, the rail-roads, and the steamers upon the lakes.

All these many manufacturing industries were present and pressing reasons for the re-building of the city; and not alone for foundries and shops, but for houses to shelter the many thousands of laborers required to do the work. We sometimes wonder, in looking at the crowds of people who fill the streets and the cars in the morning and evening hours, where they come from, where they go, where and how they live, and what they all can find to do. The explanation is found by the barest allusion to the vast and many forms of business and labor that enter into the life of a great city. Such was Chicago when the fire occurred; and all these were imperative reasons for its immediate re-building.

But it was not the fact of necessity alone that aroused the energetic people of Chicago for their great task. They were inspired by a large hope for the future greatness of their city. In the midst of their present desolation and distress, they saw that in the longer view of things these calamities, however discouraging, were but passing incidents in its larger life; that the “great fire” would soon be a thing of the past, whilst the re-built city must be the glory of the future. And as hope and courage revived, the new Chicago rose to beauty to the赞叹ed while even by the black and smoking ruins marked the site of the old. Led on by such visions, speculations and reasonings as to the possible future of such a city were heard on every hand.

It may be confessed that such hopeful boastings as to the possible future of Chicago were not wholly unknown or strange before the fire; and hence such talk was not entirely new. But it seemed to have a new meaning and to serve a more valuable purpose. It was this hopefulness, this expectation and pride over a city yet to be, that saved the people from the great mistake of re-building upon a small and cheap plan. At first, indeed, the re-building of some of what are now our noblest structures, was projected upon a plan that would have been wholly unworthy of the names they bear and the proud and prominent places they occupy. In the haste and discouragement, the first plan of the Tribune building, now one of the finest in the city, was poor and cheap; and the same is true of many others as at first planned. But the business men were much together in those days of a common loss; they talked together; they reasoned as to what was best to do; and the result was that one encouraged the other; and one, hearing of the enlarged plans of his neighbor, was led to improve his own. And in this way the feeling was soon common that the new city must be upon a plan far more substantial and elegant than had been the old. The result was, that only one building of any size,—that on the corner of Clark and Washington streets, was put up cheaply; and that has been torn down to give place to the fine Chicago Opera-house block. Had not this better judgment prevailed, our city would have been filled with cheap and insecure buildings, and the work of tearing down and re-build- ing would not yet have been half done. But instead of this, the great business streets present an appearance that is uniform, beautiful, imposing, and even grand.

Among the many questions discussed —for, in those exciting days, everybody was talking,—one of the most common was, the time that would be required to re-build the city. Some said that fifteen years would not see Chicago what it was before the fire; others, more hopeful, said ten years; and the most sanguine did not dare place the time at less than five years.

Well, the work was begun. Out of the $5,000,000 contributed for relief, soon temporary homes were provided for forty thousand people, and workmen were supplied with tools. Learning from experience, the fire limits, forbidding the erection of wooden buildings, were extended, not only over the area where the fire had raged, but in some directions far beyond. And then began the work of clearing away the ruins, drawing plans and laying foundations for hotels, theaters, business blocks and dwellings of brick, iron and stone. Architects were busy perfecting drawings, contractors were busy collecting material, and mechanics of all kinds found ready employment at good wages. Thousands of workmen came from other cities and from the country, and, though it was now winter, the streets were filled with busy men and with teams, and the whole scene became one of inspiring activity.

But it is not possible for those who saw the city burned; and saw it re-built, to describe the scene so as to make it appear real to others. Indeed, they can not make it real to themselves, for both the burning and the re-building were so far out of and beyond all the ordinary experiences of life, that the effect was in a sense overpowering, and the feelings were more like a dream, or when looking at a panorama, than those of actual life. Of course, all knew and felt that the events were terribly real; but they were more like a dream, or a panorama, too large to grasp; and then, the mind becoming accustomed to that from which it could not turn away, adapted itself to its new and strange surroundings.

It is no unusual thing to see a dwelling or a block burned; but how must one feel to look upon a vast, raging and uncontrollable storm and sea of fire, sweeping on from ten o'clock at night till morning, and then sweeping on till noon and till night, consuming over seventeen thousand houses, rendering a hundred thousand people homeless, and then stopping, only because there was nothing more in its path to be destroyed? It is common to see ten or a dozen or fifty houses rising at once; but when one looks upon, not a dozen or fifty, but upon ten thousand houses rising and ten times that number of busy workmen coming and going, and listening to the noise of countless saws and hammers and chisels and axes and planes, he is bewildered.

And thus it was in the burning and the re-building of Chicago. Those who witnessed the scenes marvel that they were or could have been. And in this state of wonder and excitement, thousands who had hardly known hardship before found themselves pushed out
into the struggle, and came to know how much they could bear and do, and many who were invalids, and some who had abandoned hope of recovery, found they had a reserve power of vitality, and, this being aroused, went to work for themselves or others. And whilst many may have suffered in health from exposure and hardships, not a few gladly confess that to the thrilling experiences and the continual excitement of those years, they are indebted for the lengthened existence they still enjoy.

That which some had said would require twenty or ten years to accomplish, was achieved in three years. A city that had been over thirty years in building, had been destroyed in a day and a night. In three years the explanation of its re-building. This is now an accomplished fact; and it is not only something of which Chicago may be justly proud, it is a pride and an honor to the country in which such a marvelous achievement is possible.

And now, having back of us, and beneath us, the explanation of both the building and the re-building of such a city, we are at the best point of observation to forecast the further out-workings of these conditions and causes in the possibilities and probabilities of its growth and greatness in the future. And it is from such standpoints of observation only, that speculations as to what may be can have the credit and weight of being rational. But once in the line of natural causes, the rational probabilities based upon such abiding conditions may become a reliable basis for both belief and action.

Since the fire, the population of Chicago has more than doubled; from three hundred thousand the city has grown to not less than seven hundred thousand, and the amount of building and the increase of business have naturally been in the same general ratio.

And now, look at some other facts bearing upon the same line, but to which reference has not yet been made. In approximating facts, we may say that one hundred years ago our country had a population of three millions, or about three persons to each square mile. Now we have a population of fifty millions, but still less than twenty to the square mile. And when we compare these facts with the crowded conditions of the old world, we are in a position to account for, and to explain, the vast increase of population in our own land through immigration. England and Wales have three hundred and eighty-nine to the square mile; France one hundred and fifty; Germany one hundred and ninety-three; Scotland one hundred and nine; Ireland one hundred and sixty-nine; and little Belgium has four hundred and fifty to the square mile. The
law of equalization must tend to reduce the population of these over-crowded countries, by bringing their people by thousands and millions to our own shores. In the last thirty years the emigration to this land has averaged over two million five hundred thousand every nine years. If the increase of population in our country continues in the ratio of the past — and there is no reason to think that it will not, — in fifteen years, or in the year 1900, it will have reached not less than eighty million souls.

And all this argues the continued and rapid growth of Chicago. Situated as this city is, it is not a question of what we might desire one way or the other; it is a question of what in the nature of things has to be. The city must, as a necessity, keep up with the growth of the country both in numbers and in business. And, for the reasons before mentioned,—that we are on the great National highway; at the head of the vast system of water-ways through the lakes; and on the natural and increasing lines of the great railroads, and in the center of what is undoubtedly the most productive country on earth.

Naturally, there is a line of cities along the Atlantic coast, and naturally a line of cities west of the Alleghenies, as Buffalo, Cleveland and Pittsburgh; and naturally two such cities as Cincinnati and St. Louis on the Ohio and Mississippi rivers. And thus we have the line north of these, and at the head of the lakes and on the direct line of the Nation's travel and commerce, has a position of her own, and from no fault of these other cities, but from the advantage and the necessities of such a position, leaves them all far behind in her rapid growth. And in the natural order of the development and business of the country several other cities have sprung up in a line or circle of four or five hundred miles from Chicago, still further west; as Kansas City, Omaha, St. Paul and Minneapolis. The positions of these are such as to justify, and even demand, a much larger growth than of those along the Mississippi. New York lies at the Eastern, and San Francisco at the Western, terminus of our great trans-continental travel and commerce, and Chicago, lying between, is helped by both, and is naturally the great mid-way center of manufacturing, merchandising, and general production and distribution, and it is not difficult to foresee that this great valley lying between the Allegheny and the Rocky Mountains is destined to become the dominant, the controlling, power in the nation that promises to be the greatest the world has ever seen. The principal countries of Europe could all be put down in this great valley, and it could feed and clothe all their many millions of people. America is destined to out-number and lead all the nations of the earth; this great valley is and must be the central and ruling power of the nation, and Chicago will, and must, by natural causes, be the chief city of this valley, and hence the largest in population, and the most important and commanding in point of influence and power upon the national welfare.

It is not the purpose of this article to moralize; but one can hardly help asking what the future of Chicago and the millions of this vast surrounding country will be, in point of intelligence and the moral qualities that alone can make a Republican government secure. It can not be denied that the lower elements of the old world are crowding to our shores. The country is yet new, and room abundant; but can we stand the pressure when it becomes thickly populated? It is estimated that by 1890 our population will contain forty-three million foreigners; and that twenty-five millions of these will be in the Great West. The significance of such facts and suggestions is felt in Chicago to-day. The hopeful feature is in the encouraging fact that so many of our foreign population are industrious and are acquiring property, and thereby possess a personal interest in the public welfare. Our next great hope is in the power of our public schools to enlighten and to Americanize.

In this survey of the re-building of Chicago, we have considered the external conditions that made such a fact possible, and have followed out these natural causes in the line of their suggestiveness as to the rationally probable future of Chicago and of the country. But it is pleasant to note the less observed, but more significant, fact, that man, as a builder, works not alone from external conditions and bodily needs, but whilst building of wood and stone, he is revealing the power and glory of his mind. He objectifies mental and spiritual ideals and affections. The vast structures that rose up under his human touch were not alone for purposes of business, but came to embody and shelter the love of home and family, and learning, and religion. By the side of the great business blocks have arisen the school-house and the church; and in the re-built homes are found again the old altars of love and the memories and hopes that the fire could not burn. And, last, to the fact that the building and the re-building of Chicago were not the results alone of its location and the surrounding conditions that made possible the existence of a great city. These were essential as conditions; but as such they had been present through all the unrecorded centuries, during which many forms of the varying uncivilized life of different tribes of Indians had come and gone. But in all those long ages there was no mind sufficiently enlightened to perceive these advantages; there was not a civilization that could utilize them. All this vast preparation of nature was to the savage mind but a camping-ground; and the wide prairies and great lakes and forests offered no wealth beyond their abundant supply of game and wild grasses and fruits.

To utilize these conditions of a higher productiveness and other and larger forms of wealth, there was needed the inventive and creative brain and hand of intelligence. For this nature waited; and with the white man it came. In his mind and heart were the thoughts and ideals and inspirations of all that was to be; and finding here the necessary conditions for their realization, the ideals were soon translated into the grand and imposing forms of the actual. But in all this, the possibilities of such realization and the inspirations of which they were actualized, were hid away in the mind and heart. And thus the glory of man as a builder in our world is not alone in the cities and temples that he causes to rise, but in the great thoughts and noble sentiments of which these are the material expressions. Thus, the sentiments of patriotism build the capital and the protecting fortresses of a country, and over these lift up a flag. The love of fireside and learning and religion builds the home and the school and the church; and in all these, man reveals, not alone his thought of the useful, but his ideal of the beautiful and the good.

And thus the re-built Chicago will stand as a monument, not alone of the courage, the energy, the strength, the acquisitiveness and world-wisdom of the man, and women who in three years accomplished that almost incredible task, but a monument also of their intelligence and morality and all the noble sentiments by which they were inspired in so great a work.

H. W. THOMAS.
WORK COMMENCED.

The conflagration of 1871 marked the third epoch in the history of Chicago. While to many who read of it, as well as to thousands of eye-witnesses, the disaster seemed an omen of the city's ruin, it yet contained the elements of a growth hitherto scarcely dreamed of, through which both society and business should be re-organized on a broader and more enduring basis. As the new structures which were to arise should be more adequate and more fitting, the past and growing needs of the city, so the life of the city, rudely shaken from the moorings of the past, was to become more cosmopolitan.

The new associations enforced by the exigencies of the winter succeeding the fire,—the mingling of all creeds and nations in the human work which the disaster entailed,—were to break up cliques and coteries; to give a freer scope to her life,—a wider range to her sympathies; to found that new Chicago, whose strong pulsations and conscious vitality should be but faintly exemplified in the trade palaces which became their outward manifestation.

But of the future there was little portent, as, standing amid the ruins of a square mile of business edifices and extensive factories, which but yesterday had been alive with the bustle of trade, the eye swept over a dreary waste of three more square miles, strewn with ashes, cinders and dismantled walls, among which were scattered the charred remains of human victims. The appalling fury of the flames, which destroyed alike busy mart, palatial residence, and hovel, had swept away the accumulations of years; and with an absolute lack of money, a belief that the contents of safes and vaults would prove worthless, and little probability of realizing any substantial return from insurance policies,—there seemed slight prospect of repairing shattered fortunes, re-placing desolated homes, or restoring the city to her former pre-eminence.

With a hundred thousand people shelterless, a lack of water, and a scarcity of food, and a partial panic, induced by the rumor that thieves from other cities had flocked by scores to Chicago,—the existence of a feeling of gloom and despondency would not have been surprising. Nor were there wanting fanatics who saw in the flames only the wrathful judgments of an offended Deity. To such, a fitting answer was returned by Rev. Robert Collyer, as, standing among the ruins of Unity Church, he addressed his congregation from one of the dismantled capitals of its pillars, on the Sunday morning succeeding the fire:

"I have heard not a little speculation about the moral significance of our great calamity, and men who meant better have unwittingly accused God of a great wickedness, when they have intimated that it was a judgment of Heaven because of the meanness of our city. First of all, judgments of Heaven are not retrospective, but always prospective; that is, they are never of the backward glance, but always of the onward. God's way is otherwise. He disciplines without destroying, and builds up without pulling down. No such punishment could possibly do any good if it were only received as a willful infliction of the rod of Heaven. Second, there was no reason why Chicago should have been made an example for the rest of the world. Of course, we were a people with great worldliness and selfishness, of great boasting and parade; but certainly no city in the Christian world has ever done more, according to its means, for schools, churches, and charities.

Third. We have been stricken in the boundaries of our fire limits, in permitting so many, or any, wooden buildings within the limits of the city, and to-day the fire limits should be the city limits. We have given full sway to drinking, gambling, and licentious houses, and the result is, we have, by our wanton, reckless, and immoderate example, made of our city, and harbored in it, a criminal population almost equal to that of London, which is the worst of the face of the earth. We have done less to reform this evil condition, when in our power, than almost any other city. We have drifted, too, into the hands of a set of tricky politicians, * * * * and the only recognized aristocracy of the city is a set of ignorant and recently enriched social swells and snobs."

In the same sermon, Mr. Collyer said:

"What is lost? First, our homes. Thousands of families are homeless and penniless. Second, our business. This is temporary. Third, our many families are the great misfortune, it is to one out of which we can repair. We have not lost—First, our geography. Nature called the lakes, the forest, the prairies together in convention long before we were here, and they decided that on this spot a great city should be built—the railroads and energetic men have aided to fulfill the prophecy. Second, we have not lost our men—noble, generous, and of genius. Third, We have not lost our homes; the city is to be once rebuilt, and the history of the latter house shall be greater than that of the former."

These words, and others of like import from the clergy and the press, formulated sentiments which were more or less distinctly impressed on the heart of everyone who was vitally interested in the city's welfare, while they served to arouse flagging courage; and before the ashes of the smouldering ruins were fairly cool, Chicago's inherent vitality and buoyancy of spirit had re-established themselves.

Of the aid extended to Chicago in her distress, little can be added to what has many times been written. The story of the charity that forgot all rivalry save emulation in deeds of kindness; that knew no geographical lines; that recognized no differences of race or creed,—belongs not alone to those benefited, but to the world. It has been well said, that there was no one of the United States in which some cinder from the Chicago fire had not kindled a flame of sympathy; and although it may be possible to compute the commercial value of the donations to the suffering city, the worth of the unstinted charity which the calamity evoked can not be estimated.

A history of the early measures taken for the relief of the sufferers was given, in considerable detail, in the second volume of this work; but some noteworthy corporate and individual subscriptions may be specified, in addition to the account there given:

A. T. Stewart, of New York, $50,000; City of Brooklyn, $20,000; New York Stock Exchange, $50,000; District of Columbia, $10,000; Rochester, $10,000; Buffalo, $10,000; City of Baltimore, $100,000; Robert Botmer, New York, $16,000; Peoria, $75,000; Worcester, $50,000; Indianapolis, $75,000; Cincinnati, $200,000; St. Louis, $300,000; Memphis, $40,000; New York Gold Room, $75,000; New York Produce Exchange, $5,000; New York Corn Exchange, $25,000; New York Board of Trade, $13,000; A. Belmont, Brown Brothers, Jesup & Co., and Darnac, Stock & Hall, $5,000 each; St. Louis, $5,000; Forti- coron, Washington, $5,000; President Grant, $1,000; Philadelphia Commercial Exchange, $10,000; Troy (N. Y.) Board of Trade, $10,000; London, Canada, $5,000; Hamilton, Canada, $5,000; Montreal, $20,000; Toronto, $10,000; Springfield, Mass., $15,000; Pittsfield, $5,000; City of Albany, $75,000; Albany (N. Y.) Lumber Board, $25,000; Elmina, N. Y., $10,000; Syracuse, N. Y., $51,000; Niagara Falls, $10,000; Syracuse, Providence, $1, $10,000; New York dry goods houses, $20,000; Lawrence, Kansas, $13,000; Kansas City, $26,000; J. S. Morgan & Co., of London, $5,000; Dayton, O., $20,000; Berkeley Street, Boston, $10,000; Simon Hilde & Leather Exchange, $10,000; Tennessee Legislature, $5,000; Evansville, Ind., $10,000.

The foregoing are but specimens of the fruits of that practical sympathy which found its expression in generous works of mercy. From every quarter of America and of the world came the needed aid, the receipts for the first three months being $4,200,000.

Among the munificent offerings from foreign countries, the Common Council of London unanimously voted 1,000 guineas, accompanying the gift with resolutions of sympathy. Contributions from private citizens, aggregating £7,000, were also received. Baring, Morgan, Rothschild, Brown, Shapley & Co., of London, the Great Western Railroad, of Canada, and the Grand..."
Trunk Railroad, subscribed £1,000 each. The Liverpool Chamber of Commerce voted £5,000, and the American Chamber contributed $14,000. Mass meetings, to secure further aid, were held all over England. A meeting to organize relief was promptly and unanimously called by the Edinburgh Chamber of Commerce. At Berlin, a subscription list for the relief fund was opened, being headed by the Chief of Police; and the leading banks and merchants of Frankfurt-on-the-Main took an active interest in securing subscriptions.

As already intimated, very few hoped to realize any substantial return from policies of insurance. Business foresight early perceived that many companies must succumb to the unparalleled drain upon their resources; and even the most sanguine anticipated the payment of but a small proportion of the amount guaranteed by the policies. The bankruptcy of the Chicago companies was conceded by common consent, and comparatively few were found who hoped that the other companies would not repudiate their indebtedness. Before three days had expired, however, re-assuring messages were received from foreign companies, stating that losses would be paid in full. Time demonstrated the falsity of many of these promises, but their effect was to keep up the courage of many, who would otherwise have been utterly disheartened.

The following extracts from the inaugural message of Hon. Joseph Medill, the first mayor of the city subsequent to the conflagration, show the result of the great fire upon the interests of the municipality:

"Of the total property in Chicago created by labor and capital, existing on the 8th of October, more than half perished on the 9th. The money value of the property thus suddenly annihilated, it is impossible accurately to ascertain, but it can hardly fall short of $515,000,000, a comparatively small part of which will be re-insured by the insurance companies. Such a tremendous loss can not befall the people at large without seriously affecting their municipal affairs. The city as a corporation has lost its property and income, precisely as have individuals in the aggregate. The municipal government has no income except what it derives from the citizens of Chicago in the form of taxes, licenses and rentals, or obtains on their credit. To the extent that their property and business are diminished by the terrible misfortune that has befallen them, so will the recovery of the city be diminished; as our citizens are now arranging as to meet the exigencies and keep within their means, so must the municipal government do likewise."

"Heavily as the blow has been that has struck us, I am not discourage of the city by its municipal losses, like that of the citizens, will soon be repaired, and by judicious management of our city affairs, the people will soon recover from their losses, and thus be able in a short time to bear the burden of taxation, without oppression."

"Shall proceed to state, in brief form, the present fiscal condition of the city, as I gather it from official sources:

- Bonded debt, December 1871: $14,103,000
- Less bonds held in the sinking fund: $577,000
- Outstanding bonds: $13,526,000
- This debt is composed of the following items:
  - Funded debt—old issues: $3,142,000
  - Funded debt—new issues: 2,102,500
  - School bonds: 1,139,000
  - School construction bonds: 53,000
  - Sewage bonds: 2,680,000
  - River improvement bonds: 2,560,000
  - Water bonds: 4,820,000
- In addition to the bonded debt, it is officially reported to me that there is a floating debt consisting of:
  - Certificates of indebtedness: 135,797
  - Unsettled claims for deepening navigation: 253,000
  - Current expenses for November, about: 250,000
  - Tunnel balance and other items: 45,000
- Total, about: $686,797
- The comptroller estimates the general expenses for the remainder of the fiscal year at $1,141,000.
- This stands to the credit of various special funds the following unexpended balances:
  - Water fund, from sale of bonds: $877,262
  - School building, from sale of bonds: 146,152
  - Special assessment collected: 45,451
  - Reform school fund: 30,000
- Total: $1,556,338

"From these funds the city government has temporarily drawn for payment of current expenses, to be replaced when needed: $1,141,186"

Balance on hand, December 1871: $472,152"

After estimating the loss of the municipality through the destruction of its buildings, machinery, furniture, etc., at $2,509,180, a figure subsequently found to be below the actual amount—the Mayor resumes:

"But the destruction of this property is not the only loss suffered by the corporation. The burning of records, vouchers, books, papers, tax warrants, assessment rolls, etc., will necessarily occasion much loss, confusion, and embarrassment to the city government. But it is believed that a large part of the apparent loss of official knowledge and data can be supplied from other sources. Still, the pecuniary losses to the city will be considerable, and the exercise of delinquent taxes and special assessments, the evidence of delinquent taxes and special assessments."

"What lesson should this cruel visitation teach us? Shall we regard it as one of fortuitous occurrence, which only happens at long intervals and is beyond human foresight and control? Such a conclusion constitutes our great future danger. A blind, unreasonable inclination in favor of pine for outside walls, and pine covered with paper and tar for roofs, has possessed many of our people. * * * * * If we re-build the city with this dangerous material, we have a moral certainty, at no distant day, of a recurrence of the late catastrophe. * * * * * Can there be any doubt as to our duty in view of these considerations and conditions? It seems to me it is obvious and imperative. The outside walls of every building hereafter erected within the limits of Chicago should be composed of materials as combustible as brick, stone, iron, concrete or slate."

"The fire limits, in my opinion, should be made co-extensive with the boundaries of the city, and when the latter are extended, so should be the former. There is no line that can be drawn with safety within these limits. I recommend that your honorable body proceed to frame and perfect a fire ordinance that will give security and permanence to the future city."

The city's future safety demands a better and more reliable supply of water for the extinguishment of fires than is afforded by the existing system. This fact was painfully demonstrated in the late calamity. When the pumping works succumbed, not a gallon of water could be poured on the fire. The public were then compelled to fight the fire, and hundreds, perhaps thousands, of houses perished in consequence thereof. The city should not be left wholly dependent on these machines, but be prepared to meet any contingency in addition to that which disabled them."

Some of the suggestions contained in the message of Mayor Medill were in harmony with those made by Colonel D. C. Houston, of the U. S. Engineer Corps, under date of October 13, 1871:

"The points which seem to me to be considered at this time and be fully provided for, are:

1. The laying out of certain lines for steam communication from the center of business to the suburbs, to be so arranged as not to obstruct the street travel or be obstructed by it. This most essential element of a modern metropolis can never be secured or arranged for so well as at present.

2. The arrangement of commercial and central depots for the great lines of railways entering the city.

3. A commodious levee along the river for public docks, a grand market and a grand plaza, where all can go without paying tribute. Instead of having buildings built close down to the river bank, let there be an open space on each side of the river devoted to the above purposes.

4. The great leading lines of business should be consolidated or concentrated on certain streets near the north and south limits of the city. There should be a financial center, a dry-goods center, a hardware center, etc.

5. A public square for open meetings and out-door business."

"These suggestions are heretofore thrown out, but they should be considered, and a committee representing all interests should be appointed to draw up a scheme by which these desirable results can be secured."
REBUILDING OF CHICAGO.

OBSTACLES ENCOUNTERED.

REMOVAL OF THE DÉBRIS.—A circumstance deserving special mention in connection with the city's rehabilitation is the removal of the débris. Large as were the city's teeming facilities—which were reinforced by farmers who, through a circuit of one hundred and fifty miles, sought Chicago with a view to profitable employment, they proved inadequate to the demands upon them. The common price paid for a teamster and wagon averaged six dollars a day, and citizens were not wanting who doubled this rate in consideration of prompt and careful service. A striking illustration of the greed displayed by some of the contractors engaged in clearing away the ruins is afforded in the experience of Potter Palmer. He wished to remove the débris from the site of the building occupied by Messrs. Field & Leiter. The lowest offer he received was $5,000. Rather than submit to such extortion—the price at any ordinary time would not have exceeded $1,000—he did the work himself.

A convenient dumping place for the rubbish taken from ruins was afforded by the basin formed on the lake shore, between the outlying track and breakwater of the Illinois Central Railroad. What would have been the increase in expense had no such place been at hand, it is impossible to estimate. At the same time the deposit there of the vast amount of rubbish, absolutely worthless in itself, made land for the city at the rate of $1,000 a day.

Even before the flames had expended their fury, the mercantile community of Chicago gave proof of the energy that no fire could destroy, in seeking for new locations. No situation available for business was left unoccupied, and merchants congratulated themselves upon obtaining places which, but a few months before, would have been refused with disdain. The ruins were covered with notices of removal to temporary quarters. Some of these were bare business announcements; others apparently sought to show, by humorous features, that the writers believed in the efficacy of laughter as an antidote to distress.

DIFFICULTY OF ESTABLISHING TITLES TO REAL ESTATE.—In the Court House had been stored the legal evidences of title to every square foot of real estate, not only in Chicago, but in all Cook County. Money could not be borrowed on mortgage by those who could not show a title, and real-estate owners hesitated before erecting buildings on land from which they might ultimately be ejected. The people looked for relief to the Legislature; not until late in the succeeding winter, however, was any measure of relief adopted, and even then the statute enacted met the emergency only in part. To a very considerable extent, individual owners were compelled to validate their titles by steps satisfactory to a court of equity. Still, the actual delay resulting from this cause fell so far short of what had been dreaded, that at this interval of time it is difficult to realize how grave the situation then appeared.

LENGTH AND SEVERITY OF THE WINTER.—The first frosts appeared before the ashes had cooled, and the ground remained frozen until spring was far advanced. At first it was supposed that no permanent building could be commenced until the return of warmer days; but massive structures began at once to rise, and the work steadily progressed throughout the entire winter.

The Strike of the Trade Unions.—Early in the season, a suspension of work was threatened by these organizations until higher wages were paid, although the price of labor had already materially advanced. The effect of these threats was to awaken apprehension in the public mind, but they came to little, owing to the vast influx of labor, both skilled and manual, drawn by the emergency from all quarters of America as well as from Europe.

HIGH PRICE OF BUILDING MATERIAL.—Brick and lumber bounded upward. A maximum price for the latter commodity was fixed, by common accord of the dealers, at a reasonably low figure. The lumbermen's example, however, was not followed by the brickmen, whether through indisposition or inability does not appear. The prices of building material during the winter ruled high, yet fell somewhat before spring opened. An attempt was made to secure legislation from Congress looking to the relief of the Chicago sufferers. That body was asked to enact a law, authorizing the refunding of all duties paid on imported building material used in re-building the burned district within a specified time. A precedent had been afforded in the case of the re-building of Portland, Maine, in 1866. When the measure was first proposed, it encountered no serious objection; but before the bill was taken up for action, the enthusiasm of sympathy had cooled, and an opposition, headed by the lumber interest, had been formed. A long and bitter fight over the passage of the bill ensued, resulting in its enactment, with the rebate clause relating to lumber stricken out. Chicago derived but little benefit from its enactment, owing to the dilatoriness of the Treasury Department in adopting rules to give it efficacy. Many difficulties were interposed, and not a little bitter feeling toward the Secretary of the Treasury was engendered by what was believed to indicate a disposition on his part to defeat the object of the Act.

BUILDING COMMENCED.—Temporary buildings for business purposes sprang up at once in every portion of the burned district; while at the same time shanties were being put up with equal celerity in the North Division. Many of these were the outgrowth of the work of relief, which largely assumed the form of aid extended to poor men toward putting up some shelter for their families. It should be noted here, that in the statements made regarding the number of buildings erected in the city during the first year following the conflagration, no account has been presented of these temporary shanties, which were put up without permits from the Board of Public Works. Neither has account been taken of the innumerable cottages built on the North Side between the North Branch and Clark Street, most of which were built either before the establishment of the fire limits, or in open defiance of the ordinance which fixed them.

An idea of the rapidity with which permanent buildings were commenced and completed may be formed from the fact that, within six weeks after the fire, two hundred and twelve permanent stone and brick buildings were in course of erection in the South Division alone, their total street frontage extending 17,715 feet, or three and one-half miles. Before December 1, two hundred and fifty building permits had been issued by the Board of Public Works, and between December 1, 1871, and October 1, 1872, the number of permits issued was twelve hundred and fifty, classified as follows:

| As to material: | Frame (exclusive of temporary structures) | 65 |
| Brick | 965 |
| Iron | 20 |
| Stone | 200 |

As to height:

| One story | 254 |
| Two story | 378 |
The total frontage of these buildings was 43,413 feet—or eight miles. This aggregate includes, in the case of corner buildings, only the frontage on the main street. The reason for the large preponderance of brick buildings is to be found in the difficulty in obtaining stone, consequent upon the delay in quarrying and cutting.

Below is given the grand totals of the first year’s work. It will be seen that Clark and State streets lead in the amount of frontage re-built; the River, Dearborn and Madison streets in the proportion of frontage re-built to the territory burned over; and Randolph and Monroe streets in the value of buildings erected.

### NORTH AND WEST DIVISIONS

| Total frontage of prominent buildings erected in the North Division | 7,691 feet |
| Total cost of all kinds of buildings erected in the North Division | $6,425,000 |
| Total frontage of prominent buildings erected in the West Division | $81 feet |
| Total cost of all kinds of buildings erected in the West Division | $998,500 |

**Total cost of buildings erected in the whole burned district:** $45,555,200

On November 23, 1871, the fire limits were fixed, by ordinance of the Common Council; within the boundaries established, wooden buildings were absolutely prohibited, and elaborate details were given for the interior construction of large buildings, with a view to safety. A negligence, almost criminal, however, characterized the conduct of the municipal authorities, respecting the interior of "fire-proof" buildings. It was not uncommon to see a building, supposed to be of this class, surmounted by a Mansard roof, as inflammable as a pile of kindling-wood. On the whole, however, the business portion of the city was re-built in a manner which rendered it as secure against fire as that of any American city.

Some remarks may be here made respecting the character of the material employed in the first re-building. Much of the brick used can hardly be said to have been unexceptionable, owing to a superabundance of lime in its composition. Of course, the Philadelphia brick was not open to this criticism, but its cost was too high to admit of its coming into general use. Iron fronts were unpopular after the fire, in a community which had seen them warp and twist, although pillars of this material, running up one story, were common enough. Little granite was used. Limestone and sandstone were favorite materials. At an early stage of the city’s restoration, no small prejudice was felt against the former, because of its crumbling during the conflagration. The truth is, however, that no description of material could endure a heat sufficient to fuse metals insusceptible at a lower temperature than 3,000 degrees. The term "fire-proof," like all other terms of description, is relative in its application; any of the three varieties of stone named would pass safely through an ordinary fire; no stone yet quartered could withstand the intolerable heat of a city in flames. Of all the buildings exposed to the fire, those which suffered least were the Custom House, the Court House, the Nixon and National Bank buildings—all limestone structures. Seven quarries were taxed to the utmost in furnishing stone to Chicago during the year following the fire. Of these, three were in Ohio, all sandstone; one in Michigan, also sandstone; and three in Illinois, one of which was sandstone and the other two limestone. The price per foot ranged from sixty-five cents to $1.10; the color varied between white, gray, blueish-brown, reddish-brown and cream.

A departure from ordinarily accepted architectural principles was inaugurated by Messrs. J. V. Farwell & Co., who constructed the walls of their store from brick. The walls were erected between frames of lumber. The interstices were filled with fragments of brick, broken stone, etc., and the cement—in a liquid state—poured into the frame. As it cooled, it formed a solid and substantial wall, assuming the ornamental forms carved in the planks forming the frame.

The first step taken toward permanent reconstruction was the re-building of the bridges and viaducts, the money for which was received from the State. Eleven days after the fire, the Legislature, with a view to relieving Chicago’s distress, appropriated $3,955,340, with interest until paid, to refund the amount expended in canal improvement. In order legally to justify such appropriation, the State assumed complete control of the canal, by virtue of reserved power. The Act appropriating this sum, provided that less than one-fifth nor more than one-third of the entire sum should be applied by the municipality to the re-building of bridges and other structures of a public character, while the remainder should be devoted to the payment of interest on the city’s bonded debt, and the maintenance of the police and fire departments. Great as was the direct benefit resulting from this action of the Legislature, the indirect advantages resulting therefrom, in nerveing and stimulating the general public, were even greater. Repairs were at once undertaken on the eight bridges and three viaducts which the flames had rendered impassable, and within a year all were completed.

The viaducts were located at State, Clark and Wells streets; and the bridges at Rush, State, Clark and Wells streets, Chicago Avenue, Adams, Van Buren and Polk streets.

From October 9, 1871, to January 22, 1872, the LaSalle-street tunnel furnished the only direct means of communication between the North and South divisions.
of the city; fortunately that thoroughfare was but little damaged.

Twenty-eight and one-half miles of street pavement were exposed to the fire, and the damage done them has been estimated at about seventeen per cent. of their original cost, or $211,350. A noteworthy circumstance in this connection is that the wooden blocks of Nicholson pavement showed unsuspected fire-proof qualities, second only to those of vulcanite. The following short table shows the linear feet of pavement destroyed, with its estimated value:

<table>
<thead>
<tr>
<th>Pavement Type</th>

</tbody>
</table>

The most expensive work of repair undertaken by the city authorities was the reconstruction of the Water Works. The actual and direct outlay for repairs was, in round numbers, $100,000, exclusive of damage done to the North and South Side reservoirs, which may be set down at $20,000. Other losses may be fairly estimated as follows:

<table>
<thead>

<td>Total</td>
<td>$31,000</td>
</tr>
</tbody>
</table>

In addition, should be considered, the increase of $97,410 in the water expense of the city, owing to the immense waste of water through the service pipes, from which no revenue was derived. If all these items be added, the total cost of repairing the Water Works may be set down at $248,410. The work was done in a thorough manner, and an iron roof was substituted for the old inflammable covering. In addition, the building of a new lake tunnel, of much larger capacity than the old one, was at once commenced.

The direct outlay for buildings put up for municipal purposes was mainly for the erection of the temporary court house (familiarly known as "the old Rookery").

The number of churches in Chicago before the fire was, in round numbers, one hundred and sixty-five, of which thirty-nine were burned, the loss being estimated at between two and a half and three millions of dollars. Those on the North Side were, as a rule, re-built on their former sites. On the South Side, the general tendency was to move farther south. Two magnificent churches in the latter division that were unharmed—the Methodist Church, on the corner of Wabash Avenue and Harrison Street, and the Church of the Messiah (Unitarian), of which Rev. Robert Laird Collier was pastor—passed into secular service. The former was, subsequent to the fire, rented by the General Government to be used as a post office. The Church of the Messiah was used after the fire for mercantile purposes.

In the progress of the city's re-building, the business area was largely increased. In the permanent location of merchants, a new departure was made in the grouping of houses engaged in certain lines of trade around common centers. The wholesale dry-goods interest selected as a territory the locality around the intersection of Market with Monroe and Madison streets, their choice being, no doubt, influenced by the erection of J. V. Farwell and Company's building, and the removal of the wholesale department of Field & Leiter to the corner last named.

In the West Division,—near the locality where the fire originated,—Canal Street, for more than a mile, had been abandoned to rookeries of the most miserable description. These were re-placed by manufactories and business houses of a generally heavy character. The selection of locality proved to be a wise one, and, during the ensuing fifteen years, the number of factories has steadily increased. On the South Side, the business area was enlarged fully one-third.

As a rule the owners of buildings noted for magnificence and beauty before the fire sought to replace them by edifices constructed on a larger and grander scale. LaSalle Street had been famed for its magnificent office-buildings, and after the conflagration croaking prophets were not wanting who declared that Chicago would not "look upon its like again"; but the same thoroughfare, re-built, far surpassed the old in grandeur. The new Chamber of Commerce was a finer structure, in every respect, than was the old, and the buildings erected for the conduct of banking and insurance business proportionately excelled their predecessors. The improvement in hotel buildings was much greater in extent. Even at the Stock Yards was built a hostelry which, in point of capacity, surpassed the old Sherman and Tremont houses. The demand for hotel accommodation, however, increased in a ratio even greater than that of the city's population. It may be doubted whether any city in the country (certainly no inland city) daily harbors so large a transient population as Chicago.

Having briefly outlined the material re-building of the city, it remains to note the resumption of business; and, in this connection, it may be remarked that the same obstacles which militated against the actual re-building of the city encountered our merchants in their efforts to restore Chicago to her former position as a commercial center.

Those who could not find locations which they were willing to occupy, had to accept the inevitable of "shanty" life, and old Argonauts of '49, who viewed the city's first effort at revivification, said that Chicago presented a resemblance to a mining town; but the broken bricks, the curiously-twisted iron beams, and the scorched, split trees were adjuncts to the Chicago "shanties" which were wanting in the camps of the frontier.

The first business structure erected on the ruins of former greatness was that put up by W. D. Kerfoot, the well known real-estate agent and operator. He lost all his worldly possessions of a pecuniary sort on October 9. On the morning of October 10, he repaired to the locality where he had formerly conducted business, on Washington, between Dearborn and Clark streets, and with the assistance of his clerk and his clerk's father, had, before noon, erected a twelve by sixteen shanty of boards, and was ready to resume business.Surmounting the structure was a board bearing the words, "Kerfoot's Block," and on the building a sign, "W. D. Kerfoot. Everything gone but wife, children, and energy." The ruined walls around were too hot to permit the building of the shanty within the line of the sidewalk, and it was put up a few feet from the pavement, in the middle of the street. Here it stood until October 19, when the ruins around having sufficiently cooled, the Board of Public Works required Mr. Kerfoot to move his "business block" back, within the street line. He
continued to do business here until the following June, when he removed to permanent quarters. The enterprise and pluck displayed in the erection of the board office did not a little toward reviving courage and dropping spirits. The comical features of the situation appealed to the humorous sense of the passers-by, and their attention was for a time diverted from their own losses and misfortunes. The office soon became a "halfway house" between the South and West Divisions, and a sort of general headquarters. In front of the building was placed a long board, covered with notices of removals, etc.—a sort of extemporized city directory—and this circumstance, added to the general character of the place, made Mr. Kerfoot's office a general "Bureau of Information." Hackmen, seeking to learn the address of the person at whose residence or place of business they should leave a passenger, drove by the building to get information which might be more easily obtained there than elsewhere.

Business was resumed within twenty days after the fire. A temporary habitait was afforded to many merchants along the Lake Front. Under the existing laws, the Lake Front could be used for no other than park purposes. The Board of Public Works, however, deemed itself justified by the exigency in converting this ground, temporarily, to business purposes, and accordingly executed ground-leases to merchants for one year, with a proviso that at the expiration of that period the buildings should be removed; the annual rental being fixed at $500 for every twenty-five feet of frontage. As a result of the adoption of this policy, a long row of business houses (mainly wholesale) reared their pine fronts along Michigan avenue. From Park Row on the south to Randolph Street on the north, a distance of one mile, nearly the entire east frontage was lined with rude structures, mostly one story, all frame, and frequently of great depth.

Another consideration which preyed upon the minds of business men during those days was, Even if locations could be obtained, whence were to come the goods? The answer arrived in the form of hundreds of telegrams from Eastern creditors to the leading merchants of the city; telegrams received in the first dark hours of distress and doubt, before the extent to which the calamity might affect them was fully known. These telegrams assumed that the sufferers would commence anew, and attested the senders' faith in their ability and probity. The general tenor of the dispatches was: "We suppose you are burned out; order what goods you need, and pay when you can; we want your trade." No doubt an element of business sagacity was discernible in such messages, but their effect was to re-assure and reanimate those who might have been pardoned for giving way to despondency.

ARCHITECTURE.

It has been said—not without reason—by a writer of a period some three years subsequent to the great fire, that that catastrophe constituted an episode rather than a crisis in the city's history. If tangible evidence in support of this assertion were needed, it would be possible to furnish it, in statistical form, by reference to the figures which record the astounding progress made in re-building the burned district within the year following the fire. As has been already said, of the entire frontage of buildings destroyed in the South Division, the first year's work showed 52,792 feet re-built and 58,252 feet vacant; in the North Division, the frontage re-built was 7,691 feet; and in the West Division, 891 feet; the aggregate frontage re-built in the three divisions being 61,374 feet. It must be borne in mind that this statement applies only to permanent buildings, which were chiefly of brick or stone.

The general character of these structures was creditable. Many of them comprised solid walls, of great
It has been said that a great reason by a writer in the period some years ago subsequent to the great fire, that caused great destruction in an episode rather than a crisis in the city, was the credible evidence of support of the charter at the time was needed. It would be possible to furnish the statistics from the reference to figures which would the unbelievable progress made in building the burned district within the year following the fire. As has been already said, of the entire estate of buildings destroyed in the South Division, 87 years were devoted to rebuild and present 374 feet of brick and stone. In the West Division, 87 feet were built in the three divisions, 374 feet. It must be borne in mind that these figures applied to permanent buildings, a supply of brick or stone. entire character of these structures was creditable. Of them comprised solid walls, of great
RE-BUILDING OF CHICAGO.

width, resting upon stable and broad foundations. Some resembled fortresses more closely than commercial structures; their vaults incased in several feet of masonry—and covered with railroad iron—and composed, from foundation to turret, of material which had already absorbed all the oxygen it could contain, centuries before it entered into the composition of Chicago walls. It must be admitted, however, that in the erection of not a few buildings the dominating considerations were haste and expediency. The business interests of the city demanded more roomy and better arranged quarters than were afforded by the temporary shanties in which merchants first found a local habitation.

Architects found their resources taxed to the utmost to prepare plans, and in many cases, so eager was the desire to build, the interval of time between the matur- ing and the execution of the plans was inappreciable. A noticeable illustration is furnished by the Grand Pacific Hotel, the re-building of which was commenced even before the plans had been completed. To this spirit of eagerness (not, perhaps, unmixed with that of emulation) may be attributed the erection of many structures, even in the business center of the city, of a character—architecturally speaking—which were dis- creditable alike to the owners who erected them and the municipal authorities who tolerated them. Some of these buildings, owing to the illustrations of the short-sighted policy which was responsible for their construction.

Stories are current to the effect that minor details of plans were not infrequently conceived by builders destitute of scientific knowledge or skill, who submitted them to the architects in charge of work, to receive an approval scarcely justified even by the necessities of the emergency, which, however, allowed little time for examination, study or improvement. For this reason, the architecture of the city, during the twelve months immediately succeeding the fire, showed little substantial advance over that of ante-fire days, except as regards the material used and the thickness of the walls. After the subsidence of the strong—though temporary—pressure brought to bear upon the architects, during the first year following the conflagration, they were able to devote more time and attention to their work, the substantial proofs of which may be seen in the massive and beautiful structures which now adorn our public thoroughfares.

Among the more noteworthy buildings erected during this era may be named

The Chamber of Commerce (completed before, and occupied on, the first anniversary of the fire), the cost of which was, in round numbers $366,000.
The Sherman House, cost $650,000.
The Passenger Depot of Lake Shore & Michigan Southern and Chicago & Rock Island Railways, cost $750,000.
The Grand Pacific Hotel, cost $1,000,000.
The Palmer House, cost $1,500,000.

In addition to these, some seventy-three others, the average cost of which was $100,000 each, were commenced during the first year after the fire, although not all were completed before the expiration of that period.

The building activity which characterized the year 1872, continued throughout 1873. The prices of building materials and labor were high, but capitalists, recognizing the desirable opportunity offered for investment, did not hesitate to advance means for the prosecution of the work. During that year was commenced the reconstruction of the public buildings, the Post Office and Custom House and the Criminal Court-house and County Jail (the two structures last named being connected). Among the most prominent edifices completed during that year were the following, all erected within the district lying between Michigan Avenue and Franklin Street, on the east and west, and Lake and Adams streets, on the north and south: The Emperor Block; the Lakeside Building (a notable example of the Gothic revival); the Times Building (one of the most complete structures of its class yet erected on the continent); the Matteson House; the Busby and Stuart Building (occupying the site of the old Crosby Opera-house); the St. James Hotel; and the Tremont House, the latter a building of highly ornate architectural character, whose cost was $500,000.

The comparatively narrow limits included within the boundaries above named—within which were concentrated the leading commercial houses, both jobbing and retail—soon proved too contracted. A demand for more business accommodation soon sprang up and steadily increased; yet the majority of tenants sought quarters in the district mentioned. As a result of this demand arose the towering structures which began to be erected toward the close of 1880.

The history of architecture in Chicago since the fire affords a striking contrast to that of the period antecedent to the conflagration; the latter is commonly recognized by the architects of the city as a new era. The flames had taught citizens the folly of employing wood as a building material, and brick and stone were substituted in the city's rehabilitation, while much attention was paid to the interior arrangement, the object being to render the "new Chicago" as nearly fire-proof as possible. Of the results of careful thought which had been devoted to this subject, tangible illustrations were afforded by the Tribune and the Times buildings, the Singer Sewing Machine Company's building, and a score of others.

Not for many years, however, did any proposed solution of the question, "What constitutes a fire-proof building?" find general acceptance. In this respect, as in many others, the year 1880 signalled a decided ad-
vance in application of the principles of true scientific architecture to practical building. George H. Johnson may be said to have been the originator of the present fire-proof system of Chicago. Before the fire his plans were followed in the construction of many buildings. Among these may be named the old First National Bank, the Republic Fire Insurance Company's Building, and the Nixon Building. The fact that the walls of these edifices remained standing, comparatively unharmed, aided in the popularization of his theories among a people who had begun to distrust all schemes for the erection of buildings alleged to be fire-proof.

The prevailing styles of architecture in vogue in the city's re-building, were the Italian Renaissance, and the advanced, or modern, Gothic. The influence of the former was noticeable in the very first structure undertaken after the fire, and dominated the architectural plans adopted during the next two years. Most of the prominent buildings erected during 1872 and 1873, belonged to this school, or embraced, in their design, modifications of its principles.

With the re-building of the residence portion of the burned district, became apparent a marked tendency to imitate the boulevard system of Paris, indicated in the erection of blocks of closely contiguous buildings, of the same general style and similar arrangements. Instances of that departure may be recalled by residents of both the North and South divisions of the city. As a characteristic of the architecture of this period (particularly with relation to private residences) may be mentioned diffuse ornamentation, which, in a number of instances, degenerated into vulgar—if not gaudy—display. So general did the morbid fondness for this particular species of adornment become, that there came to be recognized, among both builders and the general public, a definite "school" of architecture, familiarly known as "Chicago style." Among the buildings which might be named as marked exceptions to what may be said to have been almost a rule, was the Palmer House.

The plans for this building were, to a considerable extent, conceived, if not completed, abroad. Mr. Palmer, with a view to its erection, visited the chief cities of Europe, in company with one of the leading architects of this city. The general style of the building, both in its exterior effect and its more important features of interior arrangement, is largely the embodiment of modern French ideas, particularly in the entrelac, which is strikingly Parisian in appearance.

Architects, builders and property owners comparatively soon wearied of the Italian school. The first transition was to the style technically known as the modern Gothic. The movement for the revival of this school embraced both exterior and interior effects. Its influence was soon felt, and its results plainly apparent upon the architecture of the time. Isolated instances of the tendency multiplied in the incorporation of some of the principles of this school in the design of many buildings, the general effect being that of an amalgamation of diverse or contradictory principles, until its culmination was embodied in the American Express Building, on Monroe Street, the erection of which was followed by that of the Pike Block, adjoining the latter, and completed almost immediately afterward. The popular approval bestowed on these edifices created a marked change in both architectural thought and popular taste, and the way was paved for further innovations, which made a new era in architecture. The interest which began to be felt in this subject may be attributed to the education and improvement in taste, resultant upon the careful study and cultivated art of the architects of Chicago.

To recur to the more material aspects of the situation. The concentration of a vast and constantly growing trade in so small a compass,—and notably the growth of Chicago to its pre-eminence as a grain mart; the large number of real estate dealers and of professional men of all classes, requiring offices contiguous to the principal public buildings and to each other—had, of course, a demand for business blocks of a capacity greater than had been theretofore known. This demand was met by Chicago architects with a readiness, and in a manner, which has resulted in the erection, in this city, of a series of imposing office structures, equaled in few cities of the world. During the period immediately following the panic of 1873, there was, comparatively, a cessation of building; nor was it actively resumed until 1880. The first buildings to rise after the recovery from this partial prostration were the Grannis and the Borden blocks, and these were soon followed by scores of others. In the erection of these structures the old methods were discarded; that is to say, that highly ornate buildings—thinnly veneered with stone—were supplanted by simpler, yet more stately and more honest, designs, in brick; which material theretofore became, and has since continued, the favorite for all buildings designed for business uses.

The year following witnessed the erection of the general offices of the Chicago, Burlington & Quincy Railway Company, the First National Bank and the Montauk Block. During the next two years rose the Calumet Building, the Pullman Building (constructed after plans drawn by S. S. Beman, of which the originality of design and beauty of construction have made it famous), the Maller's, Gaff, Insurance Exchange, the
Royal Insurance (Quincy Street), the Home Insurance
(one of the city’s “lions”) and Traders’ buildings. All these
followed the same general plan of architecture.
A simplicity of design, almost severe, was united with
great solidity of construction, and the admission of light
and air formed a prominent feature in the drafting of
the plans, and an efficient elevator service, as safe as
scientific skill could render it, was provided in all.
A noticeable feature in the construction of all the
buildings, above named, is the sacrifice of space to light.
For instance: In the general office-building of the Chi-
cago, Burlington & Quincy Railway Company is an
inclosed court, sixty feet square, surrounded by galleries
on which the various offices are situated; the same plan,
in its salient features, was adopted in the erection of the
First National Bank Building. Care has been taken in
the erection of all, that no exposed surface shall be un-
protected by a thick covering of fire-clay. The great
fire conclusively demonstrated the fallacy of the theory
that iron was a fire-proof material. Its value, as regards
compactness and strength is still conceded, and it is com-
monly used as a material for columns, floor-beams and
girders, but always inclosed, as already said, in a coat-
ing of fire-clay (previously moulded in roller forms),
ever less than two inches in thickness, over which is
applied the finished plaster, or cement. That the new
theory is an advance over the old is self-evident; that
its application results in a construction absolutely fire-
proof can not be asserted in view of the burning of the
interior of Grannis Block in the winter of 1885.
The same general principles of construction were
followed in the erection of the Rialto, Phencix and
Monadnock buildings, which also present a general simi-
larity in matters of detail. The style of architecture
adopted in the exteriors nearly follows that known as
the Romanesque or Round-arch Gothic, the first note-
worthy departure from the principles of the modern
Gothic school, which had, for some years, ruled su-
preme. Many, if not most, of the city’s leading archi-
tects believe that this change will be measurably per-
manent, or, in other words, that the style followed in the
buildings now being erected will prevail for many years,
so far, at least, as buildings for commercial purposes are
concerned.
Probably the structure which, of all erected in Chi-
cago since 1871, may most safely challenge inspection,
and, measurably, defy competition, is that known as
“the new Board of Trade Building,” on Jackson Street,
completed in 1885. The removal of the Chamber of
Commerce to this locality, at once prompted—even if it
did not necessitate—the erection of a large number of
office-buildings in its immediate vicinity, some of
which have been already named. Not far from it, on
Adams Street, stands the unique Moorish structure, five
stories in height, owned and occupied as a restaurant
almost palatial in its appointments, by H. M. Kinsley,
the well-known caterer; while on Michigan Avenue has
been built, for H. V. Benis, the magnificent Hotel
Richelieu. The immense structure to be erected by
Marshall Field & Co., on the corner of Adams and La-
Salle streets, to be used as a wholesale warehouse, is to
be of Long Meadow (Mass.) stone, and will cover a site
325 by 180 feet. The building will be eight stories in
height, and in its main features will conform to the pre-
vailing architectural style. Its (estimated) cost will be
$600,000.
The churches of Chicago, even before the fire, were famous throughout the country, and the city vied with Brooklyn in meriting the sobriquet of the City of Churches. The work of re-building was not long delayed, and the new structures surpass the old in both number and beauty. In their building, no marked deviation from the generally received principles of ecclesiastical architecture is noticeable; the Norman-Gothic and pure Gothic schools predominating. Among the edifices erected that are deserving of special mention, because of eminence in beauty, both of interior and exterior, may be cited the Catholic cathedral of the Holy Name, St. James's and the Epiphany Episcopal churches, the First and Third Presbyterian, the Plymouth and New England Congregational, the First and Immanuel Baptist and Unity (Unitarian) churches. A full description of the re-building of the various sanctuaries that were destroyed, and the erection of the more prominent new ones required by the constantly augmenting population, will be found in the chapter on Religious History. Of the present churches in the city, and of the spirit which has prompted their construction, it may be said that while the city can boast of no temple comparable to "old Trinity" or the Stewart cathedral, in New York, it is only a question of time when the great church buildings of Chicago will rival in grandeur and beauty those of any metropolitan city on the American continent.

To illustrate the growth of this description of building in Chicago, it is only necessary to refer to the accompanying table, an examination of which shows that since 1878 twenty-five churches have been erected, of which no less than fourteen, were built in 1883.

No sketch of the architecture of Chicago—even though as brief as the present—would be complete which failed to contain some mention of the great advance noticeable in the style of building in the residence portions of the city since the great fire. To adorn the homes of the merchant princes of the capital of the Northwest, have been devoted the best efforts of architects of renown and decorators of national reputation. The truth of the old adage, "many men, many minds," has found here a new illustration in a diversity of style, resulting in a vast variety of pleasing effects. Nor, in many quarters of the city, which may, perhaps, be denominated as most exclusive, is the beauty of the effect destroyed by the building of the houses in contiguous blocks, unrelieved by any surroundings not of a purely artificial character. Not a few are surrounded by grounds which, in view of the city's extent, may be fairly called spacious; and in this respect Chicago surpasses every city of equal size in the United States. Scores of illustrative examples might be mentioned, but neither space nor any fair principle of discrimination will permit.

In this connection, the following statistical statement of building done prior to 1871, and which has been compiled from such sources as were available, is of interest:

*The cause of the decrease in the building operations of this year is to be found in the eighth hour strike, which occurred in May, and caused many to defer or abandon a previously formed intention to build that year.*

In summing up the foregoing brief review of the building done, and the architectural advance and changes worthy of note, in Chicago's history since the catastrophe of 1871, it may be remarked, that this period has witnessed the erection of nearly all the city's prominent public buildings, which alone represent an expenditure aggregating, in round numbers, $87,000,000; that during these fifteen years the whole of the present business portion of Chicago has been re-built; while almost countless private residences—some of them of rare beauty and even magnificence—have been raised.

The following are given the personal sketches of some of the gentlemen whose ability as architects has been exercised in the building and re-building of Chicago.

### ARCHITECTS.

THEODORE VIGO WADSWORTH was born on the island of St. Croix, Danish West Indies, on May 27, 1827. The first ten years of his life were spent with his parents on a sugar plantation, and he was then sent to Copenhagen, Denmark, to be educated. After a course of instruction under private tutors, he entered the Royal Academy of Fine Arts, from which he graduated with high honors. He returned to his native land with the intention of practicing his profession; but, upon his arrival at St. Croix, he found the agitation of a South American revolution had so unsettled business affairs that he decided to come to this country, and landed at New York on April 10, 1830. He had letters to various prominent persons of that city, but soon became dissatisfied and went to Philadelphia, where resided relatives of his father, among whom was the then resident minister of Denmark, Steen Anderson DeBille. After devoting seven years to his business in Philadelphia, he concluded the West offered a wider field to a young man in his profession. He decided upon Chicago as having the best future of all western points, and since March, 1837, has been identified with its interests. Chicago, at that early day, was far from attractive, but after casting his lot with her citizens, he began to imbibe somewhat of their spirit, and after the first panic of 1837, he was instrumental in building up our great city, by designing many of its churches, business blocks, and residences. He was one of the thousands who lost everything in the fire of 1871; but with undaunted energy again speciallyusted
went to England and Scotland, where he spent some time in profes-
sional employment. At the end of the year, he returned to Chicago
in the fall of 1871, upon the suggestion of the above-named gentle-
man, he came to this country, and located in Chicago. During
his residence here, he has been most actively engaged in architectural
work, in which he has been connected with the design and build-
ning of scores of smaller buildings—stores, residences and churches.
Mr. Hallberg has always been prominently identified with the archi-
teecture of the city, and has been very much interested in matters
relating to Mormon and water supply. Mr. Hallberg was mar-
ried, on October 27, 1881, to Miss Florence, daughter of the late
H. W. Estey, who was a pioneer and wealthy resident. Mrs. Hall-
berg is a member of the literary and musical organizations, and is
prominent in the art and social circles of the city. Their only daugh-
ter is named Margaret Leitz. Mr. and Mrs. Hallberg are members
of Professor Swing's church.

John M. Van Osdel, 2d, was born in New York City, on Jan-
uary 13, 1837, and is a son of William C. and Harriet Van Osdel.
His parents removed to Chicago in 1839, and resided here for seven
years. They then removed to Naperville, Aurora, and Dixon, re-
maining in each place several years. The son, John, was educated
in the common schools, and after finishing his studies, worked at
the carpenter trade with his father, who was a builder and con-
tractor. In the fall of 1860, he was made a member of the regular
force of the 4th Illinois Volunteer Infantry. He was early promoted to first
sergeant, and on August 11, 1862, received his commission as first
lieutenant, the commission being made out by General Grant, as
squadron of light horse and the 1st Iowa regiment, which was de-
ferred at Pea Ridge, the first battle in which the 9th was en-
gaged. The company participated in the campaigns of the Army
of the Cumberland, and was constantly engaged in marching and
fighting, and encountered most severe battles in the War. Mr. Van Osdel
was promoted captain of Co. "K," on September 30, 1864, and received
his discharge on December 8, 1865. Although actively participat-
ing in many of the heaviest battles in the War, Captain Van Osdel
never received a wound. Upon the close of the War he came to
Chicago, and entered the office of his uncle, John M. Van Osdel,
the noted architect and old resident of Chicago. He studied
architecture and drawing, and, in 1872, was made a partner in the
business. In many of the notable buildings erected since the great
fire the name of the Van Odels is associated—the plans of the
Palmer House, Tremont House, the Oriental, Halsey and Kendell
dwellings, and the McCormick and Reaper blocks, having been
made by them. Mr. Van Osdel, 2d, was married, on February 29,
1853, to Mrs. Catharine A. Anderson, of Dixon, Ill. They have
six children living and three dead. Mr. Van Osdel is a member of the
military order of the Loyal Legion.

Smith M. Randolph was born near New Brunswick, N. J., in
1837, and was educated in the district schools there. He came
to Chicago in 1854, before he was seventeen years old, and entered
the office of his brother, Mahlon Randolph, an architect, now located
in New York City. In 1859, he left his brother's office to join a
firm of civil engineers, Mo., but after prospecting for about
eighteen months, he was compelled to abandon his business
abilities and returned to Chicago in 1860, just before the election of
Abraham Lincoln. Soon after that election he located in Dillahue, Iowa,
and in 1862 entered the War in a capacity with his brother Mahlon.
He was the first of the first companies enlisted at that time for Bissell's
Engineer Regiment of the West, Mahlon going as captain of the company
of the 1st Illinois Engineers. Mr. Randolph was made by the important
position he held as superintendent of the Dillahue Elevator Com-
pany, then handling immense quantities of grain, etc., for the army
down the river. In 1862, when the second call came for thirty
thousand men, Mr. Randolph could stay no longer at the rear, and, learning
that the Chicago Board of Trade were to equip a battery
he telegraphed to have his name put on the list, which was filled in
two hours after the time it was opened. He joined the command in a few days, and
was with this famous battery during all
of its three years of active service, remaining a private soldier until
the close of the War. During most of the time he was engaged on
staff duty, and had chances to see what was going on as well as to
fight. The Fourth Michigan Cavalry belonged in the same divi-
sion as this battery, and Mr. Randolph was thus present when the
former brought Jefferson Davis in a prisoner. Mr. Randolph was
mustered out on March 4, 1865; and as it was thought by many that Chicago had grown too fast during the
War, and would either come to a standstill or retrograde, Mr. Randolph
went to his home in Alton, Ill., where he con-
ducted business as architect until 1874, designing many of the pub-
ic and private buildings of the city and surroundings. In 1870,
Mr. Randolph was appointed by Governor McCullough as police
commissioner of the city, and served on the board. In this capacity, he
re-organized the force and conducted the department to the satisfac-
tion of the law-abiding citizens of all political parties. After
the great fire of 1871, he closed his business in St. Louis, and
returned to this city, fully determined to make it his permanent
home, and has since resided here. Mr. Randolph has identi-
fied with the Chicago of to-day. Mr. Randolph has recently com-
pleted a magnificent residence for H. H. Kohlsaat, at a cost of
about $35,000, which was made the subject of illustration and eulogism in the ""Inter-
national and Tallent House."" He is one out of the many which have been designed and built by this
gentleman, both in St. Louis and Chicago. In February, 1870, he mar-
rried Miss Hattie E. Johnson, of St. Louis, whose maiden name was
Calkins, who died in 1881, at the age of ten years. In October, 1881, he was married to Mrs. Hattie W.
Smith, and has one son.—Paul Randolph.

William Swing was born in Cassel, Germany, on Sep-
tember 28, 1842. After a preparatory training in the schools of
his native village, he entered the University at the age of sixteen.
His studies in the University were directed to technology. On
graduation from the last named institution, at seventeen years of
age, he went to Marburg, where he pursued a course of philosophi-
cal study. His father, Fred, K. Strippelman, was prominently
identified with architecture and civil engineering in Germany, and
his oldest brother, Theodore, is a prominent civil engineer in the
employ of the Koenumian, Austrian, and French governments,
in Silesia. His family is French in origin, but has been identified
by many of the latest scientific researches for one hundred years.
When Mr. Strippelman was in his twentieth year, he came to Amer-
ica and located himself at Nashville, Tenn., where he became
draftsman to the Army of the Cumberland, under General Pea-
form, which posting bore upon him so many heroical service.
At that time, his intention was to go to South America, and he went to
New York, in partial fulfillment of that design. Being detained in
that city by sickness, he abandoned his original idea, and, after re-
established himself, he went to Mobile.
start in life equal to about one dollar United States currency. But his energy, pertinacity and honesty have resulted (as they always do) in success; and now Mr. Otter, in his excellent practice, his elegant home (recently purchased), and the broad art and architecture), and his happy family, repays the benefit of those qualities engendered in himself and practically earned during his twenty-three years business experience. He married, in 1852, Miss Sophia Charlotte Larson; they have two children.—Annie Sophia and George Philip.

JULIUS H. HUBER was born at Newark, N. J., in 1822, and is the son of Henry Huber, one of the early architects of Chicago.

He was educated in the academy of his native city, and his intention, at that time, was to go to West Point and receive a military education. The choice of his brother led him to go to Europe to study for an architect; he chose the latter, and spent two years not the Technic Institute, at Munich, preparing for the profession of his choice. After he had passed a thorough examination at school, and spent some time in studying the different styles of architecture in the old country, he returned to Newark, and soon joined his father in this city, arriving in 1857. He occupied the position of draughtsman for some time, and was then taken into partnership with his father. In 1876, the partnership was dissolved, and he was engaged by the city, and continued in its employment until 1858. In 1881, he again opened an office as architect. He was married, in Lockport, Ill., in 1858, to Miss Lucy Pitts, daughter of E. J. Pitts, of that place.

FREDERICK H. WAESCHER was born at Soest, Westphalia, Prussia, in 1840, and was educated at his home, graduating at the highest order, and afterward spent six years, partly in college and partly in the study of architecture, practicing under his personal superintendents. In 1856, the American Civil War broke out, and he enlisted as a private soldier, and served until his death, when he concluded to come to America. Chicago being his destination, he arrived here in 1857, and established himself in an architect's office; but this not proving sufficiently remunerative, he concluded that the wages paid to bricklayers offered him sufficient inducement to take up this branch of business. After a few months' work, he found that he was not able to stand the heavy manual labor, and so gave it up and again resumed his position as draughtsman with O. S. Kimney, in whose office he remained for nearly three years. At the time the Franco-Prussian war opened, he again returned to Germany and entered the service of the government. He was appointed lieutenant, and was at the siege of Magdeburg, the battle of Orleans, and at Le Mans. After the war closed, he returned to Prussia, but was not content, and after six months, he concluded again to come to Chicago, and at once went into an architect's office on his arrival. He superintended the construction of the Eye and Ear Infirmary, on the West Side, and when it was completed opened an architect's office for himself, and was engaged by the managers of the Newberry estate to design and superintend the construction of their buildings. He has had charge of this work since 1875. He designed and superintended the building of Miss Grant's Seminary for Young Ladies, corner of Chestnut and Dearborn Avenue; the large building of Hon. George Saint, corner of Twenty-fifth Street and Calumet Avenue; the E. W. Blatchford factory, corner of Clinton and Pulaski streets; and many other buildings, public and private. He has always made a specialty of heavy warehouses, storage buildings and factories.

He married Miss Clotilda Mattes, at Des Moines, Iowa, in 1852.

JOHN J. FLANDERS, architect, of the Board of Education of the City of Chicago, was born in this city on June 30, 1814, his father, E. J. Flanders, having located here, in connection with early mercantile interests, in 1834. Mr. Flanders received a good literary and commercial education, and then commenced the study of his profession, in 1856, in the office of August Otter, and continued it with T. V. Wadskier, and subsequently with Edward Burling, with whom he remained for two years. He then, in 1874, opened an office on his own account, and has been actively identified with the profession since that time. He has particular attention to the erection of residences and business edifices; among which are the residences of John L. Grider, J. K. Barry, W. M. Pond and F. S. James; the Pullman building, on State Street, between Madison and Monroe streets, and near Jackson Street; J. R. mallers' officebuilding, and stores and residence, the Foss estate buildings, Jacob and Conkling's buildings, the Sugar Refining Company's building. The Malley's warehouse and store, on Quincy and LaSalle streets, was the first office-building, twelve stories high, erected in Chicago, and is admired as a monument of architectural skill and appearance. The Andrew, Ironclad, Hotel, Park, Hovey, and the school buildings erected by the Board of Education during 1854-55, are works of Mr. Flanders.

CULVER was born at Nantucket, Mass., in 1850, and educated in Boston, and, in connection with his intended profession, architecture, attended school and studied under A. C. Binney, an accomplished architect of Boston, since deceased. He was a student for five years, and, in 1872, opened an office in Boston.

After the great fire in New Brunswick, in 1877, he also had an office there, and furnished plans and superintended the erection of several fine buildings in that city, among which was the Bank of New Brunswick Block, in the business of the East, and came to Chicago, and spent about three years in special engineering work in connection with refrigerating and machinery, which specialty he is still making his study. He was made architect as architect in the Metropolitan Block; afterward moved to the Ashland Block, where he is at present located. He was married, in 1872, to Miss Charlotte E. Noyes, of Abington, Mass.; they have two children, Henry and Ada.

SOLON SPENCER REMAN was born at Brooklyn, N. Y., on October 1, 1853, and is the son of William Riley Reman, of that city, a cultivated gentleman of high attainments. Although a professional architect, the elder Mr. Reman has made the study of that subject one of his chief pursuits, and early imbued his son with the same tastes. Solon was educated partly by his father and partly by himself, in Brooklyn. In 1865, at the age of fifteen, Mr. Reman entered the New York office of the famous architect, Mr. Richard Upjohn, where he remained for eight years. In 1876, he opened an office on his own account in New York City, where he practiced his profession until December, 1879, when, forming the acquaintance of George M. Pullman, he was invited by him to come to Chicago, to design and construct the new City of Pullman and the extensive car-works at that place. During the winter of 1879-80 he perfected the plans of that unique city, and in the following spring the great work of building that place was begun, and car-body work, and the frame of the Pullman buildings is the designer of all the buildings of Pullman, including the arcades, churches, schools, market, hotel, water-tower, etc., besides some thirteen hundred dwelling houses for the employees. In addition to his architectural work, he superintended the charge of the affairs of Pullman, excepting the building of cars and the operation of the car-works. He is also the architect of many fine and costly buildings in Chicago among which may be mentioned the fine office-building erected by the Pullman Company, on the corner of Adams Street and Michigan Avenue, at a cost of $700,000; the Washington Park club-house, grandstand and stands, at a cost of $200,000; the City Market, on Twelfth Street and Michigan Avenue, at a cost of $50,000; General Anson Stager's private residence, on Eighteenth Street and Michigan Avenue; and the Oriental Laundry Company's building. In addition to these buildings, during the few years Mr. Reman has been in Chicago he has been the architect of some thirty dwelling-houses in this city and vicinity. He has also made the plans for a fine granite building, to be located on the corner of Adams and LaSalle streets, for Marshall Field, which is estimated to cost about $1,000,000; as well as for the Northwestern Mutual Life Insurance Co.'s new building, at Milwaukee, Wis., which cost $500,000. Mr. Reman is also a member of the American Institute of Architects and of the Western Association of Architects. In 1885, Mr. Reman was married, in Pullman, to Miss Marian Smith, of Chicago. Mrs. Reman is the daughter of the late William F. Smith, a distinguished English engineer. He was the first to suggest the underground-railroad system of London, and who was connected professionally with the planning and construction of the present system of the capital city. Mrs. Reman's step-father was the late James Freeman Smith, an eminent citizen of Chicago, who died at Rome, Italy. They have two children.—Florence Spencer and Edith Alice.

STEPHEN V. SHIPPEN was born in Montrose, I'll., on January 26, 1825, and was educated at the academy in that place. For several years he worked at the printing business, which was abandoned on account of failing health, and he next gave his attention to the study of architecture, commencing with his father, a builder, afterward at Pittsburgh and finally at Philadelphia, and before leaving his native State, had designed and superintended the erection of numerous public and private buildings. He came to Chicago in 1854, but in the following year took up his residence at Madison, Wis., with which city he afterward became quite prominently identified. In 1857, he was appointed architect of the Central Wisconsin State Hospital, at Weston, where he superintended its construction until the commencement of the War of the Rebellion, when (in July, 1861) he entered the 1st Wisconsin cavalry as a Lieutenant, and was successively promoted Lieutenant, colonel and colonel by brevet. His military career is austerely the honor to his State. He was wounded on May 2, 1862, at Cape Girardeau, Mo.; also on April 24, 1863, at crossing of Whitewater River, and crippled for life, was captured as a prisoner of war, released on parole, and exchanged on December 11, 1863. He returned, subsequently, from his wounds to again enter the field with his regiment, and participated in all the numerous engagements of that command in Kentucky, Tennessee, Alabama and Georgia, ending at Macon, with Wilson's cavalry corps, at the end of the war. He was de-
RE-BUILDING OF CHICAGO.

73

failed to collect the plans and report on the condition of the exten-

sions of his buildings at this time. Augustus De Morgan col-

lects the records of military posts, hospitals, etc., in that State

and Western South Carolina, and then ordered to report to the

War Department to take charge of rebel archives, where he re-

mained one year, by special appointment.

On returning to his home, he was elected city treasurer without op-

position. He also resumed his profession of architect, and com-

pleted the Hospital for Insane; his design for the rotunda and
domes was adopted, and he served the President of Massachusetts

as architect of the State Capitol, and completed that building; was superintend-

ing architect of the United States Court House and Post Office to its

final completion, and designed and superintended the construc-
tion of the Northern State Hospital for the Insane, at Oshkosh, Wis.;

was the architect of the Iowa State Hospital for the Insane, at

Independence, Iowa; also designed and supervised the construc-
tion of the Northern Lunatic Asylum at St. Joseph, Mo. He has for se-
neral years been a citizen of Chicago, and has had charge of some of the

finest buildings in this city, such as the Gaff Building, on La-

Salle Street, and the Presbyterian Hospital.

Mr. Shipman is inti-
mately connected with literary studies and work. In 1850, he was

elected secretary of the Department of Science, and in 1852, math-

ematical, physical, s[co]l[og]o[lep]h[on]ical, and social sciences, in the

Wisconsin Academy of Science, Arts and Letters. He has been con-

nected with the State Historical Society of Wisconsin since 1852,
as a miscellaneous secretary, and is now a member of the Board of

Directors of the American Institute of Architects, of the Western

Association of Architects, and of several learned societies. He has been an active

member of the Masonic order, and of the Masonic order of Knights-Templar.

By reference to Allibone’s Dictionary of Authors, we find him credited with the Shipman Family Genealogy. Mr. Shipman was at one time chief engineer of the Army of the Northwest, and later assistant engineer of the Military Division of the "Badger State," and he now bears on his body the scars of many hard-fought actions. He was married, at Harrisburg, in November, 1850, to Cornelia, daughter of Hon. E. S. Goodrich, Secretary of State; to whom he was born Annie L. (now Mrs. E. S. Tomblin, of Emerson, Iowa), Rose W. (now Mrs. J. K. Anderson, of Waukesha, Wis.), Charles G., M. D. (of Ishpeming, Mich.), William V. (of Culbertson, Neb.), and Cornelia, Mrs. Shipman died at Madison, Wis., on January 27, 1850; he was married again, at Chicago, in 1881, to Mrs. Mary Townsend, of Bethel, Me.

FREDERICK T. BOWEN was born at Somerville, Mass., on July 22, 1833. He was educated at Harvard College, and, after closing his studies there, attended, for a short time, the Lawrence Scientific School, but was compelled to shorten his course at that institution on account of the death of his father, Dr. Washington, D. C., which was at that time the home of the family, and commenced business as a draughtsman, and there remained for about one and a half years, when he concluded to come West. He arrived in Chicago in 1877, and engaged as draughtsman in the office of L. B. Dixon, a prominent architect, and remained with him until 1881. He then became a partner of Mr. Dixon’s, which association continued until 1884, when he dissolved partnership, and opened an office for himself at the corner of LaSalle and Madison streets. He was married, in Chicago, in 1880, to Mrs. Carrie Barstow Wallace.

OSBORNE J. FERREY was born at Albion, Kennebec Co., Me., in 1839. His early school education was obtained at Albion, China, and Waterville. At the same time he worked upon his father’s farm, and studied drawing and painting, receiving instructions from several of the principal artists of the place, and attended the Public School and the Free Academy, at which he was graduated in 1856. His attention was early directed to the study of architecture at the age of fourteen or fifteen, by articles in one of the monthly magazines, and thereafter art and architecture, but mainly the former, were never lost sight of, and he kept up the practice of drawing and painting, as an engagement, and always favored his adoption as a profession. Being of a somewhat roving disposition, he went to Minnesota, with older brothers, in 1856, and removed to Bloomington at a different time, where he studied painting, sign-painting. Returning to the East two years afterward, he continued in the painting business, soon drift ing into decorative and fresco painting at Boston and Taunton. He also taught during the winter from the same and Maine for several years, and instructed in painting, drawing, and penmanship. Naturally of a versatile mind, he acquired considerable proficiency in a number of different pursuits, and his studies covered a wide and varied field. The Civil War broke out at the time of his graduation, and he joined the 3d Maine Volunteers immediately and was appointed an officer. At the time of the adoption of the new constitution he was appointed a captain, and was mustered into the service of the First Maine Volunteers, and served in the late war, being promoted second lieutenant just before the close. He took an active part in nearly all the famous battles and engagements from the well-knonwn to the capture of the Relief ship, Spotswood, of Cold Harbor, Burdsheide’s Mine, etc., and during the winter of 1864-65 his battery held Fort Sedgwick, one of the most exposed and dangerous points upon our lines. Upon leaving the army, he again resumed his studies and practice, giving lessons in drawer, etc., meantime. He removed to Massachusetts in 1868, and, studied, worked, and taught, between that time and 1874, at which time he came to Chicago. During this time he took a course of study in the Massachusetts Normal Art School, gave instructions in the Mechanics’ Association Drawing Schools, in Worcester, and con-
ducted the City of Chelsea evening drawing school and school for art instruction to public schools. He has been a member of the Society of Architectural draughtsmen in Worcester, Northampton, and Boston, and for two years conducted business in his own name in Worcester. He came to Chicago under the auspices of J. K. Os-

gewald & Co., Boston, to open the Chicago office of the Architectural Society of Architects, and of several other learned societies. He has been an active member of the Masonic order, and of the Masonic order of Knights-Templar. By reference to Allibone’s Dictionary of Authors, we find him credited with the Shipman Family Genealogy. Mr. Shipman was at one time chief engineer of the Army of the Northwest, and later assistant engineer of the Military Division of the "Badger State," and he now bears on his body the scars of many hard-fought actions. He was married, at Harrisburg, in November, 1850, to Cornelia, daughter of Hon. E. S. Goodrich, Secretary of State; to whom he was born Annie L. (now Mrs. E. S. Tomblin, of Emerson, Iowa), Rose W. (now Mrs. J. K. Anderson, of Waukesha, Wis.), Charles G., M. D. (of Ishpeming, Mich.), William V. (of Culbertson, Neb.), and Cornelia, Mrs. Shipman died at Madison, Wis., on January 27, 1850; he was married again, at Chicago, in 1881, to Mrs. Mary Townsend, of Bethel, Me.

FREDERICK R. SCHUCK was born at Chicago in 1854, and is the son of Frederick Schuck, Sr., who died in July, 1871, and grand-nephew of Adam Schuck, who died in 1855, in Chicago, in his ninetysixth year. Adam was one of the two surviving members of the old Napoleon body-guard, and came to Chicago nearly forty years ago. Frederick, Jr., was educated in the city schools, high-school and college, and received his education in the study of architecture in the office of Henry L. Gay, and trained with him eight years. In 1880, he went to Pullman, took charge of some of the buildings being erected, and opened an office at No. 51 Clark street, Chicago.

He is one of four surviving children of Frederick Schuck, Sr., the names of the others being Fanny, Louisa, and Amelia

He received his literary and scientific education at Harvard University, the Massachusetts Institute of Technology, and in Europe. After a thorough training, he entered the office of one of the leading architects in Boston, and for the last five years has been associated among his fellow-craftsmen. In 1881, he came to Chicago to superintend the construction of the Union Club-House, the plans...
of which he had prepared. The success he achieved in this work brought his services into such request, that he decided to locate in Chicago, and accordingly opened an office and took Charles S. Frost into partnership. Since then he has ranked among the foremost of the architects, not only here, but anywhere in the West. Mr. Cob married, in 1882, Miss Emma M. Smith, daughter of the late Augustus F. Smith, a prominent attorney of New York City. They have two sons,—Henry Ives, Jr., and Cleveland.

Charles S. Frost was born at Lewiston, Me., on May 31, 1856. After having received an excellent education in the public schools, he entered an architect's office in Lewiston, where he remained three years, and there gained a good practical knowledge of his present business. He then went to Boston, and entered the Institute of Technology there, and after finishing a special course of study at that institution, he was employed in several offices in the same city for three years. He then engaged in business for himself, meeting with remarkable success. In 1882, he came to Chicago and entered into partnership with Henry Ives Cobb. Mr. Frost was married, in this city, on January 7, 1885, to Miss Mary Hughtt, daughter of Marvin Hughtt, general manager of the Chicago & North-Western Railway.

Louis J. Schauff was born at Milwaukee, Wis., in 1857, and was educated at Cincinnati and at Chicago. After closing his studies, he concluded to make architecture his study, and began at the bottom, learning the carpenter's trade, and afterward was engaged in the manufacture of wood-working machinery, working in both branches nearly four years. During this time, he spent his spare time in draughting, and kept preparing himself for his life-work. In 1873, he went into the office of Cass Chapman, first as draughtsman and afterward as foreman in his office. In 1880, he was engaged with the North Chicago Rolling Mills, had charge of the building department at South Chicago, and continued with them until 1883. In 1884, he associated with Robert C. Berlin, under the firm style of Schauff & Berlin, of which he is still a member. He is a member of the Western and Illinois State Associations of Architects. He was married, in Chicago, in June, 1884, to Miss Fannie Moore.

Robert C. Berlin was born at Granville, Ill., in 1853. He commenced his education in this country, but, in 1873, went to Switzerland, and attended the Polytechnic Institute at Zurich, taking a thorough course of four years, and making every effort to become proficient in architecture, the profession he had concluded to adopt. After closing his studies, he spent some in traveling, visiting points of interest in England, Germany and France, with a special view of studying the different styles of architecture, and intending to make practical use of all the information he could gain. He returned to Chicago, and entered the office of Egan & Hill, and was with them when they were completing the new Court House. He afterward entered the service of J. A. McLennan, and remained as draughtsman for about three years, and in May, 1884, he associated himself with Louis J. Schauff, and is at present doing business under the style of Schauff & Berlin, in the Ashland Block, corner of Clark and Randolph streets. He is a member of the Western and Illinois State Associations of Architects. He was married, in Chicago, in 1883, to Miss Agnes A. Dodge, daughter of George Dodge.

Gabriel Isaacson is one of the rising young architects of Chicago, and has already made his mark as a skilled designer. Mr. Isaacson was born at Farsund, Norway, on August 31, 1859. His father, Lewis Isaacson, died when the son was an infant, and the widow and orphan immigrated to America, locating at Chicago in the spring of 1861. Gabriel attended the common schools during his boyhood, but at an early age entered the office of E. S. Jenison, architect. He remained with him until 1876, and then went into the office of John C. Cochran, with whom he was connected for the greater portion of eight years. From an ordinary workman, Mr. Isaacson arose to the position of head assistant to Mr. Cochran, and was regarded as a most valuable employe. In 1882, Mr. Isaacson was secured by Alexander Kirkland to assist in architectural work upon the new City Hall, and after serving him for about one year returned to the office of Mr. Cochran, where he remained until January, 1885, in which month Mr. Isaacson established business for himself. He has already designed plans for a handsome $40,000 church for the Congregational Society of Evanston; and in that suburb and many others, there are testimonials of his skill as an architect, in the way of a number of beautiful residences and cottages. Mr. Isaacson was married, on November 13, 1889, to Miss Agnes R. Knutson. They have three children,—Florence M., Herbert F. and Agnes Irene.
BUILDING TRADES.

As an appendix to the architectural résumé, it is but just that some mention should be made of those trades that were employed in forming the conceptions of the architect and rendering possible, as realities, his plans. To the enterprise of the builder and to the skill of the mechanic, is Chicago indebted for her architectural beauty; for the hand is as necessary to execute, as the brain is to design, forms of taste, elegance and permanence.

Brick Manufacturers.—The growth of the manufacture of brick in Chicago between the years 1870 and 1880, is shown by the following statistics given in the United States Census Reports for those years. It is a matter for regret that in this department of the building interests, as in so many others, no official compilation of statistics is made by the trade itself. There is no central bureau of information, and the only reliable data to be obtained is that gathered from the census returns, at intervals of ten years. In the following table, the figures given are for Cook County, no separate record being tabulated for this city. It is not unfair, however, to assume that fully ninety per cent of the entire product of the county is turned out by Chicago brick yards.

<table>
<thead>
<tr>
<th>Year</th>
<th>Establishments</th>
<th>Hands Employed</th>
<th>Capital</th>
<th>Wages</th>
<th>Material</th>
<th>Value of Product</th>
</tr>
</thead>
<tbody>
<tr>
<td>1870</td>
<td>20</td>
<td>1,063</td>
<td>$531,000</td>
<td>$560,665</td>
<td>$109,030</td>
<td>$535,575</td>
</tr>
<tr>
<td>1880</td>
<td>53</td>
<td>1,165</td>
<td>$50,000</td>
<td>182,224</td>
<td>1,014,200</td>
<td></td>
</tr>
</tbody>
</table>

The percentage of increase in ten years in each of the items named above was as follows:

- In the number of establishments: 165 per cent.
- In the number of hands: 51 per cent.
- In the capital invested: 66 per cent.
- In the wages paid: 113 per cent.
- In the material used: 40 per cent.
- In the value of the product: 74 per cent.

The preceding figures are suggestive. The number of establishments was nearly trebled, while the increase in the number of hands employed was only 51 per cent. This is attributable to the introduction of improved machinery and its general use. The disproportion between the increase in the number of employees and the amount of wages paid, is also noticeable, the latter being 113 per cent. This is not to be ascribed solely to the general advance of wages, but is in great part due to employment of a larger proportion of skilled laborers. Another variation in the percentages of increase is that between the cost of material and the value of the manufactured product; the increase in the former being but forty per cent, while that in the latter is seventy-four per cent. The reason for this is to be found, in a great measure, in the marked improvement in quality which characterized Chicago brick during the period named. More carefully selected and better material was employed; less limestone entered into the composition, and a harder, better-formed product was the result of the manufacturers' efforts.

The greater part of the brick made here is that known as "Chicago common," and is pronounced by competent judges, both architects and practical builders, to be equal in quality to any common brick made in the country. The high prices demanded for Philadelphia brick stimulated the manufacture of pressed brick, and no finer specimens of the latter description of building material are to be found in the world than are made in Chicago. Agencies of many of the leading manufacturers from other States are established here; however, and the use of pressed brick for fronts is yearly increasing. The establishment of an extensive and well arranged permanent building exhibit, to which reference was made in the second volume of this work, has no doubt exerted a healthful influence on the trade and done not a little to incite emulation.

A circumstance should not be lost sight of that has had an undoubted effect on the trade in brick in this city, viz.: Transition in the architectural style from the ornamentation of the Renaissance school to the severe simplicity of the Gothic. The latter calls for great solidity, and its ideas are best expressed in the massive walls of pressed brick to be seen on every side in the business quarters of the city, and in many private residences, wherein the utmost beauty is attained by the introduction of terra-cotta ornamentation.

Thomas Moulding was born at Warrington, England, on December 13, 1825, and is the son of Thomas and Rachel (Bates) Moulding. In 1849, he was apprenticed to a machinist, and following his trade in England, until 1851. In that year, he came to Chicago, and was employed as a machinist for about eleven years. In 1862, he commenced the manufacture of brick in a moderate way, producing only about sixteen thousand a day during the first year. By the aid of his practical knowledge of his trade, he made meritorious improvements. His business has rapidly increased until he has three factories,—one in the city, one at Lake View, and one at Porter, Ind.—each of which is supplied with steam machinery, the three engines aggregating one hundred and twenty-five horse-power. The capacity of the works in Indiana is three million common and five million pressed brick and at the two works in the city and Lake View twelve thousand common brick are made. He also manufactures about two million drain-tile annually, and has just commenced the manufacture of terra-cotta copings. He employs about three hundred men, and does a business of $200,000 annually. Mr. Moulding was married, on September 27, 1857, to Miss Sarah Watkins, of Chicago. They have five children,—Thomas C., Minnie R., Lizzie W., Joseph W. and Sarah B.

HAYT & ALSIP.—This firm of brick manufacturers and dealers was organized in 1872, by Henry C. Hayt and Frank Alsip. They have two large yards, supplied with steam power and all the appliances for making first-class building brick. They employ two hundred and fifty men, and turn out an average of twenty-five million brick per annum.

Henry C. Hayt was born at Fishkill, Dutchess Co., N. Y., on May 9, 1831, and is the son of Henry D. and Catherine (Hood) Hayt. After leaving the public schools, he attended Amenia Seminary until 1849. He was then engaged in farming until 1858, when he began the practice of law in McGregor, Iowa, and entered into partnership with Oscar Barlick, under the firm name of Hayt & Barlick, lumber dealers. They carried on the business there until 1872, when he came to Chicago, and commenced the manufacture of brick with Frank Alsip, under the present firm name. Mr. Hayt was married on November 22, 1862, to Miss Sarah Harris, of Pongkeeppe, N. Y. They have one child,—Margaret.

Frank Alsip was born at Pittsburgh, Penn., on November 7, 1827, and is the son of William and Mary A. (Meeker) Alsip. When he was twelve years of age, he went to work in a brick yard at Pittsburgh, where he was employed about five years. He was then apprenticed to a bricklayer for three years, during which time he learned the trade in all its details. He was employed as a journeyman brick mason, in and about Pittsburgh, until 1859, when he went across the plains to the gold mines of California, and worked in those mines two years. He then went to St. Louis, Mo., where he was employed at his trade for about a year, and then he returned to Pittsburgh, and engaged in business as a builder and manufacturer of brick with A. H. McClellan & Alsip. This firm carried on the business for four years, when it was dissolved, and Mr. Alsip went to Prairie du Chien, Wis., where he engaged in the same business with his brother, under the firm name of Alsip Bros. They made brick and erected buildings in Wis., Iowa, and Minnesota, until 1872, when he came to Chicago, where he formed a partnership with Henry C. Hayt, under the style of Hayt & Alsip brick makers, which firm, last year, turned out more brick than any other brick yards in Chicago. He is also associated with J. E. R. Harron, under the firm name of F. & W. H. Alsip, brick manufacturers.
DEARBORN STREET, SOUTH FROM WASHINGTON.

HISTORY OF CHICAGO.

and is now sitting up one of the largest factories for the manufacture of brick in the city. Much of the machinery was invented and designed by him, and will be capable of producing one hundred and twenty-five thousand first-class brick a day. He was married, in January, 1854, to Miss Mary J. Smiley, of Pittsburgh. They have six children; Jennie, William H., Frank B., Maude, Charles, and Millicent.

T. & J. D. Tully.—This firm was organized in 1872, by Thomas and John D. Tully, for the purpose of manufacturing and near Cornwall, Canada. When he was fifteen years of age, he went back to Rochester, where he worked in a hotel and the Rochester Novelty Works for a few months, and then learned the painter's trade in the carriage workshops of James Carroll, where he was employed until 1846. He then came to Chicago, but soon afterward went to Quincy, III., where he worked at his trade until 1858. He then returned to Chicago, and engaged in the grocery business, which he followed for about thirty years, when he sold out his grocery store and devoted his entire time to the manufacture of brick.

This business he had commenced in Chicago in 1864. In connection with his other business. In 1872, he entered into partnership with his brother, and the present firm was organized. He was married, in November, 1862, to Miss Mary White, of Rochester, N. Y. They have the following children: Ada, Franklin, Mary A., John W., Julia M., Margaret, Thomas, Ellen, and Elizabeth.

The Illinois Pressed Brick Company was incorporated in February, 1874, with a capital of $100,000. Its first officers were John T. McAuley, president; Arthur W. Penny, secretary; Willet B. Jenkins, treasurer; and Frank T. Melcher, superintendent. The company was organized for the purpose of manufacturing red pressed-brick. Their works are located at Blue Island, III., and are supplied with steam power and the most approved machinery. They employ about eighty men, and their capacity is fifty thousand brick a day. In May, 1885, Mr. McAuley resigned the presidency in favor of Addison Ballard.

John T. McAuley, ex-president, was born on September 24, 1836, in Warren County, N. Y., and is the son of George and Mary (Miller) McAuley. He came to Chicago with his parents, in 1841, and subsequently attended the public schools until he was eighteen years of age. After finishing his studies, he was employed as a salesman in a boot and shoe store three years. In 1861, he entered the army as sergeant-major of the 5th Illinois Infantry Volunteers. He was promoted to rank of second lieutenant of Co. "C," then became captain of Co. "B," and afterward assistant adjutant-general of the First Brigade, Second Division, Eleventh Army Corps. He was wounded at the battle of Shiloh. In December, 1862, he was mustered out of the service. He was engaged in the wholesale boot and shoe business for a number of years. In 1880-82, he was connected with the Chicago, Texas & Mexican Central Railroad. He then commenced the brick business, and organized the present company. He is a member of Thomas J. Turner Lodge, No. 409, A.F. & A.M. Mr. McAuley was married, on November 20, 1866, to Miss Mary L. Sayrs, of Chicago. They have two children,—Harriet S. and Henry S.

Arthur W. Penny was born at Chicago, on May 23, 1850, and is the son of George W. and Laura (Wilson) Penny. He was educated at the Northwestern University, Evanston. In 1876, he went to Providence, where he was connected with the Rummel Chemical Works. In 1882, he returned to Chicago, and engaged in the brick business, assisting in organizing the firm of which he was elected secretary. He resides at Park Ridge, and is president of the board of village trustees, taking an active part in the affairs of the place. Mr. Penny was married, in 1878, to Miss Clara F. Wilson, of Providence. They have two children

—Edith G. and George W.

George W. Penny, the father of Arthur W., came to Chicago in 1856. In 1848, with his father, John Cunningham, and his brother, A. J. Penny, he took an active interest in the brick business. A. J. died in 1859, and the father, of cholera, in 1859, when George W. succeeded to the business. At that time, this firm had the most extensive brick yards in the city. In 1854, George W. made ten...
carried on until 1869, when Mr. Katz retired and Mr. Putnam became a partner, the firm name being changed to Schmid & Putnam. The latter firm continued the business up to the time of the great fire in 1861, when their most expensive buildings were destroyed, and then resumed his old trade, and, in 1872, entered into partnership with Frank Schubert, under the firm name of Schmid & Schubert, contractors and builders. They did a very extensive building trade. The partnership was dissolved in 1876, since which time Mr. Schmid has been in business alone. During his connection with the building trade, he was engaged for two years in the sale of yellow pine lumber. Mr. Schmid has been one of the most prominent German contractors and builders of the city. Among the buildings which stood as monuments of his skill before the fire may be named Bryan Hall, Trinity Church, the fire-brigade house, and the American Children's Orphan Asylum.

JOHN M. DUNPHY was born at Utica, N. Y., on October 2, 1834, and is the son of Martin Dunphy who was a prominent builder of that city. He was given a good common school education, and at the age of sixteen began to learn the trade of mason and contractor, serving an apprenticeship of four years. In 1854, he came West, and worked at his trade in various cities until 1858, when he located at Chicago, which has since been his home. He at once formed a partnership with a Mr. Moss in the contracting and building line, and continued with him until 1863, since which time he has been alone. Among the many prominent structures now existing as memorials of Mr. Dunphy's work, may be mentioned the Cathedral of the Holy Name, St. James's Church, the residences of George M. Pullman and B. P. Moulton, St. Denis Hotel, and many others. For years past he has taken an active interest in politics, and is known as an earnest but consistent Democrat. In 1876, he was nominated for the office of collector of the West Town and was elected by a decided majority, and in the spring of 1881 was re-elected. Mr. Dunphy is married to Miss Mary Doyle, daughter of J. Edward Doyle, of this city. They have had four children, three sons and one daughter, but of these there is but one son living, John J., who is in business with his father.

RE-BUILDING OF CHICAGO.

[Monroe Street, West from Clark.]

business blocks and elegant private residences. In 1857, he was married to Miss Eleanor Nelson, of Fox Lake, Ill. They have six children living.

OLIVER N. SOLLIT was born in Chicago on October 16, 1860, and is the son of Thomas and Eleanor (Nelson) Sollit. After finishing his studies in the city schools, he entered the office of James J. Egan, where he studied architecture, and the knowledge thus acquired has been of no small advantage to the firm of which he is the junior member.

GEORGE SCHMID is the son of John M. and Anna Margaret (Hirsch) Schmid, and was born in Equarofen (Mittel-Franken), Bavaria, Germany, on August 4, 1831. After leaving school he was apprenticed to a cabinetmaker at Wurttenberg, where he worked for two years; after which he traveled through Germany, visiting all the principal cities. In 1850 he went to New York, where he worked at the carpenter's trade until 1855, when he came to Chicago. Here he worked as a journeyman carpenter for a year, and then formed a partnership with Andrew Katz, under the firm name of Schmid & Katz, contractors and builders. This firm did an extensive business until 1864, when they discontinued it, and started a brewery, which was known as the Schmid, Katz & Leverenz Brewery. This they continued until 1866, when Mr. Leverenz died, and the firm became Schmid & Katz, and was so

FREDERICK HENRY AVERS was born at Buffalo, N. Y., on October 3, 1831. His parents were from Germany, and at the date just mentioned had only been in this country a short time. His father, John Avers, was a contractor and builder, and was for many years prominent in that line of business at Buffalo. Frederick, as he grew to man's estate, also adopted the same calling, which he successfully pursued in his native city until 1859. In that year he went to Pike's Peak, but found that region too wild and unsettled, so he returned and located in this city, which has since been his home. In the rebuilding of Chicago, up to the time of the fire, and in its re-building since that event, Mr. Schmid has taken a prominent part. Among the buildings he has erected may be mentioned the Sherman House, the Palmer House, before the fire; the Northwestern Railroad Depot, the Allen, paper car-wheel works (at Pullman), the Adams Express Building, Marshall Field & Company, Immanuel Baptist Church, College of Physicians and Surgeons, Chicago Homeopathic College, and the Evanston High School. Mr. Avers is a Knight Templar; has taken a prominent part in the building of the new Masonic Temple; and is also a member of the Dearborn Astronomical Society. He married, in 1853, Miss Emma Markham, daughter of Thomas Markham, of England. They had three children, Franklin, George, and Cora Isabelle (deceased), with their father in business, and have already earned for themselves the
HISTORY

Frank Agnew was born in Dundee, Scotland, on December 7, 1821. He came to the United States, landing in this city in September, and took up his abode with an uncle, Charles O'Conner, a builder and contractor. He immediately apprenticed himself to his uncle in the carpenter's trade, and almost the first work he did was on the old Franklin school-house, which was destroyed by fire in the fire of 1871. He remained in the employ of his uncle about two years, when he began work as a journeyman, continuing in that capacity until 1857. In the fall of that year, he entered the paid fire department, which was organized about that time, having been previously a member of the volunteer force. He assisted in the organization of the Firemen's Benevolent Association, of which he was for years the presiding officer. In 1861, he resigned his position in the fire department, and began to actively engage in the business of building. Among the memorials now standing of Mr. Agnew's work, may be mentioned the Normal School building, Hooley's Theater, and St. Xavier's Academy. He also supervised the construction of the present City Hall building. In 1872, Mr. Agnew was appointed Fire Engineer of Cook County, by the people's party, and was elected by a majority that ably attacked the city. He is a member of the National Land League Association, the National Temperance Society of which he was at one time vice-president. He married, on June 14, 1860, Miss Ellen O'Neill, daughter of the late Michael O'Neill, an early settler of Chicago. Mrs. Agnew was born in County Waterford, Ireland, January 2, 1840, was educated in the schools of this city, and is a lady of fine accomplishments and of the most amiable character. Mr. and Mrs. Agnew have eight children,—John P. and Francis, who are associated with their father in business; Margaret, Frances, Elizabeth, John J., Thomas, Eunice, and Charles.

John L. Diez & Co.—This firm of contractors and builders, and lumber merchants, was originally established in 1866, by Frank Moninger, August Schrenk and John Kirwan, on Illinois Street near Ogilby, engaged in the manufacture of sawn, dressed, blinds, frames, mouldings, etc., and carpenter work. In a short time they were necessitated, by their large business, to seek more commodious quarters, which resulted in the erection of the firm's residence on Indiana Street. Being located in the midst of lumber yards, in order to accommodate their business, they erected also a planing mill, wherein they manufactured all descriptions of lumber utilized by their carpenters. In 1879, Mr. Schrenk and Mr. Kirwan having bought out Mr. Kirwan's interest; they then commenced the contracting and building business, which herefore they had not done. The firm afterward ceased to exist, Mr. Francis Diez, brother of Mr. Diez, having purchased Mr. Schrenk's interest, and remaining a member of the firm until 1890, when he sold his interest to Schrenk & Moninger, and formed Mr. Schrenk & Moninger, in 1890, the firm continuing as contractors and building in 1897, bought an interest, and the firm name was changed to John L. Diez & Co. This firm continued business until the great fire of 1871 destroyed their whole establishment. In the course of a few months they rebuilt their factory with larger and more comprehensive facilities, and had got their business into good running order again, when it was destroyed by fire in August, 1873, which obliterated everything on its grounds and necessitated the dissolution of the old firm. In 1873, John L. Diez and Frank Moninger entered into a co-partnership, under the old name of John L. Diez & Co., and erected a factory two stories in height, built of brick, by Mr. Joseph Moninger, Mr. C. J. Moninger, who then, with J. L. Diez, retained the business until 1880, when J. L. Diez, continued the business with the late Ottmann, under the firm name of the firm. This firm not only transacts a comprehensive business as lumber merchants and in the manufacture of lumber, but they also pursue a trade in the Carpenter, contracting and building line, employing about one hundred men on the average.

John C. Robinson is the son of John and Parmella (Goodwin) Robinson, and was born in Nova Scotia, on August 3, 1845. His father removed his family, in 1583, to Eastport, Maine, and again, in 1851, to Akron, Ohio, where John learned the carpenter's trade from his father, who was a carpenter and builder, for whom he worked several years. He learned the profession of an architect in Detroit, Mich., and, in 1870, came to Chicago and continued his profession until 1875, when he engaged on his own account, in building and building until 1881, when he formed the present partnership. He married, in 1882, Miss Ada De Groot of Philadelphia, Pa. They have two children.—Edna and Roy H. Anderson Minor, contractor and builder, is the son of William and Annery Anderson Minor, and was born in Cleveland, Ohio, on January 31, 1870. He was partially educated in his native city, and has studied some years in the city, he erected all the most prominent buildings there. In 1871, he came to Chicago, and entered into partnership with J. R. Trumbull, which firm existed until 1875, and building, during that time, the Hamlin & Hale Building and many others. In 1875, John L. Diez and Mr. Minor entered into partnership with P. J. Sexton, under the firm name of Sexton & Minor, which continued for about two years, then dissolved, and Mr. Minor acted as superintendant for Mr. Sexton, receiving a salary and also having an interest in the business. While in this position he had charge of the erection of the erection of the Cook County Court House and the Chicago Court House; and while a member of the firm, and as superintendents, also had charge of the building of many fine business blocks and private residences in the city. In May, 1883, he became a member of the present firm. He is a member of the Masonic fraternity, belonging to Apollo Lodge, No. 642, A.F. & A.M.; Lafayette Chapter No. 2, R. & S.M.; and Chevalier Bayard Commandery, No. 6, R. & S.M., of this city. He is also a member of the Odd Fellows' lodge and Masonic lodge at Toledo, and is also a member of the Master Masons and Builders' Association of Chicago. Mr. Minor was married,
on August 24, 1884, to Miss Minnie Alice Fair. They have two children—Alice Geraldine and Milton Leroy.

The Campbell Brothers' Manufacturing Company was originally organized in 1873, by Murdoch and Alexander Campbell, under the firm name of Campbell Brothers, for the purpose of doing a general contracting and building business and for manufacturing all kinds of wood material. They carried on the trade and continued the firm until 1874, when they admitted William McKee as a partner. The name of the firm was changed to Campbell Bros. & Co., which existed until 1875, when Mr. McKee retired, and they resumed the name of Campbell Brothers. In January, 1881, it was incorporated under its present name, with a capital stock of $25,000.

The firm is now known as Campbell & Hoyt's Sons, and is in the hands of Alexander Campbell, vice-president and superintendent; Hiram T. Jacobs, secretary and treasurer. They have always had a large and prosperous trade, and many substantial business houses and elegant private residences, erected or fitted up by them, testify to their ability and skill for doing fine and substantial work. A few of these are the residences of Judge Skinner, J. C. Bullock, J. Medill, A. J. Kirkwood, F. H. Hill, J. H. Witbeck, and others in all parts of Chicago and its suburbs. Their business has steadily increased year by year, until now they have a large factory run by steam power and filled with the latest and most improved machinery. They employ from one to two hundred men, and do a business exceeding $300,000 annually.

Murdoch Campbell, president, was born in Prescott County, Canada, on February 15, 1841, and is the son of John and Christiana (McCrimmon) Campbell. When he was sixteen years old, he left Canada and came to Chicago, and learned the carpenter's trade from Henry & Campbell, contractors and builders. He worked for them many years, during the last seven having charge of their work and being foreman in their factory, and thoroughly qualified himself in all branches of the trade, whereby peculiarly fitting himself for carrying on the large and prosperous business of which he is at present the head. He belongs to the Masonic fraternity, and is a member of the Odd Fellows Lodge, No. 478, A.F. & A.M.; the Eastern Star, No. 48, and Chicago Commandery, No. 12, K.T. Mr. Campbell was married on January 30, 1867, to Miss Jeannette R. Caldwell, of Bloom, Ill. They have four children.—Archibald M., Abigail K., M. Josephine and John Albert.

Steinmetz & Eilenberger.—This firm of contractors, builders, and manufacturers of sash, doors, blinds and mouldings, was organized in 1879, by Conrad Steinmetz and Herman Eilenberger, to continue the business originally established by Steinmetz & Simmons as manufacturers of sash, doors, and blinds, and to carry on building and contracting in connection with their mill. The present firm do a large business both as builders and manufacturers. They have erected many fine buildings in all parts of the city, a few of which are the Beider Block, the C. B. Carter Block, the Heiser & Junge Block, and W. M. Hoyt's buildings. They fitted up the Exposition Building for the May Festivals of 1882 and 1884. They fitted up the same building for the National Republican Convention, and remodeled it for the National Democratic Convention, and completed the Grand Opera Hall for Chicago's first Grand Opera Festival. They employ about three hundred men, and do a business of $300,000 annually.

Conrad Steinmetz was born in Germany, on July 13, 1859, and is the son of Samuel and Martha (Brantgarn) Steinmetz. In 1854, he came to America, remaining about one year in the City of New York, and then going to Springfield, Mass., where he learned his trade and was employed, as an apprentice, in a sash and blind factory until 1861, when he returned to New York City. After working there about a year he removed to Hartford, Conn., where he worked at his trade in a sash and blind factory for three years. In 1865, he came to Chicago, and took charge of a similar factory for Parker & Stearns, which he managed for four years; then he was with Allen & Bartlett about a year; after which he was with the Garden City Manufacturing Company until 1874, when he entered into partnership with Conrad Simmons in the manufacture of sash, doors, and blinds. At the end of three years, the firm was dissolved, and he did business one year by himself, when the present partnership was established. Mr. Steinmetz is a member of Germainia Lodge, No. 184, A.F. & A.M. Mr. Steinmetz was married, on January 29, 1865, to Miss Hermine Kleinecke, of Hartford, Conn. They have five children,—John, Henry, Rose, Minnie and Ella.
HISTORY OF CHICAGO.

when he came to Chicago, and was foreman for Charles Utesch, a contractor and builder, for about a year; then was in partnership with John Angus, a short time; after which he conducted business as a contractor on his own account, until 1859, when he became a member of the present firm. While he was in business alone, he built the Larkin Block, in 1854, the church of Cooper’s Grove, near 57th Street, wood, and many other buildings in the city and suburbs. He was married, on January 20, 1876, to Miss Elizabeth Knapp, of Chicago. They have four children. —Theresa, Lilly, Alno and Henry.

Charles W. Ginkel. —He was born in 1834, in St. Louis, Mo., and was graduated at the Union College, in New York City, May 18, 1849, and is the son of R. W. and Mary (Wane) Reynolds. When he was about five years of age, his parents moved to Milwaukie, Wis., where they remained two years, and then moved to Beloit, Wis. In 1859, they came to Chicago and two years later moved to Whiteside County, Ill. In 1865, Mr. Reynolds went to Clinton, Iowa, and learned the carpenter’s trade, working at it three years, when he was employed building depots and stations on the line of the Union Pacific Railroad. He resided some time in California, and returned to Clinton in 1869, where he remained at his trade about a year. Returning to Chicago in 1872, he was employed as a journeyman carpenter until 1875, when he engaged in business as a contractor and builder on his own account. For six years he confined himself almost entirely to the building of stores; among others he constructed the stairs in the retail store of Marshall Field & Co., those in the McNeill Block, in the Kentucky Block, in the Major Block, in the Fuller Block, and many others in different parts of the city. He engaged in general building in 1875, in his shop with five mechanics, and now manufactures all his material and fancy wood-work. He has built many fine business blocks and private residences in all parts of the city and much of which are the Jackson Block, the Sibley Block, the Cremon Block, the Lakeside Skating Rink, the Manual Training School, the Rosalie Music Hall and all the residences on Rosalie Court, near the South Park Station on the Illinois Central Railroad. He keeps one hundred and twenty-five men in his employ, and does a business of $250,000 annually. He is a member of Landmark Lodge, No. 422, A.F. & A.M., and of Fairview Chapter, No. 62, R. A. M. Mr. Reynolds was married on April 16, 1871, to Miss Julia N. Darrow, of Beloit, Wis. They have two children. — Carrie E. and Fred. L.

Angus & Ginkel. —This firm of general contractors and builders was formed, by John Angus and Charles W. Ginkel, in November, 1881, to succeed that of Allen, Angus & Ginkel, which firm was in existence less than a year, having completed but one large building, the freight houses for the Chicago, Burlington & Quincy Railroad. Both members of the new firm are young men who have thoroughly learned their trade in all its branches, being the sons of old and experienced contractors, and have succeeded far beyond their most sanguine expectations. In the year 1852, they built the Chicago, Burlington & Quincy Railroad round-house, Potter Palmer’s fine residence, and the Hobbs Building. The latter is a six-story building, which they commenced on November 7, and completed in forty working days. In 1853, they erected Potter Palmer apartment houses and French flats on North State street, a large warehouse on the northeast corner of Clinton and Fullerton, and the 422-foot block of C. T. Verkens, Jr.; in the year 1884, they built the Abraham Kinsely factory, the Grand Trunk Railroad freight house, the abattoirs and center pier for the Chicago Indiana Railroad bridge across the Calumet River, and the piers for the viaduct over the railroad tracks in the town of Cicero. They were also contractors on the City Hall.

John Angus is the son of John and Elizabeth (Gamson) Angus, of Scotland, where he was born on February 16, 1852. After completing his studies, he learned the cut-stone trade from his father, who was a cut-stone contractor and also superintendent of a stone quarry. He left Scotland in 1866, and went to England, where he remained about a year, after which he came to America, stopping in the City of New York, where he worked at his trade until the spring of 1872, when he came to Chicago, where he has since resided. He is a member of his father’s business with his brother William, as William & J. Angus, cut-stone contractors, until 1875; after which he was in business for himself up to the time the firm of Allen, Angus & Ginkel was organized. During the period he was in business for himself, he had charge of the new Court House and Douglas Monument. He has charge of the setting of the cut-stone work on the Custom House, from 1857 to 1859, on the Landmark Lodge, No. 759, A.F. & A.M.; York Chapter, No. 148, R.A.M., and a charter member of Chevalier Barry Commandery, No. 52, K.T. He was married, on November 19, 1871, to Miss Agnes James, of the City of New York. They have three children. — John, Esther and William.

Charles W. Ginkel is the son of John G. and Louisa (Heischheim) Ginkel, and was born in Bavaria, Germany, on April 19, 1834. His father was a cut-stone contractor, who immigrated to America in 1850, and came to Chicago in 1852, where he died in January, 1872. John G. took an active part in public affairs, having been a member of the first Board of Public Works of the city, during the period of business as a contractor, on his own account, until 1859, when he became a member of the present firm. While he was in business alone, he built the Larkin Block, in 1854, and church of Cooper’s Grove, near 57th Street, wood, and many other buildings in the city and suburbs.

He was married, on January 20, 1876, to Miss Elizabeth Knapp, of Chicago. They have four children. —Theresa, Lilly, Alno and Henry.

Henry Dibblee. —In January, 1873, William R. and John S. Gould and Henry Dibblee, under the firm name and style of Gould Brothers & Dibblee, established themselves in business at Nos. 742 and 744 Washington Street, where the firm had been in the wholesale grocery business, and were also manufacturers of linseed oil. They were burned out in the great fire of 1871, but shortly afterward resumed and continued in business under the dissolution of partnership.

In this year, Mr. Dibblee removed to Nos. 274-75 Wabash Avenue, remaining there until, in 1881, he established himself at his present location, Nos. 260-262 E. Lake Street. Here, Mr. Dibblee deals exclusively in all kinds of ornamental fountains, vases, statues, cemetery work, pillars and lustic furniture. In addition, he handles tiles of all kinds; in this and other lines of his specialties, his house is the largest in the West. The territory covered by his trade extends over all the Western States to the Pacific slope, south to the Gulf, and east into the Canada. Shortly after establishing himself in business, Mr. Dibblee took the necessary steps for a justly celebrated English tile, and is now the only direct importer in the United States of these goods. He is agent also for Maw & Co., the well-known manufacturers of Holroyd, England, for the American ornamental tile; and for the celebrated Lowe tile, made by G. F. S. & J. F. Low of Chelsea, Mass. A suite of three rooms in his newly-arranged entresol is devoted to a display of these articles, and an attractive feature of his salesrooms. The tile business has grown very rapidly in the West; and especially in this city, within the past few years, it has shown a wonderful increase. In 1881, Mr. Dibblee became the agent for the Fair Haven Manganese Company, of Fair Haven, Mass., and is now doing the largest business in this branch of the business for any dealer in the West. He at present employs forty men, and does an annual trade of $200,000—a most satisfactory increase over that done when the business was first undertaken, at the age of eighteen. He first worked as a clerk in his father’s store, and was finally made a partner in the business, and so continued until, in January, of the following year, founded the house of which he is the head, and the history of which has already been given. Mr. Dibblee was married on November 26, 1873, to Miss Laura Field, daughter of John Field, of Conway, Mass. They have two children. — Bertha and Frances F.

Matthew B. Swezy was born on December 17, 1822, at River Head, on Long Island, N. Y., and is the son of John and Eny (Reeve) Swezy. When but a boy of age, he left home for Brooklyn, N. Y., and learned the carpenter’s trade from his uncle Tappin Reeve, for whom he worked until 1852, when he formed a partnership with him, under the firm name of Reeve & Swezy, contractors and builders. This firm did a large business, when it was dissolved, Mr. Swezy continuing the trade on his own account until 1872, when he came to Chicago and associated his son, Tappin K., in business with himself, under the name of M. B. & T. R. Swezy, carpenters and builders. They did a large business until the spring of 1877, when the firm was dissolved, and since 1879 Mr. Swezy has carried on the trade by himself. Among the many fine buildings erected by him, under the firm name of Swezy, are the residences of R. A. Hall, Mrs. Eddy, Samuel Shackford, and Dr. Theodore J. Bluhardt. For the last ten years he has done a
large businesses in manufacturing his improved dumb-waiters for cigar-fillings. He employs from fifteen to twenty men in this business.

He was married on March 25, 1844, to Miss Elizabeth F. Pell, of Brooklyn, N. Y. They have five children,—John A., Tappin K., Clarence E., Charles T., and Frederick C. Waddei., is the son of Jeremiah and Mercy (Merrill) Chandler. His parents removed to Boston, when he was about five years of age. He learned the carpenter's trade on fifth street's trading square, at three years of age, and then he was engaged in building churches in the State of New York for seven years. In 1841, he commenced business in Boston as a contractor and builder on his own account, and was employed until 1844, when he organized Co. 48 New York Infantry, serving until the close of the War. He was mustered out in 1845, and came to Chicago, where he entered into partnership with A. L. Gooding, under the firm name of Gooding & Chandler, carpenters and builders. In 1850, the firm was dissolved, and Mr. Chandler has since carried on the business alone.

His firm of contractors and builders was established in 1856, by Charles C. Fowler and George Carr.

They have built a large and prosperous business, and have erected many elegant residences in Chicago, Hyde Park, and elsewhere, among which may be mentioned one for F. A. Hubbard on Lake Avenue, between Oakwood Avenue and Brooks Street; three for R. W. Dunham, on Lake Avenue, near Thirty-ninth street; two for Edward Silvey; two for Mrs. Clark on Ellis Avenue; one for C. H. Fowler, at Winona, Ill. They also remodeled Petal Hall. They employ about twenty-five men, and do a business of $60,000 annually.

Charles C. Fowler was born at Kingston, Canada, on November 27, 1829, son of Samuel and Frances Fowler. He learned the carpenter's trade at Kingston, and worked at it there about seven years. In 1842, he went to Scotland, where he was employed at his trade and where he learned the profession of an agent. In 1845, he moved to London, England, remaining one year, when he returned to Canada. In 1866, he came to Chicago, and engaged in the building business with George Carr, as a member of the present firm. He is member of landmark Lodge No. 242, A. F. & A. M. Mr. Fowler was married, on June 16, 1859, to Miss Frances Carr, of Kingston, Canada. They have five children,—Gordon, Herbert, Mary, Susie, and Bessie.

Charles C. Waddei, was born at Sheerness, Kent, England, on April 11, 1833, and is the son of George and Mary (Kepp) Carr. He learned the carpenter's trade, when he was fourteen years old, from his father, who was a carpenter and builder at Kingston. After working at that trade in that city, he commenced business on his own account which he followed until 1866, when he came to Chicago and entered into partnership with Charles C. Fowler. Mr. Carr was married, on June 16, 1860, to Miss Elizabeth Ann Lark, of Kingston, Canada. They have three children,—Bertha M., George E., and Ralph L.

FREDERICK C. HEATH was born at Windsor, Broome Co., N. Y., on December 14, 1833, and is the son of Asa and Mercy (Gore) Heath. He came to Chicago in 1841, and, after clerking one year in the store of his brother, Francis C. Heath, was employed in steamboating on the Mississippi and Missouri rivers until 1851. In 1851, he returned to his native city, the government there employing him in forwarding the material on the canal, and was then employed by Newton Chapman in bridge-building about three years. He worked about a year with L. B. Boomer, and then with C. E. Fuller, building bridges in Tennessee. In 1857, he returned to Chicago, and commenced business on his own account as a carpenter and builder, since which time he has been actively engaged in the trade. He built a fine residence on Forty-seventh street, in Hyde Park, for N. S. Bouton; six houses for F. H. Winston, on Division Street; six houses for Judge Waite, three for Mrs. R. M. Dorman, and many others in all parts of the city and suburbs. Mr. Heath was married, on February 10, 1850, to Mrs. Jane Ayres.

WILLIAM G. WADDELL was born at Gallopedia, Galla Co., Ohio, on November 25, 1822, and is the son of James and Temperance (Co.) Waddei. His parents removed from Crawford to a small farm in Michigan City, Ind., in 1831, where they remained two years. A short time subsequently, they moved to Chicago, Ill. In 1838, they settled at Freeport, Ill. Mr. Waddei learned the carpenter's trade from his father, who was a carpenter and builder, and engaged in business at Freeport, on his own account, in 1842, when he followed it until 1874, when he came to Chicago, and formed a partnership with George Ann, under the firm name of Waddei & Rennell, contractors.

In 1859, the firm was dissolved, since which time he has been in business for himself. He has been an extensive builder, and has erected a large number of residences in the city. He built sixty for Jerome Beecher, on Indiana, Calumet, Forest, and Prairie avenues, before 1874, all one hundred elegant residences in Chicago, these being only a few of the many he has erected. He belongs to the Masonic fraternity, and has taken all the degrees up to and including the thirty-second. This firm was dissolved, in 1855, by John H. Howt, and was employed by the National School Furniture Company, in the manufacture of school-desks. In 1875, he commenced business as a stair-builder on his own account. He now employs from twenty-five to fifty men, and does a business of $100,000 annually. He built ninety-two flights of hardwood stairs for John V. Farwell & Co.'s wholesale store, at a cost of $25,000. He constructed the stairs for Mandel Broders, on State Street, for the Imperial Building, for Courtice & Huber, for the residence of Mr. Potter Palmer, and many others in all parts of the city. He was married, on April 14, 1882, to Miss Jennie Conklin, of Dubuque, Iowa, who worked at that trade at Sheerness until 1857, and around London until 1869, when he came to Chicago. After his arrival here he was employed as a journeymen carpenter by different contractors until 1851, when he entered into partnership with Charles C. Crowhurst. In 1854, he was married, on April 14, 1856, to Miss Mary Hughes, of Sheerness, England. They have seven children,—Mary Ann, Eleanor, Herbert, Emma E., Edgar G., Walter and Frank.

Charles C. Crowhurst was born at London, England, on March 12, 1848, and is the son of John and Emma (Cole) Crowhurst. He learned the carpenter's trade from his father, who was a contractor in London, England, and worked for him until he came to Chicago, and was employed by Messrs. Hopkins & McComb, contractors, two years. He then went to work in the shops of the Chicago & Alton Railroad Company, where he remained five years; afterward he was with Thomas Gunnill, an old contractor, for a year; and then formed a partnership with James H. Howt. Mr. Crowhurst was married, on September 6, 1884, to Miss Elizabeth Cousins, of Austin, Ill.

D. WADE & CO.—This firm of contractors and builders was founded in the spring of 1853, by Daniel Wade and Thomas R. McKilip, since which time they have built for the government of the United States, and all other parties, including the builders of the capital of that territory. In 1854, they built and shipped one hundred and four houses to Buenos Ayres, South America. Being what they term ready-made houses, the material for each house is cut, fitted and numbered, so that when shipped, it is shipped in such a way as to be ready for the customer, who, when he receives it, can build to his own taste and fancy.

Daniel Wade is the son of John and Elizabeth (Race) Wade, and was born on the Isle of Man, on August 23, 1837. He learned the trade of a builder in his native place, where he worked at it until 1850, when he came to Chicago. Here he commenced the building of portable houses; but since 1878, he has been engaged in the trade of his ready-made houses, which he has shipped to Cuba, South America, India, and in fact to nearly all parts of the world. Mr. Wade is an Episcopalian. He was married, on April 15, 1858, to Miss Isabella Chinn Bishop, of the Isle of Man. They have seven children,—Myra Isabelle,
John James, Elizabeth Margaret, Evan Henry, Malcolm C., Walter H., and Mona Amelia.

Wade Killick is of Irish descent, and was born at Kenosha, Wis., on October 26, 1861. His parents were William and Bridget (Kearny) Killick. In his younger days his father was a prominent engraver at the greenery trade at Kenosha, Wis. After leaving school, Thomas clerked in Chicago for W. H. Calvin & Co., brokers and commission men, and the Western Union Telegraph Company, until 1879, when he commenced work for Mr. Grafton, builder of portable houses and railroad-cars, with whom he remained until the formation of the firm of D. Wade & Co. He is a young man of good ability, and thoroughly understands his business.

Sparr & Weiss, manufacturers of mouldings, Nos. 196-202 North Union Street, was organized as a firm on June 15, 1880. The original capital employed was some $4,000, with a working force of four men. The firm now employs twenty-five skilled workmen, and have a large trade, which is exclusively local. In addition to unfinished mouldings, they manufacture compressed and machine-cut bung-plugs and vent-plugs. The members of the firm are Augustus Sparr and Frank Weiss, both of whom are skilled mechanics in the business.

Augustus Sparr has been a resident of Chicago for nearly twenty years. He was born at Erford, Germany, on September 1, 1861. His father having been connected with the revolution of 1847 was compelled to leave his native land, for political reasons, in 1849, and came to America with his family, locating at St. Louis, Missouri. Here the son then was sent to his mother to Indiana, where they settled on a farm. For some years he followed a farming life, and when quite a boy sawed wood on which was laid the foundations of Chicago & New Albany road, the farm being located about six miles from New Albany. When fourteen years of age, Mr. Sparr went to Cincinnati, Ohio, where he remained until 1857, when he came to Chicago. In 1858, he became a partner in the enterprise which bears his name. Mr. Sparr is a member of the Masonic fraternity. He married in 1859, his wife dying two years later. He married a second time, in 1873, and has four children.—Corina L., Myrtle, Charles L. and Florence.

Frank Weiss has been a resident of Chicago since he was a child. He was born in Bavaria, in 1849. In 1852, his parents came to America. They stopped at New Orleans, at various points along the Mississippi River, and finally located in Chicago. Here the son was educated and learned his trade of wood-worker, in which line he has been engaged for seventeen years, for some time with Sammons, Clark & Co. In 1869, he entered into a partnership with Augustus Sparr. He is a member of the Foresters. His parents are still living in Chicago. Mr. Weiss was married in Chicago, in 1877, to Miss Annie Sutterle; they have three children.—Dellie, John and Frank.

Harvey Sheeler was born on August 25, 1849, in Canada, where his father was engaged in farming. He was here until August 16, 1850, when he enlisted in Co. "F," 1st Regiment Illinois Volunteer Infantry. He served in the Army of the Potomac, and did much hard service. He was mustered out with his regiment in 1865, and returned to the vicinity of Chicago, where he followed farming until 1878, when he engaged in the building of houses, mowing and raising, in which he still continues. He moved all the buildings from the right-of-way of the Chicago & Western Indian Rail Road within the city limits, the contract price of which was $850,000. He has moved a large number of buildings all kinds in all parts of the city, and has done much work in Grand Rapids, Indianapolis, Louisville, St. Louis, and St. Paul. He was married, on May 15, 1879, to Miss Mary O'Connor, of Chicago. They have one child,—Harvey.

Marble and Stone Manufacturers.—The increase in wealth has resulted in the erection of more ornate private residences. This remark holds true in the case even of those houses erected for purposes of renting. An illustration is afforded by the increase in the number of marble and stone workers since 1879, as shown by the census returns for that year and 1880, which are given below in tabular form. Stone fronts are far more common in private residences than before or for some years after the fire, and stonecutters find their resources tapped to the utmost to supply the constantly increasing demand, a large proportion of which is local. Limestone and sandstone are the most commonly used, coming chiefly from Ohio, although Joliet stone has become very familiar to Chicago citizens. Marble is used comparatively infrequently, except in interiors. Very handsome work in this material is done in not a few yards in this city. Of late years, however, the prevailing taste for interior decoration has demanded wood of different varieties, and the trade has not been without an influence on the marble workers.

A considerable business has within a comparatively few years sprung up in artificial stone for interior work, and some very large contracts for work and material of this sort have been performed. Much of the ornamentation of the Board of Trade building and of many office-buildings are illustrations.

As in the case of the brick manufacturers, the only statistics obtainable relative to the trade are those in the U. S. census, which are here given:

Emmanuel Earnshaw was born in 1828, near Huddersfield, Yorkshire, England. He is descended from a family of builders, and was early trained to the same business. At the age of thirty he located in this city, where he has ever since been prominently identified with the building interest. His first work was in connection with the cut-stone industry. After the fire, he engaged in the building business, and resulted most of the bridges that were destroyed in the conflagration. He also built the West Side Water Works, and had full control of the erection of the crib. Since the dissolution of a former partnership, he has built the Ontario Flats, the Ryerson Building, St. Luke's Hospital, and the Rosenfeld Block. He was one of the founders of the St. George's Society of this city, and has always been an active member of that body. He has been a member of the Masonic fraternity for about fifteen years. He and his family are active supporters of Professor Swing's Church. Mr. Earnshaw married, in England, Miss Mary Brook. They have two children,—Charles (a builder) and Emily (now the wife of Byron F. Rush).
he formed the present partnership. He has been very successful in all his undertakings, and has reason to be proud of the extensive business thus built up. Mr. Furst is a member of the American Lodge, No. 669, A.F. & A.M., and of Wiley N. Eggin Chapter, No. 126, R.A.M. He has also been a member of the Germania Bruderbund Society for twenty-seven years. He was married, on April 10, 1856, to Miss Julia Gerhardt, of Chicago, formerly a resident of Lege- 
feld, Saxony. They have one child,—

Henry, Jr.

Peter H. Neu was born in Germany, on June 12, 1836, and is the son of John and Maria (Weber) Neu. He commenced to learn the stone-cutter's trade in 1852, in his native place, where he worked at it for six years. In 1858, he came to Chicago, and was employed one year as a journeyman stone-cutter, after which he entered into partnership with his uncle Peter, under the firm name of Peter Neu & Co., cut-stone contractors. They carried on the trade together until 1874, when the firm was dissolved. After this, he worked as a journeyman stone-cutter (five years with Henry Furst, Sr.) until the present firm was formed. Mr. Neu was married, on January 10, 1852, to Miss Annie Lutz, of Chicago. They have one child,—Clarence.

Henry Furst, Jr., was born on November 19, 1863, and is the son of Henry and Julia (Gernhardt) Furst. He attended the public schools of Chicago until 1880, when he entered Yale College, and took a business course of about two years. He then returned home and worked for his father until March, 1885, when he became a member of the present firm.

James Batchen was born in Scotland, on May 26, 1829, and is the son of Alexander and Isabella (Allen) Batchen. About 1845, he was apprenticed to his brother, who was a cut-stone contractor for whom he served four years, thoroughly learning his trade. He then went to Edinburgh, Scotland, where he was employed as a journeyman stone-cutter about four years. In 1853, he came to America and settled at Washington, D. C., where he worked at his trade on many of the finest buildings in that city. After remaining there about ten years, he came to Chicago, and for some years was employed as a journeyman. He afterward sold his property in this city and went to Louisville, Ky. He returned to Chicago in 1869, and commenced business as a partner in the firm of Taylor & Batchen, cut-stone contractors, at corner of Harrison and Franklin streets. This firm carried on the business until 1875, when Mr. Taylor died and the firm was dissolved. Soon afterward Mr. Batchen formed a partnership with John Smith, under the style of Batchen & Smith, and in 1881 moved to present location. They continued the trade until the death of Mr. Smith, which occurred in January, 1895, and since then Mr. Batchen has carried on the business by himself. During his residence in Chicago he has furnished the cut-stone for many of the finest buildings in the city, among which are the Singer Building, fourteen fine residences on St. John's Place, eleven stone-front residences on Washington Avenue; the Masonic Hall on Cottage Grove Avenue; Mr. Furst's residence near Thirty-eighth Street; six marble-front residences in Ellis Park; a fine block of buildings on Cottage Grove Avenue, near Thirty-seventh Street; the elegant residence of George Hoyt, on Twenty-fifth Street; the administration building and isolated pavilion of the Cook County Hospital; and many others in all parts of the city and suburbs. He is a member of Cleveland Lodge, No. 211, A.F. & A.M.; of Englewood Lodge, No. 615, F.O.E., of Washington, D. C.; and of Illinois Council, No. 615, Royal Arcanum. Mr. Batchen was married, in October, 1858, to Miss Eleanor Pauline, of Hot Springs, Wis. They have three children,—John S. F., James P., and Margaret S.

John S. F. Batchen was born at Ithaca, Ind., on October 24, 1859, and is the eldest son of James and Eleanor (Pauline) Batchen. His parents removed to Washington, D. C., when he was quite young; where they remained until 1865, in which year they came to Chicago. He received an excellent education in the public schools of this city, and of Louisville, Ky., being a pupil there under Professor Henry H. Belfield, afterward principal of the North Division High School, and now director of the well-known Manual Training School. He engaged in business as a wholesale dealer in building stone in 1881 and is northwestern agent for the buff and blue oolitic limestone of the Hoosier Stone Company, Bedford, Ind.; for the Hummelstown brownstone, of Dauphin County, Penn.; and the Potomac red sandstone, of Washington, D. C. Mr. Batchen has established for himself a national reputation on account of his thorough knowledge of the quarrying interests of the United States, and his unflinching energy, as well as his generosity, have been of great benefit to the General Government and to many leading educational institutions. The report on stone construction in Chicago, for the building-stone investigation of the tenth census, was compiled by him. He obtained all the specimens from the Illinois quarries for the building and ornamental stone collection of the United States National Museum, at Washington, D. C. With the exception of a few sent by Professor Allan C. Conover, of Madison, Wis., Mr. Batchen has been the largest contributor of specimens of building stone to the building and ornamental stone collection of the Smithsonian Institute, having sent between three thousand and four thousand specimen cubes from different quarries, located all over the United States, Mexico and Scotland. Sample cubes were sent by him from the quarries on the line of the following railroads: Atchison, Topeka & Santa Fé, Hot

MICHIGAN AVENUE, NORTH FROM THIRTY-FIRST.
Springs, Atlantic & Pacific, Missouri Pacific, Chesapeake & Ohio, Kansas Pacific, St. Louis, Iron Mountain & Southern, Peninsula & Atlantic, and two trunk lines of the conterminous United States. He did a cut-stone business for many of the finest buildings in this city and throughout the United States. He took an active part in the formation of the Carbondale Brown-Stone Company, of which he was now president and treasurer. He lived and died in his native city, and left a large collection of buildings of the best materials built by his firm.

**McFarlane & Gibson.**—This firm was established in 1882, by Norman McFarlane and Alexander F. Gibson. They are cut-stone contractors and dealers in rubble and facing stone. Their yard is supplied with mills and power, by which they saw and prepare the material ready for building. They have erected some of the finest residences in the city, among which are a green-stone residence of W. R. Lynn, the Pennsylvania gray-stone residence and barn of George V. Hankins, the residences of Mr. Spafford and Mr. Mills, near Garfield Park. They employ about twenty-five men, and business is very prosperous.

Norman McFarlane was born at Cupar Angus, Perthshire, Scotland, on January 4, 1846, and is the son of William and Elizabeth (Will) McFarlane. He learned the trade of a stone-cutter in Philadelphia, in which he worked until he moved to London, England, and one year in Glasgow, Scotland. He came to America in 1869, and was employed at his trade, in New York City, for about three years. In 1872, he moved to Chicago and worked as a journeyman stone-cutter until 1882, when he became a partner in the present firm. Mr. McFarlane was married, on January 1, 1865, to Miss Elizabeth Christie, of Loch Side, Forfarshire, Scotland. They have three children,—Jennie, George, Elizabeth, Norman, Thomas and William.

Alexander F. Gibson was born at Drumblithie, Kincardineshire, Scotland, on April 7, 1845, and is the son of George and Margaret (Keith) Gibson. He learned the trade of a stone-cutter in Philadelphia, in which he worked until he moved to London, England, and one year in Glasgow, Scotland. He came to America in 1869, and was employed at his trade, in New York City, for about three years. In 1872, he moved to Chicago and worked as a journeyman stone-cutter until 1882, when he became a partner in the present firm. Mr. McFarlane was married, on January 1, 1865, to Miss Elizabeth Christie, of Loch Side, Forfarshire, Scotland. They have three children,—Jennie, George, Elizabeth, Norman, Thomas and William.

**Ebertshaeuser & Riley.**—This firm of cut and sawed stone contractors was established in 1852, by Henry Ebertshaeuser and George Riley, for the purpose of taking contracts and doing a general business in stonework. They have a large yard and saw-mill, and prepare the stone for their customers.

They have erected many fine buildings in this city, a few of which are St. Malachi's Church and school, the finest residence of C. Watrous, their five residences on South Park Avenue, near Thirty-fifth Street, and the elegant residence of Mr. J. G. Van Rensselaer. They have employed about twenty men, and do a business of $50,000 annually.

Henry Ebertshaeuser was born at Fischbach, Nassau, Germany, on April 5, 1819, and is the son of Jacob and Anna (Grisar) Ebertshaeuser. His parents came to America in 1827, and settled in Chicago, where he learned the trade of a stone-cutter, when he was fourteen years old, from Peter Neu, for whom he worked four years.

He then employed as a journeyman stone-cutter about five years, and, in 1852, entered into partnership with George Riley, under the present firm name. He was married, on April 23, 1855, to Miss Magdalena Zuber, of Germany.

George Riley was born in Kings County, Ireland, on March 7, 1825, and is the son of John and Elizabeth (O'Maley) Riley. When he was thirteen years of age, he was apprenticed to a stonemason. He lived several years. In 1852, he came to Chicago, and was employed by Fletcher Brothers, cut-stone contractors, for about six years, and also by Henry Forst, for about four years, when they were both in partnership. In 1856, he joined the present firm. Mr. Riley was married, on July 28, 1853, to Miss Margaret Hitchcock, of Chicago. They have five children,—Mary, John, Elizaibeth, Margaret, and Catherine.
Bay, Ontario, Canada, yielding the finest quality of stone for building purposes, which is rapidly gaining on that city as the center of stone quarrying. The firm employs seventy-five men, and does a business of $125,000 annually.

Cuthbert McArthur was born at Chicago, on February 22, 1830, to Mr. and Mrs. McArthur. He was educated in the public schools of Chicago, having passed through all the grades of the Brown School, from which he graduated in 1854. He was employed as draughtsman by the Board of Public Works, 1856 to 1872, in the father's foundery, until 1877. During 1876, he was in San Francisco, superintending the putting up of the iron-work on the Sub-Treasury Building, which was finished the same year as draughtsman in the Cook County Recorder's office, in 1878 he was engaged, with James Lillie, in the construction of the Illinois Eastern Hospital for the Insane, at Jacksonville. In 1889, he entered the employ of two real-estate dealers, as a clerk in their office, and remained with that firm until he was elected secretary of the Chicago & Vert Island Stone Company, which position he now occupies. Mr. McArthur was also appointed secretary of the Board of West Chicago Park Commissioners on April 1, 1885.

E. L. Kastholm & Co.—This firm of cut-stone contractors was established in the spring of 1884, by Emil Jacob, Peter Ambrosini, and Peter Spang. Although they have been in business but one year, they have had a splendid trade, and have erected many important buildings, among which are the Emerson School, the Brown School, the Public Library, the Stock Exchange, the elegant residence of E. Murren, and the residence of Mr. Maynard. They employ about twenty-five men, and last year did a business of $25,000.

Gabriel Jacob was born in Vinciaturo, Italy, on February 8, 1849, and is the son of Bernardino and Mary (Lembo) Jacob. He learned the trade of a stone-cutter in Italy, in 1864, working at it there until 1873, when he came to America. He was employed at his trade a year and a half at Kingston, N. Y., and then went to Canada, where he worked on the Welland Canal about two years. In 1877, he came to Chicago, where he found employment at his trade until he became a member of the present firm, in 1884. Mr. Jacob is a member of Home Lodge, No. 416, A.F. & A.M. He was married, on February 23, 1874, to Miss Jennie A. Cornell, of Kingston, N. Y., and they have four children,—Henry B., May L., Joseph, and Alice A.

Peter Ambrosini was born in Italy, on October 6, 1852, and is the son of Donato and Maria Ambrosini. When fourteen years old, he learned the trade of a stone-cutter, and worked at it fourteen years. He came to Chicago in 1868, and was employed at his trade, as a journeyman, for four years, when he became a member of the present firm. He was married, on January 14, 1888, to Miss Linda Gnocchio, of Chicago.

Peter Spang was born in Germany, on June 22, 1835, and is the son of John and Mary (Cetto) Spang. After having served in the German army for several years, in 1862 he commenced to learn the stone-cutter's trade, and worked at it in his native country about four years. He came to Chicago in 1866, and worked here as a journeyman for eighteen years, when he became a member of the present firm. Mr. Spang was married, on June 13, 1865, to Miss Mary Kost, of Aurora, Ill. They have one child,—Kate.

Michael A. Jacob is a native of Italy, and was born on October 19, 1856, to Mr. and Mrs. Jacob. He learned the trade in his native country in the fourteenth year of his life, and was employed on that country until his sixteenth year, partly learning the trade of stone-cutter. In 1875, he came to America, and, after passing a few months in Canada, came to Chicago, where he has since permanently resided. For many years he was carver in the stone-yards of Tomlinson & Reed and his fine workmanship has become well known. In 1884, when the firm of E. L. Kastholm & Co. was formed, Mr. Jacobs took an interest in the concern and remained so until the present time. Mr. Jacobs is well known among many stone contractors of the city, and his firm has already become prominent and successful, owing to the superior work that is turned out of their shops.

The Pioneer Fire-proof Construction Company came into existence as a stock company in November, 1859, under the title of the Ottawa Tile Company, which name has since been changed as above. Henry B. Moulton, president; A. T. Griffin, vice-president; and E. V. Johnson, secretary, treasurer and general manager. The company was organized for the manufacture of the hollow tile used in fire-proofing buildings, the invention of Mr. George H. Johnson. Kastholm, the first firm to have erected the first hollow flat arch and partition wall in America were constructed in the Kendall Building (now known as the Equitable Life Assurance Society Building), on the southwest corner of Washington and Dearborn streets, this city, in all of which buildings, most of that building are built of hollow tile. The clay used in the manufacture of the hollow tile is obtained in Ottawa, Ill., where the buildings of the company are situated. For the first fourteen years, the firm was directed by Mr. Wright and for a few years afterwards by Mr. Tomlinson. Some of the most massive structures ever erected in Chicago were fire-proofed with hollow tile, among which are the Board of Trade and Pullman Buildings.

George H. Johnson, among the most prominent architects of the age, was born in Manchester, England, in 1830, and was the son of Isaac Johnson, a hatter and furrier. He received his early education at Kingston, Wales, and at the age of sixteen was employed by Robert Nell & Sons, manufacturers and builders of the city. Being gifted with a natural talent for architectural mechanism, he made rapid progress in his studies, and after three years of apprenticeship, established himself at Kingston, in 1852, accompanied by his wife and child, he came to America, and immediately became the manager of the Architectural Iron Works in New York City. He filled that position for ten years, during which time he became thoroughly versed in the iron-work placed by the company was designed and finished by him, and as a token of appreciation of his services he was given a certificate by the president of the company for that effect, in 1874. During the period he was in their employ, he designed and executed many prominent iron buildings, among which are the United States warehouse, at Atlantic Dock, Brooklyn; the United States Arsenal storehouse, at Westervelt, N.Y.; the Singer Building in New York; the George & Baker Sewing Machine Building, made in the original form of a gothic window; the Gilsey Office Building, in New York; and many others equally well known. He came to Chicago in 1866, at which time he erected, under the direction of J. M. Morgan, three iron-front buildings on Lake Street, for T. Tuttle and others, re-creating then the grand possibilities for Chicago, little thinking of the revolution in fire-proof buildings which his future inventions would cause. Being then in the service of the Architectural Iron Works, he returned to New York, and, after severing his connection with that company two years later, started business for himself, and added largely to his reputation as an architect to that city. Immediately after the close of the Civil War, he went to Richmond, Va., and put up a number of prominent buildings. After remaining there two years, he went to Baltimore in 1867, and was interested with W. C. Howard, Bartlet & Co. In 1869, he left this firm and remained there until 1871. While in Buffalo, he built the Niagara and Plympton fire-proof grain elevators, besides other buildings of note. In the early part of 1872, he took an interest in the movement through Europe, studying the ancient and modern designs of architecture on the continent; and on his return to New York City, he went earnestly to work to perfect his original inventions in fire-proofing. On October 12, 1871, he came to Chicago, and when surveying the smoking ruins of this great city, conceived the idea of fire-proof hollow tiling for buildings; so that from the greatest holocaust in the history of the world comes the greatest invention for the perpetuation of perfected architecture. Following out his original designs, he built, in the spring following, the first fire-proof building ever erected on this continent; and although the originator of the recent building material, he gave the credit of the invention to those who lived two thousand years before his time, and only claimed the revival of a lost art used by the Egyptians many years before the birth of Christ. From the Kendall Building he obtained other contracts and erected the Commercial and Dearborn House, in 1854, business in Chicago having fallen off, owing to the amount of building done the three years previously, Mr. Johnson went to New York, and commenced business there. In May of the same year he again went to Europe, and studied the particular architecture of each country throughout Continental Europe. Upon his return to America, he entered with spirit upon the material, and brought forward his inventions in New York City; but owing to the lack of appreciation of his advanced theories regarding fire-proofing, he met with but little encouragement, and returning to Chicago in September, 1877, he formed a partnership with Mr. Johnson, the firm name being Johnson & Co., continuing until his death, which occurred in 1879. Mr. Johnson was twice married,—first in May, 1851, to Miss Maria Selkirk, of Manchester, England, by
Frank M. Nichols was born in the State of New York, on September 24, 1854, and is the son of Louis and Emeline (Fish) Nichols. His mother was a niece of ex-Secretary Hamilton Fish. 

Nichols came to Chicago in 1854, and engaged in mercantile pursuits until 1861, when he commenced the publication of The Reporter, a monthly journal devoted to the interests of marble and granite cutters, modelers, and plaster makers actively employed, and new designs are continually being produced. He is now fitting up a marble and granite display rooms, where he has on hand a full supply of all kinds of stone tools, and material used in the trade. He carries on the business under the firm name of Nichols & Co., and in the course of the year supplies goods to as many as 500 different jobbers. 

He employs from fifteen to twenty men, and does a business of $80,000 annually. Mr. Nichols was married, on May 24, 1877, to Miss Minnie Hudson, of Cincinnati, Ohio.
MASON CONTRACTORS.

JAMES McGRAW, a resident of Chicago since 1839, and well known as a leading building contractor, was born in Jefferson County, N. Y., on February 1, 1827. His father, James McGraw, was a farmer, and his mother was Phoebe Thompson, a lady of French descent, born at Broome, N. Y. The family resided in the State of New York until James was eight years of age; they then removed to Kalamazoo, Mich., where he resided until 1859, when he came to Chicago in that year. James attended private schools during his residence at Kalamazoo, and when he came here he was apprenticed to A. S. Sheppard, a contractor, with the view of learning the trade of mason and plasterer. In 1846, young McGraw, then nineteen years old, started in business on his own account, and, by hard, honest toil, won a good reputation and amassed the means which bought him a comfortable home in the West Division. In 1871, Mr. McGraw formed a partnership with Joseph Downey. The fire of 1871, called out their greatest efforts, and they were constantly engaged in constructing large and prominent buildings in the business quarter. The partnership continued until August, 1883. During their connection they erected such buildings as the Cook County Infirmary, at Jefferson, taking the entire contract for the same; Hervey's Theatre; Harlem Theater; the Jewish Synagogue, corner of Michigan Avenue and Fourteenth street; and the Lyceum Theatre, which is owned by McGraw & Downey; and many others. Mr. McGraw erected the first building on Chicago Avenue after the fire of October 9, 1871,—a two-story structure, for James Egan, on Madison street, near Fifth Avenue. Mr. McGraw has been a quiet, industrious business man during his residence here, and enjoys a splendid reputation as one of the leading contractors of the city. Twenty-five years ago Mr. McGraw erected a residence on West Adams Street, then in the most fashionable residence district on the West Side; but the changes of time and the enlargement of the business district in the West Division has surrounded his home with mercantile establishments. Notwithstanding, he continues to reside in the "old home," made pleasant and inseparable to him by the memories of bygone days. He was married, on January 1, 1857, to Roanna, daughter of the late Rufus B. Ormsbee, of this city. They have had two daughters,—the youngest of whom, Clara, the wife of Joseph Downey, died on March 17, 1885, in Allentown, S. C.; their son, James, is a child of the family.

WILLIAM PRICE & SON.—This firm of masons, contractors, and builders was organized in 1880, by William Price and William D. Price, to continue the building business commenced many years ago by the senior partner. They have been very successful, and have erected many fine buildings, a few of which are the barns of the West Side Street Railway Company; a building for John Kedzie, on West Madison Street; the residence of J. H. and Z. Gage, on Grant Boulevard; two residences for Charles H. Curtis, on the corner of Cottage Grove Avenue and College Place; and Troscher's Building on Market Street.

William Price was born in the City of New York, on November 15, 1821, and is the son of Cornelius and Nancy (Maloy) Price. Soon after his birth, his parents removed to Watkins, Schuyler Co., N. Y., where they resided until 1835. William Price has a younger brother George, and a elder brother, James, both of whom are prominent in the building line. He learned the trade of a mason from his father, and worked at it, either as a journeyman or on his own account, until 1847, when he formed a partnership with his brother Cornelius. They carried on the business together about ten years. In March, 1857, he was appointed postmaster of Chicago, but was removed by President Buchanan, the following March, for being a friend and adherent of Stephen A. Douglas. In 1868, he became postmaster of the Chicago Times, which he controlled until 1866, when the establishment was sold to Cyrus H. McCormick. In 1861, he was appointed an aide on the staff of General Hunter, with the rank of major; but, after serving about a year, he was compelled to resign on account of ill-health, when he returned to Chicago, and in the next year commenced business at his trade, which he carried on by himself until 1871, and then formed a partnership with Ansel B. Cowdrey, who served as his partner for about six years. He then entered into a partnership with William D. Price, his son, under the name of William Price & Son. Except the time he was postmaster and in the army, he was actively engaged as a builder. He erected the old Tremont House, Rice's Theater, the American Express Company's building and barns, the Bryant Block, the Transi House (at the Union Stock Yards), the Rock Island car-shops, the Court House, Jackson street, and many public and private buildings in the city and suburbs. In 1866, he sold his residence in Chicago, and removed to Libertyville, Lake County, and resided in the old farm house, which he served as supervisor of his township, and has held the position of supervisor for several years. He returned to Chicago in 1879. In 1870, he was a member of the Legislature from Lake County. In 1853, he was a candidate for Congress on the democratic ticket. Mr. Price was married to Miss Martha J. Devoe of Chicago, who died on January 31, 1885.

William D. Price was born on September 25, 1828, in Chicago, and is the son of William and Martha J. (Devoe) Price. He received his education in the public schools of this city, afterward attending the Illinois College, in the course of his education he formed the mason's trade from his father and uncles, for whom he worked until 1850, when he entered into partnership with his father, under the firm name of William Price & Son. He was married, on December 29, 1851, to Miss Emma McNab, of Libertyville, Ill. They have one child,—Grace M.

WILLIAM E. MORTIMER was born in Devonshire, England, on June 7th, 1835, and is the son of William and Mary A. (Cook) Mortimer. He learned the trade of a mason from his father and uncle, for whom he worked until he was about twenty-one years of age. He came to Chicago in 1840, and was employed as a journeyman mason for two years by Mr. Lyon & Co. In 1842, he was engaged in business on his own account as a mason and contractor, which he carried on until 1855, when he formed a partnership with N. P. Lobberg and George Tapper, under the firm name of Mortimer & Lobberg. This firm carried on the business from 1855 to 1859, during which time they built a number of fine business blocks.

In 1859, Mr. Mortimer assumed the business, and continued it until 1864, when he formed a partnership with N. P. Lobberg and George Tapper, under the firm name of Mortimer, Lobberg & Co. They built the Chicago University and other large buildings. In 1866, Mr. Lobberg retired from the firm; and from that time to the present his business has been conducted by Mr. Mortimer and George Tapper, and they have done as large a business as any firm in the city. In 1866, they built the Michigan Southern Depot on Van Buren Street; the year following, the Northwestern University at Evanston, and the Atlantic Hotel, of this city, in the early part of 1871. Immediately after the fire of 1871, their business was immense. They built the Kenton House, on Michigan Boulevard, the Calvert Building, and the Home Insurance Company's Building, Mr. Mortimer has been a member of No. 305, A.F. & A.M.; Corinthian Chapter, No. 69, R.A.M.; Chicago Commandery, No. 19, K.T.; and Oriental Consistory, S.P.R.S. 32'. Mr. Mortimer was married, on November 22, 1853, to Miss Mary J. Linton, a native of Somerset, England. They have six children,—William H., Matilda J., Ida May, Charles J. and Laura Belle.

George Tapper is the son of William and Ann (French) Tapper, and was born on May 25, 1835, in Devonshire, England. He partially learned his trade from his father, who was a mason, and in England in 1852, coming to Chicago, where he has since resided. After his arrival in the city he was employed by Mr. E. Mortimer and other parties, until 1864, when he became a member of the firm of Mortimer, Lobberg & Co. Mr. Lobberg withdrew from the present partnership, in the latter part of 1866, and Mr. Mortimer & Tapper was formed, since which time Mr. Tapper has devoted his entire energies to the advancement of the interests of the firm, and has every reason to feel proud of the success he has attained. Mr. Tapper is a member of Ashlar Lodge, No. 308, A.F. & A.M.; Washington Chapter, No. 43, R.A.M.; Chicago Commandery, No. 19, K.T.; and of Oriental Consistory, S.P.R.S. 32'. He was married, on March 31, 1853, to Miss Arabella Mortimer, of Chicago, by whom he had one daughter,—Maria, now Mrs. Fiskett. He was married a second time, on May 24, 1867, to Miss Jane Thomson, of Chicago. They have three children,—George F., William R. and Elmer L.

George Chambers was born in England, and, after obtaining a fair education in the public schools, he served his trade at his master's trade. In 1852, he came to America, locating at Cincinnati, Ohio, for about six years. In 1858, he entered into partnership with William D. Price, his son, under the name of William Price & Son. Except the time he was postmaster and in the army, he was actively engaged as a builder. He erected the old Tremont House, Rice's Theater, the American Express Company's building and barns, the Bryant Block, the Transi House (at the Union Stock Yards), the Rock Island car-shops, the Court House, Jackson street, and many public and private buildings in the city and suburbs. In 1866, he sold his residence in Chicago, and removed to Libertyville, Lake County, and resided in the old farm house, which he served as supervisor of his township, and has held the position of supervisor for several years. He returned to Chicago in 1879. In 1870, he was a member of the Legislature from Lake County. In 1853, he was a candidate for Congress on the
erected many of the finest churches in the city, among which may be mentioned the Board of Trade and the Church of the Messiah, and Unity Church. Of late years he has paid considerable attention to the construction of tunnels and aqueducts, and has been engaged upon some of the largest tunnels in the Eastern States. He has been the designer of the Detroit River Tunnel, the Alton and Water Works tunnel, and is now engaged in the construction of the New River aqueduct, which extends from Crotone Reservoir to Harlem River. Mr. Chambers is now engaged on the building of a large lock at the village of Ogdensburg, which was known as.ManyToManyField.

John Sutton, contracting plasterer of this city, was born at St. John's, N. B., on September 26, 1819. His father, John Sutton, was also a plasterer, and in his day one of the largest contractors in this line of work at St. Johns. The subject of this sketch served an apprenticeship with his father, after which he went into business on his own account. In 1841, he went to New York, and followed his trade in that city until 1849, when he came West on a speculating trip, stopping for a brief season in this city, but finally locating at Clarksville, Tenn. At the breaking out of the Civil War, he returned to this city to once more take a position among the enterprising contractors in the building line. Among the buildings now standing as memorials of his work, may be mentioned the First Presbyterian Church, the private residences of J. W. Doane and J. D. Mills, and the Honore Block. Mr. Sutton has ever taken an active interest in all matters tending to the advancement of society. He has been an active member of the Masonic fraternity for over twenty years, and has held a number of offices in the various bodies of that order. He is a member of Apollo Commandery, No. 1, K.T.; of Oriental Consistory, S.P.R.S., No. 32; and is a Knight of the Red Cross of Rome and Constantine. He is also an Odd Fellow and a member of the Knights of Pythias. Mr. Sutton has been twice married: first in Lowell, Mass., to Miss Maria S. Kidcut, who died, leaving two sons,—John H. (who is now a farmer), and George H. (a contracting plasterer of this city). Mr. Sutton's present wife was Miss Emily Fitzgerald, daughter of Richard Fitzgerald, of New York City. By this marriage there have been eight children,—three sons and five daughters.

Edwin Sturtevant is the son of Zebina and Jane A. (Storey) Sturtevant, and was born in Verona, N. Y., on January 5, 1841. His father removed to Delavan, Wis., in 1854, where Edwin learned the trade of a mason, at which he worked summers and clerked in the dry goods stores of C. H. Sturtevant and D. H. Wells during the winters, until he enlisted, in 1863, in Co. 'I,' 39th Wisconsin Infantry, of which he was promoted lieutenant, and afterward captain of 'A' of the same regiment. He was engaged in the Red River country just in time to meet General Banks on his retreat. In 1865, he was in the expedition sent to the Rio Grande. He was mustered out of service, with his regiment, in

1866, when he returned home, and there he remained until February 27, 1867, when he came to Chicago, and worked as a mason during the summers and clerked for Field, Leier & Co. in the winter—the brother, when he started in business for himself as a contractor and builder. He built the Singler Building, the Academy of Design Building, the Consecration Building, the Northwestern Loan and Trust Company's Building, the line residences of A. Pymar and D. M. Wells, and the New York and Chicago Trade Building (this contract on the latter building was over $500,000). He is a member of the board of Delavan Lodge, No. 121, A.F. & A.M., of Delavan, Wis. He was a member of the Knights of Pythias, in 1872, to Miss Jennie K. Whitman, daughter of John R. Whitman, of Chicago, and part of Grand Trunk Railroad. They have two children,—Marion and

Wood Brothers.—This firm of contractors and builders was organized in 1871, by Alonso C. and Albert E. Wood, for the purpose of doing a general business as masons, plasterers, and builders. The firm, by its perseverance and good reputation, has grown to be one of the largest and best known firms in the business, and has erected many of the most imposing and beautiful buildings in all parts of the city and suburbs.

Alonzo C. Wood was born at East Farnham, Canada, on December 26, 1844, and is the son of Amos and Nancy (Gage) Wood. His parents removed to Waukegan, Ill., in 1851, where he received a common school education. In 1861, he enlisted in Co. 'C,' 17th Illinois Volunteers, and served in the battle of Prairie Grove, Ark., and was mustered out of the service in 1863. Afterward, he was employed as an army express rider until the close of the war, when he returned home. He came to Chicago in 1866, where he learned the trade of a mason, and was engaged in the contracting business until 1871, when he engaged in the contracting and building business with his brother, Albert E., and the present firm was formed, since which period he has devoted his entire time to the interests of the firm. Mr. Wood is a member of Geo. F. Thomas Post, No. 5. As a Mason, he is connected with Hesperia Lodge, No. 411, A.F. & A.M., and with Wiley M. Eggn Chapter, No. 126, R.A.M. He was married, in 1875, to Miss Agnes Hildreth of Chicago, who died in 1880, leaving three children,—Albert, Harry and Edward. Albert E. Wood is also a son of Amos and Nancy (Gage) Wood, and was born at East Farnham, Canada, on August 5, 1847. He attended the public schools at Waukegan, Ill., until 1866, when he came to Chicago with his parents, and learned the trade of a mason from his father. He worked at the trade about five years, and was employed by Mr. Alonso C. Wood, and has since been an active member of the firm.

W. A. Wells located in this city in July, 1871, and soon opened business as a contractor and builder. Since that time he has erected a large number of buildings of great value, among which may be cited the following buildings: The Exposition Building, the Times Building, Fowler Brothers' packing-houses, Kinner's packing-house, People's Gas Light and Coke Company Building, George A. Seaver's block, Haller & Fuller's drug house, Hiram Sibley's fire-proof warehouses, Continental Building, H. C. Durand's storehouses, and Carey, Ogden & Parker's paint factory. Mr. Wells was born in New York City, on July 22, 1830, where he received his early education. In 1848, he removed to Rock County, Wis., where he continued his schooling at his native place. In 1849, he learned the trade of a mason and, in 1852, when 14 years of age, took an active part in contracting and building at Janesville, Wis., where he remained until he removed to Chicago, in 1871. His operations in the line of his business, however, were not confined to that city, as he built the Court House and Jail at Parkeville, and the Insane Asylum at Janesville. Mr. Wells is a prominent Odd Fellow, and has been a Mason for thirty years; during which time he attained the rank of a Knight Templar. He was married in 1854, at Janesville, Wis., to Miss Sarah H. Harris, daughter of the late James Harris, of Watertown, N. Y., where Mrs. Wells was born and educated. She is actively interested in the philanthropic institutions of our city, and by her husband's influence in the higher social life of her city of society. Mr. and Mrs. Wells have three sons,—Addison E., who became a partner in his father in 1880, under the firm name of W. A. & E. Wells; Fred. A., who is a merchant; and John H., who is a merchant and keeper and cashier of the Massachusetts Mutual Life Insurance Company.

Jas. F. Goble, contractor and builder, was born in Morris County, N. J., on July 1, 1834, and is a son of Robert and Margaret (Martin) Goble. His mother died on August 30, 1835. Father and son came to the West in 1844, and settled in Elgin, Kane Co., Ill., where his father died on January 7, 1860. It was there that Elias was reared and educated, having attended the common schools of Elgin until he became of sufficient age and strength to lend a hand to the trade of mason. After sending him to his apprenticeship, he was sent to the old Galena & Chicago Railway Company and superintended the building of nearly all the arch bridges on that road between Freeport and Chicago, gaining a high reputation for the splendid work he performed. His work of any importance was the construction of the approaches and piers for the second Mississippi River bridge, built at Clinton, Iowa, and he also erected the stone shops at the same place. In 1867, with his family, he removed to Chicago, and at once went into the business of superintending the construction of the Washington and LaSalle-street tunnels, for which work he shared no little credit in the great success of the enterprise. In the great fire of 1871, he commenced business on his own account at the construction of street and road, and many of his works may be seen in the city. Among these may be mentioned the West Side Water Works; the Lillie Avenue Avenue and building works; the Lake erie, a marvel in masonry; the administration building and pavilions of the Cook County Hospital; City engine houses; Folk's Lake and Twelfth-street viaducts; Merchants'
Building, Presbyterian Theological Seminary, Women's and Children's Hospital, McCoy's New European Hotel, and scores of other public buildings of more or less prominence. After the great fire, he re-built the masonry for Clark, Wells, Lake, Adams, Rush and Polk-street and Chicago-avenue bridges, all of which bear the highest credit to his workmanship. Mr. Gobel is a member of the Builders' and Traders' Exchange, and, while still engaged in con-

tracing in this city, is superintending the completion of the State Capitol, at Indianapolis, Ind. He has been a member of the Masonic order for many years, and also belongs to Fort Dearborn Lodge, No. 214, I.O.O.F.

GEORGE MESSESMITH, mason, general contractor and builder, was born in Hess, Germany, in 1842. When only a year old, his parents removed to America, and located at Huntingdon, Penn. The family only resided there about three years, when they came West, and settled at Peoria, Ill., where George was reared and educated, attending the public schools up to his fourteenth year. He then became an apprentice to the trade of masonry and building, and so rapidly did he learn the work that, at the age of twenty-two, he became foreman for many of the best contractors of Peoria. He was ambitious, energetic, and by his natural ability so quickly acquired the details of his trade, that he was recognized as an expert in the business. For several years he was engaged in supervising large contract-work in the principal cities of the United States, but after the great fire of 1871 he decided to locate permanently in Chicago and engage in business on his own account. The opportunities presented to him he took advantage of, and since coming here he has rapidly gained reputation and wealth in his vocation. Among a few of the many buildings that he has constructed are such noted structures as the Rutter Building, Foundlings' Home Building, Cook County Hospital, Western Theological Seminary, Western Electric Company Building, Sheldon & McGaugy's Block, McCoy's European Hotel, McCormick Reaper Works, Consumers' Gas Company Works, besides many of the best and finest residences throughout the city. Mr. Messersmith resides at Lake View, and is the owner of considerable property in that place. He has always been prominent in promoting the welfare of that village, and is highly regarded as a good business man and upright citizen by its residents.

GEORGE LEHMAN & SON.—This firm of masons and contractors was originally established, in Chicago, by George Lehman, in 1871; the present firm was formed by George Lehman and Edwin Lehman in 1883, for the purpose of continuing the same. Although the firm has been in existence but a few years, it has done a very large business. They built, in March, 1883, twenty-four double-front two-story brick residences, on the corner of Western Avenue and Grenshaw Street, having a frontage of four hundred and sixty-eight feet, in nineteen working days. They also built the Belvedere Block, on the corner of Thirty-first Street and Cottage Grove Avenue; the building for the panorama of the Siege of Paris, on Walsh Avenue; the Gaff Building, on LaSalle Street, near Jackson, having ten stories and basement; and many others in all parts of the city and suburbs. They employ about four hundred men, and do a business of half a million dollars annually.

George Lehman was born at Dayton, Ohio, on November 9, 1829, and is the son of David and Eliza (Brandenburg) Lehman. In 1847, he learned the mason's trade in his native place, where he worked until 1854, and then engaged in business there on his own account, which he continued until 1871, when he came to Chicago. While in Dayton, he built the opera house and most of the important buildings there. In connection with his trade, he had two brick yards and a stone quarry, where he manufactured brick and quarried stone for his own use. He came to Chicago in 1871, and formed a partnership with Benjamin F. Gump, under the style of Lehman & Gump. This firm existed three years, and after that Mr. Lehman carried on the business alone until 1883, when the present partnership was formed. He was married on December 14, 1852, to Miss Amanda Abell, of Dayton, Ohio, and has eleven children,—Amanda L., Drusilla B., Edwin, Irene E., Milo R., Lydia, Ibbie J., Maggie, Mary E., Elsie Etta, and Fannie.

Edwin Lehman was born on February 5, 1855, in Dayton, Ohio, and is the son of George and Amanda (Abell) Lehman. After finishing his studies in the public school of his native place, he learned the trade of a mason from his father, working for him from 1872 to 1883, when he entered into partnership with him and became a member of the present firm.

HENRY APPEL was born in Germany, on August 2, 1842, and is the son of Frederick and Johanna (Schmidt) Appel. In 1856, he went to Solingen, Prussia, and learned the trade of a mason, working at it in that city about ten years. In 1866, he came to America, and settled at Sandwich, Ill., where he was a prominent mason two years, and then commenced business on his own account as a mason and builder. In 1871, he came to Chicago, and was employed by Clutting & Howard, contractors, for whom he was foreman one year. In 1872, he formed a partnership with William Mayne, under the name of Appel & Mayne, but the firm was dissolved at the end of a year, and a new one formed with Joseph Seidel in the spring of 1873. This firm existed one year; since that time Mr. Appel has been in business by himself. He built the fine barns at Seipp's Brewery; the Seipp Block, on the corner of Van Buren and Franklin streets, 179 x 140 feet, four stories high; and the Iris block for Hettick & Jung, on the corner of Twenty-fourth and State streets; besides many others in all parts of the city. He was married, on June 4, 1871, to Miss Christine Spohr, of Chicago. They have four children,—Henry L. W., Louis W., Ida Caroline, and Fred. A. L.

JOHN GRIFFITHS is the son of William and Margaret (McKinzie) Griffiths, and was born near Woodstock, Canada, on April 3, 1847. His father was a mason contractor when he learned the trade. In 1869, he went to St. Louis, where he remained a few months; he then went to Grand Tower, Ill., worked at his trade for a few years, and then returned to Canada, and worked at his trade at a few places; in the fall of 1871, he came back to Chi-

icago, where he has since resided. In 1875, he formed a partnership with S. J. Moss, under the firm name of Moss & Griffiths. In
JOSEPH DOWNEY.—One of those residents of Chicago who has demonstrated, beyond the reach of controversy, the truth of the adage that perseverance and pluck, when united to answering the voice of duty, integrity, are bound to succeed, is this well known contractor and builder. Mr. Downey is a self-made man and the truest and best sense of the phrase, and yet is absolutely devoid of the egoism which is so often apparent in those who have been the architects of their own fortunes. He was born in King County, Ireland, on April 23, 1849. Both his father and grandfather were noted builders in their day, having together laid the foundation and erected the observatory for the famous Ross Telescope, the largest in the world, and having also erected the castle of Lord Ross, from whose liberality the famous telescope takes its name. Mr. Downey's father died when he was but five years old; immediately thereafter his mother came to America, bringing her three infants,—Joseph, Thomas (now a foreman of the fire department of Denver, Col.), and Mary (who died some years ago). Mrs. Downey first settled at Cincinnati, where she purchased a home; but owing to her desire to be near friends who were living in Chicago, she disposed of her property in Cincinnati a year or two later and removed to this city. Joseph received his education in the Chicago public schools, and in his twenty-first year began the acquisition of his trade with James McGraw. In 1874, Mr. McGraw took him into partnership and his keen perceptions and untiring energy soon justified the wisdom of Mr. McGraw's selection. It is worthy of remark, in this connection, that while foreman for Mr. McGraw, Mr. Downey laid the foundation of the first building erected in Chicago after the great fire, on Madison street, about fifty feet west of Fifth Avenue, the ground at the time being so hot as to burn the boots of the workmen. He has erected many of the buildings which have gained for Chicago her reputation for beauty and solidity of architecture; among these may be mentioned the Columbia, Criterion and Lyceum theaters; the Union depot, at Fourth Avenue and Polk Street; the Minnesota Block, the Franklin Public School, and many of the handsomest private residences in the city. The contract for the building of the Columbian Theater required its completion in eighty-seven days, under a penalty of a forfeiture of $200 for each day's delay. It affords an illustration of Mr. Downey's energy to add that it was completed on time. He was the builder of the Cook County Poor House, and the large and handsome Union Depot at Hamilton, Ill. He also erected an addition (four hundred feet long) to the Missouri Insane Hospital, at St. Joseph. Mr. Downey's success has been truly remarkable. Starting in life dependent on his own resources, he has, at the early age of thirty-six, built up a business of $200,000 per annum and given employment to a large number of men. He has acquired a handsome competence, and is about to retire from an active business life, to enjoy the leisure and the domestic happiness which his hard labor and incessant application have fairly earned. In 1853, he severed his partnership with Mr. McGraw, and has since lived alone. Mr. Downey was the president of the Master Masons and Builders Association in 1884, and an active member of the Citizens League, in whose work he evinced a deep interest. He is, at the present time, treasurer of the Builders and Traders' Exchange of this city. He was married, on December 7, 1871, to Miss Clara McGraw, daughter of his former employer and partner. Her death occurred in 1883; and on May 5, 1885, he married Miss Leonia Kleck, of this city.

DANIEL H. WILKIE is the son of Daniel and Sophronia Wilkie, and was born in El Paso, Ill., on May 5, 1860. His father was a carpenter. He came to Chicago in 1876, and learned his trade from William McNel, one of the most noted wood and builders in the city. He qualified himself so well in his trade, that he was employed by the city on the new City Hall for two years. In 1881, he engaged in business for himself, and the following year formed a partnership with C. T. Holman, under the firm name of Wilkie & Holman, masons and contractors. This firm erected many fine buildings, among which was the Brenn School-house. Their contracts during the year 1884 amounted to nearly $100,000. Mr. Wilkie is a young man of good ability, with a bright future before him as a mason and builder. He was married, on November 15, 1883, to Miss Mamie Hodge, of Chicago. They have one child,—Paul.
BARNEY & RODATZ.—This firm of contractors and builders, was established in June, 1853, by John F. Barney and Jacob Rodatz, two young men of ability. Although the firm has been in existence but a short time, they have done a good and prosperous business, having erected a large building on Randolph Street, the Chapter House of St. Paul's Cathedral, on the West Side; the Geneva Flats, on Rush Street; the Hansen Building, on Dearborn Street; the Indiana Elevator; and all the freight and engine houses of the Chicago & Western Indiana Railroad.

John F. Barney is the son of Jonathan and Sarah (Hammond) Barney, and was born at Boston, Mass., on November 10, 1837. He received a thorough and practical education in Boston, came to Chicago in 1854, entered the employ of the Chicago, Rock Island & Pacific Railroad Company as an engineer, in 1856 became division master mechanic of the same, and remained with that company until 1870, when he was made superintendent of the American Bridge Company of Chicago. In 1877, he went to Australia, and was engaged in the manufacture of ice for two years, when he returned to Chicago, and was employed as general superintendent of Crane Brothers' Manufacturing Company, and at the same time architect-engineer of buildings and bridges of the Chicago & Western Indiana Railroad until the formation of the present company. He is a Mason, and belongs to Apollo Commandery, No. 1, K. T. He was made a member of the Chicago Council on December 30, 1884, to Miss Care E. Robinson, of Taunton, Mass.

Jacob Rodatz is the son of Albrecht G. Charles and Maria (Hermes) Rodatz, and was born in Germany, on October 20, 1835. He came to Chicago in the spring of 1871, and learned his trade under Louis Weigk, a North Side contractor, with whom he remained four years, after which he was employed by Burling & Adler, architects. In 1881, while with them, he was superin-
tendent of the construction of Central Music Hall; then he was with John F. Barney on the Chicago & Western Indiana Railroad, building bridges, engine houses and docks; superintended the recon-
struction of old First National Bank Building, until this firm was formed in 1883. He is a young man well qualified to perform any part that may be assigned him in the great drama of life. Mr. Ro-
datz is married to Miss Taltah Howard, of Kingston, Canada. They have two children,—Marie Margaret and Jacob Howard.

SEWER PIPE.—While the volume of trade in sewer and drain pipe has very considerably increased since the fire, only three new dealers have been added to the list, which now numbers eight. But one manufacturer exists in the city, most of the pipe sold here being made elsewhere, and the greater proportion of sales being, perhaps, of the Akron brand, made at Akron, Ohio. Competition has resulted in a general depression of prices, and dealers complain of the small margin of profit in the business, as compared with former years. The con-
stant growth of the city and the increase in building, however, produce a steady demand, and large contracts are not infrequent.

NORMAN A. WILLIAMS deals in Akron sewer pipe, fire-brick and fire-clay, drain-dirt, cement, etc. He is the pioneer dealer in articles made of fire-clay in the West. He established himself in the trade in 1850, and was the first manufacturer with a first-class product. He was thus, from the first, enabled to guarantee the quality of his goods and, measurably, to command success. He handles Akron sewer pipe, fire-brick, fire-clay, chimney-tops, flue-linings, tiles, slabs, etc., as well as plaster and cement. His trade is not con-
fined to Chicago, but extends over the West and Northwest. He carries an average stock valued at $30,000, employs twelve men, eight teams, and conducts a business of about $300,000 a year. He has been at his present location, No. 249 Washington Street, since he established himself in business here. Mr. Williams was born at Auburn, N. Y., on July 1, 1821. At the age of twelve, being thrown upon his own resources, he began life as a brick-laver and mason in his native city, and remained thus employed until attain-
ing his majority, after which he spent eleven years working at his trade in Western New York. He located at Cleveland in 1853, where he engaged with William P. Southworth as manager of his business, and after an active life of two years in that capacity, he consented, at the urgent solicitation of the Citizens' Committee, to accept the membership of streets, in which position he served acceptably for two terms. Before the expiration of his third term he resumed his connection with William P. Southworth. In 1850, he left Mr. Southworth and came West, eventually locating in Chi-
cago, through the influence of the Akron Sewer Pipe Co.; the

His career since coming to Chicago has been already briefly sketched. He has one son, Martin D. Williams, secretary of the Akron Sewer Pipe Agency, of Akron, Ohio. Although avoiding public life, every measure tending toward the development of the social and indus-
trial interests of the city has always found in Mr. Williams a warm supporter.

PLUMBERS, GAS AND STEAM-FITTERS, ETC.—Among the building trades of the city, none has witnessed a larger proportionate increase than the plumbing and steam and gas-fitting interest. At the time of the fire, the entire number in the city was but forty-
four, which had increased in fifteen years to one hun-
dred and eighty-seven, or 325 per cent. It is impos-
sible to state, with any approach to accuracy, the amount of capital invested in the business, but it may be said on reliable authority, that the growth of the trade in this direction has been even more remarkable than in the number of establishments.

A marked advance in the methods of work has charac-
terized the period. Ideas, crude in themselves and imperfectly understood, have been exploded; knowledge derived from patient study, as well as from experiment based thereon, has taken the place of an indifferent following of old ways; and plumbing—although much of the work is necessarily coarse—is rapidly ap-
proaching both a science and an art. The sanitary laws are better understood, and the workman who best comprehends and most faithfully observes them is the one who best succeeds. Ventilation and drainage are carefully considered, and the Master Plumbers' Associa-
tion of Chicago offers annual prizes for the best essays on these and kindred subjects.

The Association was formed under the general law of the State, in 1883, and its membership has steadily increased. All members of the craft of good standing and character are eligible, and the organization is one of the most solid of the trades guilds in the city. Weekly meetings are held, at which papers are read and discussed, and matters of general interest to the trade are considered. A fraternal feeling is awakened, and the public is directly benefited by the adoption of improved meth-
ods and a uniform and reasonable scale of prices. One of the earliest measures adopted by the Association was that looking to the securing of a better class of apprentices, and none are now received by its members, who have not at least acquired the rudiments of a com-
mon-school education. The next generation of work-
men will, it is hoped, be men of better education and broader views than have been some of their predeces-
sors. One cause which has operated in raising the standard of work, is to be found in the fact that the existing city building-laws contain in many provisions regulating the details of all work of this character, based upon sound scientific and sanitary principles, and—which is of equal importance—those details are rigorously enforced.

Connected with the growth of this interest has been the trade in plumbers' supplies. At present (1886) there are seven houses engaged in this branch of busi-
ness in this city. Some of these firms conduct large manufacturing establishments, and the volume of trade annually carried on by them is very large.

A cognotate trade is that of the manufacture of steam-
heating apparatus and fittings. The following statistics of this branch of mechanical industry are taken from the ninth and the tenth census of the United States. Comment upon a growth so surprising is unnecessary.

HISTORY OF CHICAGO.

WOOLOON & WARNER.—This firm of manufacturers of steamfitting, heating and ventilating apparatus, and dealers in all kinds of supplies, was established here in 1876, by John Wooloom and William C. Warner. The place of business, from the first, has been at Nos. 226-28 Lake Street, and at Nos. 16-22 Franklin Street. The firm gives employment to about thirty men in the business, and the volume of business makes it a most successful concern, showing, as compared with many of its older competitors. Both of its members are old residents of Chicago and thoroughly practical business men.

JOHN Workman was born in the State of New Hampshire, on August 26, 1836, and is the son of James M. and Lucy (Ham) Workman. When but a mere lad, he was apprenticed to learn the steamfitting business, and in 1852 he took up residence in the city of Cleveland. In 1859, that firm established a branch house in Chicago, and Mr. Workman, who had almost grown up in their employ, was sent out here in 1866, to look after the firm's Western interests and to manage the branch in this city. The place of business was on Lake Street, near Franklin, where it remained until destroyed in the great fire of 1871. Following this event the house was re-established, but Mr. Woodman, at this time, severed his connection with the firm, after a continuous service of twenty-two years, and engaged with the Crane Brothers, the well-known manufacturers of this city. He remained with them until 1874, when he established himself in business on his own account, and in 1878, he was re-married and removed to Galesburg, Ill., where he has since resided, and begun his business career as a member of the firm of William Kerr & Co., dealers in building materials, at the corner of West Lake and Jefferson streets. This connection was kept up until 1875, when he retired from this firm, and in the following year he associated himself with John Woodman in their present business. Mr. Warner married, in 1893, Miss Emily E. Kerr, daughter of Dr. Thomas Kerr, of Washington, Penn. They have two children,—Mary W. and Florence E.

SAMPSON Ddson, of the firm of Samuel I. Pope & Co., steam-heating, steam-fitting, etc., is the son of Captain Isaac and Miranda Pope, and was born at Wells, York Co., Maine, on May 6, 1845. He received a thorough business education in the schools of his birthplace, and at the age of sixteen came West, and engaged in the same business with Walworth, Hubbard & Co., No. 181 Lake Street, with which firm he remained ten years. Having been consistently conversant with the business, as well as having become a practical mechanic, he established himself in the trade, in connection with H. F. Day, No. 324 West Lake Street, where he remained two years, during which time Mr. Cater retired from the firm. This was succeeded by Charles H. Patten, the style of the firm being Samuel I. Pope & Co. They removed to No. 193 Lake Street, their present location, in 1877. This firm has taken and successfully fulfilled some of the largest contracts for ventilating and heating large buildings, west of Buffalo, among which may be mentioned the work in the Indiana, Michigan, and Kansas Insane Asylums, Post-offices at Cincinnati, Buffalo, St. Paul, and Madison, Wis., etc. Mr. Pope was married, on August 16, 1866, to Miss Lizzie Carter, of Libbyville, III. They have four children,—William A., Annie A., and Lizzie C.

CHARLES HUTCHINSON PATTON, of the firm of Samuel I. Pope & Co., was born at Palatine, Ill., on October 29, 1854. His parents formerly resided at Newburyport, N. H., and came West among the first settlers, at an early age. Charles H. remained at home until sixteen years of age. After passing through the graded and high schools, he sought school in the vicinity of Palatine for nearly three years. In the spring of 1873 he came to this city, and engaged with Samuel I. Pope as bookkeeper and clerk, and continued with him as mathematician and in charge of the estimates, until he succeeded to a partnership with Mr. Pope. The firm has since been known as Samuel I. Pope & Co. Mr. Patton was married, on February 22, 1879, to Miss Mary Robertson, of Lake City, Lake Co., Ill. They have two children,—Paul and Mary.

THE OTLEY MANUFACTURING COMPANY was organized in 1856, for the purpose of making a steam-packing cement, a very useful material used between joints of steam apparatus, being a great improvement over everything discovered up to the present time, and taking the place of gaskets, red and white lead, and other substances. This article was discovered and patented by Samuel Otley in 1857, and has been introduced almost entirely on its merits. He has become the sole owner and manufacturer at the present time.

William Otley was born in London, England, in 1844, and received a fair education in his native country, remaining there until after leaving school, when he began a seafaring life and followed it up to 1871, when he had visited nearly every portion of the globe. In 1871, just before the completion of the great trans-Mississippi enterprise, he was employed in a large hotel at that time, losing all his worldly effects in the conflagration. He then, with his family, moved to Grand Haven, Mich., where he again entered into his old business of sailing. It was while there that he discovered this cement, which has proved so valuable and furnished him a profitable and growing business. In 1875, he returned to Chicago, and began the manufacture of his cement, which was sold under the name of Brown & Co., and met with great success. In 1876, adding to his business the sale of boiler covering, which is another article of great value in the uses of steam, he has entered into a general contracting business, and has lately done considerable work around the different city parks, and recently completed the whole of the steam-pipes, boilers, etc., of the New City Hall, Wahl's glue factory, McCormick Block, new Post Office Building, Counsellors Building, and many other important buildings in this city: also, those in Belcher's sugar refinery, at St. Louis, and in Studebaker Brothers' large works at South Bend, Ind. Mr. Otley was married at London, England, on June 17, 1868, to Miss Mathilda Cox, of St. Ives, Huntingdonshire. They have three children living,—Benjamin, James and Thomas.

SYLVESTER BROWN, of the firm of Brown & Tubman, steam and gas-fittings, etc., is the son of Sylvester and Catharine Brown, who was born at Ashburna, Ohio, in 1829. He came West in 1847, and at Marseilles among the first settlers of LaSalle County, and afterward moved to Dayton, in same county, and since 1850 has resided in Chicago. It was not until that time that the frontier was continually agitated by Indian invasions, and the settlers were incessantly harassed by their depredations, and during the Black Hawk war were compelled to seek refuge at the Fort in Ottawa. Young Brown's business experience began when eighteen years of age with the laying of water and gas pipes in Ottawa; subsequently he was employed by King & Hamilton, until 1870. In Oct., 1871, a few days before the great fire, he came to Chicago, and was engaged with John Davis & Co., for one year; afterward he was engaged to the establishment of Crane Brothers for six years. At the expiration of that time he began his present line of business, in partnership with his brother, Andrew J., at No. 13 Arcade Court. In February, 1882, Mr. John Tubman's health failed, and Andrew J. Brown's interest in the business, and the firm of Brown & Tubman removed to their present quarters in the following May, when they have since continued. Mr. Brown was married on Oct. 14, 1867, to Miss Mary Ward, of Ottawa.

JOHN TUBMAN, of the firm of Brown & Tubman, is the son of Richard M. and Mary Tubman, and was born at St. George's, Bermuda Islands, on October 16, 1852. During his early life his parents came to America, and settled at Montreal, Canada. He was adopted for the agent for the Grand Trunk Railway, and was connected with the construction between St. Louis and Chicago, and, as the road was pushed forward, his family moved from Montreal to Chicago. Upon reaching Detroit, young Tubman remained there until ten years, afterward spending one year in school at Montreal. He came to this city in 1869, and has since been engaged in the business of Charles Gossage as errand boy, with whom he remained one year. He afterward was employed by the Western Union Telegraph Company, for some time, and subsequently learned the trade of lineman. On July 16, 1872, he was engaged by Crane Brothers, and continued in their establishment until January 31, 1884. During the following month he purchased the interest of A. J. Brown, of the firm of Brown Brothers, No. 13 Arcade Court, and on May 1, 1884, the firm of Brown & Tubman removed to No. 149 Fifth Avenue, where they have since been in business. Mr. Tubman was married on December 10, 1870, to Miss Louise Wagner, of Chicago. They have one daughter,—Louise.

HORATIO PORTER BLAIR, member of the firm of Blair, Hopkins & Dunlap, steam-heating and ventilating, etc., was born at Collinsville, Conn., on October 28, 1837. He is a son of the public schools of his native village until seventeen years of age, and then went to Marseilles, Iowa, where he entered the employ of E. W. Terry & Co., wholesale dealers, boilers and stove, etc., with whom he remained one year. Returning to Connecticut, he engaged in the hardware business with L.A. & Co., in the capacity of head-clerk, and continued with that firm until 1860. In October of the same year he formed a partnership with the firm of H. L. Embler & H. P. Blair & Co. At the end of three years, Mr. Spencer retired from the firm, and Mr. Blair continued the business two years, when A. J. Embler associated himself with the business, the firm being known as H. L. Embler & Blair until 1872. Upon the disso-
olution of the firm Mr. Blair went to Boston as chief-engineer for the
Yellow Jacket Manufacturing Company until 1878. He then organized the Laffin Manufacturing Company, at
Westfield, Mass., of which he was superintendent and chief-engineer one year. In 1880, he was engaged as superintendent and chief-engineer for the E. H. Cook Company, at Rochester, N. Y., and
remained therewith until 1883, at which time he came to this city as
manager of their western department, and in August, 1885, in
connection with his present associates, succeeded the E. H. Cook Com-
pany, limited, as to their interests in the West. Mr. Blair is one of
the fathers of low-pressure steam-heating, and is regarded as an
authority in that line of business. All of the largest contracts under
taken by the E. H. Cook Company have been fulfilled under his per-
sonal supervision as engineer, and all of them have been in every re-
spect satisfactory. Mr. Blair was married, on March 12, 1862, to Miss Eliza-
beth M. Powers, of Hartford, Conn. They have two children.—Elizabeth and Fred.

JOHN J. HAMBLIN was born at New-
ark, N. J., on July 5, 1835, and is the
son of John and Susanna (Ross) Ham-
blin. His father removed to New York
City in 1836, where John J., attended
school until he was about fourteen years old, when he learned the trade of a
plumber, and worked at New York City for seven years. In 1846, he came to
Chicago, and was employed at his trade one year, when he engaged in the plumb-
ing business with James McDonald, un-
der the style name of McDonald & Hamblin. They carried on the business
together until 1856, when the firm was
dissolved. He then enlisted in the Chi-
icago Mercantile Battery, with which he
served three years. After being must-
tered out of service, he returned to Chi-
icago, and entered into partnership with
Joseph A. McCartney, under the style
of McCartney & Hamblin. After eleven
years, the firm dissolved, and Mr. Ham-
blin continued in the business until 1878,
when he removed to Kansas, there en-
gaging in farming for three years. That
pursuit not proving remunerative, he re-
turned to Chicago, and commenced the
plumbing business again, in which he
has since been engaged. Mr. Hamblin is a member of Dearborn Lodge, No.
310, A.F. & A.M. Mr. Hamblin was
married, on November 25, 1857, to Miss
Elizabeth Barnes, of Chicago. They
have five children.—Elizabeth J., Mary
L., Charles B., Eva, and Isabella.

BASSETT & BEAVER.—The business of
this firm of dealers in artistic gas fix-
tures and plumbers' supplies was estab-
lished in 1858, by J. S. Bassett, on North
Clark Street, opposite the old Revere
House. A year later, Mr. Bassett sold
out and went to California, where he
remained until 1861, when he returned to
this city, and formed a partnership with
Simon Livingston, under the firm name
of Livingston & Bassett, who opened a store at No. 134 Clark
Street. This firm continued until in 1866, when it was dissolved, Mr. Livingston being succeeded by J. L. Pattison. The new firm
removed the place of business to No. 81 Monroe Street, where it
remained until in 1870, when it was dissolved and the firm of Bas-
sett & Beaver was formed. J. E. Beaver having by then remained until
Pattison's interest. The location was also changed, at the same
time, to No. 78 Monroe Street. At this location they were burned
out, and after the fire the lease was considered so valuable that 11
11. Honor purchased it for $10,000. The firm then rented a store
in the First M. E. Church Block, No. 113 Clark Street, where, after
a successful business career of two years, they erected a four-story,
building, seventy-five feet square, in the rear of their rented store, and
exchanged for it the lease of No. 81, and occupied its lower floor.
In 1873 they lost $100,000, mainly in failing to collect from heavy firms or companies, and were thus so crippled that it became necessary to compromise
with their creditors. After making a settlement they started again
at Nos. 229-31 Clark Street, remaining there one year, when they
sold their lease to the Wakefield Rattan Company for $4,000, and
moved to Nos. 57-59 Adams Street, where they remained one and
a half years. They then moved to their present location, No. 215
State Street. Here they occupy the basement and the first floor of
the building, the first floor being divided into three showrooms.
They employ from forty to fifty men, and transact an annual business
of about $100,000. They have the exclusive agency for the J.
Black, Son & Co., manufacturers of Prudence McDonald & Co.,
the Traverse & Murray Manufacturing Company, of New York City.
They are doing a very large plumbing business, which is in charge of
Mr. Bassett and Hendrick Hughes, the gas-fixture business be-
ting in charge of Mr. Beaver. On January 1, 1884, Mr. Bassett
closed out his interest to the Beaver, Hughes & Wetmore Company
(who continued the old business at the same site), and went into the
plumbing business by himself, at No. 235 Dearborn Street. This
company has been regularly incorporated, and has a capital stock of

$25,000. Its officers are as follows: James E. Beaver, president;
Hendrick Hughes, superintendent; and John O. Wetmore, secre-
tary and treasurer.

James Smith Bassett (deceased) was born in Delaware County,
N. Y., on March 3, 1831. His father, Cornelius Bassett, was a son
of one of the original settlers upon Massachusetts soil, the family
having located at what is now known as Martha's Vineyard. In
1849, when only fifteen years of age, James came to Chicago, as a
plumber's apprentice in the employ of Thomas George, with whom
he remained for seven years. At the end of that time, he set up in
the business with a Mrs. Rose, and was, with the exception when al-
sent for a time in California, actively identified in that line of busi-
ness until his death in 1888. Mr. Bassett was an active Mason,
and was a member of Apollyon Commandery, No. 1, K. T., of this
city. He married, in 1866, Miss Jennie Beaver, daughter of Mrs.
Jane A. Beaver, of Aurora, Ill. They had two children,—James
Franklin and George. Mr. and Mrs. Bassett were counted among
the valuable members of the Wabash Avenue M. E. Church, he
having been one of its officers for many years and until his death.

James E. Beaver was born at Sugar Grove, Kane Co., Ill., in

PRAIRIE AVENUE AND TWENTY SECOND STREET.
HISTORY OF CHICAGO.

1848. His parents were James and Jane A. Beaver. He was reared and educated at Aurora, graduating in 1854 from the Jefferson College there. In that year he went into the mercantile business in Aurora, and remained there until in 1856, when he came to Chicago, and entered the firm of Basset & Beaver. He married, in 1857, Eliza Johnson, daughter of Philip Larnom, a well-known capitalist of Chicago. They have two children, Frank Marion Louise and James E., Jr. Mr. Beaver is a prominent Mason, and a member of the A.O.O.M., No. 1, K. T.; he is also a member of the Military Social Club, the Grand Army of the Republic, the Chamber of Commerce, Trade and Building, the new Board of Trade Building, and many fine residences. He keeps on hand a full stock of plumbers' supplies, and employs a large force of men.

H. M. WILMARTH & BRO.—This firm was founded in 1859, by Henry M. Wilmarth. His first establishment was at No. 75 South Clark Street, where he remained until 1862. He then moved to No. 182 Lake Street, where he continued until 1866. In the meantime, in 1854, he associated with him T. W. Wilmarth, under the firm name and style of H. M. Wilmarth & Bro. The concern was then removed to the famous old dry goods store of Ross & Foster, at what was then Nos. 107-97 Michigan Street, where the first sign displaying the name of the new firm was put in place. The fire of 1857 destroyed this store with all its contents. In a few days after the fire, Henry M. opened the two partners of his private residence, No. 222 Michigan Avenue, as a salesroom and a dispository for gas-fixtures, and his stable adjoining as a work-shop. He subsequently purchased the Church of the Messiah, on the corner of Clark and Walash Avenue, and soon transformed it into an elegant store, where, until 1857, the firm carried on their business.

Henry M. Wilmarth (deceased) was born in Newport, N. H., on January 25, 1836, and is the son of Jonathan M. and Lacy (Cheney) Wilmarth. He received his education in the public schools of that vicinity. In 1856, he came to Chicago, and became a clerk in the gas-fixting establishment of Gereolui Brothers, with whom he remained until his succession to their business, which he carried on until the day of his decease. He was one of the original stockholders of the First National Bank of Chicago, and was a director of that institution for the term of its organization. He was one of the original guarantors for the support of Professor Swing's Church. In commercial and domestic life he was well known for his strict fidelity to every engagement and his comprehensive liberality and beneficence. His loss was deeply felt, not alone by his friends, but also by many whose livelihood depended on his liberality to the institutions, which he greatly supported and whose pursuits were his especial interest.

James H. ROCHE, plumber, gas-fixer, and sewer-builder, was born at Philadelphia, Penn., on August 16, 1851, and is the son of James and Therese (Labouch) Roche. He was reared in the public schools until 1867, when he learned the plumbers' trade from A. J. labouch, with whom he remained four years. In 1871, he came to Chicago, and was employed by Messrs. Griffin & O'Neal for two years, by Thomas McKenney for one year, and by Harper & Skitchen for two years. In 1873, he succeeded Harper & Skinner, and in 1878, formed a partnership with D. & J. Hardin, under the firm name of Roche & Hardin. They remained together two years, when the firm was dissolved, since which time Mr. Roche has carried on the trade by himself. He was one of the first plumbers to get a sewer-builder's license in connection with his plumbing, and has, by perseverance and strict attention to the requirements of his calling, built up a large and prosperous trade, and has fitted up many of the finest and best buildings in the city and suburbs.

George Tipple was born in England, on April 6, 1847, and is the son of Robert and Mary (Steele) Tipple. His parents moved to America in 1853, and settled in Chicago, where George attended the public schools. In 1857, he learned the plumber's trade, and after serving his apprenticeship, he worked with George Neyman until 1875, when he engaged in business with Rupert Coleman, under the firm name of Tipple & Coleman. At the end of three years, the firm was dissolved, and he carried on the trade by himself until June, 1878, when the present partnership was established, with a capital of $50,000, by perseverance and close attention to business, built up a fine trade, which the firm is continuing.

Robert M. Wilson, of Edinburgh. She died in 1850, leaving three children—John F., Robert G. and Agnes E. Mr. Watt was again married in September, 1862, to Miss Annie McGowan, of Albany, N. Y. By this marriage there are six children,—James McGowan, Archibald M., Frederick H., William H., Annie McGowan, Jennifer M., and Hattie S.

Michael Ryan was born in Ireland, on Easter Sunday, 1846, and is the son of Michael and Kate (Gleason) Ryan. He came to America in 1860, and settled at Cincinnati, Ohio, where he learned the trade of plumber. He worked with a number of firms in Cincinnati, and came to Chicago, where he has since resided. He was employed at his trade as a journeyman until 1870, when he engaged in the plumbing business on his own account, which he continued until 1871, when he formed a partnership with his brother, under the name of Ryan & Ryan. This firm was dissolved in 1873, and a new firm was organized. Mr. Ryan has always taken an active part in public affairs. He was elected alderman of the Fifteenth Ward in 1872; in 1876, re-elected alderman of the Fifteenth Ward, re-elected in 1877, and served until 1879; was again elected in 1880, and in 1884. He is at present a member of the City Council. He was married, on August 17, 1865, to Miss Annie Feeny, of Covington, Ky. They have six children living,—James J., Michael T., Robert E., Sarah, John McHale, and Anna Mary.

Thomas Ryan is the son of Michael and Kate (Gleason) Ryan, and was born in Ireland, on October 13, 1844. He came to America in 1860, and went to Cincinnati, Ohio, where he learned the trade of a plumber. After he had served his apprenticeship, he worked as a journeyman in most of the principal cities of the West. He came to Chicago in 1871, and engaged in business with his brother Michael, under the present firm's name.

Thomas Wadsworth Wilmarth was born at Newport, N. H., on September 3, 1843. He was educated in the schools of his native place and at Kimball Union Academy, of Meriden, N. H. Leavin school in the fall of 1861, he came to Chicago in 1862, where he associated himself in the gas-fixtures business with his brother Henry M., and preserved this connection continuously from that time until the death of his brother, with the exception of some five years between 1857 and 1862, when his health was so impaired that he rested at Crown Point, Ind. Mr. Wilmarth is a member of the Oriental Lodge, No. 33, A. F. & A. M., and of the Oriental Sovereign Lodge, No. 32, R. & S. M.

They have had three children,—Ray Bartlett, Thomas Henry (died April 15, 1854) and Edith Gertrude.

Hunt Watt was born at Coulsand, Mid-Lothan, Scotland, on January 11, 1841, is the son of James and Catharine (Dowar) Watt. After finishing his studies in the schools of his native place, he went to Edinburgh, in 1842, and was apprenticed to a plumber and gas-fixer in 1846. After working at his trade there for two years, he came to America in 1848, and was employed at first two years in New York City. He then went to Albany, N. Y., and commenced the plumbing and gas-fixing business on his own account, which he has followed for thirteen years. In 1858, he came to Chicago, where he built up a large trade, but his accumulations were all swept away in the fire of 1871. He immediately erected a one-story brick building on the corner of Harrison Street and Wabash Avenue, and commenced business. He was the first brick house built and occupied after the fire, and it is still standing. Mr. Watt has done the plumbing in many of the finest buildings in the city, such as the Grand Avenue, the National Hotel, the new Board of Trade Building, and many fine residences. He keeps on hand a full stock of plumbers' supplies, and employs a large force of men.

Watt was married, in September, 1852, to Miss Catherine Wilson, of Edinburgh. She died in 1860, leaving three children—John F., Robert G. and Agnes E. Mr. Watt was again married in September, 1862, to Miss Annie McGowan, of Albany, N. Y. By this marriage there are six children,—James McGowan, Archibald M., Frederick H., William H., Annie McGowan, Jennifer M., and Hattie S.

George Tipple was born in England, on April 6, 1847, and is the son of Robert and Mary (Steele) Tipple. His parents moved to America in 1853, and settled in Chicago, where George attended the public schools. In 1857, he learned the plumber's trade, and after serving his apprenticeship, he worked with George Neyman until 1875, when he engaged in business with Rupert Coleman, under the firm name of Tipple & Coleman. At the end of three years, the firm was dissolved, and he carried on the trade by himself until June, 1878, when the present partnership was established, with a capital of $50,000, by perseverance and close attention to business, built up a fine trade, which the firm is continuing. He was married, on May 10, 1876,
to Miss Mary Nixon, of Chicago. They have two children,—
George and Mary.

In 1857, Mr. Coleman was the son of Thomas and Ann (Granitham) Coleman, and was born in Oxfordshire, England, on May 14, 1852. He came to Chicago, with his parents, in 1865. He learned the trade of a plumber in his native city, at which he worked until 1875, when he became connected with George Tippie. They remained together about three years, when the firm was dissolved, and he then was employed as a journeyman plumber until 1884, when he formed the present partnership. Mr. Coleman was married on September 30, 1879, to Selina Thorpe, of Chicago. They have one child,—

Bessie. William F. Gay & Co.—The business of this firm of plumbers and gas-fitters was established in 1877, by William F. Gay, and the present firm was organized in the spring of 1884, by William F. Gay and Thomas P. Cullen. They do a general business as plumbers and gas-fitters, and, by industry and close attention to business, have built up a good and prosperous trade.

William F. Gay was born at Chicago, on September 22, 1855, and is the son of John and Bridget (White) Gay. He was educated at the Holy Name College, at Chicago, from which he graduated in 1874. He was then employed in the seed store of Fogg & Son for about two years. In 1886, he commenced the plumber's and gas-fitter's trade with Lane & Rock, for whom he worked about eight years. He was then engaged by the county, on the insane Asylum, at Jefferson, until 1877, when he engaged in business on his own account. In 1885, he formed a partnership with Thomas P. Cullen, about which firm name:

Thomas P. Cullen is the son of Thomas P., and Margaret (Welch) Cullen, and was born at Chicago, on May 5, 1861. He attended the public schools until 1877, when he learned the plumber's trade under William F. Gay, for whom he worked until he entered into business with him, in 1885.

Frederick Neustadt, plumber, gas-fitter, and sewer-builder, was born at Aifel-on-the-Main, Germany, on December 24, 1846, and is the son of Frederick and Katie (Nix) Neustadt. He attended the common schools until he was fourteen years of age, when he was apprenticed to a plumber. After he had served his time, he worked at the trade, in his native place, until 1879, when he came to Chicago, and was employed by different plumbers for about nine years. In 1879, he commenced business on his own account, which he has since followed. Being a practical mechanic and skillful workman, and having given his entire time and attention to the business, he has built up a large and prosperous trade in the city and suburbs. Mr. Neustadt is a member of Mithra Lodge, No. 410, A.F. & A.M. Mr. Neustadt was married, on May 24, 1879, to Miss Linda Meissner, of Germany. She died in September, 1876, leaving one child,—Charles A. He was married the second time, on October 25, 1880, to Miss Mary Raymn, of Chicago.

John F. Alles & Brothers.—The business of this firm of plumbers, gas-fitters, and sewer-builders, was established in 1881, by John F. Alles. In 1882, Joseph W. Alles, a younger brother, became associated with the business and the present firm was organized. From a very small beginning, they have succeeded in building up a large and prosperous trade. Both are practical and experienced plumbers, and have attended to the plumbing, gas-fitting, and house drainage of many of the finest houses in the northern part of the city and at Lake View.

John F. Alles was born at Chicago, on May 6, 1858, and is the son of Frank and Catherine (Proesel) Alles. He attended the public schools until 1874, when he learned the plumber's and gas-fitter's trade, at which he worked about ten years. He commenced business on his own account in 1881, and carried on the trade alone one year, when he admitted Joseph W. Alles, a younger brother, into the present partnership. John F. is a member of Lincoln Park Council, No. 871, Royal Arcanum. Mr. Alles was married, on October 26, 1881, to Miss Lona Goeltz, of Chicago. They have two children,—Catharine and Margaret.

Joseph W. Alles is the son of Frank and Catharine (Proesel) Alles, and was born at Chicago, on November 26, 1861. When he was about thirteen years of age, he left school and commenced to learn the plumber's trade, which he has since followed. He worked for different parties until 1882, when he formed a partnership with his brother, John F. Alles, since which time he has been an active and grateful partner.

Painters and Decorators.—The number of firms and individuals in Chicago engaged solely in decorative art is not large, but is increasing steadily. The number of general house-painters is very great, and many of these are capable of doing, and in fact do, work of a genuinely artistic character; but of those who devote themselves exclusively to fresco painting there are hardly a score. The re-building of the city attracted to Chicago a number of workmen in this, as in every other, department of mechanical art. Among them were, of course, men of all grades of ability; but the erection of the many palatial private residences brought to the city decorators of unsurpassed skill from the East, some of whom had acquired their knowledge under masters in foreign lands. Decorations in Chicago, on the public and office buildings, compare favorably with those on buildings of a similar class in any other city of the country, while those in many of the homes of private citizens of wealth are marvels of taste and beauty.

Of course, however, not every resident has the means, even had he the taste or inclination, to adorn his residence in such a style, and the great mass of private dwellings are painted by workmen engaged in the general branches of the trade. Of such establishments there are in Chicago a large number, many of them of considerable size, employing numerous skillful workmen, and carrying on an extensive business.

The manufacture of paints and varnishes in this city has attained considerable magnitude since the year 1870. The visitor to Chicago, as well as many of her own citizens, may find a beautiful illustration of the progress made in this direction by a visit to the permanent building exhibit, reference to which has been already made. Here, arranged in artistic grouping, are specimens of the products of the city's paint works.

The following tables show the increase in these branches of manufacture, as gathered from the census reports for 1870 and 1880:

The Heath & Milligan Manufacturing Company, manufacturers of dry colors, white and colored leads, mixed paints, etc., was founded in February, 1851, by Monroe Heath, at No. 179 Randolph Street. Trade soon sought Mr. Heath, and the business has, since its establishment, kept pace with the city's growth to metropolitan proportions. The name and style of the house has undergone several changes, as has the personnel of its proprietors, but Mr. Heath has been at its head from the date of its formation. In 1854, he formed a partnership with Ethen Hard, of New Hampshire, who had located in Chicago. Two years later, a removal was made to Franklin Street, between Randolph and Lake. In 1860, the firm removed to Lake Street, corner of South Water; and in 1863, to No. 167 Randolph Street, almost opposite their present location. In the latter year, Mr. T. R. Wood succeeded Mr. Hard as partner, and the firm name was changed to T. R. Wood & Co. In 1886, Mr. Wood retired, and William F. Milligan, who had been connected with the house for some years, was admitted as a partner, the firm then becoming Heath & Milligan. In 1886, they moved to their present location, No. 170 to 174 Randolph Street. In August, 1870, they were burned out, but immediately rebuilt. Not long after their establishment in their new house, the firm of 1871 decided both building and stock. Notwithstanding this succession of reverses, the house scarcely suspended business for a single day. Immediately after the fire, they secured temporary quarters at No. 103 West Randolph Street, and soon began the erection of a new building on the former site. This was pushed with such vigor that it was ready.
for occupancy early in 1872. The building is one of the finest in that vicinity. In 1851, a joint stock company was formed under the name of The Heath & Milligan Manufacturing Company, with Mr. Heath, Mr. Milligan as vice-president and Ernest W. Heath as secretary and treasurer. The specialties of the company are the manufacture of white lead, ground colors, dry colors, mixed paint in Japan and oils, and oil colors, and deserts. Mr. Heath and Mr. Milligan are practical mechanics, and possess a knowledge of business in all its departments. Their premises occupy (all floors included) nearly sixty-five thousand feet of floor space, all of which is utilized in the performance of the obligations of his mature life. While he has never permitted himself to be placed in public life, he always gives cordial support to all movements tending toward the development of the republican, but has not taken an active part in politics. He has been a member of the Masonic fraternity for over twenty years, and has been connected with the Odd Fellows for over thirty years. In Chicago in 1852, to Miss Lovina W. Lamb, of Ashbula County, Ohio. Of their six children, three boys and a girl are living and two boys have died.

Joseph M. Nelson (deceased) was born in County Meath, Ireland, on June 1, 1827, and during his boyhood attended schools as the country afforded, and then learned the trade of painting. At the age of twenty-one, he came to the country, and in 1850 years worked in New York City, where he displayed his ability as a first-class mechanic. In 1852, he came to Chicago, and, after a tour through the West and South, finally located here in 1853, established himself in business as a decorative, house, and sign painter. He soon won the confidence and secured the patronage of the business community, and was recognized as a skilful and faithful workman. His success was assiduous and rapid. In 1857, he met with a fire, but his indomitable energy enabled him speedily to recover from the effect of his reverses, and from the last mentioned date his success was remarkable. He was awarded the contract for painting the new Court House, in County Building, probably the largest job in this line of work ever let in this city; and the taste and fidelity with which it was executed earned for him a deservedly high reputation among the citizens of Chicago. In 1858, he married Miss (nee) Catharine Lamb. They have had four children, one of whom, W. P. Nelson, is the secretary of the Master Painters’ Association. Mr. Nelson, Sr., died, after a short illness, on April 10, 1861. The business which he established is still conducted under the firm name of T. Nelson & Son, W. P. Nelson being the active manager of the same.

William Edmonds is the son of Joseph and Mary (Stacy) Edmonds, and was born at London, England, on September 10, 1813. After obtaining an education sufficient to enable him to engage in commerce, he associated himself with his brother in the shipping interest, of which he eventually became sole proprietor. He died in 1852, he disposed of his business interest. The following ten months he passed in France, engaged in no particular calling. In the latter part of 1857 he immigrated to this country, locating at Brooklyn, N. Y. Shortly after his arrival in America, circumstances induced him to acquire a trade. Being something of an artist, he, after a short experience, mastered the sign-painter’s trade, and so successful was he in that particular branch that he determined to give it his exclusive attention. Five years following his effort, he established a business of his own, in New York City and Brooklyn, which he continued for fifteen years. In the fall of 1870, the rapid growth of Chicago induced him to identify himself with its vast commercial advance. Within a few weeks after his arrival he started in the sign and ornamental painting business. Mr. Edmonds is now in the line of business in Chicago. For more than twenty years he has been identified with the business interests of Chicago. His memory of the city dates back to the days when it was struggling for the prudential hold it holds today, when not a few of the principal streets were made conspicuous by the placards planted in their midst, “No bottom here.” He was married at London, England, to Thebe Tyrrell. They have three children.

William Henry Conner is the son of John and Bridget (O’Neill) Conner, and was born in the village of Union, Canada, on September 19, 1857. When he was in his eighth year, his parents moved to London, Ontario, where he attended school for several years. Then he turned his attention to the acquirement of a trade. After due deliberation, and much opposition on the part of his parents, he concluded to follow the occupation of a painter, a pursuit for which he possessed natural ability. At the close of his apprenticeship, he went to England, and, as apprentice to London firm, he went to St. Thomas, and secured a position in the employ of the Canada Southern Railroad. In 1856, a desire to see something of the United States induced him to relinquish the business connections and come to this country. Shortly after his arrival here, he entered the employ of the Pullman Palace Car Company, at Pullman, Ill., as ornamental painter on Pullman coaches. For eight months he remained with this company in this city and established himself in the business of an ornamental and sign-painter. Mr. Connor is something more than a mere painter of signs; he is at the same time a clever craftsman and the ability of an artist painter. He was married to Hattie Richon, on November 21, 1883, in this city.
RE-BUILDING OF CHICAGO.

and decorating establishment of S. S. Barry & Son, was born at Salem, Mass., on March 19, 1811, and is descended from a line of ancestors who were early scientifically trained. During the past year he has been business manager of the firm. He was 1846. He has been associated with the house ever since, and has always maintained an active interest in the progress of Chicago. He is a member of both the Masonic and Odd Fellows fraternities, in which he has been an active worker for the past thirty years. In earlier days he belonged to the city fire force, and ran with Engine No. 2, then called the "Metamora." Mr. Barry married, in 1837, Miss Abigail C. Abbott, of Salem, Mass. They have one son and two daughters living,—George, associated with his father in business; Helen S., now the wife of Joseph Sayers, who is connected with the well-known firm of N. K. Fairbank & Co.; Abbie Maria, the remaining daughter, is at home. Martha Etesa (deceased) was the wife of Rev. Horace J. Swift.

James Bernard Sullivan, of the firm of J. B. Sullivan & Bro., painting, decorating in fresco, etc., is the son of Michael and Hannah Sullivan, and was born at Troy, N. Y., on November 29, 1830. He remained at home until he was twenty years of age, during which time he received a thorough education, and then went to New York, where he engaged with John S. Perry, painter, decorator, for two years. Upon leaving his master, he continued one year in trade, he continued his vocation, in Troy, until 1855, when he came to Chicago. In the following year he began business on his own account, and in 1857 established himself at No. 266-68 North Clark Street, his present location. He associated with his brother, M. J. Sullivan, in 1869, under the firm name of J. B. Sullivan & Bro. This establishment has kept pace with the rapid development of the decorative art, and is recognized by the trade as one of the leading houses in the Northwest. First-class materials and expert workmen are only employed, and to these aids the Messrs. Sullivan attribute their success. Mr. Sullivan was married, in 1859, to Miss Margaret Cunningham, and resided at No. 162 South Wabash Avenue, when he died in 1869, leaving four children,—Mary E., Margaret F., James B. and Agnes M. His second marriage, to Miss Elizabeth Glassbrook, of Chicago, occurred in 1870; they have two children,—Joseph and Irene.

Michael Joseph Sullivan, of the firm of J. B. Sullivan & Bro., painting, decorating, etc., is the son of Michael and Hannah Sullivan, and was born at Troy, N. Y., on October 3, 1846. He attended the public schools of his native city until fourteen years of age, when he came to this city, and engaged in his trade in the east by his brother J. B. Sullivan, in 1869. In 1872 he became a partner and one-third interest in the firm of J. B. Sullivan & Bro., and in 1872 took charge of the business. He is thoroughly conversant with the details of the decorative art, and is known to the public as one of the leaders in the profession. He married, on October 3, 1872, to Miss Ellen Braley, an accomplished lady of Chicago. They have two children,—Francis J. and Marie E.

WALL PAPER.—No manufactories of wall paper are in Chicago, all goods of that description used here being brought from other (chiefly Eastern) markets. That the city is where many of the Eastern dealers consider "anything good enough for Chicago trade" has finally passed away, is illustrated by the advance made in the style, beauty and finish of wall paper exposed for sale in the stores of this metropolis. Art designs of exquisite beauty are now ordered by Chicago dealers, many of whom carry stocks vying in extent and assortment with those of any other city. This city has become the center of a large and growing wholesale trade, whose ramifications extend over the entire West and Northwest.

Nat. Faxon is the son of John and Lucy Faxon, and was born on March 10, 1835, at Quincy, Mass., where his parents lived and died. Mr. Faxon was educated in the common schools of Quincy. After leaving school, he went to Boston and entered the employ of the W. W. S. & Son, in which he remained five years. In July, 1843, he came to Chicago and opened a wall paper store, in company with his brother, E. G. L. Faxon. This was, undoubtedly, the first house in Chicago which dealt exclusively in wall paper. The firm remained the same until 1879, when E. G. L. Faxon died, after which Messrs. Hilger and Jenkins entered into the partnership, and the style of the firm was changed to Hilger, Jenkies & Faxon, and so continued until 1876, when the firm ceased partnership, the former continuing. He was a partner in the establishment a branch house at Milwaukee, of which Nat. Faxon took charge, remaining there seven years. After closing business in Chicago, Mr. Faxon went into the employ of the Chicago Carpet Company, manufacturing the wall paper for nearly four years. He then established himself in the wall paper business, and now carries a heavy stock and has a choice trade. Mr. Faxon is a member of the Genesee Falls Lodge, A. M., of Rochester, N. Y. In 1859 he married Miss Josephine, daughter of Rev. Horace Jenkins, residents of Milwaukee, but natives of New York. There have been three children by this marriage,—Clarence Hardwick and Hazel Dean (twins), and Marion Louise. Mrs. Faxon died in July, 1880.

SPOOR MACKLEY, proprietor of the extensive wall paper house on Wabash Avenue, is a native of Albany County, N. Y., where he was born on November 10, 1842, and is a son of Eliz and Rosaline (Frai) Mackley, also natives of the same place. Mr. Mackley is a graduate of the best schools in his native county. He was reared on a farm, and remained there until he was twenty-one years of age. Leaving home in 1865, he came to Chicago and became a partner in the old wall paper firm of Allen & Mackley, which continued until the fire of 1871. Soon after this event, he established a house for himself, in the same business, and now has the satisfaction of knowing that his wholesale trade is the fourth in magnitude in the United States, while his wholesale and retail trade, combined, place his house in the third rank. In 1873, Mr. Mackley was married to Miss Margaret Sayers, daughter of J. E. and Margaret, who have two children, —Alonzo Kent and Edwin Moore. Mrs. Mackley is a member of the Presbyterian Church.

Robert T. Martin was born on July 20, 1827, in Philadelphia, Penn., and is a son of Robert and Ann E. (Mackin) Martin, who were natives and early residents of that city. He received his education in the public schools of his native city, and first entered commercial life as a clerk, in a commission house at Philadelphia, at the early age of thirteen years. He remained in that city two years, and, in 1847, came to Chicago, and engaged in general business, continuing therein until the fire of 1871. On that event he commenced the furniture and piano business, which he continued until 1851, when he retired from that branch of trade, and engaged in the wholesale and retail wall paper business, with which he has become prominently identified and in which he is still engaged. Notwithstanding the cares incidental to the transaction of his large and prosperous business, Mr. Martin finds time and attention to devote to literature and artistry, in the prosecution of which latter study he has acquired some of the rarest books pertaining to that science, in Chicago, as will be seen by reference to the first volume of this History, wherein some of the rarest books published in this city, and still existent, are accredited to Mr. Martin’s library. In 1869, he was married to Miss Caroline H. South, a daughter of William and Eliza W. South, who were natives of Philadelphia. They have five children. Mr. Martin has been connected with the Trinity Mission, or one of its branches, for a number of years; he was also associate superintendent of the Christ Church Sunday-school for five years. It is proper, while alluding to the services performed by Mr. Martin in this connection, to mention the indefatigable attention and unflagging industry he has manifested in this work. The value of these missions, established as they are, in the dist parts of the city most in need of Christian influences and instruction, has long been acknowledged by the community. The potency of the influence for good of the Trinity Mission is justly to be credited to the earnest work of Mr. Martin’s predecessors and his faithful continuance thereof.

PLATE GLASS DEALERS.—In 1871, immediately after the fire, the city directory contained the names of but two dealers in plate and window glass; the number had increased to fifteen in 1885. Few of these direct importations from abroad, although handle more or less imported plate glass. It is impossible to give figures relative to either imports or sales. There have been as yet no efforts made to establish a manufactury of plate glass in this city. Indeed, the manufacturry throughout the United States prior to 1879, was tentative merely, and proved, financially, a failure.* There are living in Chicago, at the present time, men.

* It is an interesting fact that the first glass works west of Cincinnati were built at Altoa, in 1867.
HISTORY OF CHICAGO.

who invested and lost hundreds of thousands of dollars in experimental manufacturing of this character. As a result, however, the trade in glass may be said to be a prosperous one, as, indeed, it could hardly fail to be a city where building is so largely carried on as here.

Of manufacturers of cut, stained and ornamented glass, the census report for 1880 shows that there were in Chicago, at that time, six; the capital invested was $39,600; the average number of employees, eighty; the total wages, $47,545; the value of materials, $38,564; and the value of manufactured product, $113,612.

George A. Misch began the manufacture of stained glass, in this city, in 1864. Two years later his brother, Adolph J., was admitted as a partner, and remained a member of the firm until his death, which occurred on December 15, 1874. Since that time, George has continued the business alone. When but fairly established on a safe footing, the fire of 1871 placed him, as well as hundreds of other Chicago business men, once more at the foot of the ladder, but Mr. Misch soon recovered, in a great measure, his losses. He now has a trade extending over the entire West, and also does considerable business in the East. He furnished the memorial work for the Presbyterian Church in Detroit, the Cathedral for the Church of St. Francis de Sales in Cincinnati. In this city he supplied the stained glass used in the Temple of the Sinai Congregation, in St. Peter's, St. John's, and the Cathedral of the Holy Name, and many other churches. Numerous glass parts of the United States, are provided with his manufactures. At the time of the fire, Mr. Misch was located at No. 90 Washington Street, and then employed in business, in that city, about one hundred men, and possessed a capital of nearly $847,545. When he resumed business on the North Side, where he remained nearly a year and then removed to his present location. Mr. Misch was born in Straus, Germany, on July 5, 1842, and is the son of Theodore and Wilhelmina Misch. In 1864, his parents settled in New York City, where his father engaged in the manufacture and importation of stained glass, the son with him as a journeyman until in 1864, when he came West and engaged for himself the business which he continues. Mr. Misch was married, in 1868, to Miss Effie By, daughter of Nicholas By of this city. They have four children,—Emmie, Albert, Fred, and George A., Jr.

McCully & Miles.—This firm is now composed of John McCully and Holland F. Miles, but the business was established in 1859, by E. Cook & Co., and was the first of the houses in the city to engage in the manufacture of glass tracts. In 1872, Mr. McCully became a member of the firm of E. Cook & Co., and two years later Mr. Miles purchased Mr. Cook's interest, since which time he and Mr. McCully have continued under their present firm name and style. From 1874 to 1875, the place of business was at 38 Wabash Avenue; in 1876, they removed to the present location. They deal in all kinds of stained glass, the full name of the business being McCully & Miles, and since this time in the West. Since the business has been increased more than tenfold; forty men are now employed, and their trade, which extends from Maine to California, amounts to a $100,000 annually in the manufacture of stained glass for many of the prominent churches in this city; also for the State House, at St. Paul, Minn., and for the St. Paul's Episcopal Church, at Milwaukee, one of the finest churches in the West. Among the many private residences in this city for which they have furnished glass, may be mentioned those of M. D. Wells, the late General Anson Stager, B. P. Moulton, and others.

John McCully was born in Birmingham, England, on August 26, 1826. His father, Richard McCully, was, during his business life, in the stained glass trade, and the son was early trained in the same mercantile pursuit. After receiving a good education, he began his apprenticeship in 1836, and worked in his native city until in 1870, when he came to this country and engaged for two years with a house in New York City. In 1872, he came to Chicago through the medium of Mr. Cook, with whom he continued until he formed his present connection with Mr. Miles, in 1874. Mr. McCully was married, in 1875, to Miss Kitty McMillan, of Kingston, Canada; Mrs. McCully was, however, reared and educated in the United States. They have two children. Mr. Miles was married, in February, 1884, to Miss Addie Lyon, of New York City.

James H. Rice, president of the stock company which bears his name, was born in Tompkins County, N. Y., on May 19, 1830, and is the son of Asa and Polly (Reed) Rice. His early education was gained in the district schools, and, like many other successful business men of this city, he obtained it by self, to assert an independence which stood him good stead in his after years. At the age of eighteen he left school, and for five years succeeding was employed on a farm, when, in the spring of 1854, he was employed at Peru, Ill., by Ira Foote, contractor and house builder. In July of the same year, he came, with Mr. Foote, to Chicago, and for a number of years he was associated with him as a contractor and builder. In 1863, the city was for the erection of a small dwelling-house for ex-Alderman Sexton, situated at the corner of Twelfth Street and Indiana Avenue. Soon after, Park Row was finished, and the old Richmond Hotel, on the corner of Michigan Avenue and Lake Street, was built. In 1872, after finishing the Tremont House, the partnership existing between Mr. Foote and Mr. Rice was dissolved, and a business as importers and dealers in foreign and American window-glass was established. Mr. Foote owned an interest, although his name never appeared as a partner in the firm until 1877. The business was conducted in Mr. Rice's name until January 1, 1884, when the present stock company was incorporated, under the name of The James H. Rice Company. Since its incorporation, this house has taken a foremost place among the strong business enterprises for which Chicago is so famous, and in its splendid line is second to only one in the United States. It was among the first, if not the first, exclusive glass houses west of the Alleghany Mountains, and does a very large importation of French manufactured goods, consisting of plate, mirrors, sash, and window-glass, in German and French mirrors, polished plate, and domestic and foreign window-glass. The importations of foreign glass have fallen off greatly during late years, owing to the completeness of American manufactures. There are in the United States, at the present time, four plate-glass factories,—viz., at New Albany, Ind.; Jeffersonville, Ind.; Creighton, Penn. and Crystal City, Mo. Of the latter factory, Mr. Kimball is the sole agent. These factories are unable to supply the rapidly increasing demand, and a fully three-fourths of all the glass sold in the United States is of domestic manufacture, and seven-eighths of the glass sold in Chicago, which is the most extensive distributing point in America, is made in this country. The sale of American glass in this city has increased twenty-five per cent. annually for the past four years, and the time is not far distant when the importation of glass will be wholly abandoned by Chicago dealers. In the spring, 1874, Mr. Kimball was recognized by the national reputation as a shrewd manipulator of the glass markets, by a gigantic purchase which advanced the price fifteen per cent. This was accomplished at no cost to the company, and was exemplar in its operation and effect to that which has distinguished the provision markets and the financial exchanges of the country. So comprehensive was this manipulation, that the advance quoted ruled the market all over the United States. It was not possible that there was the evidence of a thorough knowledge of the business, was the occasion of a universal press-comment, and gained for Mr. Kimball a world-wide reputation as a dealer in this line of merchandise. Mr. Kimball was born at Boston, Mass., on February 23, 1839, and is the son of Alva and Ruth (Woodbury) Kimball. His father was a prominent print manufacturer of Boston, and his mother a descendant of the old Woodbury family of New Hampshire. He received his early education at the common schools of his native city, and later became a pupil at Andover College. He left college at the age of sixteen, and paid a visit to an uncle, a dry goods merchant, at Louisville, Ky. At twenty he entered and began to remain in Louisville, and obtained employment with the dry goods firm of Bent & Duval, of that city, and became the New York house for that house when only nineteen years of age. After five years' service with Bent & Duval, he formed a partnership with a Mr. Johnson, the firm being Johnson & Kimball. They carried on a successful business in dry goods until 1863, when the partnership was dissolved and Mr. Kimball entered the pay department of the army, with headquarters at Louisville. After a year's service, he was made chief clerk of the quartermaster's department, under General Thomas E. Wood, and next quartermaster of the headquarters of the assistant quartermaster-general being at Cincinnati. He held that position until the close of the War, when he went to New York City as the solicitor of consignments for the auction and commission house of Thomas Anderson & Co., of Louisville, Ky., in the interests of the firm he represented, introducing American window-glass. In 1871, he entered the employ of James H. Rice as
...handling paint, oil, and glass. He remained here one day at the beginning of March, with John Derry, the present secretary of the company. Mr. Newkirk is a young man of great business ability and energy. He has become well and favorably...
CORPORATE HISTORY.

At the election in November, 1874, the city comprised twenty wards. In 1875, the city government was re-organized under the General Incorporation Act of April of that year, and consequently no election was held in November, the persons then in office holding over until May, 1876. Under this law the city was divided into eighteen wards.

REGISTER FROM 1872 TO 1885, 1877-78—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) John W. H. Richardson, Chauncey T. Bowen; (2) William W. Martin, William W. Quick; (3) John W. McClary, Charles T. Hotchkiss; (4) John H. McAvoy, John W. G. McRae; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1877-78—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) Chauncey T. Bowen, John J. Knickerbocker; (2) Arthur Dixon, Joseph E. Oakes; (3) John W. McGennis, David Coey; (4) John H. McAvoy, William W. Quick; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1878-79—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) Chauncey T. Bowen, John J. Knickerbocker; (2) Arthur Dixon, Joseph E. Oakes; (3) John W. McGennis, David Coey; (4) John H. McAvoy, William W. Quick; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1879-80—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) Chauncey T. Bowen, John J. Knickerbocker; (2) Arthur Dixon, Joseph E. Oakes; (3) John W. McGennis, David Coey; (4) John H. McAvoy, William W. Quick; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1880-81—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) Chauncey T. Bowen, John J. Knickerbocker; (2) Arthur Dixon, Joseph E. Oakes; (3) John W. McGennis, David Coey; (4) John H. McAvoy, William W. Quick; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1881-82—Mayor, Joseph Medill; City Clerk, Charles T. Hotchkiss; City Attorney, I. N. Stiles; City Treasurer, David A. Gage. Aldermen, by wards: (1) Chauncey T. Bowen, John J. Knickerbocker; (2) Arthur Dixon, Joseph E. Oakes; (3) John W. McGennis, David Coey; (4) John H. McAvoy, William W. Quick; (5) Peter Duggan, William A. Tomaino; (6) Michael Schmitz, John H. McAvoy; (7) E. F. Bullard, Thomas H. O'Hara; (8) Bart Quick, S. E. Cleveland; (9) Charles W.lickler, Louis Schaffner; (10) John Thomas, John McCarthy; (11) Mahlon D. Ogden, William M. Clarke; (12) Charles L. Woodman, A. A. Burnham.

1877—Mayor, Monroe Heath; City Clerk, Caspar Butz; City Attorney, R. S. Tuttle; City Treasurer, Charles L. Larrabee. Aldermen, by wards: (1) D. K. Pearsons, J. T. McAlley; (2) Addison Ballard, Jacob Rosenberg; (3) Eugene Cary, John L. Thompson; (4) James H. Gilbert, John W. Stewart; (5) John D. Tully, Swwayne Wickersham, (elected September 24, 1879, to fill vacancy caused by the resignation of M. F. Tuley); (2) Patrick Sanders, Addison Ballard; (3) O. B. Philips, John M. Clark; (4) H. E. Mallory, Amos Grannis; (5) George Turner, M. McAlley; (6) Edward F. Cullerton, John J. Alpeter; (7) John McNally, John Kirdan; (8) Frank Lawler, Thomas Purcell; (9) John M. Smyth, James Pevey; (10) John Eissner, Michael McNurry; (11) A. G. Throop, George B. Swift; (12) James T. Rawleigh, Joseph D. Everett; (13) A. C. Knepf, Henry F. Thompson; (14) Frank A. Sauter, Reinhard Weidler; (15) A. W. Tuley; (16) F. Wetterer, Christian Meyer; (17) John McCaffery, Edward P. Barrett; (18) Julius Jonas, William G. McCormick.

Frederick Sommer: (6) Frederick Lodging, E. F. Cullerton; (7) Henry Kerby (who held his seat until April, 1875, on account of the non-determined contest of John Kirdan against James H. Hilbreth, declared ineligible although he received the majority of votes in the election held April 3, 1877); Charles Tarnow; (8) R. M. Oliver, Frank Lawler; (9) Jacob Beidler, John M. Van Osel; (10) M. McNurry, George E. White; (11) A. B. Cook, A. G. Throop; (12) S. G. Seaton, James T. Rawleigh; (13) H. P. Thompson, William Wheeler; (14) M. Ryan, John Baumgarten; (15) Frank Niesen, A. W. Waldo; (16) M. Schweihsal, F. Linsenbath; (17) Bernard Jansens, M. Sweeney; (18) J. H. B. Daly, James A. Kirk.

1878—Mayor, Monroe Heath; City Clerk, Caspar Butz; City Attorney, Richard S. Tuttle; City Treasurer, Charles L. Larrabee. Aldermen, by wards: (1) Merrv F. Tuley, D. K. Pearsons; (2) Patrick Sanders, Addison Ballard; (3) O. B. Phillips, Eugene Cary; (4) Herbert K. Mallory, James H. Gilbert; (5) George Turner, John D. Tully; (6) E. F. Cullerton, Frederick Lodging; (7) John McNally, John Kirdan; (8) Frank Lawler, R. M. Oliver; (9) John M. Smyth, Jacob Beidler; (10) John Eissner, M. McNurry; (11) A. G. Throop, A. B. Cook; (12) James T. Rawleigh, S. G. Seaton; (13) A. C. Knepf, H. P. Thompson; (14) Frank A. Sauter, M. Ryan; (15) A. W. Waldo, Frank Neisen; (16) Peter S. Wetterer, M. Schweihsal; (17) John McCaffery, B. Jansens; (18) Julius Jonas, J. H. B. Daly.

CARTER H. HARRISON.

James M. Wanner.

CARTER H. HARRISON, mayor of Chicago, although he has been in active political life but fourteen years, is one of the most widely known public characters in the country. He has contributed to what such a power within the democratic party, that at the last National Democratic Convention his name was prominently mentioned as a candidate for the Vice-Presidency. Mayor Harrison may be said to have fairly inherited his taste for political life. His great-great-grandfather was the ancestor of President William Henry Harrison, his grandfather a cousin of Thomas Jefferson, and he himself is a cousin of John C. Breckinridge. He was born near Lexington, Ky., on February 15, 1825, and his father dying when he was eight months old, he was left to the care of his mother, a daughter of Colonel William Russell, of the United States Army, one of the pioneers of Kentucky, of which state he is now a prominent citizen. Harrison's home was a log house, and it is said that "his first cradle was a new sugar-trough." From his mother he inherited those principles which, in 1849, placed him in the front rank of the emancipators of Kentucky. Most of his education preparatory to entering the sophomore class of Yale College, he received from Dr. Marshall, brother of the Chief Justice, and father of Tom Marshall, the great orator. Graduating in 1845, he commenced the study of law, but did not enter into practice at once, as his mother needed his company and comfort. In 1851, he went abroad, traveling for two years, in Europe, Asia and Egypt. In 1854, he returned to this country, and having practiced in the Northwest, but reaching Chicago, became so impressed with the young city that he invested all his means in real estate, expecting also to enter into the regular practice of the law. But his acute business foresight induced him to utilize his real estate holdings, thus laying the firm basis of an ample fortune. Mr. Harrison did not actively engage in politics until 1870, when he was elected during the succeeding year a member of the first board of County Commissioners. He held the office until December, 1874, when he took his seat as member of Congress from the second district of Illinois. His term in Congress was marked by an earnestness and ability which made him one of the most prominent members of that body. A resolution, introduced by him, to fix the presidential term at six years, with ineligibility for re-election and making the retiring President a senator for life, drew the attention of the country to him as a man of broad and radical views. His efforts in behalf of the Centennial appropriation bill exhibited him, not only as an energetic worker and ready debater, but as a brilliant orator. As a humorist, also, he developed a reputation second to that possessed by no other public character in the country. In this extended arena full scope was given to those talents, which had been fostered by extensive reading and travel. Mr. Harrison spent the summers of 1874 and 1875 in Europe, with his family. He was elected mayor of Chicago in 1879, 1881, 1883, and 1885. Against his own desire he was nominated for Governor of Illinois in 1884, and during the fall of that year conducted a most energetic and brilliant campaign, which resulted in cutting down the republican majority of 37,033, enjoyed by Governor Colloom, to 13,500. Mayor Harrison was married, on April 12, 1855, to Miss Sophia Preston, who came from a southern family. She died in 1857, and in 1862, he married, in 1882, Miss Marguerite E. Stearns, daughter of one of Chicago's oldest, most respected and wealthiest citizens.

GEO. S. WINTON, Jr., corporation counsel of the City of Chicago, is the youngest man who, at the time he was married, was twenty-eight years of age when chosen. He has nevertheless made an enviable reputation as a lawyer and an official, having a clear perception and easy address. His parents were early residents of Chicago, his father, Frederick W. Winston, being a leading member of the Bar as early as 1857. His mother, whose maiden name was Minis T. Dudley, was a native of Kentucky; and while on a visit to her home in Franklin County, her son Frederick was born on October 27, 1836. The best private schools in Chicago afforded him his education, preparatory to a thorough course in Yale College, where he graduated with high honors, and, in the spring of 1857, was admitted to practice before the Supreme Court of the State. Forming a partnership with Chester M. Daws, assistant U. S. district attorney, he soon brought himself to such favorable notice that, in the spring of 1881, he was appointed assistant corporation counsel under Francis Adams. One of the most important cases intrusted to him was that involving the right of the corporation to regulate the closing of the bridges. In the spring of 1883, he argued the question in the U. S. Supreme Court. This was the great principle that the corporation decided rights in the control of the streams within its bounds. Upon the resignation of Mr. Adams, in December, 1883, Mr. Winston was appointed corporation counsel, and unanimously confirmed by the Common Council. He has carried through many measures of great import to the city.

J. F. STURGIS,

After the fire of 1871, the first thing was to secure offices and rooms for the various branches of the city government. On October 9, the head-quarters of the mayor were temporarily located at the corner of Ann and Washington streets. At a meeting of the Common Council, on October 11, a committee was appointed to select a suitable building for the differ-
ent offices of the city government. On the 12th, the report of the committee, recommending the Madison-

street Police Station as a place of meeting for the Common Council, was concurred in. A communica-
tion from Mayor Mason to the Council, of the same date, stated that he had "on yesterday decided to temporarily
fix his office, and those of other city officers, at the cor-
ner of Hubbard Court and Wabash Avenue." This,
the Common Council met, by resolving at once "that
the Mayor, Comptroller and City Clerk have their
offices for the present in Madison street Police Station."

At this meeting it was also resolved "that the Board
of Public Works be required to immediately prepare
plans and specifications for a permanent building for all

HISTORY OF CHICAGO.

House, offering premiums of $5,000 for the best plan,
$2,000 for the second, and $1,000 for the third. In re-
ponse, fifty plans were received, and opened in March,
1873. It was not, until 1877, that steps were taken
toward the commencement of the new building. At a
meeting of the City Council, on September 3, 1877, an
ordinance was passed as follows:

"That the Department of Public Works, in connection with the
building committee, be, and they are hereby, authorized and em-
powered to take immediate measures to put in the foundations of the
City Hall building upon its original site, and according to such
plans and specifications, and in such manner, as they, or a majority
of them, may decide upon."

An agreement having been entered into between the
county and the city requiring the exterior portion of the

CITY HALL BUILDING.

city offices and the Common Council, to be erected on
the old Court House Square."

Within a week from the fire, work was authorized to
be commenced upon the building of a new City Hall,
on what was called "the reservoir lot," owned by the
city, at the southeast corner of Adams and LaSalle
streets.* The structure covered the entire lot, being
about one hundred and seventy-eight feet square, and
was completed and occupied by January 1, 1872. It
contained rooms sufficient for all the city offices, and
also accommodations for the law library, the county re-
corder, and several of the courts. The city expended
$75,000 in constructing and furnishing this edifice,
which continued to be occupied by the officers of the
city government until 1885. It was merely a pile of
brick and mortar, almost wholly without conveniences,
hastily thrown together in walls, with openings for doors
and windows. It was familiarly known as the "old
Kookery."

In November, 1872, the city and county jointly
advertised for plans for a new City Hall and Court

* It had upon it an iron water tank which had belonged to the Water Works
service on the South Side. The new City Hall was built around the brick sub-
structure, which was transformed into safety vaults.

House and the City Hall to be of uniform architectural
design, arrangements were made with J. J. Egan, ar-
chipet for the county, to furnish the city with duplicate
drawings of the front elevations, together with plans in
detail of the stone work of the Court House. L. D.
Cleveland, superintendent of buildings, was placed in
charge of construction and the preparation of plans for the
interior. The contract for excavating for the foun-
dation was let to John Shackley for $1,483, and for
building the sub-basement to Mortimer & Tapper for
$57,999. On April 17, 1878, further contracts were
awarded as follows:

Thomlinson & Reed, cut stone         $477,693
John Angus, masonry                  90,519
J. F. Sexton, iron work              105,302

The work was somewhat retarded in the spring and
summer of 1879, on account of an investigation ordered
by the City Council, growing out of certain charges pre-
ferred by the Citizens' Committee. In April, 1881, the
commissioner of public works reported that the con-
tract had been let for the fire-proof roofing and flooring,
and that it was intended to push the work so that the
new building might be occupied by the fall of 1882.
But this was not realized. In February, 1882, the mayor reported that the building would not be completed until the spring of 1883; but it was in fact not ready for occupancy until January and February, 1885. The first officer to move in was the city comptroller, on January 3, 1885.

The building is a dual structure, erected for the joint occupancy of the city and county. The style of architecture is the modern French Renaissance. Above the second story proper is a colonnaded double-story, with Corinthian columns thirty-five feet in height, of polished Maine granite, supporting an entablature, divided into architrave, frieze and cornice. The attic story is embellished with allegorical groups representing agriculture, commerce, peace and plenty, the mechanic arts and science. The building was to have been surmounted with domes. The materials used in the superstructure are principally Bedford sandstone and brick, the columns, pilasters and pillars being of Maine granite. The cost of the building, including all amounts paid therefor and due on contracts up to January 1, 1885, was $1,549,438. The amount estimated as necessary to complete the unfurnished portion is $92,600, making a total cost of $1,642,038. The county building, erected at the same time and of nearly the same materials, according to the report of the commissioners of public works, cost $2,124,668.

The dimensions of the building, exclusive of the rotunda connections with the Court House, are: Outside length on LaSalle Street, 366 feet; outside width on Washington and Randolph streets, 128 feet each; height from sidewalk to top of cornice, 136 feet.

The interior is divided into six stories, and contains 119 office rooms, with 64 fire-proof vaults. All the partition walls are of brick and hollow-tile; the floors are of T-beams and hollow-tiles; stairs and balustrades of iron, wainscoted with colored marble in panels. The entire interior work is of white oak, of elaborate design and highly finished.

The basement story, which is thirteen feet eight inches in height, is occupied by the Fire, Police and Health departments, the City Electrician and Gas Inspector. The first story, twenty-one feet eight inches high, is occupied by the Mayor, Comptroller, City Clerk, Treasurer, Collector, the departments of Building and Public Works, the Bureau of Water Rates, and the Janitor. The second story, twenty-one feet eight inches high, is occupied by the Commissioner of Public Works, and the Bureaus of Accounts, Special Assessments, Engineering, Sewers, Maps, Streets, and the janitor. The third story, twenty-three feet eight inches high, contains the city law departments and the Board of Education. The fourth story is occupied by the City Council, the main chamber being 90 by 55 feet. The rooms in the fifth story are unfurnished.

**THE POLICE DEPARTMENT.**

The fire of 1871 caused less demoralization in the Police Department than in any other branch of the municipal service. The losses in buildings, office and station furniture, and supplies, amounted to $63,500; and with a boat-house, six hundred and twenty muskets and six brass cannon and equipments, aggregated about $75,000. This comprised the entire value of property destroyed, except the lost, stolen, and unclaimed, or detained-as-evidence effects in the hands of the custodian, estimated at $20,000. All the records, books of accounts, papers, and files of the office were burned; but as soon as temporary headquarters were obtained,
CORPORATE HISTORY.

In 1871, the city was divided into three precincts: The first, with station on Harrison Street, comprising the central portion of the city, with sub-stations on Twenty-second Street, Cottage Grove Avenue, and Deering Street; the second precinct, station on Madison and Union Streets, controlling the West Lake, West Twelfth, the West Chicago-avenue and Rawson-street districts; and the third, at No. 180 Dearborn Avenue, including the Larrabee-street and Webster-avenue sub-precincts. In 1873, the North Branch Station, on Rawson Street, was added to the third precinct list. In 1874, the Hinman-street Station, on Hinman and Paulina streets, was entered in the second precinct jurisdiction. In 1875, the following re-districting and apportionment of sub-stations was made under the régime of City Marshal R. E. Goodell: First precinct, the Harrison-street, Twenty-second-street, Cottage Grove-avenue and Deering-street districts; second precinct, West Madison-street, West Twelfth-street and Hinman-street districts; third precinct, West Chicago-avenue, West Lake-avenue and Rawson-street districts; fourth precinct, East Chicago-avenue, Larrabee-street and Webster-avenue districts.

In 1876, the valuation of station houses and real estate was as follows: First precinct $71,995.00; second precinct, $65,280.02; third precinct, $23,283.88; fourth precinct, $39,561.65; total, $205,264.35.

In 1879, the Central Station, besides the detective force, was headquarters for the day squad; and the first precinct embraced only the Harrison-street, Twentysecond-street and Cottage Grove-avenue districts.

The following table gives a condensed and accurate résumé of the operations of the department:

Total 405,102 $2,288,609 $6,346,091 91 $8,641,600 60 $8,107,445 35

In 1884, the total value of real estate belonging to the Police Department was $72,500; the value of the buildings, $207,800; and that of stock, supplies and apparatus, $92,433.79; making a total of $377,733.79. This was divided among seventeen stations, as follows: Central Station, $8,244.55; Harrison-street Station, $51,992.30; Twenty-second Street Station, $26,630.98; Cottage Grove-avenue Station, $2,348.66; Thirty-fifth Street Station, $5,534.45; Twelfth-street Station, $2,560.40; Hinman-street Station, $17,567.70; Deering-street Station, $6,968.80; Desplaines-street Station, $3,948.10; Madison-street Station, $8,617.32; Lake-street Station, $4,159.60; West Chicago-avenue Station, $1,750.60; North-avenue Station, $9,966.45; Rawson-street Station, $4,787.49; Chicago-avenue Station, $43,487.20; Larrabee-street Station, $24,293.05; Webster-avenue Station, $4,933.12.
West Chicago-avenue, North-avenue and Lawson-street stations. The fifth precinct was then established, and comprised the Chicago Department for the fourteen years ending December 1, 1884, shows chief official power vested in a superintendent from 1875. Previous to that date the operations of the force were controlled by a board of commissioners, these being—

1871–72—Manuel Talcott, Mark Sheridan, Jacob Rehm; W. W. Kennedy, superintendent; E. P. Ward, secretary. 1872–73—Messrs. Sheridan, Wright, Talcott, Cleveland and Kehm, commissioners—Elmer Washburn, superintendent; E. P. Ward, secretary. 1873–74—Mark Sheridan, E. F. C. Kloke, Charles A. Reno, commissioners; Jacob Rehm, superintendent; E. P. Ward, secretary. 1875–76—Mark Sheridan, E. F. C. Klooke and Charles A. Reno, commissioners; Jacob Rehm, superintendent; E. P. Ward, secretary. 1877—E. A. Seavey, superintendent; E. P. Ward, secretary. 1879—Simon O'Donnell, superintendent; Austin J. Doyle, secretary. 1880—William J. McCarrig, superintendent; Austin J. Doyle, secretary and inspector. 1881—William J. McCarrig, superintendent; Aus in J. Doyle, secretary and inspector. 1882—Austin J. Doyle, superintendent; D. Welter, secretary and inspector. 1883—Austin J. Doyle, superintendent; D. Welter, secretary and inspector. 1884—Austin J. Doyle, superintendent; D. Welter, secretary and inspector. From before the inauguration of J. Kipley as custodian of the Police Department; and from that date until 1885, John O'Donnell filled the position.

The introduction by Captain W. J. McCarrig, in 1880, of the police telephone and signal system, embracing the use of patrol wagons and boxes, was an innovation which has proven eminently successful and has since that date extended to other cities. The establishment of telephone stations at intervals along all available patrol beats, at once augmented the protective and detective efficiency of the force. One year later this branch of the service had become fully organized; 2,114 box-keys had been given to citizens, the horses attached to patrol wagons had been trained to cover a mile of territory within six minutes, and eight operating stations were maintained. In 1883, there were 373 boxes placed on the most prominent street corners throughout the city, being an average of twenty-five boxes to each wagon. Up to December 31, 1884, 87,368 reports had been received through these boxes from patrolmen, 23,921 alarms had been responded to, 14,592 arrests made, 1,188 fires attended, 66,697 miles traveled, 2,175 sick and injured persons cared for, 8,010 prisoners taken to stations and the jail, and 3,726 disturbances suppressed without arrest. The service required the attention of eighty-four men. The total number of boxes was 334.

The detective force, which, in 1871, was under the command of Wells Sherman, comprised at that time eight members, most of whom have been prominently known in that branch of service for many years. The corps then consisted of Messrs. Ellis, Heineman, Simmons, Elliott, Simonds, Tyrrell, Lackey, and Bridges. In 1873, Samuel A. Ellis became chief of detectives, and made the first movement toward establishing a permanent and effective detective force, securing an appropriation of $10,000 for a secret service fund, and modeling the service after that of other systems. He was superseded, in 1874, by Joseph H. Dixon, who gave way in 1876 to William J. McCarrig. In 1880, Edward J. Steele was constituted lieutenant of detectives, and in 1881, Edward J. Keating was made chief. In the same year, Thomas H. Currier took charge, and was followed by John J. Shea and Joseph Kiplely, chiefs of this branch of the service until 1885. The following is the number of officers detailed as detectives since 1871:

In 1872, 6; 1873, 10; 1874, 6: 1875, 10; 1876, 10; 1877, 10; 1878, 8; 1879, 10; 1880, 11; 1881, 19; 1882, 20; 1883, 22; 1884, 36. The detective force is operated on a salary system, with a yearly secret service fund appropriation to meet the requirements of its workings, which have become very systematic and effective.

In 1877, the police force of Chicago were successful, with the aid of the military, in quelling a riot which, at one time, threatened to assume the same lawless and destructive character which had characterized the labor demonstrations in Pittsburgh and other cities. On Monday, July 23, orders were issued to the Police Department to hold itself in constant readiness for a local outbreak. Excitement ran high among the laboring classes, and at a mass meeting of workmen, held on Monday evening, at the corner of Madison and Market streets, five thousand spectators, inflamed by the fiery speeches of communistic orators, dispersed to their homes with a decided impression that trouble would ensue on the morrow. On Tuesday morning, the first indication of mob violence appeared, and information reached police headquarters to the effect that a mob of several hundred persons, armed with clubs and sticks, were moving down South Canal Street, compelling all workmen in lumber yards and factories to join their ranks. They were dispersed by a detachment of second precinct police, and several of the leaders arrested. Later in the day, the collection of another mob near Remington's gun store, on State Street, led to a second successful sortie on the part of the police; and taking this as an indication that the rioters were bent on following the example of the Pittsburgh mob, which raided the gun stores of that city, the following order was sent to the proprietor of every gun store and pawnshop in the city:

"To all Pawnbrokers:"

"As a measure of precaution, as well as protection to yourselves in the event of a riot, I would respectfully request that you immediately remove all revolvers or other fire-arms from your windows to some safe place where they can not be taken from you, and let them so remain until such time as all danger is past.

"M. C. Hickey, General Superintendent of Police."

At four o'clock in the afternoon, information was received at headquarters that mobs were congregating on different portions of the city. A general order was issued commanding prompt action, and many arrests were made. A reserve force was held at one spot, and the police were kept busy dispersing crowds, which gathered later at some new center. That afternoon circulars were scattered broadcast over the city, calling for a mass meeting on Market Street the same evening. The mayor and a council of police questioned the expediency of this meeting, and the mob, numbering several hundred, was dispersed by the police after a vigorous use of the baton. The ensuing morning, crowds gathered to discuss the situation, but they fled at the coming of the police. Up to this time the police force had been ample to cope with the rising, and Captains Seavey, Gund, and O'Donnell, and Lieutenants Blettner, Simmons, Bell, Hathaway, Gerhing, and Haas, with their details, had done most effective work in controlling and dispersing the rioters. Over one hundred and twenty-five arrests had been made, and three hundred and twenty-two special policemen sworn into service.

In accordance with a proclamation issued by Mayor Heath, citizens' organizations were established in each ward; the First and Second regiments, and other military, cavalry, and veteran organizations were held in readiness at their respective armories; and by Tuesday evening not less than twenty thousand armed men were
ready to act in defense of the city. General Joseph T. Torrence commanded the military organization, with headquarters at the central police office.

The first actual violence occurred on Wednesday. The rioters, growing bolder, began driving men from work and destroying property in the lumber districts, and massed nine hundred strong near McCormick's reaper factory, on Blue Island Avenue. Here a detachment of police under command of Lieutenants Callahan and Vesyey routed the mob. Stones and other missiles were used, and two patrolmen were slightly injured. A second mob, at Van Buren-street bridge, was dispersed by Lieutenant Ebersold; and still another, in the vicinity of the Illinois Central elevator, by Lieutenant Bell and Sergeant Brennan. Before noon a dozen outbreaks occurred in the various divisions of the city, during which men were beaten, windows broken, and street cars stopped. The aspect of affairs had become serious. The saloons were ordered to be closed, trucks were kept in readiness to carry the police, a mass meeting of the rioters was broken up and their platforms torn down, and during a desperate hand-to-hand conflict many were beaten and several shots fired. At the Burlington & Quincy round-house, on Sixteenth Street, Lieutenant Macauley and Sergeant Ryan's detail had a half-hour battle with rioters, during which five of the latter were shot dead. That evening Pribyl's gun store, on South Halsted Street, was raided, and the stock appropriated by the mob.

Thursday morning, the rioters were massed in the vicinity of the Sixteenth-street viaduct, and several sanguinary conflicts took place. Lieutenant Bischoff's detail drove a riotous crowd into the West Twelfth-street Turner Hall, and were fired upon, special policemen Landaker and Shank being wounded. The riot had now begun in earnest. At the viaduct, three hundred and fifty policemen were engaged in a desperate battle. Alarming rumors of riot and carnage were afloat, and each fusillade intensified the popular excitement. The hour for decisive action had come, and the First and Second regiments, commanded respectively by Colonel S. B. Shierer and Colonel James Quirk, were instructed by General Torrence to report at the scene of disturbance, to Police Captain Sceavy. General Six-pound guns, ready for action, in command of Colonel Bolton and Captain Tobey, and two companies of cavalry, were also brought into service. The police were nearly exhausted, but kept driving back the rioters; and at Halsted-street bridge, where a large number of packing-house and rolling-mill men had reinforced the mob, the scene was one of the wildest conflicts.

The police, commanded by Lieutenants Hood, Carberry and Bischoff, crossed the bridge in pursuit of the rioters, when some sympathisers of the latter opened it to prevent their retreat. The police were hemmed in, and showers of bullets filled the air, when a brave little fellow, named James O'Neill, seeing their predicament, swung back the bridge, and soon after Deputy Superintendent Dixon and Lieutenant McGarrie arrived with reinforcements, and after a series of skirmishes effectually routed the rioters. During the various conflicts, ten of the strikers had been killed and forty five wounded, and nineteen policemen injured.

General Joseph T. Torrence, brigadier-general commanding the Illinois National Guards, in his report of the riot and the part taken by the military in the same, says:

"I at once ordered the five regiments composing my brigade—the First, Lieutenant-Colonel S. B. Shierer; the Second, Lieutenant-Colonel James Quirk; the Third, Lieutenant-Colonel W. K. Morgan; the Ninth, Major William P. Chalmers; and the Twenty-fourth, Lieutenant-Colonel J. B. Parsons—to assemble at their respective armories and hold themselves in readiness to move at a moment's notice. These orders were carried out with dispatch.

"The First and Second regiments remained in their armories until the 26th of July, when the First was moved to the Exposition Building and the Second to the Rock Island Depot. At 10 o'clock on the same day, Captain McElligott, of the First, was dispatched to the corner of Chicago and Milwaukee avenues, in command of his own company, Captain Lackey's Zouaves and the North Chicago Light Guard, and an hour later the remainder of the First Regiment, under command of Lieutenant-Colonel Morgan, was ordered to the Harrison-street station, where it was joined by one gun of Bolton's Veteran Battery. With this force Lieutenant-C Colonel Shierer then proceeded to the east end of the viaduct where the gun was placed in position to command the bridge, and the regiment properly posted for its support. The Second Regiment was simultaneously posted at the corner of West Twelfth Street and Halsted Avenue, to support a second gun of Bolton's Battery. In the evening the following changes were made: Four companies of the Second Regiment, under Lieutenant-Colonel Quirk, were stationed on the Halsted-street viaduct, and three companies, under Major Murphy, midway between Halsted and Madison streets; two companies of the First Regiment were posted at the Twelfth-street bridge, two at Jefferson street, and two east of West Twelfth-street Turner Hall. With the exception of one company, of the Second Regiment to the corner of Archer Avenue and Halsted Street, the disposition of the troops remained substantially the same until the 27th of July, when, at 2 o'clock p.m., the First Regiment, in command of Captain McElligott, was ordered to the Exposition Building. Later the Second Regiment returned to the Rock Island depot. On the morning of the 29th of July, the Major-General commanding proceeded to Broadwood, taking with him the First Regiment and Captain Lackey's Zouaves. The Second Regiment remained on duty at the Rock Island depot until Monday morning, the 30th of July, at 5 o'clock a.m., when, in order to protect persons desiring to leave the city, the companies of the regiment were posted as follows: Two companies at the corner of Eighteenth Street and Stewart Avenue, two at the corner of Archer Avenue and Halsted Street, and one at the Rock Island depot. On the night of the 26th of July, the troops on the viaduct being molested by missiles and pistol shots from struggling rioters, Colonel Quirk ordered his men to fire. One volley was fired at 9:10 p.m., and a second at 10:30 p.m., the first producing some effect, the second reducing the rioters to silence. All remained quiet in the vicinity of the viaduct for the rest of the night. The Union Veterans, a force composed wholly of old and tried soldiers, though not connected with the State military organization, but sworn in as special policemen, reported to me for duty and obeyed orders from headquarters. This command was organized and equipped under the efficient supervision of General Keyes, Colonel Owen Smarr, Major S. B. Murphy and Captain Martin I. Iclicm, on the 24th of July, and from that time forward was almost constantly engaged in the performance of duties which were of the first importance to the Government, and was promptly and efficiently organized and equipped, and was employed during almost the whole time of the riots in guarding the North and West Side water works. Company 'A,' Captain L. W. Pierce, was the first fully organized and equipped, and was employed during almost the whole time of the riots in guarding the North and West Side water works. Company 'F,' Captain C. K. E. Koch, was mainly occupied in protecting the distillery at the corner of Corcorre Avenue and Morgan Street. General Libb also recruited and commanded a company of veterans, numbering seventy-two men, which was the greatest service performed by any of the companies; 'C' and 'G,' of the Union Veterans, but I feel it my duty to call attention to their meritorious conduct, as also to that of the Clan-na-Gael Guards, Captain W. J. Cline. On the 26th of July, a strong veteran cavalry force of about 100 men was organized by Major James H. B. Daly, assisted by General Shaffner. This command was divided into three companies, under Captains C. H. Montgomery Agramonte, Thomas J. Waters and H. C. McNeill, to which was added the Chicago, Batter, and W. P. Carberry's company. Immediately upon being mounted and equipped, the troops of Captains Waters, McNeill and Agramonte were ordered to the scene of the disturbance—the Halsted-street bridge—in the neighborhood of which they remained on duty all day, making many charges, and capturing a number of prisoners, some in the open streets, and others in houses from which shots had been fired, and disputing groups of rioters. General Torrence ordered the cavalry on Halsted Street and at the viaduct in person. The
conflict on Halsted Street having terminated in the discomfiture of the mob, the cavalry was employed for the remainder of the time in patrolling the disaffected districts. It would be difficult to overestimate the services rendered by the cavalry, some of whom were almost constantly in the saddle, performing duties of the most exhausting and harassing nature.

General Torrence especially refers, in the continuation of his report, to the members of his staff, Lieutenant-Colonel H. A. Huntington, Majors Joseph Kirkland and John Lanigan, Captains Charles H. Taylor, Lieutenant William C. Lyon, Surgeon F. Henrotin, Lieutenant Mann and Lieutenant Hoppin (the two latter gentlemen, recent graduates of West Point, volunteered on the staff), all of whom worked faithfully day and night in organizing, arming, equipping, provisioning and disposing of the forces.

Telephone and Signal System — The details of the police telephone and signal system will be fully comprehended by a glance at the accompanying illustrations, which were furnished by the courtesy of E. B. Chandler.

The box, or house, complete, represents a telephone station, and contains a full outfit for communicating with the operator at the police station. It is provided with an alarm box and telephone, and, with the street lamp on top, takes the place of the iron lamp-post. It resembles a sentry box, is octagonal in shape, two feet five inches in diameter, about seven feet in height, and is conspicuous in color. The doors are secured by a patent trap lock, and none but police officers have lease-keys to the same. Citizens opening the boxes have numbered keys, and must remain until an officer comes, after giving an alarm. Inside of the house is a small box with a projecting lever, for the use of citizens, which, pulled down, registers a signal at the station for the patrol-wagon detail. Inside of this signal box is a dial* for different calls, and a telephone for the use of patrolmen in communicating with the police station. A large number of private signal boxes, a part of the general system, have been placed in residences and offices. A duplicate key of each residence or office is left under seal at the police station, and a call indicating burglars brings the police with the means of gaining ready access to the house or office whence the call is made. The patrol wagons are models of convenience and adaptability for the work required of them. They have an alarm gong, and carry handcuffs, clubs, blankets, canvas stretchers and ropes. The single-horse wagon is employed where short distances are to be covered and light work is expected. The double wagon is more completely equipped, and can carry quite a number of persons.

Frederick Ehersold, chief of police, is one of the most popular and courteous of the police officials. He was born at Ixheim, Bavaria, on March 30, 1841, his parents being Louis and Elizabeth (Schmit) Ehersold. His father was a heavy contractor of that town, and was held in such high esteem that much of his work was done for the government. His wife’s father was a leading physician of Bavaria, and descended from a noted family of land-owners. Frederick obtained his education in the national school of his native place, and also assisted his father, as a boy, in his profession as a builder and contractor. During the later years of their lives, his parents were afflicted with diseases which proved to be incurable. His father lingered as a hopeful consumptive, and his mother as a

* The face of this box was adapted by W. J. McGurgle, while chief of police.
suffered from rheumatism, until, on the 6th of February, 1856, they passed away together. Thus, at the age of fifteen, young Ebersold was left an orphan; but having an aunt and an elder brother in America, he decided to join them. In September, 1856, he sailed from Havre, France; and after remaining a few months with his aunt in New York, he started with his brother, an architect, for Chicago. In February, 1857, he entered the employ of J. J. West, the furniture dealer, as a varnisher and finisher. Mr. West selling out in 1859, Mr. Ebersold went to Mendoza, where for two years he managed a large warehouse business, dealing principally in coal and grain. At the breaking out of the War, he joined the 12th Illinois Infantry in the three months' service, being corporal of his company. He was taken sick at Cairo and returned to Chicago in August, but enlisted the next month as a private in Company "I," 55th Illinois Regiment. He was promoted through all the ranks to the captaincy; and, as a portion of the First Brigade, Second Division, 15th Army Corps, he marched with Sherman to the sea, and was with him until the surrender of Lee. He participated in

thirty engagements, and was in the thick of the bloody fight at Shiloh, where, with the exception of the 9th Illinois, the 55th Regiment lost more heavily than any other command. Out of a total of 512 who went into the fight, 283 were either killed, wounded or missing. The 55th was placed upon the left of the line, in an important position, its particular task being the building of a corduroy road over Leek Creek, near Hamburg. Captain Ebersold was mustered out of service at Little Rock, Ark., on August 14, and paid off at Chicago, on August 25, 1865, quite broken in health. He then engaged in the commission business for some time, but met with reverses. He joined the police, and on July 15, 1879, and has since connected with it in various positions ever since. Commencing as patrolman, he joined the day squad in 1868, became sergeant of the first precinct in May, 1872, and captain on August 1, 1879. At the same time, William Buckley was appointed lieutenant, which office was formerly known as sergeant. Captain Ebersold took charge of the second precinct in August, 1880, and of the third precinct in December of the same year. In August, 1882, he was in command of the day squad for his district, and on April 22, 1884, he succeeded Captain Buckley, and assumed the command of the first precinct. In August, 1885, Captain Ebersold was appointed inspector of police, succeeding Colonel Welter, deceased. He remained in this position until October 15, 1885, when, on the resignation of Superintendent Doyle, he became acting superintendent of police, the position he now holds. Except as a member of the Grand Army of the Republic, Captain Ebersold is not connected with any secret society. He was married on November 26, 1868, to Julia Sophia Hahn. They have five living children,—two boys and three girls.

AUSTIN J. DOYLE, late general superintendent of the Police Department, was the youngest incumbent of that position who ever held the office in Chicago. He was born in this city on September 18, 1849. Receiving his education at the Christian Brothers' School, he commenced his business life as an errand boy for the dry goods firm of W. M. Ross & Co., being afterward collector for that house. In 1865, he obtained a minor position in the Record-er's Court, and three years thereafter was appointed first deputy. His industry, ability and courtesy made him such a general favorite, that when, in 1873, he was run upon the People's Ticket for clerk of the Criminal Court, he was elected by a large majority, the youngest man upon the ticket he received the largest majority. The duties which Mr. Doyle was called upon to perform in this position, being in contact with every variety of the criminal classes, admirably fitted him for the greater responsibilities which he subse-

quently assumed. He was chosen secretary and inspector of police on June 14, 1879, and served in that capacity until November 22, 1882, when he was appointed superintendent of the Police Department by Mayor Harrison, and in that responsible position he became a terror to all evil-doers throughout the country. Small in size and mild in deportment, Mr. Doyle is noted far and near for his bravery, and for his unflagging earnestness when his mind has been made up to any line of action. He is among the shrewdest of his profession, and yet is the soul of honor. In fact, no department of the city government was more vigorously or ably conducted than Eis.

DOMINICK WELTER, deceased, was born in Eichthal, Grand Duchy of Luxembourg, on November 9, 1839. In 1859, his father removed his family to Tiffin, Ohio. There the son attended the public schools and assisted his father in the bakery, learning also the business of a tobacconist. Being naturally venturesome, when fifteen years of age he enlisted in the 7th United States Infantry, and in the service saw much of Oregon and Washington territories, localities which were little known in those days. At the breaking out of the War, he started for San Francisco; but finding that no soldiers were being recruited in California, left for his old home, in June, 1861. At Cincinnati he enlisted as a private in the "Brickman Guard," known in the service as the 4th Ohio Cavalry, and attached to the Army of the Cumberland. He was promoted to a second lieutenant in September, 1862, and to the first lieutenant in January, 1863. He was taken prisoner at Chickamauga, on November 20, 1863, and for eighteen months suffered all the hardships of prison life at Libby, Va., Macon, Ga., Charleston and Columbia (Camp Sorghum), S. C., and Salisbury, N. C., where he was exchanged, via Wilmington, N. C., by order of the Secretary of War, receiving his final discharge in July, 1865. While a prisoner, during the summer of 1864, he was promoted to a captaincy, and at the close of the War he was major, commanding his regiment. After the War he returned to his home in Tiffin and continued his business as a tobacconist. He visited Chicago, as early as 1852, his elder brother having acquired possession of a large tract of real estate covering the present site of the Custom House, upon a portion of which he lived. But believing that Chicago would never amount to much he sold the land, which, had he retained it, would have made him a millionaire, and removed from Chicago several years before the breaking out of the Rebellion. Dominick Welter first located permanently in Chicago, in 1870, establishing himself as a tobacconist, conducting a prosperous business, turning the active management of the establishment over to his son who, before himself, had been appointed to the position of secretary and inspector of police, in November, 1882. Under Colonel Welter's management this department became one of
HISTORY OF CHICAGO.

The most important in the service. Just previous to the railroad riots of 1877, he became connected with the only company of cavalry in Chicago organized by Samuel S. Homan, from this, the First Cavalry. 1st S. C. was organized in August, 1877, and Major Welter succeeded Colonel Agnew as commanding officer in March, 1881. It was mainly due to Colonel Welter's untiring efforts in maintaining law and order, that Chicago remained at peace during the excitement. In December, 1884, when three hundred men were added to the police force, Colonel Welter over-extended himself in drilling and debating, and this brought on a combination of diseases, which were the ultimate cause of his death. At the annual men's picnic in 1885, at the Chicago Driving Park, he was taken so ill that he was obliged to go home, and was confined to his residence for a month. He rallied slightly and decided to make a trip to his old home in Tiffin, Ohio. There while he became ill with aneurism of the heart, and died on the night of July 8, 1885. Upon the arrival of the news of his death in Chicago, the police headquarters and station-houses were draped in mourning, and a detachment of officers of police left for Ohio as a sort of his remains to St. Joseph's Church, and thence to St. Boniface Cemetery, consisted of Chief Marshal Stockton and Captain Chappell. Regiment band, 150 members of the Fire Department, drum corn of Battery "D," Chief of Police Doyle and staff, 200 men from the Police force, Attorney General and aides, 125 men from the Independent Order of Foresters, Major Nevan's band, 100 representatives from the Luxembourg Unterstuetzungs Verein, 50 men from the Catholic Benevolent Legion, 50 National Guards of the 1st Infantry, 250 men from the 1st Infantry, 100 men from the 1st Infantry, 250 men from the 1st Cavalry, 100 members of the Catholic Benevolent Association, the State Police and Fire Association, and a member of the Board of Directors of the High Court of the Independent Order of Foresters.

George W. Hubbard, in charge of the central detail, was born at Litawton, Jamestown, N. Y., on May 22, 1850. At the breaking out of the War his parents removed to Baltimore, where George received much of his early education, attending, among other institutions, Bryant & Stratton's Commercial College at that place. About this time his father bought a magnificent piece of land on the shores of Horn's Bay, Dorchester Co., Md., called the Grist Mill, Eden. The investment, however, proved a losing one, and shortly afterward he removed to Cambridge, Md. A few years thereafter George located in Kansas City, Mo. He remained there for several years as clerk in the American House. In March, 1871, Lieutenant Hubbard came to Chicago, and entered the employ of Dawes, Sills & Shields. For a time he also held a position also with the South Division Railway Company. In July, 1873, he joined the Police Department as patrolman. In August, 1875, he was appointed sergeant at the Dearning-street Station. When the patrol-wagon system was introduced in 1880, he was placed in charge of the Dearning-street Station, which was located at the Twelfth-street Station. In November, 1882, he was promoted to a lieutenantcy, and in April, 1884, became acting captain in command of the central detail. He is a member of Richard Cole Lodge, A.F. & A.M. Washington Chapter R.A.M., and Apollo Commandery, K.T. Lieutenant Hubbard is easy to get along with in manners, and a good disciplinarian.

Michael John Schaeck was captain of police in charge of the fifth precinct, with headquarters at Chicago Avenue Police Station, controlling one of the most important police districts in Chicago, has been in the municipal service for over sixteen years, and a resident of this city since 1856. Captain Schaeck is a native of Belgium-Luxembourg, and was born at Saptountaine, on April 22, 1832, the son of Christoph and Margaret Schaeck. His father was an expert locksmith and a native painter, and there the son attended school until he was eleven years of age. In 1855 accompanying his parents, moved to America. They visited Chicago and remained here for a short time, after which they settled in Valparaiso, Ind., and later in Hammond, Ind. In 1858, when he was fifteen years old, Captain Schaeck went to Chicago and remained here for a short time. In 1863, Captain Schaeck went to Fort Washington, Wis., and was employed in a large brewing establishment for three years. He then returned to Chicago, and after several lake voyages began his official career as a member of Ludwig's night and detective force. Here he served with distinction in a detective capacity until June 15, 1869, when he joined the municipal force, and was assigned to duty at the Dearning-street Station. Later he was transferred to the First Division, where he has been on duty since that date. He served as roundman, sergeant and detective until 1879, August 1 of which year he was promoted to the position of supervisor to succeed Captain Welter, who held the position during the excitement. He then became acting captain and detective until 1885, when he was promoted to captain, and placed at his present post of duty. During all these years Captain Schaeck's record is one in point of courage and efficiency, and without doubt excels that of any other member of the force. He came to the department with experience, and at once signified himself for competence and ability. He has been in the force 29 years, and, as a member of Ludwig's detective force, he detected safe burglars at a Kingsbury Street coal office, and single-handed attempted to arrest them. Four desperadoes in turn went through his hands, two escaping amidst a fusillade of shots, and two being dragged to the street by the captain. One of these men, with a club, while he held his other prisoner with his foot on his throat, and, wounded as he was, landed him in safety at the station, where he was sent for five years to the penitentiary. In the winter of 1866, Captain Schaeck had a desperate encounter with a band of burglars and recovered $5,000 of stolen clocks on North Clark Street. The exploit involved a marvelous exercise of daring, and resulted in the capture of two noted malefactors. The following year was fatal to Captain Schaeck, yet, with all his details of flight and pursuit forms one of the most thrilling incidents in police annals. During its occurrence Captain Hatha- way was mistaken for a burglar and fired at, but falling, and the spurs of his horse injuring him, he was shot through the breast and a second and fatal shot. Later, Captain Schaeck arrested a band of burglars on North Clark Street after a sanguinary affray, which resulted in the breaking up of an organized gang of railroad car thieves, and for which he received much credit. His record is replete with exploits of this kind, the most recent noted case being the arrest and conviction of the assassin Malouk, traced down by many shrewd police work. Since 1875, Captain Schaeck has participated in no less than 933 arrests, 865 of which were of criminals. Among these were the most dangerous malefactors known in the West, many of whom had served as many as four terms in the State penitentiary, and had as high as ten criminal charges against them. It was he who sent Keene Maloney and James Flynn to the penitentiary for the rolling-mills robbery, to effect which they threatened to assassinate an infant before its mother's eyes. Captain Schaeck's record shows perhaps the rest of more notorious criminals than that of any other single officer on the force. Aside from his phenomenal reputation as a detective and efficiency as an official, he is prominently known in social and business circles, and enjoys the esteem and confidence of the citizens in the community where he resides. He is a member of the Police Benevolent Association, and of the State organization; is a charter member of Lafayette Lodge, No. 3, of the Benevolent Association. Captain Schaeck was married, on April 21, 1871, to Miss Christina Klashen, of Chicago; they have three children.---Edward, Charles W. and Margaret O.

Edward Laughlin, lieutenant at the Harrison Street Station, was born at Castle, County Kerry, Ireland, on September 8, 1843, where he received his early education. When about eighteen years of age he came to America, and, after a month's sojourn in New York, removed to Valparaiso, Ind., and was employed on the railroad between Fort Wayne and Chicago. In 1862, he located in Chicago, and was engaged in the Chicago & Milwaukee Railroad freight-house for one year, and then for two years with an iron-clad, at Nos. 86-88 Market Street. In April, 1867, he went to California, remaining there and in Wisconsin Territory and Nevada for two years, being interested in mining, and at steamboating on the Missouri River, and for over two years worked in the establishment of Ingraham, Corbin & May. He became a member of the police force on March 2, 1872, serving at the West Madison-street Station for two years, at Hinnan-street two years, and at Twelfth-street three years. Later, for one year, Lieutenant Laughlin was assigned to detective work on the superintendent's staff. He was made acting lieutenant of police at the Thirty-third Street Station, and later was officially appointed, and, in November, 1882, was transferred to his present position. Lieutenant Laughlin bears a high record for bravery and detective work, and, on a recent occasion, he succeeded in the capture of Louis Kousseau, an insane man who had terrorized two hundred miles of country, when armed, in a railroad train,—a capture made only after deadly peril and fatal bloodshed. Lieutenant Laughlin was married, in 1869, to Ann Eliza Adkins. They have seven children.—Mary, Nora, Kate, Johanna, Margaret, David, and Daniel Duffy.
Richard Alexander Sheppard, lieutenant of police of the Fifth Municipal Precinct, has been an active member of the force for thirty years. He was born in Columbus, Ohio, in 1866, and came to Chicago with his parents when he was four years of age. He attended the public schools of his native city, and was graduated from the High School of Columbus. He enlisted in the Illinois National Guard in 1887, and served with distinction in the Spanish-American War. He was mustered out of the service in 1898, and has since been a active member of the police force. He has been a leader in the National Guard and is now a member of the Illinois State Guard. He has been a member of the Masonic order for twenty years, and is a past master of the lodge. He is the father of three children, and is a respected and popular citizen of Chicago.

Eliza Emmonns Lloyd, lieutenant of the Webster-avenue Police Station, has been a resident of Chicago since 1869, and has been a police officer for thirty years. She was born in Utica, N. Y., in 1874. Her father, Captain Lloyd, was a cabinet-maker, and under him the son carried the trade. Captain Lloyd has generously adopted a orphans children. He is a member of the State Fire and Police Association; of Lincoln Park Lodge, No. 611, A. F. & A. M.; of Lincoln Park Chapter, No. 54, R. A. M.; and of the American Legion. John Baas, lieutenant of police at the Larrabee-street Police Station, is one of the oldest officers of the municipal police force, having joined the department in 1865. During a citizenship of forty years he has served with efficiency, and is now reaching on to a quarter of a century. Lieutenant Baas bears the proud distinction of having filled the same important office of superintendent of police and authority for eleven years, and of having rendered it acceptably to his superior officers and to the community at large. Lieutenant Baas is a native of the kingdom of Bavaria, and was born at Gerolndhausen, near Wurzburg, on February 11, 1826. His father, Jacob Baas, was a cabinet-maker, and under him the son carried the trade. Lieutenant Baas served in the future lieutenant acquired the rudiments of this and the painting trade in his native town, and attended the Lutheran School at that place. There, father and son were prominent in the revolutionary movement of 1848. Three years later Lieutenant Baas came to America, sailing from Havre in the steamer Danubia, and seventeen and a half days later arriving in New York, on April 23, 1851. For the ensuing two years he was located at Utica and Rome, N. Y., where he worked at the painting trade. In 1854, he came west, and after a brief residence went to Belvidere, Ill. He returned to Utica in 1856, and was married to Miss Sabine L. Dupper, who came with him to Chicago. In 1865, when John Wentworth was mayor of Chicago, Lieutenant Baas joined the police force, of which he was a member for two years, and the following year he was promoted to the rank of lieutenant. He then was a member of the Illinois State Zeitung. On August 16, 1862, he enlisted in Co. C, 2nd Illinois Volunteer Infantry, and was assigned duty in the 114th Army Corps, shortly afterward engaging in the battle of South Mountain. The autumn of that year he was wounded at Antietam and went through the campaign of the Cumberland, being in the battle at Mission Ridge and in other notable conflicts. He accompanied General Sherman's command in the March to the Sea, and, after three years' active service, was discharged from the army at Washington, D. C., on June 9, 1865, and was mustered out on July 1, 1865. The same year he resumed his trade in Chicago, and on September 14, 1865, again joined the municipal police force, being recommended by Captain Fred. Gaud, to the Board of Police Commissioners, of which he has been a member since. Almost immediately afterward he was made station-keeper at the North Market Station, and the following year was promoted to the position at the North-avenue Police Precinct, then a sub-station. In August, 1866, he returned to the North Market Station as night-station-keeper, and, on June 1, 1867, was transferred to the North Market (now Larrabee-street Police Station). On January 13, 1868, he was made sergeant, a position later changed to a lieutenant, being in service at the Huron-street Station until November 14, 1868, when he returned to the North-avenue Station, where he has remained uninterrupted since that time. He was there in command at the time of the great fire of 1871, when he took charge of 750,000 worth of plate and valuables belonging to William H. Herndon, saving them from the flames near the Hotel, where the building was destroyed by the fire. His wife and son died shortly before that time, and, on Jan. 29, 1874, Lieutenant Baas married again, his second wife being Miss Margaret Dopper, of this city. Lieutenant Baas bears a proud record for faithful service and the police district under his control is one of the best regulated.
HISTORY OF CHICAGO.

in the city. It was settled principally by Bavarians, and is termed the Bavarian "Heaven." In June, 1871, at the head of a mounted detail, on his "historical" white horse, he led the escort of the German Procession, said to be the largest and longest one ever run in the streets of this city. In 1877, Lieutenant Baus took the flag in the competitive police drill. During the riot of 1877, he was among the first, and with twenty-five policemen, and for this feat received the sobriquet of "the buckler" from the city press. In the Knights Templars' and Garfield funeral parades, he, mounted, led the processions, as he did on Mayor Hummel's return in the winter. He has been distinguished by many terms such as Napoleon, General Van Der Tann, and Phil. Sheridan. In September, 1878, Lieu- tenant Beadell offered the position of captain, which he refused but it cost him his appointment to that office. During the dead lock at Springfield in 1858, Lieutenant Baus received one vote for U. S. Senator; the nearest he has ever come to congressional honors. He has a family of five children, three by his first wife, named Mrs. Louisa Massion, Adelaide C, and Kittie, and two by his second wife, named Margaret and John P.

ARMS FOR CHICAGO.

JAMES P. STANTON, lieutenant of the West Lake-street police district, was appointed to that position in the direct line of promotion, on August 1, 1881. As a citizen, a soldier and a business man he has exhibited ability, enterprise and personal integrity of a high order.

His family history is as follows: Lieutenant Stanton was born on March 25, 1834, at Birmingham, England, where his father followed the trade of a bookbinder. There he lived until he came to Chicago, on February 25, 1856. His father had visited America in 1842, and on his return spent two years in the family about a year. For eight years after his arrival, the son worked at the trade of glazier and painter, and engaged in this indus- try. He commenced his official career in 1861, when he was engaged as a数字经济 officer, his home being stationed at Vicksburg and along the Mississippi River, under Colonel Coolbaugh. On July 25, 1863, he enlisted in the United States Navy, at Philadelphia, remaining in the service three years and a month, and being mustered out on August 26, 1867. He was on the "New Ironsides" at both attacks on Fort Fisher, and was wounded at Norfolk; serving also on the "Chiepec" and "Marblehead." After leaving the service he remained in Philadelphi, but finally returned to Chicago and resumed his trade, being engaged with his father until 1869, when he joined the police force. For two years he was stationed at the old Armoury, under Captain Hickey. In 1871, he resigned, and engaged in business until 1873, when he was elected a constable of the West Town for a term of four years. In 1876, Mr. Stanton became again a member of the force, serving his six years' probation in Captain Hook's precinct, under Lieutenant Bell, at the Halsted-street Station; was trans- ferred to Madison Street, appointed a detective, then a sergeant, and finally to the lieutenantcy. Mr. Stanton was married on October 28, 1860, when sixteen years, seven months and three days old, being one of the youngest men on record to assume the connubial yoke in this municipality. He wedded Miss Mary Murphy, the daughter of Senator Murphy, of the North Division, the ceremony being per- formed by Rev. Dr. Dunbar, of the Church of the Holy Name. Mr. and Mrs. Stanton have had ten children, seven of whom are still living; those are named Mary, John, Winfield, Ellen, George, Agnes and Benjamin. He was a member of the A. O. U. V., the Police Benevolent and State Associations, and was president of the Painters' Union.

EDWARD J. STEELE, lieutenant at the West Chicago-avenue Station, has been a resident of Chicago for sixteen years, and prom- inently identified with the municipal police department since 1872. Lieutenant Steele has been a familiar and popular ele- ment in the routine police and detective service. He was born at Lowell, Lewis Co., in 1859, being the son of Joseph and Elizabeth Steele. When about six years old his parents removed to Canada, where he received his early education. When twenty-six years of age, he resided in a small village in Minnesota, and in 1869, became a resident of Chicago, having been engaged previously in farming. Here he followed the trade of a farmer, and was also a member of the Hambletonian automobile police agency for one year. In 1872, he joined themetropolitan force, being for three years at the West Madison-street Station. He then served on the day squad, at the Central Station, for nearly two years, and was a member of the City staff of detectives, in the latter year being appointed chief of that branch of the service. After acting about a year in this capacity, he was appointed lieutenant, and was at West Lake Street a year, and later transferred from his present post. Lieutenant Steele's record shows not a single day off duty in thirteen years, and covers some notable arrests, among them that of A. E. Woodward, Tweed's driver; Captain C. L. Muller, and others in the Knights Templars; in 1878, the Galesburg Bank robbers, Carroll, Davis and Garrett, and the model railroad gang, with large plunder recovered.

Lieutenant Steele was married in Chicago, in 1863, to Miss Mary Parker. They have five children,—Freeman, Sarah, Joseph, Nettie and Daisy.

JAMES P. BEADELL, lieutenant of police, has been a resident of Chicago for seventeen years, and was appointed to the police force by Chief Seavey. He was born in McDonough County, Ill., in 1859, the son of Lucy and Thomas Beadell. His education was obtained at the public schools, and he was engaged in the dry goods business, as a member of the firm of Beard, Savage & Beadell. After their establishment was destroyed by the fire, he, for a brief time, engaged in the sale of hardware, with great success, and established a free force, during the first year of Mayor Heath's administration, he was appointed and served in the police force at the Central Police Station for three months. He was then transferred to the Halsted-street Station, and later, to the Madison-street Station, when he was appointed a sergeant. He was sent to Lake-street Station, in 1882, two months after his promotion to a lieutenantcy, he was assigned to the West Madison-street Station, his present post of duty. Throughout his service in the department, Lieutenant Beadell has been noted for his efficiency as an officer and prompt and effectual work on cases intrusted to his charge. Lieutenant Beadell was married in 1873, to Miss Fannie Stanton, of Chicago. They have one child,—Sarah M.

MADISON BEADELL, lieutenant of police, is the son of Benjamin and Adeline (Wiley) Beadell, and was born in Onedia County, N. Y., in 1822. In 1859, after receiving a fair education, he went west, and became a wagon and hand gunsmith, at Chicago, with an eventual residence in the Miami, and later on the Atlantic, having a residence at the Thousand Islands, in the St. Lawrence River. While passing through the Welland Canal, in 1867, he was engaged in the breaking-out of the rebellion, and enlisted in the 10th Illinois Cavalry, at Chicago; from which post, for four years and nine months, he was engaged in active service. He was first on duty in Missouri, and was in all the battles fought in the South-west, and was located at Prairie Grove, Springfield and Little Rock, going from the latter place to Join General Banks at Shreveport, La. After the march to the Rio Grande with General Sheridan, Lieutenant Beadell was must- aed out of service in San Antonio, and was engaged in the coast defense, and was located at the Cottage Grove-avenue Police Station. He then went to the new station at Wentworth Avenue and Twenty-second Street, under Captain Buckley, roundsman. He was assigned to duty on the beat south of Twenty-second and east of State Street, being the first patrolman ever placed there on regular duty, his duties then comprising an open prairie. For a few years subsequent to 1880, he served at the old Armoury, and, in 1873, was appointed a desk-sergeant, the commission being presented to him at the place of his residence, having been received while on duty at Burlington Hall, on State Street, at which time, in attempting to overtake a thief, from whom he recovered a large amount of goods, was actually shot. The lieutenant then served as sergeant at the Twenty-second and Second Street, and the Cottage Grove-avenue Police Station. Being made lieutenant at the latter station in 1878, he was transferred in the same capacity to Twenty-second and Second Street, and then to Fifth and Bridgeport. Here he was in charge during the butcher's strike of 1881, and was credited with being so popular among them, that the demonstration was completely quelled. He then returned to his present post, at the Cottage Grove-avenue Police Station, where he enjoys the confidence of his men and of the community. His detective acumen has been productive of suc- cess in numerous criminal cases, among them the arrest and conviction of the Shoemaker packing-house incendiary, the recovery of a girl mysteriously abducted and found at St. Louis, the arrest of Talbot, the Public Library thief, and numerous other cases of public interest. Lieutenant Beadell married Miss Kate S. Appleton, of Chi- cao, in 1869. They have two children,—Charles and Benjamin.

AUGUST BLUETTNER, lieutenant of police, and a member of the municipal police force since 1867, was born in Germany, near Cassel, on May 10, 1846, the son of George and Margret Bluettnier. When six years of age he accompanied his parents to Chicago, where they located in the West Division, and there the son was edu- cated. When seventeen years of age enlisted in the 51st Illinois Volunteer Infantry, serving until the close of the war, when mustered out at Springfield, Ill. He saw two years of active service under General Thomas, in the Army of the Tennessee, and was wounded slightly in one engagement. He returned to the city of Chicago in 1865, and for one year was engaged in the grocery business, then joined the municipal police force, serving as a patrolman at the intersections of Sixth and Wabash Avenue, and later at the old Union-street Station; and for seven years was desk sergeant at the Twelfth and Wells. He then held the position of sergeant at the Halsted-street Station, and later at the Lake-street Station, and then to the Twelfth and Wells, where he was stationed until promoted to his present position. He then held the position of lieutenant, at the Halsted-street Sta-
tion, and was later sent to the Central Station as clerk of the detective department, and from there, during the last year of the police superintendency, to the precinct of Thomas J. Rehm, was assigned. He was sent to the Madison-street Station, and had charge of the first platoon two years, when he was made lieutenant of the day squad for one year, and then transferred to the Homan-street Station, where he again held the same position for two years. During eighteen years' service in the police department, Lieutenant Blettner has won distinction as a brave and efficient officer. He made the arrest in the notorious Cudahy-Stewart murder, and has never been absent from duty during any notable criminal operations. He was married, on December 31, 1869, to Miss Margaretta Schnitt, of Chicago. They have six children,—Edward, George, Amanda, Mattila, August, and Marie.

John Crook, lieutenant of police, who has been connected with the municipal force for sixteen years, is born in Tipperary, Ireland, on July 7, 1839, the son of Richard and Johanna Crook. When ten years of age, with his mother, and others who had been in America before him, he emigrated, locating at Glens Falls, N.Y., for six months, and, later, for one winter, at Albany. For two months he drove a team on the Erie Canal. Afterward, he was apprenticed to the carpenter's trade, in Albany, but removed to Claremont, N. H., where he remained one year, going thence to Providence, R. I., where he was located eighteen months: to Brooklyn, six months, where he resided with his former employer; and finally returning to Albany, from whence all his relatives had gone to Ireland, except one brother, who had located at Blin Island, III. In 1853, Lieutenant Crook came to Chicago. Until 1857, he worked at the Amos Weeks works, corner of Fourteenth and Clark streets, where he followed his trade with Hall & Winch, on Clark Street. In 1860, he joined the local police force, serving first as patrolman under Captain Hickey, at the old Armory. When Mayor Bartram was elected, he was appointed on his staff, in 1876, serving at the Mayor's office, at the City Hall, for two years. In 1859, he became a sergeant of the day squad, serving in this capacity for over three years. On November 1, 1859, Crook was transferred to the Twelfth-street Station, being made acting lieutenant. In April, 1883, he was sent to the Thirty-fifth-street Station, remaining one year. He then returned to the Twelfth-street Station, his present post, where his appointment was declared official. Lieutenent Crook's record has been one of rare personal and official integrity and usefulness. He was married, in New York, in 1857, to Miss Mary McLaughlin, who died in 1885. He has three children,—two married, Mrs. Mary J. Mollen and Mrs. Marcella Lichter; and one unmarried, Josephine.

Archibald Darrow, lieutenant at the Homan-street Station, was born at Wadogee, Lake Co., Ill., on February 15, 1852, being the son of Archibald Darrow. There he received his education, and at an early age applied himself to the carpenter's trade. When nineteen years of age he came to Chicago, and for two years following was working for various local firms. On June 24, 1872, he became a member of the police force, being known from his youthfulness as the "boy policeman," and at each stage of his advancement was the youngest of his grade. For seven years he was located at the West Chicago-avenue Station. In 1879, he was promoted to the position of patrol sergeant, serving at the West Lake-street Station for nine months, and at the Twelfth-street Station, where he was then made acting lieutenant, and assigned to duty at the West Madison-street sub-station, where he superintended the establishment of the patrol-box system. On August 1, 1881, his appointment was made official, and he was given charge of the Homan-street Station, his bravery and ability causing the appointment, the precinct having numerous criminal characters. This station has the largest acting force, fifty officers, of any sub-station in Chicago, and was originally known as the Gad's Hill Station. In the Italian murder case, which occurred on Sunday, September 12, 1885, Lieutenant Darrow gave it his personal supervision, and the murderer was arrested within three hours after the crime, although he has not lost a murder case in his district. Lieutenant Darrow was married in Chicago, in 1883, to Miss Sarah Rooney, of Lake County, grand-daughter of John Rooney, one of the oldest settlers of the Northwest, who died recently at the advanced age of eighty-seven years. They have one child,—Archibald.

Michael Callahan, one of the best-known officials of the Police Department, has been identified with the force since 1877. He was born in New York City in 1838. When an infant, his parents removed to McHenry County, Ill., and the son was educated in that vicinity, completing his studies at Professor Ander son's School, located in that city. Until 1854, he worked on his home farm, and in that year went to California, by way of the Isthmus of Panama. For three years he was engaged on a farm near Stockton, Cal., in mining, at which he made a fortune of over $25,000. In 1856, he left Trinity Church, returning to his home by way of Nicaragua, and shortly afterward came to Chicago. On May 12, 1867, Mr. Callahan joined the police force, being assigned for one year to patrol duty at the Armory. He was then at the Western Lake-street precinct, and was stationed at a lieutenancy. He was sent to the Madison-street Station, and had charge of the first platoon two years, when he was made lieutenant of the day squad for one year, and then transferred to the Homan-street Station, where he again held the same position for two years. During eighteen years' service in the police department, Lieutenant Blettner has won distinction as a brave and efficient officer. He made the arrest in the notorious Cudahy-Stewart murder, and has never been absent from duty during any notable criminal operations. He was married, on December 31, 1869, to Miss Margaretta Schnitt, of Chicago. They have six children,—Edward, George, Amanda, Mattila, August, and Marie.

The Policemen's Benevolent Association of Chicago was organized on February 18, 1868, its object being to create a fund for the relief of the distressed, injured, sick and disabled members of the force. It has greatly increased during the seventeen years of its existence, and its membership now includes nearly the entire municipal police force. Until 1884, the presidents of the organization had been John Nelson, W. W. Kennedy, Thomas A. Moore, Edward Hood, Samuel Ellis and Wheeler Bartram; and its treasurers William H. Carman, William Buckley, William Miller, Frank Gerbing and Michael Brennan. At the end of its first year, which was an experimental one, the Association had on hand $1,246.25. The showing for succeeding years was:

For 1870, $5,452.20 received, $5,452.20 disbursed; 1871, $4,606.28 received, $4,606.78 disbursed; 1872, $4,355.85 received, $3,952.50 disbursed; 1873, $5,355.85 received, $3,952.50 disbursed; 1874, $4,119.85 received, $1,734.75 disbursed; 1875, $8,435.08 received, $3,358.08 disbursed; 1876, $4,599.75 received, $4,122.90 disbursed; 1877, $1,906.97 received, $1,062.00 disbursed; balance on hand, January 1, 1879, $2,853.47; balance on hand January 18, 1881, $3,402.99. The receipts for 1881 were $11,219.09, disbursements, $7,975.26; 1882, receipts, $11,714.18, disbursements, $7,145.50; 1883, receipts, $12,143.23, disbursements, $8,653.90; 1884, receipts, $11,160.14, disbursements, $7,869.91; leaving a balance of $6,296.23.

January 27, 1877, the Association was incorporated, with Wheeler Bartram, James S. Barber, Michael Brennan and William Buckley as charter members. The officers and trustees at large, elected January 11, 1885, are:

President, Wheeler Bartram; Vice-President, Patrick Kelly; Secretary, Daniel Hogan; Treasurer, Michael Brennan; Trustees at Large, John L. Mahony, Michael L. Miller, Edwin P. Mann, Michael Connolly, Richard M. Kelly.

The House of Correction.—The old Bridewell, situated at the corner of Polk Street and Fifth Avenue, was for years an eye-sore to the prisoner-workers and philanthropists of the city. Its location, its structures and its appointments were in every respect detrimental to the physical and moral interests of its inmates. That it was wholly inadequate to the growing needs of the city was manifested to the Common Council, therefore, by the appointment of a House of Correction; and in 1869, a lot of fifty-eight acres of land, situated north of the South Branch of the Chicago River, in the east one-half of southwest one-quarter of Section 25, Township 39, Range 13, was purchased for the purpose from Samuel J. Walker. The price paid was $16,560. The erection of the new prison was at once proceeded with, on plans prepared by John M. Van Osdel, the architect for the Public Works Department of the city. Bonds were issued to the total amount of $280,757. In 1871, the buildings constituting the prison proper were finished, and were formally opened August 10, of that same year. These were the main building facing to the east, two hundred and eight feet from California Avenue, in which were the superin-
HISTORY

The building is of plain and substantial design, with no architectural embellishments, built of white brick, with slate roofing. The warden's house, 50 by 60 feet and two stories high, occupies the center of the east front. The two cell houses, each 50 by 221 feet, extend north and south, forming wings, and are attached to the rear of the warden's house. The male wing contains 288 cells, arranged in four tiers of 72 cells each. The female wing contains 200 cells, arranged in tiers of 50 cells each. The cells are constructed entirely of cut-stone, with no joints or seams excepting at the angles. The galleries and stairways are of iron. Each cell is ventilated by a separate flue, and has an iron grated door. Each range of doors has a sliding bar, moved by a lever, by means of which all the doors of the range are simultaneously locked.

In the north end of the female cell room, on the first floor, is the boiler-room, fifty square feet, in which there are three large steam boilers, tanks, pumps, and other apparatus for heating the several buildings. On this floor, also, is a bathing room, fitted up with six iron bathtubs, wash-bowls, etc. On the second story is the hospital for females, thirty by fifty feet, and several smaller rooms for special invalids.

Immediately in the rear of the warden's house, connected by corridors, separating the cell rooms, is a building 50 by 135 feet, two stories high. In the attic, resting on the walls of these corridors, are four large iron water tanks, from which the kitchen, laundry, and bath rooms on the first floor of this building are supplied. The chapels are on the first floor, and on the second are the officers' dining-room and bedrooms, the hospital for males, and the dispensary. Three buildings for workshops were subsequently erected. Additions and improvements have been made from time to time; but these, although they have increased the facilities for the employment of the prisoners, have not augmented the cell room that a constantly increasing number of prisoners demands.

The total cost of the buildings and premises up to the date of their transfer to the Board of Inspectors was $343,968.07. The contractors, with the amounts received by them, were—

Kavanagh & Merriman, cut-stone, $90, 800; Carter Brothers, masonry, lathing and plastering, $72,979; Streator & Eddy, iron work, $15,000; Henly & Campbell, carpenter work, $20,156.96; Clancy, Webb & Co., painting and glazing, $2,379; Abraham Kaisley, slate, etc., $6,259; J. W. Newell, locks, $4,375; Joseph Hogan, plumbing, $2,224.54; Richard Kiley, earth felling, $2,924; miscellaneous, $47,205.

The first contingent, of one hundred and thirty prisoners, was removed from the Bridewell to the House of Correction on August 10, 1871; and the new institution was managed under the old system by the City Comptroller and the Bridewell Committee of the Common Council, until the 19th of September following. Under the act of organization, a Board of Inspectors, consisting of Hon. R. B. Mason, ex officio, chairman, Hon. John C. Haines, Louis Wahl, and Colonel C. G. Hammond, then assumed the charge of the institution, but inaugurated no change in the system of management up to January 15, 1872; George Mansur, the old keeper of the Bridewell, discharging the duties of Superintendent.

Charles E. Felton, formerly of the Erie County (N. Y.) Bridewell, was then appointed superintendent. He brought with him a nine years' experience in prison management, and his success is seen in the subsequent history of the institution. An entirely new order of things was instituted. One change was the introduction of prison labor. Prior to this the prisoners had been a direct charge against the city during their imprisonment, contributing nothing toward their own sustenance. It was obvious that, besides relieving prison life of much of its monotony and accustoming the prisoners to habits of industry, their employment would materially reduce the cost of the institution to the city. The only difficulty which presented itself, and it was a formidable one, was securing employment for the class of prisoners committed. Manufacturers were naturally indisposed to contract for the labor, where the average of imprisonment a year was always under thirty days. In this quandary, the manufacture of brick was selected by the Board of Inspectors, and this industry gave employment to the male prisoners during the spring and summer months. A brick yard was constructed and furnished with all the necessary appliances, and improvements have been added from year to year. The brick is sold wherever a market can be found, but it is largely used in the construction of sewers and other city work. The other industries which have furnished employment to the male and female inmates of the prison are canesewing, the manufacture of horse-nets and scurrs, knitting, etc.

Besides the labor employed in these industries, men and women are constantly at work repairing, renovating and cleaning the buildings and premises. Idleness has not, since 1872, been permitted to any one who is not incapacitated through mental or physical infirmities.

The discipline of the House of Correction, based largely upon moral suasion principles, is stringent. Prisoners are not allowed to converse with each other; and, as far as possible, association at any time is not permitted.

From 1873, religious services have been held regularly in the chapel, the clergy of the city alternating in the conduct of such services as they find convenient. Since January, 1883, mass has been celebrated once a month in the chapel, under the direction of the Rev. Fathers McGuire and Henepin, of St. Pius Church. The other services are held under the direction of the Young Men's Christian Association.

The interesting matter relating to prison work and management is statistical. Apart from what the statistics exhibit, the sum total of prison life is about the same from year to year. A fresh accession of between thirty and forty replaces the daily output of prisoners. During the thirteen years ending December 31, 1884, there were 85,610 commitments to the House of Correction. The subjoined table distributes these over the several years, showing the sex and the social relations:

</table>
The average number in prison each day during the thirteen years was 498. The constant burden of the reports of the Board of Inspectors and Superintendent, since the opening of the institution, has been the suggestion that additional accommodations be provided. A new ward for the female prisoners would enable a classification of the female into long and short time prisoners. The female ward has been more than adequate to the demands upon it, but in the male ward a herding of the prisoners has at all times unavoidably been resorted to. More than half the cells have, at times, been occupied by two, and sometimes more, prisoners, and on one night every cell was occupied by two or more prisoners. One of the results of this arrangement was the murder of a prisoner by his cell-mate in 1882. Mr. Felton says in one of his reports:

"To an expert at Sociology, the prison would seem to contain, under one roof, and without any facilities for classification, a medley congregation of inmates, having all of the characteristics appropriate to the almshouse, hospitals, insane and idiotic asylums, as well as to the prison."

The Common Council, however, has seen fit to disregard the recommendations of the Board of Inspectors and of the Superintendent, and the accommodations so urgently required are still wanting. Relief was found, during 1884, but scarcely to an appreciable extent, by the commitment of the insane to insane asylums.

Under the new régime, the changes effected in the financial department of the House of Correction have proven to be of a most satisfactory character. Prior to 1872, the institution earning nothing, the cost of maintenance was nearly three times greater, per capita, than it has been in any year since. The Superintendent received a nominal salary, and twenty-three cents a day per capita for feeding the prisoners. Since 1872, the Superintendent has received a fixed salary, and the actual cost for maintaining each prisoner per diem has been between eight and nine cents. It is estimated that the saving to the city during the thirteen years prior to December 31, 1884, has been about $342,000 in the item of diet alone. Since 1875, no appropriation has been asked for by the Board of Inspectors.

The annexed table, showing receipts and expenditures by years, exhibits the net transactions under those headings. The "receipts from all other sources" includes moneys received from Cook County for boarding prisoners. The apparently abnormal large receipts for 1881 under this heading, are accounted for by the adjustment, in that year, of a dispute between the city and county, which had prevented a settlement of accounts for a few years previously.

The conditions of trade have a perceptible influence upon the commitments to prison. An examination of the annexed table discloses the fact that during periods of prosperity more prisoners are received than during times of depression. In his report for 1874, Mr. Felton remarks that

"City prisons are best filled, if numbers are an indication, when money is easy, and when the lower classes do not find it necessary to work hard to make ends meet, and when, from the ease with which they make money, they indulge in unreasonable excesses."

The following table shows the numbers committed, with offenses; average days of imprisonment; and the number of deaths:

| Year | Commenced | Vagrants | Intemperance | Other offenses | Insane | Other | Total | Referred | Released | Average | Imprisonments | Deaths |
|------|-----------|---------|-------------|---------------|--------|-------|-------|---------|----------|--------|---------|-----------|--------|
| 1872 | 3,679     | 1,246   | 916         | 115           | 805    | 22    | 1,590 | 11      | 1        | 10.3   | 245.5   | 1          | 11      |
| 1873 | 4,200     | 1,752   | 1,660       | 145           | 977    | 31    | 1,484 | 14      | 1        | 10.0   | 277.5   | 1          | 13      |
| 1874 | 3,159     | 1,252   | 1,145       | 123           | 533    | 18    | 959   | 13      | 1        | 9.3    | 205.5   | 1          | 11      |
| 1875 | 2,239     | 1,023   | 1,159       | 139           | 347    | 27    | 924   | 12      | 1        | 8.2    | 191.5   | 1          | 14      |
| 1876 | 2,972     | 1,178   | 1,182       | 159           | 186    | 25    | 1,431 | 12      | 1        | 11.3   | 209.5   | 1          | 12      |
| 1877 | 2,990     | 1,186   | 1,235       | 117           | 127    | 9     | 1,362 | 11      | 1        | 11.0   | 209.5   | 1          | 11      |
| 1878 | 2,724     | 959     | 1,212       | 168           | 236    | 26    | 1,352 | 16      | 1        | 11.0   | 209.5   | 1          | 16      |
| 1879 | 2,347     | 959     | 1,212       | 168           | 236    | 26    | 1,352 | 16      | 1        | 11.0   | 209.5   | 1          | 16      |
| 1880 | 3,066     | 1,014   | 2,534       | 158           | 624    | 29    | 2,648 | 19      | 1        | 13.7   | 210.0   | 1          | 18      |
| 1881 | 4,085     | 1,512   | 1,719       | 180           | 953    | 28    | 2,425 | 14      | 1        | 17.0   | 210.0   | 1          | 17      |
| 1882 | 4,767     | 1,171   | 1,604       | 186           | 1,072  | 27    | 2,549 | 16      | 1        | 16.0   | 210.0   | 1          | 16      |
| 1883 | 5,395     | 1,527   | 854         | 118           | 915    | 31    | 2,351 | 14      | 1        | 17.0   | 210.0   | 1          | 17      |
| 1884 | 5,620     | 2,014   | 902         | 116           | 1,039  | 32    | 3,311 | 14      | 1        | 19.0   | 210.0   | 1          | 17      |

It will be observed that the number released on payment of amounts due on executions diminished greatly in 1876. Prior to that date, the time served by prisoners was credited on executions at the rate of fifty cents a day. Under an ordinance of the city, that rate was then changed to two dollars. There are very few of the class committed to a city prison who will not consider that two dollars a day and board is as well earned in prison as elsewhere; and in consequence prisoners preferred to serve their time out rather than pay the fines. In 1880, the ordinance was repealed,—the old rate being restored,—with the results exhibited in the table.

The death rate has been kept well within bounds. Nearly all deaths recorded resulted from illness contracted outside of the prison, and many of the subjects died a few days after entering. The diseases recorded as most prevalent are, in the summer, dysentery and diarrhea; and in the winter intermittent and remittent fevers and rheumatism. General debility and delirium
The history of Chicago.

Tremors are also frequent causes of death. An epidemic has never entered the prison. During 1851, when small-pox was raging in the city, a few cases occurred; but their immediate removal to the small-pox hospital prevented the spread of that disease.

The education and prison record of recommitments of prisoners is seen in the accompanying table:

The Board of Inspectors consists of the mayor, who is ex officio chairman, and three inspectors appointed by the mayor and confirmed by the City Council. The inspectors, in 1872, were—Mayor Joseph Medill, Hon. John C. Haines, Colonel C. G. Hammond and Louis Wahl. In 1874, Mayor H. D. Colvin became chairman; in 1876, Mayor Monroe Heath; and, in 1879, Mayor Carter H. Harrison. In 1878, Mr. Haines was replaced on the Board by Hon. Luther Laffin Mills. In 1884, Colonel Hammond died, and, in 1885, Mr. Mills removed from the city. They were replaced by E. W. Blanchfield and E. S. Albro.

The medical attendant, who is the city physician, was, in 1872, John Guerin, M.D., and from that date till 1886, W. P. Dunne, M.D., who in turn was replaced by French Moore, M.D., who still occupies the position.

Charles Emory Felton, superintendent of the House of Correction, who has held that position since 1871, has brought his charge to the very front rank of reformatory institutions in the United States. The high estimation in which his opinion on all matters of prison reform is held, is evident from the fact that at a National Conference of Wardens, held at Chicago in December, 1883, Mr. Felton was chosen chairman. He is, in fact, remarkably well posted in all departments of the city government, showing an unusual business ability and a decidedly executive mind. Mr. Felton was born at Barre, Worcester Co., Mass., on September 18, 1831, his ancestors being of that hardy English and Scotch stock which has formed so strong an element in the population and civilization of the country. He is a liberal descendant of Nathaniel Felton, who settled in Salem, Mass., in 1631, from which date Mr. Felton has a complete chronological record of the family tree and branches. On his mother’s side, also (whose maiden name was Johnson), his ancestors have been residents of Massachusetts for more than two hundred years. Mr. Felton’s early education was obtained at the public schools of Barre, and at Allen’s High School, in Oakham, Mass. At fourteen years age he obtained employment in the Barre Patriot printing office, which position he left a year later; and, after spending a short time as clerk in a book-store in Worcester, he returned to Barre and completed his apprenticeship as a printer, in the Gazette office. In the winter of 1849, he removed to Cincinnati, to become foreman of the Chronicle and Atlas.
CORPORATE HISTORY.

119

He next settled at Indianapolis, Ind., afterward at Columbus, Ohio, and Buffalo, N. Y.; at all these places filling positions of trust. He served in the capacities of Secretary of the Buffalo Typographical Union for one year, as vice-president for one year, and as president for one year. He showed his aptitude for public life, by successfully filling an office usually held by the wives and sisters of men at the front. His health failing soon afterward, he became superintendent of the Erie County Penitentiary, Buffalo, holding that office for nine years. 

In 1851, when then came to Chicago as superintendent of the House of Correction, being installed in office on January 14, 1852. Since residing in this city he has made hosts of friends, has proved himself a most efficient officer, and is very popular with the people. Although a democrat, his political convictions have never affected his administrative work, which has been rigidly non-partisan; and while he has had charge of more than 120,000 prisoners, few have left him but with the kindliest of feelings. In religion, Mr. Felton is an Episcopalian, but most liberal in his views. He is a Mason in high standing, a member of the Prisoner’s Aid and Social Science societies, and many other organizations of like character. He is a man of pleasant and genial habits.

DIELECTRICAL—As an efficient supplement to the police system, the private detective agencies of Chicago have a wide and deservedly high reputation. Brief synopses of some of the most prominent are subjoined.

Pinkerton & Co.'s United States Detective Agency was established in July, 1883, by Matt. W. Pinkerton, under the firm name of Coe & Co., from April, 1854, when the present title was adopted. The principal of the firm is still Matt. W. Pinkerton, and the company embraces W. H., R. K. and A. E. Pinkerton. Matt. W. Pinkerton was born on March 30, 1852, the son of Matthew W. and Elizabeth (Herald) Pinkerton. He attended the common schools of Wooster, Ohio, graduating from the high school in that city at the age of twenty. Soon after leaving school he apprenticed himself as a machinist, and was made superintendent of the old Wooster foundry and machine shops. In February, 1873, he opened a business for himself in high standing, a member of the Prisoner’s Aid and Social Science societies, and many other organizations of like character. He is a man of pleasant and genial habits.

George A. Hartman was born at Canton, Stark Co., Ohio, on April 30, 1837, the son of Joseph and Mary (Patterson) Hart-
ed employment with the surveying force on the east division of the Rochester & Auburn Railway, and assisted in driving the piles for building a railroad bridge across Cayuga Lake. Subsequently, he worked in the shops of the same company as a locomotive engineer. Afterward, he took a locomotive out on the road, and later was employed on the Hoosier Railroad as a locomotive engineer until 1852, when he came to Chicago, in company with Oliver H. Lee. He was employed by the Chicago & Mississippi Railway Company, now the Chicago & Alton. When that road went into other hands, he engaged with the Illinois Central Railway. He left that company after one year, to accept the superintendency of a branch house at Chicago of the Snook & Hill locomotive lamp manufactory of Rochester, N. Y., the following year, when the company decided to close their branch houses. Mr. Hamblen purchased their interest in this city. He built up a large and remunerative trade, and made his factory the first in that line in the West, until, in 1861, at the breaking out of the War, the depression of trade, and large losses in the South, forced him to an assignment. Subsequently, he was employed by J. McGregor Adams to fit up a lamp factory for Jesup, Kennedy & Co., a New York firm, and was engaged by them for two years, when he conceived the idea of organizing a preventive watch, and founded the present agency. He was married to Miss Catherine Cone, who died in 1868, leaving two daughters,—Flora and Lora E. In 1866, he married Mrs. Charlotte Bently, widow of Captain Bently, who was killed at the battle of Perryville. He is a member of National Lodge, No. 596, A.F. & A.M.; Washington Chapter, No. 43, R.A.M.; and Chicago Commandery, No. 14, K.T. He organized National Lodge, No. 596, by dispensation from the M.W.G.M., Jerome R. Gorin, of Decorah, III., and was W.M. of that lodge for the four years following its organization. Mr. Hamblen was made a Mason in Garden City Lodge, No. 141, by Eben C. Hurd.

PETER KOEHLER was born near Mannheim, Germany, on June 16, 1855, the son of Peter and Annie M. (Dues) Koehler. He attended the common schools of his native country, until, in 1866, he sailed for America, arriving in Chicago in June of the same year. For nearly three years he worked in this city as a cigarmaker, and for six years thereafter conducted a milk route. On February 22, 1875, he received an appointment as a police officer under Chief Rehm, and three years later was promoted to the position of a detective, earning his advancement as a reward for efficient service in capturing three well known and dangerous criminals, on October 17, 1878, while they were in the act of committing a burglary. He held the position of a detective on the city force until July, 1883, when he resigned, having in April of the same year been elected county constable, and has held that position until the present time. Since leaving the employ of the city he has opened a detective agency. His bravery on occasions of danger has won for him recognition as a fearless and efficient officer of the law. While doing duty for the city, he successfully broke up a gang of burglars who preyed upon the wholesale merchants, and which was composed of George Eager, Oscar Hurwitz, and many more as dangerous men. He not only rid the city of these desperadoes, but recovered $10,000 worth of silks and sealskins found in their possession. He also arrested Dalton, who had stolen $8,000 in Milwaukee, and returned him to that city. He induced Paddy Welch on the strength of a warrant issued when he was wanted in St. Louis; and brought from New Orleans Henry Klimmer, the defunct president of the Cigarmakers' Union, No. 14. He thrilling experience with burglars, when Bert Bent met his death, is well known in police records. Mr. Koehler was married on August 14, 1873, to Miss Mary Schafer of Chicago. They have three children,—George, Jacob A., and Clifford P.

HISTORY OF CHICAGO.

FIRE DEPARTMENT.

The value of property belonging to the Fire Department, in use in 1871-72, was $639,650. By the great fire, a loss of $1,465,760.09 was entailed, which included eight engines, one elevator, three hose carts, and three hook-and-ladder trucks, buildings, apparatus and supplies. The relief fund, contributed mainly by fire departments of other cities, amounted to about $11,000. The effective force after the fire comprised two hundred and one men, sixteen fire engines, with attendant hose carts, and four hook-and-ladder trucks.

The register of the Department since 1871, is as follows:

1871-72—R. A. Williams, fire marshal; Mathias Benner, first assistant; Charles S. Petrie, second assistant; E. B. Chandler, superintendent of fire-alarm telegraph. 1872-73—R. A. Williams, marshal; Mathias Benner, first assistant; C. S. Petrie, second assistant; William Musham, third assistant. 1873-74—Mathias Benner, marshal; D. J. Swenie, first assistant; C. S. Petrie, second assistant; William Musham, third assistant. This régime was maintained until July 16, 1879. 1879—D. J. Swenie, marshal; C. S. Petrie, second assistant; William Musham, third assistant. 1880—D. J. Swenie, marshal; William Munsell, C. S. Petrie, assistant. 1881—D. J. Swenie, marshal; William Musham, assistant; C. S. Petrie, assistant and secretary. 1882—D. J. Swenie, marshal; William Munsell, C. S. Petrie, assistants; Maurice W. Shuy, fire inspector. From 1870 to 1885 John D. Harrett was superintendent of the fire-alarm telegraph.

The following statement shows the expense of the Department since 1870, in comparison with the number of companies and apparatus maintained during each year:

The following statement shows the number of conflagrations and the monetary loss incurred thereby since 1871, exclusive of the fire of October 5-9 of that year:
The record of fires since 1871 shows several disastrous conflagrations. The most important of these were—

Singer Building, Washington and State streets, August 2, 1873, loss $57,000; planing mill of L. Bridge and Carroll and Sangamon streets, September 4, 1873, loss $20,000; grain elevator of J. H. Wheeler & Co., Carroll and Canal streets, September 7, 1873, loss $35,000; firm of Field, Letter and State streets, November 14, 1877, loss $725,000; planing mill of Palmer & Fuller, Twenty-second and Union streets, May 10, 1879, loss $72,125; bonded warehouse of Wallace Kingman & Co., No. 198 Main Street, February 1, 1880, loss $210,000; paint factory of Raynolds & Co., No. 10 Lake Street, February 2, 1882, loss $72,570; lithographing establishment of Shober & Carqueville, No. 119 Monroe Street, December 25, 1883, loss $287,525; seed Warehouse of Hirram Sibley & Co., North Water Street, May 25, 1884, loss $139,625.

On July 14, 1871, at 4:29 P.M., a fire of supposed incendiary origin was started in the two-story frame building, No. 449 South Clark Streets, owned by Le Grand Ouelle, and occupied as a saloon by E. T. Cregler. The locality was crowded with frame structures, and the fire obtained a headway that soon called every available fire engine in the city to the scene. The flames took a course similar to that of the great fire of 1871, and by midday had seized and swept east and west over Clark Street, Fourth Avenue, Third Avenue, State Street, Wabash Avenue, Eldridge Court, Peck Court, Hubbard Court, Wabash Yolk Street, Van Buren Street, Michigan Avenue, Congress Street and Harrison Street. The number of buildings consumed was eight hundred and twelve, classed as follows: One-story frame, 120; two-story frame, 471; three-story frame, 21; four-story frame, 1. Total number of frame buildings burned, 619. One-story brick, 14; two-story brick, 99; three-story brick, 41; four-story brick, 31; five-story brick, 5. Total number of brick buildings burned, 190. Two-story stone buildings burned, 3. Of the structures consumed, 59 were barns, and there were 8 churches, 1 school-house, 4 hotels, 1 theater, 1 post-office and 708 stores and dwellings. The whole covered an area of forty-seven acres, with a total loss of $1,067,260, and an insurance of $1,860,000. The ensuing day, at nearly the same hour in the afternoon, a fire, the result of carelessness, destroyed twenty-five buildings near Milwaukee Avenue and Sangamon Street, with a loss of $72,750 and insurance of $46,700.

At the close of 1884 the uniformed force of the Department was as follows:

One fire marshal and chief of brigade; one assistant fire marshal and department inspector; one assistant fire marshal and deputy seyche; seven chiefs of battalion; forty-four captains; forty-four Lieutenants; thirty-four engineers; one hundred and thirty-two pipemen and truckmen, first grade; thirty-five pipemen and truckmen, second, grade; eighty-nine drivers; fifty-one foremen; forty-four and thirty; two clerks, one superintendent of horses; one superintendent of fire-alarm telegraph; one chief operator; four operators; one inspector electric lights; five repairers; two linemen; one batteryman; one fireman stationed at a fire station; two truckmen detailed at repair shops; total force, four hundred and fifty-one.

The apparatus of the Department was classified as follows:

Engine companies, thirty-four; hook and ladder companies (one operating a two-tank, two-horse, four-wheel chemical engine; three operating a one-horse, one-tank, two-wheel chemical engine and one company operating an improved stand-pipe and water tower), ten; chemical engine companies, two; total, forty-six. There were in use one hundred and ninety-eight horses and 41,847 feet of hose.

The number of fire-alarms reported to in 1884, 1,162; the apparatus traveled 14,899 miles; worked 1,984 hours; 346 fires being discovered from watch-towers by members of the Department.

The value of property belonging to the Department in January 31, 1884, was $1,165,097.43. There were 520 alarm stations, and 1,211 police and private alarm box, 358 miles of aerial fire-alarm wires; while the underground wire system comprised 7,931 feet of conduit, 4,872 feet of iron pipe, 576 feet of cable, and 361-2 miles of single wire.

The organization of the Department, with head-quarters at City Hall, on December 31, 1884, was a follows:

D. J. Swanie, fire marshal and chief of brigade; William Musiah, first assistant fire marshal and department inspector; Charles S. Petri, assistant fire marshal and superintendent; Maurice W. Shay, chief of first battalion, detail fire inspector; John H. Greene, chief of second battalion; Michael W. Conway, chief of third battalion; Joel A. Kinney, chief of fourth battalion; John Camden, chief of fifth battalion, and chief of sixth battalion; Leo Meyers, chief of seventh battalion; Joseph C. Fazen, captain commanding first battalion; Fred. N. Shipp and Patrick McNulty, deputy superintendents of horses; Thomas Monaghan, driver for fire marshal; Richard Strong, alderman Alfred Phillips, John Cavanaugh, William L. Heatt and Norman T. Ormsby, drivers of fuel and supply wagons.

The fire alarm telegraph was under the control of John F. Barrett, superintendent; David M. Hyland, chief operator; John Fitzgerald, William Carrol, Henry Lester, Jacob F. Mehren, assistant; Clark C. Haskins, inspector of electric lights.

Following are sketches of some of the prominent members of the department:

Edward W. Murphy, Assistant Marshal of the Fire Department, and commander of the Fifth Battalion, was born on the site of the Haven School, on October 22, 1854. He joined the Department in October, 1874, as pipeman on Engine No. 6, where he was transferred to Company No. 3, in December 1877, and was promoted to the rank of Company No. 4, and promoted to a lieutenant of the same company in December, 1878. In November, 1877, he was transferred to Engine No. 10, hence to No. 31, and, on July 10, 1880, was transferred to a captaincy. On September 5, 1885, he was appointed assistant fire marshal, and assigned to his present post in charge of the Fifth Battalion, with headquarters at the house of Chemical No. 1. Marshall Murphy was at the Ready elevated fire when lieutenant of No. 10, and went down four stories, from the top floor to the basement, in the collapse of the building. In May, 1886, when captain of No. 17, he, with four of his company, fell with the roof of the Academy of Music to the parquet floor; and in January, 1886, he and his company were buried under the falling walls at the Mayer furniture factory, on Canal street, one man being killed and five having broken limbs, Marshal Murphy himself was disabled for a long time. On September 16, 1882, he was presented with a watch and chain by the manufacturers of the business district, in appreciation of his services; a token of esteem to which, later, was added honorable official mention in general orders for rescuing three persons from the fourth story of Nos. 70-72 Randolph Street. He was badly injured in a collision the night of his presentation, while on the horse car going to a fire. His recuperations have been slow, but his efficiency and energy have won him high praise. Marshal Murphy was married in Chicago, in 1877, to Miss Mary Thompson. They have two children,—Edward and Franklin.

John H. Greene, chief of the Second Battalion, was born on September 3, 1842, in the city of Providence, R. I. In June, 1860, he came to Chicago, his trade being that of a printer. He was employed by Andrew Wood, proprietor of a job-office, in quest on, and, on June 24, 1864, when he joined the fire department went to Captain Hook and Ladder No. 3. On the night of April, 1877, he became assistant fire marshal, in charge of the Third Battalion. On May 1, 1880, he was transferred to the command of the Second Battalion, with headquarters at No. 180 Dearborn Avenue.

Walter Trainor, captain of Hook and Ladder Company No. 1, has been a member of the Fire Department since 1869. He was born in Armagh, Ireland, in 1847. When he was two years of age, his parents, Bernard and Alice Trainor, located at Kingston, Connecticut, and, in 1854, came to Chicago, where Captain Trainor still resides. Here the son received his education, and served an apprenticeship at ship-carpentery, besides sailing on the lakes two years. On July 5, 1866, he joined the Fire Department as pipe- man on Engine No. 13, and, in 1871, was promoted to the rank of captain. On December 9, 1872, he was made captain of No. 18, then organized, being the first new company formed after the fire of 1871. In 1873, Captain Trainor was transferred to Chemical No. 1, and, in a collision, was disabled for seven months, his legs and three ribs broken. In October, 1874, he was sent to Hook and Ladder Company No. 2, and later, to Engine No. 1, when he in turn was transferred to Hook and Ladder No. 7. Later he went on Track No. 8, and, finally, to his present post, on April 8.
HISTORY OF CHICAGO.

182. Captain Trainor has won distinction for many notable acts of bravery. While on No. 15, in 1853, he was badly injured in the fire of an office building at State's Hall, on Dearborn Street, falling from the building. On May 3, 1858, he was one of the firemen who bailed in a burning structure on Water Street, where two firemen belonging to his company were killed and himself slightly injured.

JOHN J. HENNESSY, captain of Engine Company No. 6, was born at Elmir, Chemung Co., N. Y., on July 22, 1842. When he was four years old, his parents, John and Margaret Hennessy, removed to Chicago, and died soon after their arrival, in 1851. In February, 1862, Captain Hennessy enlisted in the 32d New York Infantry, and served it for two years and nine months. He was at Shiloh and Gettysburg, and, in battles of the Wilderness and, in 1865, was with General A. J. Smith in the Army of the Tennessee. He returned to Chicago after the close of the war, and worked as a confectioner and as a traveling salesman for M. E. Page & Co. On June 22, 1877, he joined Pullivwde's Fire Patrol; and, on July 6, 1874, the municipal Fire Department, as truckman on Hook and Ladder No. 1. He was transferred to No. 6 on November 7, 1875, and promoted to the lieutenantcy of Hook and Ladder No. 7, on July 14, 1877. In October, 1877, he returned to No. 6, and was sent to Engine No. 5, on April 20, 1878. On December 31, 1882, he was made captain of Engine Company No. 5. Captain Hennessy has seen much active service, and has an excellent record for efficiency and bravery. On February 20, 1882, his skull was fractured and collar-bone broken in a hose cart collision, taking him from service for several weeks. He was married in Chicago, 1875, to Rebecca A. Hennessy, who died on June 14, 1884, leaving one child, Maggie A.

ZOEDEY C. PALMER, captain of Engine Company No. 10, has been a member of the Fire Department since 1876. He was born in Ely, England, on November 10, 1850, the son of Robert B. and Sarah W. Palmer. His parents came to Chicago on August 4, 1844. His father, Robert B. Palmer, was a pioneer in supplying water from barrel-wagons to the early residences. He also compiled with the necessities of those times by chopping wood at fifty cents a day. He had a mother, formerly Miss Sarah Watson, bought from the first mill of millinery goods ever sold in Chicago by the wholesale firm of D. B. Fisk & Co., and was located at No. 89 North Clark Street for twenty-one years, the father being the oldest bleacher in the city. Captain Palmer has served his city for twenty years, between the ages of twelve and twenty, he did duty as a man-of-war's man, and later learned the engraving art. In 1873, he joined the Fire Department as a substitute, being regularly appointed, on August 4, 1873, as truckman on Hook and Ladder No. 8. He went to No. 4, on November 7, 1876, and was promoted to the lieutenantcy of Hook and Ladder No. 3, on December 1, 1877. In 1878, he was transferred to Hook and Ladder Company No. 1; to No. 2, in December, 1879; and was promoted to a captaincy on January 1, 1882, on Hook and Ladder No. 9. In January, 1883, he was transferred to Engine No. 9; and January 3, 1885, to his present post. Captain Palmer bears a light and brave record for bravery and endurance, and has received honorable mention in Department general orders for rescuing imprisoned people. He has been several times injured, and has had as many as forty stitches made for injuries at fire. He has lost, in sixty-nine years, of absence during his twelve years of service. Captain Palmer was married, in Chicago, on December 17, 1877, to Miss Christiana Dehne, daughter of Goddard Cooy Kithey. They have three children, Grace W., Emily A., and Binnie.

GEORGE H. TAYLOR, captain of Engine Company No. 14, was born in Chicago, on December 1, 1846, and is the son of Ezra and Sabina Taylor. His parents were from New York, his father coming here in 1836 and his mother two years previously. The former is well known as a pioneer of the early days, and as the commander of the celebrated Battery "B," otherwise known as Taylor's Battery. The son was educated in Chicago, and, February 1, 1864, when seventeen years of age, entered the Fire Department as a member of the celebrated "Athletic," No. 3. In 1867, Captain Taylor went to No. 4, and, five years later, was promoted to the lieutenantcy of No. 22, where he remained one year. He served on No. 27 two years and, on No. 11 four years; when he was made captain of No. 20. In 1871, and, in April, 1852, of No. 14, his present post; for one year serving on Chemical No. 1. In the great fire of 1860, he lost everything. Captain Taylor has been identified with the most prominent advancement of the Department. He was married in Chicago, in 1865, to Miss Serena B. Davison. They have five children; William, Mary, Margaret, George and Ezra. Colonel Ezra Taylor, his father, died in this city, on October 24, 1888.

Charles W. H. FIELD, captain of Engine Company No. 15, was born in County Limerick, Ireland, in 1841. When six years of age with his parents, John and Elizabeth Enright, to Chicago. The son early identified himself with a foreman's life.

In 1855, when fourteen years of age, he joined the Volunteer Fire Department as a torch-boy, on the "Nygat," No. 3, remaining with the engine until 1858. In 1857, he joined the paid department on No. 2, where he served four years, becoming head-pipeman of "Liberty," No. 7, in 1862, of which company, in Captain Sweet, he was serving at the time this company Captain Enright was given command one year previous to the fire of 1871. He was transferred to Fire Escape No. 2, which was destroyed in the great fire. In 1873, he was sent as captain to Engine No. 15, to No. 24, in 1875, to Hook and Ladder No. 8, where he remained until 1878. He then went to No. 23, and, in January, 1885, to Engine No. 15, where he now is. Captain Enright was married, in 1865, to Miss Mary Ely, of Chicago; and, in 1885, to Miss Eliza Chappell, who was the first school-teacher in Chicago, was a native of New
In 1873, a four-wire kerite cable was laid from the water works crib in the lake, through the new tunnel, before the water was admitted, a distance of three miles, to the shore terminus.

During 1874 there was added to the fire-alarm system forty signal boxes, six engine-house strikers, one bell-striker, and thirty miles of aerial wire, making in all, up to that time, two hundred and fifty-eight boxes, forty-four gongs, and eleven public-alarm bells. The residences of the fire marshals were connected with the central station by means of instruments temporarily placed on the fire signal lines, communication being had by means of an established code of signals.

In 1875, previous to March 31, the system was supplemented by the addition of fifteen street boxes, four engine-house strikers and two public bell strikers; fifteen miles of wire were utilized in effecting communication between the central office and the fire marshals' quarters, thereby relieving the signal lines from all duty other than fire summons. Twenty-five miles of wire were used in extensions to new boxes and for the restoration of those destroyed by the fire of July, 1874. A cable, four hundred feet in length, consisting of two conductors, was laid in the brick water-tunnel, fifty feet under the North Branch of the Chicago River, at Chicago Avenue.

The first regular underground cable (as distinguished from cables laid in water-pipe tunnels or through water mains), a kerite built by Day & Co., of New York, was laid in Cass Street, between Superior and Erie streets, in October, 1877, and consisted of two conductors of No. 16 copper wire, 1,055 feet each, laid in an iron pipe of one inch diameter, the interval being filled with Stockholm tar; the insulation or coating of the wire being 3/16 of an inch in thickness, and the wire wrapped with tape.

Between March 31 and December 31, 1885, one street box and eight engine-house strikers were introduced. At the Twelfth street river crossing, a cable, with seven conducting wires—two for city use—was laid through the water main, and two of Barrett's "joker" registering appliances were placed in operation experimentally.
In 1884, fifteen additional alarm boxes were placed; registering apparatus and gongs were extended to engine houses Nos. 30, 31 and 32; forty keyless-doors were attached to existing alarm boxes; the police telegraph was extended to two new stations, and also to the private residences of four officers of the Fire Marshal’s Department; one hundred new poles were placed for extension of the police alarm telegraph, sixty miles of aerial wire were strung, and five new stations established; connections were made with eight engine houses; one hundred and eleven new street fire-alarm stations were opened.

In 1882, ten signal stations, two “joker” registers with engine-house attachments, and seventeen telephones for the transmission of Department business, were inaugurated in service; the three-dial repeater in the central office, which strikes the alarm, was exchanged for a four-dial instrument, the change was necessitated by the boxes in the stock Yards district being numbered in thousands (four figures) instead of hundreds (three figures); the police patrol system was extended into six additional districts, namely, the Cottage Grove-avenue, Larrabee-street, Rawson-street, East Chicago-avenue, West Chicago-avenue, and Himan-street districts, in the construction of which three hundred and two poles were placed, eighty miles of wire stretched and one hundred and thirty-one patrol boxes stationed. These lines were all connected with the engine houses in their respective districts. A new aerial line was constructed between the central office in the City Hall and the Bridgwell, for the exclusive use of the House of Correction, and the old line between these points was changed so as to connect the small-pox hospital with the office of the Board of Health; a kerite cable of twenty wires was placed in the LaSalle-street tunnel; the old four-wire cable connecting through Goose Island was repaired and two additional wires added, making a perfect and ample service of six wires. The entire equipment and apparatus at this time summarizes as follows: 3,478 telegraph poles, 565 miles of wire in air, 28 miles of wire in cables, 511 fire-alarm boxes, 174 keyless-doors, 40 Barrett “jokers” and attachments, 13 bells and strikers, 52 engine-house gongs, 332 telephones, 3,100 battery jars, one four-dial repeater.

On October 23, 1884, the headquarters of the city telegraph were removed from the old City Hall, corner of Adams and LaSalle streets, to the new City Hall, LaSalle, Washington and Randolph streets, where the conveniences, equipments and furnishings are unsurpassed. The signal system, including the six stations in the Stock Yards district, embraces 520 fire-alarm stations, 434 public police boxes and 322 private police boxes or calls, through all of which, 1,286 in number, fire assistance may be summoned.

The underground system, this year devised and perfected, consists of a conduit composed of asphalt cement in three-foot lengths, of pipe form, with an internal diameter of nine inches, laid in a trench under the street pavement, at a depth of from two and-a-half to five feet. The pipes are connected in the trench and made water-tight with asphaltum cement. They are continuous except at street intersections, where a man-hole chamber, of the same composition, wide enough to permit the entrance of two men, is sunk to sufficient depth to form part of the conduit. The manholes are inclosed, and have iron coverings. Through LaSalle Street, and the tunnel under the river, a three-inch iron pipe, nineteen hundred feet in length, incloses a kerite cable of twenty-five wires: between the South and West
sides of the city, two iron pipes, each three inches in diameter, laid in the Washington-street tunnel, each protect a kerite cable of eighteen hundred and seventy-five feet in length, consisting of twenty-five wires. The conduit extends from the City Hall to the three divisions of the city, and single insulated wires drawn through it connect the apparatus in the central station with the different stations along the conduit route and with the air lines at the conduit terminals. These wires have a copper core, No. 13 gauge, and are surrounded by kerite insulation of an inch in thickness, wrapped with fabric tape. The underground system includes also smaller conduits, constructed of asphaltum pipes, four inches internal diameter, leading from the City Hall to the Washington-street and LaSalle-street tunnels, designed and laid with a view of ultimately being utilized for an electric light service. The underground system comprises: 7,031 feet of conduit, 4,872 feet of iron pipe, 5,700 feet of cable, 36½ miles single wire and 25 man-hole chambers.

The cost of the plant of the fire-alarm system of today was $274,508, the principal items being as follows:

- Telegraph lines, $30,750; six cables, $7,570.74; lightning arresters and conduits, $7,090.50; 13 automatic signal boxes, $122,750; 54 engine-house gongs, $11,825; 15 bell-strikers, $9,500; 13 alarm-bells, $9,700; 15 police dial instruments, $3,000; 5 printers, $1,100; battery, $4,065; 46 "jokers" and instruments, $4,200; 170 copper doors, $16,700; central office apparatus, $21,215; line instruments, tools, desks, city maps, chairs, etc., $571. The cost of the several cables in detail, was: Archer Avenue, $607.66; Chicago Avenue, $352; Washington-street tunnel, $845.50; Division Street, $375; Clybourn Place, $97.50; LaSalle-street tunnel, $3,612.

The great fire of 1871 destroyed the records of the Firemen's Benevolent Association, and emptied its treasury. The society at that time had an investment of $5,000 in the stock of the Home Insurance Company, of this city, to make which good it was called upon to pay over its available fund, amounting to some $1,400, being only allowed by the court to retain a nominal sum, in virtue of its position as a benevolent organization.

The firemen of other cities, in this time of need, did for their brethren of Chicago all that they could or would have done for themselves. A little pamphlet, issued in the summer of 1872, makes a formal acknowledgment to the firemen of the United States and Canada of the aid thus generously tendered. In this we find recorded that a meeting of the Fire Department was called on the evening of October 17, 1871, "to take such action as should best carry out the desires in their donations to the firemen's relief fund." Mathias Benner, third assistant fire marshal, was chosen chairman, and E. B. Chandler, superintendent of the fire-alarm telegraph, as secretary. Charles S. Petrie, Thomas Barry, D. B. Kenyon and James E. Chandler were appointed a committee to receive and distribute all funds sent for the relief of the department. John P. Barrett, E. B. Chandler and D. J. Swenie were appointed a committee on resolutions.

Within thirty days from the date of this meeting donations were received from outside firemen to the amount of about $8,000, and the sum in the hands of the committee for disbursement soon after reached a total of nearly $12,000. At an adjourned meeting of the Fire Department, held on the evening of May 21, 1872, the committee on relief, Messrs. Petrie, Barry, Kenyon and O'Connell, reported in detail the amounts received and distributed, showing a balance of $4,255 on hand, which was, on motion, turned over to the Firemen's Benevolent Association. Their statement showed a total contribution of $11,485.55 from the firemen of twenty cities in the United States and Canada, out of which fund the total number of firemen relieved was ninety-seven, and the total number of persons relieved in the families of firemen, two hundred and forty-six. The following resolutions, presented by the committee on resolutions, Messrs. Barrett, Chandler and Swenie, were unanimously adopted:

"Whereas, On the 8th and 9th days of October, 1871, nearly one-fourth of the City of Chicago was devastated by fire, by which calamity ninety-seven members of our Fire Department suffered losses to a greater or less extent; and

"Whereas, The Fire Departments throughout the United States and Canada promptly and generously contributed of their substance for relief of their suffering brethren; Therefore,

"Resolved, That the members of the Fire Department of Chicago hereby tender their heartfelt thanks to the members of the Fire Departments of our sister cities, and assure them that their timely assistance will ever be held in grateful remembrance.

"Resolved, That a copy of the foregoing be sent to all the Fire Departments which have contributed to our relief."

The annual firemen's ball, of the following October, netted the Association nearly $2,000, and as the calls for relief were but moderate, owing partly to the disbursement of the relief fund above recorded, the Association began the year 1873 with a very respectable sum in the treasury.

There has been nothing eventful in the history of this branch of the Fire Department since that period. The society has been sustained entirely by membership fees, and the proceeds of the annual ball of the firemen, which takes place in the latter part of October of each year.

In 1873, it contributed $500 to the relief of the destitute by the Boston fire; and on September 24, 1878, $600 was sent for distribution among the yellow-fever sufferers in Memphis, New Orleans and Vicksburg.

The following statement shows the total amounts paid out yearly for benevolent purposes since 1871:

Total: $44,111.62

The officers of the Association since 1871 with their terms of service, have been as follows:

- Vice-Presidents: Charles T. Brown, 1872; D. J. Swenie, 1873-77; E. B. Chandler, 1878-80; L. J. Walsh, 1881-82; John Lynch, 1883; H. H.McCain, 1884.
- Treasurers: Joel A. Prest, 1872-74; Thomas Barry, 1875-82; C. S. Petrie, 1883.
- Recording Secretaries: Leo Meyers, 1872; D. B. Kenyon, 1873-79; John Fitzpatrick, 1880-81; Joseph O'Donoghue, 1882-84; Ed. Hunt, 1885.

The present officers are John Hamill, president; John J. Berry vice-president; Charles S. Petrie, treasurer; D. D. Healey, financial secretary; Ed. Hunt, recording secretary.

The Association now numbers among its beneficiaries fourteen families of deceased firemen, who are in receipt of pensions paid monthly. The present membership is 4,450. The annual dues are $2.00. The gross
receipts of the last annual ball, in October, 1885, reached the large sum of $82,650, of which $22,000 were netted to the treasury. The surplus fund is now about $63,000. From this fund some $30,000 are loaned out at a low rate of interest to members of the Fire Department, as an aid in the construction of homes. Approved loans are made from this fund, from time to time, as it increases, for this purpose.

The annual meetings for the election of officers take place in January each year. Regular meetings for the transaction of relief Business are held on the third Tuesday in each month.

BOARD OF PUBLIC WORKS.

There have been several important changes in the management of the Board of Public Works since the fire. On September 18, 1876, the Board was abolished by the City Council, and due authority and control vested in the Mayor. On May 19, 1879, a commissioner in charge was again appointed, but his resignation, October 19, 1881, once more placed the Department in the Mayor's hands; the Council, December 31 of that year, legalizing the action, and vesting the executive of the same with full power in a Commissioner as such, in charge of the Department. In 1882, a commissioner was again appointed. The following is a register of the Department, by years, since 1871:

1871-72—W. H. Carter, commissioner and president; Redmond Prindiville, commissioner and treasurer; J. K. Thompson, commissioner; F. H. Bailey, secretary; E. S. Chesbrough, city engineer.

1872-73—No change in organization occurred.

1873-74—Redmond Prindiville, commissioner and president; J. K. Thompson, commissioner and treasurer; Louis Wahl, commissioner; Alexander Sullivan, secretary; E. S. Chesbrough, city engineer.

1874-75, and up to March 31, 1876, the composition of the Board was the same as above.

1876—Department in charge of the Mayor; D. S. Mead, secretary; E. S. Chesbrough, city engineer; George W. Wilson, superintendent of streets, bridges and public buildings; William H. Clarke, assistant city engineer; E. M. Johnson, accountant and paymaster; H. J. Jones, in charge of assessments; D. C. Cregier, chief engineer North Pumping Works; W. R. Larrabee, in charge of water office; O. F. Woodford, water tax assessor; Charles Brown, superintendent of water meters; F. J. Reed, cashier; F. C. Meyer, in charge of map department.

1877—The only change made was the appointment of Henry Mason as engineer of the West Pumping Works.

1878—The only change this year was occasioned by the death of W. H. Clarke, August 5, 1875, Benezette Williams being appointed to succeed him as assistant city engineer.

1879—Charles S. Waller, commissioner; D. S. Mead, secretary; D. C. Cregier, acting city engineer; William Fogarty, superintendent of streets; E. M. Johnson, accountant and paymaster; H. J. Jones, superintendent of special assessments; D. C. Cregier, chief engineer North Pumping Works; Henry Mason, engineer West Pumping Works; Herman Lieb, superintendent of water office; O. F. Woodford, water tax assessor; M. Ryan, superintendent of water meters; John Hise, cashier; F. C. Meyer, superintendent of map department.

1880—Charles S. Waller, commissioner; D. S. Mead, secretary; F. C. Meyer, bookkeeper; D. C. Cregier, city engineer; William Fogarty, superintendent of streets; G. Howard Ellers, superintendent of sewers; H. Lieb, superintendent of water office; O. F. Woodford, tax assessor; John Hise, cashier; J. K. Tumey, registrar; H. J. Jones, superintendent of special assessments; Francis A. Demmler, superintendent of map department.

1881—The departmental offices were unchanged, except for the official abandonment of the bookkeeper's position, and the transfer of the executive authority to the Mayor, the commissioners resigning offices.

1882—D. C. Cregier, commissioner; D. S. Mead, secretary; S. G. Artingstall, acting city engineer; O. H. Cheney, superintendent of sewers; William Fogarty, a Commissioner of the Board of Works; H. J. Jones, superintendent of special assessments; Herman Lieb, superintendent of water-office collections; F. D. Igleseson, superintendent of water meters; G. R. Bramhall, superintendent of bridge repairs; C. McKeve, lake crib keeper.

1883—The only changes in the Department were the appointment of T. Patterson as cashier of the water offices; J. Mabis as engineer of the North Branch Pumping Works; and J. Comiskey as superintendent of water meters.

1884—D. C. Cregier, commissioner; D. S. Mead, secretary; S. G. Artingstall, city engineer; O. H. Cheney, superintendent of sewers; William Fogarty, superintendent of special assessments; Herman Lieb, superintendent of water-rate collections; A. A. Kemmer, superintendent of map department; F. C. Meyer, department bookkeeper; E. E. Gilbert, chief clerk water rates; T. Patterson, water rate assessor; H. G. Naper, water permit clerk; J. W. Lyons, cashier water rates; W. L. Mahar, registrar water rates; W. Williams, meter rate clerk; B. F. Davenport, in charge of private drains; F. Trautmann, engineer North Pumping Works; H. Mason, engineer West Pumping Works; H. Welch, engineer South Branch Pumping Works; W. J. Trumbull, engineer North Branch Pumping Works; J. Comiskey, superintendent of water meters; G. R. Bramhall, superintendent of bridge repairs; C. McKeve, lake crib keeper.

A summary of the work of the Department for 1884 shows:

Water pipe laid, 2434 miles; brick and pipe sewers laid, 19 miles; roadway paved, 34.52 miles; plats made, 1,610; special assessments prepared, 406; one bridge and three viaducts built; 341 contracts made, aggregating $2,585,128.23; income, $7,270,116.85; balance over expenditures to credit of Department, $1,059,120.73.

The following shows the assessments for public works since the fire:

The Board of Public Works lost severely in the great fire, and the items of damage and ruin show what intimate and extensive was its water, sewerage and street system in 1871.

The City Hall, largely completed, was destroyed by the conflagration, with a loss of $75,000; the damage to the Water Works was $75,000; to the North and South Side reservoirs, $52,910; fire hydrants, $10,000; water meters, $6,000; sewerage works, $4,200; bridge structures, $252,000; street pavements, $221,500; sidewalks—wood, $142,991.50; stone, $501,005; flagstone, $54,380; number of linear feet of sidewalks destroyed, 642,541, or 121.4 miles; loss of water, $67,410; tunnels damaged, $6,000; lamp-posts, $33,000; docks, $6,000; expenses entailed by river obstructions, $7,730. Making a total loss of property in charge of the Board of Public Works of $2,220,250.90.

STREETS.—Over twenty-eight miles of streets were exposed to the fire of 1871, and the damage effected covered seventeen per cent. of their original cost, or $211,500. At that time there were 534 miles of streets in the city, of which 91-1/2 miles were improved—about one-sixth of the total roadway area. On December 31, 1871, the record showed 223.55 miles improved, or thirty-four per cent. of the whole street area; of which 170.86 miles were of wood, 22.31 miles of Macadam, 4.63 of granite, 4.65 of Medina stone, 3.61 of asphalt, 7.25 of gravel, and 9.25 of cinders. This shows a wonderful increase for fourteen years, as up to 1870 only 91.17 miles had all been laid. The work was distributed among the several years as follows:
COURT HISTORY.

1872, 25.63 miles; 1872, 182; 1872, 10.19; 1874, 9.07; 1875, 11.49; 1876, 187; 1877, 12.89; 1878, 11.01; 1879, 6.83; 1880, 16.83; 1881, 21.52; 1882, 24.95; 1883, 22.39; 1884, 34.52; showing a total of 313.32 miles of streets made since the organization of the Department, of which 89.37 miles had been re-paved. These 89.37 miles of streets were occupied by railway tracks. A summary of the work of the Street Department for 1884 shows 725,851 square yards, or 34.52 miles, of roadway paved; 51,541 square yards, or 80 miles plated; 205,056 square yards, or 2,225.34 miles, by street railway companies; 8,835 miles cleaned, costing $82,225.76; 146 special assessments prepared; and 128 contracts made, aggregating $1,510,103.32.

SIDEWALKS.—The total number of lineal feet of sidewalks of the fire was 642,041, or 1,213 miles, comprising wood, stone, and flagstone walks, with a value of $941,380.90. At the close of 1884, there were in the city of 24.65 kinds of sidewalk, of which 14.54 miles were under control of the Park Commissioners. Of these, 720.73 miles were of wood, 72.14 of stone, and 11.18 of concrete. During 1884, new sidewalks were built, re-built or repaired, to the extent of 29.16 miles, comprising wood, stone and flagstone, with a value of $410,000. At the close of 1884, there were in the city of 24.65 kinds of sidewalk, of which 14.54 miles were under control of the Park Commissioners. Of these, 720.73 miles were of wood, 72.14 of stone, and 11.18 of concrete.

WATSON & PERKINS.—This firm was organized in 1877, by William H. Watson and Amos H. Perkins, for the purpose of taking contracts to pave streets and build sidewalks. They pave with asphalt or with cedar blocks, but mostly with the latter, having laid miles in Chicago and Minneapolis, Minn., where they can get and prepare them ready to be put into pavements. In the construction of their sidewalks, they use sand and Portland cement in such proportions as may be best for the particular locality. They have built a large amount of work in Chicago, Minneapolis and St. Paul, Minnesota, and also in other cities of the Northwest. In 1882, in connection with their other interests, they commenced the manufactory of aggregate concrete, or what is called hydraulic cement, which is composed of sand, water, and a certain material, to which it is heated and hard, and durable as stone. They have built numerous large works in Chicago, and in 1884, they were engaged in building the large Jamestown Hotel, which is now nearing completion. The work is being done in stone, and will cost about $750,000. The firm has been most successful in the construction of sidewalks, streets, and public buildings, and has made a thorough business of itself. They employ from eighty to one hundred men and do a business of $275,000 annually.

William H. Watson was born in Whitestone, Oneida Co., N. Y., on August 17, 1825, and is the son of Winthrop and Lydia (Hicks) Watson. When he was nineteen years old he learned the wagon-making business, about which he was a perfectionist. In 1859, he moved to Elgin, Illinois, where he was engaged in the manufacture of wagon-making tools, and also in the shoe business, in connection with which he operated a tannery. At the end of five years, he sold out and commenced to buy and ship groceries, and they he carried on that business until 1867, when he came to Chicago where he has since resided. He was employed by the Board of Public Works to superintend the paving of streets until 1875, when he engaged in the paving business on his own account. He was a contractor for two years, when he formed a partnership with Amos H. Perkins and established the present firm. Mr. Watson was married in August, 1844, to Mrs. Elizabeth Bonville, of Geneva, Illinois; they have one son, William C., of Houston, Texas.

Amos H. Perkins was born in Norwich, Conn., on July 26, 1834, and is the son of Isaac and Nancy N. (Allen) Perkins, and a direct descendant of Miles Standish, on his mother's side. He came to Chicago in 1858, and soon afterward commenced taking contracts for paving, laying sidewalks and roofing. He was one of the contractors on the LaSalle-street tunnel. During the war he was a hospital steward; he was in the army, and at one time conducted nearly all that was manufactured in the United States. He has been a large contractor in cedar blocks and asphalt paving and Portland-cement sidewalks, having had contracts for this class of work in most of the large cities in the country. Mr. Perkins was married in March, 1876, to Miss Mary E. Tstram, of Norwich, Conn. He is a member of Covenant Lodge, No. 326, A.F. & A.M., and of Corinth Chapter No. 62, R.A.M.

JEFFRESON HODGKINS, paving contractor, son of Philip and Mary Hodgkins, was born at Trenton, Me., on October 27, 1844. He attended the public schools of his native town until seventeen years of age. He has a farm consisting of nearly all that was manufactured in the United States. He has been a large contractor in cedar blocks and asphalt paving and Portland-cement sidewalks, having had contracts for this class of work in most of the large cities in the country. Mr. Perkins was married in March, 1876, to Miss Mary E. Tstram, of Norwich, Conn. He is a member of Covenant Lodge, No. 326, A.F. & A.M., and of Corinth Chapter No. 62, R.A.M.

JEFFRESON HODGKINS, paving contractor, son of Philip and Mary Hodgkins, was born at Trenton, Me., on October 27, 1844. He attended the public schools of his native town until seventeen years of age. He has a farm consisting of nearly all that was manufactured in the United States. He has been a large contractor in cedar blocks and asphalt paving and Portland-cement sidewalks, having had contracts for this class of work in most of the large cities in the country. Mr. Perkins was married in March, 1876, to Miss Mary E. Tstram, of Norwich, Conn. He is a member of Covenant Lodge, No. 326, A.F. & A.M., and of Corinth Chapter No. 62, R.A.M.

HODGKINS, Amos H., 1st Regiment Illinois National Guards for five years. He was married, on October 17, 1876, to Miss Isadora Berry, daughter of William M. Berry, of Hyde Park, by whom he has two children,—Grace and William N. He is a member of St. Mark's Episcopal Church.

Edward F. Buchanan, junior member of the firm, was born in Chicago, on August 21, 1855. After completing his studies in school, he was a clerk for Holister & Phelps in their carpet store, and for the New York Life Insurance Company, until 1872, when he clerked for his brother James until they engaged in business together. He was a member of Co. "A," 1st Regiment Illinois National Guards for five years. He was married, on October 11, 1881, to Imogene Fowler, daughter of B. Fowler, of the Board of Trade of this city.

STREET LAMPS.—At the time of the fire, 2,162 lamp-posts were so injured, that $83,000 was required to repair them. In 1884, there were 13,603 gas lamps in public use, distributed as follows: West Division, 7,558; South Division, 3,586; North Division, 2,549. There were 2,077 oil lamps in use. Two gas companies supplied the city: The People's Company, at $1.50 per 1,000 cubic feet, and the Chicago Company at $1.00. The total cost of maintenance per lamp was $1.92 in the West Division, and $2.75 in the South and North divisions. The cost of maintaining oil lamps per annum was $17.80. In 1885, the expense of lighting the city for the year was $45,823.19, of which $2,162.00 was paid to the People's Company and $13,603.01 to the Chicago Company. The
total number of cubic feet of gas consumed was 189,901,280.

GAS SUPPLY.—The business of gas production, like many other commercial enterprises, is full of statistical features suggestive of the phenomenal growth of population and the enlargement of every channel of commerce in the city. In 1871, with 135 miles of mains laid, the consumption of coal by the original gas company was less than 50,000 tons per annum. In 1875, the consumption was 72,000 tons, and, in 1885, the amount purchased for the estimated consumption of the year was $122,000. During the year immediately following the great fire comparatively few mains were laid, but the company made many new improvements in the process of production. At the time of the fire the North-side works, on Hawthorn Avenue, were half completed. These works, by great exertion, were saved from destruction, and were subsequently completed at a total cost of $600,000. In 1873, the company bought at the foot of Deering Street in Bridgeport, and put up new works to supply the southwestern part of the city, at a cost of $500,000. These outlying works, while being independent, are all connected with each other and with the business district by large mains, so that, in case of accident at any one station, the main supply will not be shut off. In 1871, the price of gas was $3 per 1,000 feet, and it remained at about this figure until the fall of 1883, when competition by new companies brought it down to $1.25.

The following statement shows the annual and total extension of the system of mains since 1871:

The Chicago Gas-Light and Coke Company was organized on October 16, 1839, and chartered under the laws of the State of Illinois on February 12, following. The original officers were but two,—F. C. Sherman, president, and N. B. Judd, secretary. The first board of directors was composed of the following-named gentlemen: George Smith, Thomas Dyer, Mark Skinner, F. C. Sherman, Franklin Lee, Joseph Keen, George F. Lee, John Lee and James C. Burts. The present officers are E. T. Watkins, president; Daniel C. Johnson, vice-president; John M. Balch, treasurer; and Theodore B. Wells, secretary. The following gentlemen constitute the present board of directors: E. T. Watkins, S. C. C. Becher, F. L. Voel, J. A. Brown, Jr., Albert C. Forbush, J. N. Twyford and Byron L. Smith. The original works were located on Monroe Street, near Market Street. These were destroyed in the fire of 1871, but were re-built at once. In addition, two more stations were also built, the immense growth of the city demanding increased facilities. One of these is on North Branch Canal, near Division Street, and one on Cagene Street, in Bridgeport. This was Chicago's first gas company, and it has grown with the growth of the city it has lighted for so many years, until now they have some two hundred and twenty miles of mains.

The Illinois Street-Gas Company was organized in Rock Island, Ill., in 1876, under the corporate laws of the State of Illinois, with Doctor Calvin Truesdale, of Rock Island, as president, and J. S. Butlers of Chicago, as secretary and treasurer, the capital stock at that time being $20,000. The company was organized for the purpose of lighting the streets of town and cities, by contract, with a special rate to be paid under its control to the original company, from which the gas was being covered by a patent belonging to the company. In 1879, Doctor Truesdale resigned, and William P. Butler became the president. The company has gradually extended its facilities and its field, until, in addition to the original original gas company, naphtha-gas lighting, it is engaged in the manufacture of all kinds of street lamps, besides dealing in all the illuminating and lubricating oils. This company has now about three thousand street lights in the City of Chicago: some seven hundred in Springfield, Ill.; five hundred in Peoria, Ill.; and many more in fifty other cities and towns in the West. The shops are at No. 50 Van Buren Street, with branches at Springfield and Peoria. In February, 1883, the capital stock of the company was increased to $1,000,000.

William Patterson Butler, president of the Illinois Street-Gas Company, was born at Louisville, Ky., in 1832. In 1862, he was appointed a cadet at the United States Military Academy at West Point. In June, 1866, he graduated, and was promoted in the army to Second Lieutenant of the Rock Island Arsenal, at Rock Island, Ill. There he remained on duty until 1871, when he resigned from the army, and became president of the Rock Island Mountain Company, and also of the Illinois Street-Gas Company. In 1872, he resigned as president of the Mountain Company. In 1875, and again in 1875, he was elected mayor of the city. In 1879, he removed to Chicago, and has since been connected with the gas company of which he is the President. In 1880, he was married, in Rock Island, to Miss Florence Rodman, daughter of the late General T. J. Rodman, Chief of Ordnance of the United States Army, and the inventor of the famous "Rodman gun." They have three children,—Florence, Martha and Lucia. Mr. Butler is a member of the Illinois Commandery of the Military Order of the Loyal Legion of the United States.

Captain Jonathan Kelby Butler, secretary and treasurer of the Illinois Street-Gas Company, was born on February 7, 1840, at Louisville, Ky., and was educated in the public and private schools of that city. In 1857, he began the study of the law with Judge John H. Butler, of Indiana, and in 1861, immediately after the Civil War, he laid down his law books and promptly enlisted as a private in the 13th Kentucky Volunteer Infantry. He rose rapidly to the grade of sergeant-major, and, in the spring of 1862, he was commissioned adjutant of his regiment. Afterward he was detailed as acting assistant adjutant-general of a cavalry division, commanded by General J. W. Foster, who subsequently was United States minister to Mexico and to Spain. In June, 1865, he was on duty as acting assistant adjutant-general and chief of staff to Brigadier General E. H. Hobson, commanding the cavalry brigade which captured the Confederate General John B. Magruder, in Ohio. Immediately after this raid Mr. Butler was ordered to Tennessee as acting assistant adjutant-general to General Girard, commanding Foster's cavalry division. Lieutenant Butler was present at the siege of Knoxville, Tennessee, and, in the spring of 1865, was ordered to Lexington, Ky. While there he was appointed by President Lincoln and commissioned to be acting adjutant-general U. S. Volunteers, with the rank of captain. He served in Louisville on special duty, under orders from the War Department, under the direction of General John M. Palmer, until June, 1865, when, at his own request, he was honorably mustered out of the service. He was thereafter admitted to the Bar, and began the practice of the law in Louisville, and later at Salem, Ind. In 1862, he gave up the law, came to Chicago, and connected himself with the Illinois Street-Gas Company. Captain Butler was married, in 1865, to Miss Addie Ferce, of Salem, Ind.; they have one son, Paul C. Butler, of the Chicago Hotel, No. 21, A.F. & A.M., and of Salem Post, G.A.R. At one time he was Commandant of the Southern District of Indiana, G.A.R. Cornelius Kingsley Gillmor, president of the People's Gas-Light and Coke Company, of Chicago, was born at Saratoga, N. Y., on September 17, 1861. He is the son of Albert M. Billings, the president and founder of this Company, and who has been a resident of Chicago for over a quarter of a century. Cornelius Billings was educated at Racine College in Wisconsin, where he was graduated with distinction in 1882. Returning to his home in Chicago, he at once was made superintendent of the Company, and two years afterward, in April, 1884, he was elected its vice-president by the unanimous vote of the directors, a high tribute to the enterprise and ability of Mr. Billings, who is a comparatively young man to hold such a position of trust and responsibility. His office is at the headquarters of the Company, at No. 39 South Halsted Street.

BRIDGES AND VIADUCTS.—In 1871, the Department of Bridges and Viaducts was subject to the Board of Public Works. The fire made great havoc with the papers of this Department, and besides destroyed property to the amount of $20,000,000, it did not do them much good in the way of damage to abutments, center-piers and protections. Eight bridges and two viaducts were swept away, being the Rush, State, Clark and Wells-street bridges, over the Main Branch; the Chicago avenue, over the North Branch; and the Adams, Van Buren and Polk-street bridges, over the South Branch of the river. The viaducts over the railway tracks at State and Wells streets
were destroyed, and that at Adams Street seriously damaged. The Department at once set to work to replace the structures destroyed, and the record of the ensuing year is a most interesting and progressive one. The work accomplished is given in detail in Volume II. of this History. The cost of maintaining the bridges and viaducts, including bridge-tenders' salaries, for 1871-72, was $57,332.28. During the year, a new iron the re-built bridges were provided with stone center-piers and abutments, except that at Chicago Avenue, which was combination in superstructure and stone center-pier.

Between March, 1872, and March, 1873, the work of re-building was completed, and many new improvements made. Both sides of the bridge-approaches at Rush, Clark, Wells and Halsted streets, and the north

viaduct was constructed over the tracks of the Pittsburgh, Fort Wayne & Chicago Railway Company, at Randolph Street, a very durable and substantial structure; and the old wooden bridge at South Halsted Street, built in 1860, was torn down and reconstructed.

The same year new center protections were added at Rush and Lake-street bridges. The new stone abutment on pile foundations at the south approach to Clark-street bridge, and the derrick and scaffoldings, were destroyed by the fire. The same kind of loss, including center-piers, protections, houses, turn-tables, tools, boats and seows, was met at other bridges. Five of the eight bridges destroyed were combination-plan bridges, with patent iron turn-tables, and all were new structures, built within three years, except that at Clark Street. State and Wells-street bridges were of the wooden Howe truss, and Rush-street was a wooden superstructure, with center pier and abutments of stone. The total cost of general repairs for the year was $24,142.75. All approach at State, 462 feet, and the east approach at Adams, 316 feet, were paved with new block pavement. The year closed with a record of twenty-seven bridges and eleven railway viaducts, all in excellent condition. During this year the Board of Public Works enforced the ten-minutes' rule for the opening and closing of bridges. The repair and salary expenses of the Department amounted to $59,255.32; repairs and supplies being $24,606.27. Seven new bridges and three viaducts were constructed, the total cost of the former, up to 1873, being $526,951, and of the latter, $189,573. All the bridges of the year had stone center-piers, except South Halsted, which was made of piles; and all had iron superstructures except that at Chicago Avenue, which was on the combination-plan with iron turn-table. The following is a detailed account of these structures:

Rush-street bridge, built by the Detroit Bridge Company; iron superstructure; draw, 211 feet; width of roadway, 18 feet; sidewalk, 6 feet; height of roadway above city datum, 20 feet; cost of
superstructure, $15,318.00; center and side protections, $6,590.40; total cost, $21,908.40. On August 25, 1872, the steamer "Annie Laurie" collided with the bridge, causing a damage not repaired until September 9, 1872.

The Adams-street bridge, built by the Keystone Bridge Company; iron superstructure; length of draw, 163 feet; width of roadway, 18 feet; sidewalk, 6 feet; height of roadway, 24 feet; cost of superstructure, $9,985.80; substructure, $3,050; dimensions for pier and abutment, $12,041.80; approach walls, $5,050; total cost, $37,862.27.

The North-west street bridge, iron superstructure, built by Fox & Howard; a draw, 190 feet; approach spans, 50 and 62 feet; roadway, 18 feet; sidewalk, 6 feet; height of roadway, 20 feet; cost of superstructure, $15,800; two approach spans, $7,250; substructure, $13,500; dimension in center-pier and abutments, $11,200; total cost, $50,622.14.

The State-street bridge, built by the Keystone Bridge Company; superstructure, cast iron, length of draw, 207 feet; length of pier, 200 feet; approach span, 35 feet; four viaduct spans, 76 feet each—total, 304 feet; width of roadway on draw, 18 feet; sidewalk, 6 feet; height of roadway, 20 feet; cost of superstructure, $17,900; two approach spans, $5,200; substructure, $29,860.13; superstructure, $14,490; dimension in piers and abutments, $18,929.57; curb walls, $8,425.92; total, $90,113.20.

The Wells-street viaduct, re-built with iron superstructure; length, 83 feet; width, 80 feet; three main and two sidewalk trusses, with iron floor beams; two roadways, each 22½ feet wide in clear; two sidewalks, 16 feet each; height of roadway, 24 feet; cost of superstructure, $12,000; repair walls, $57,465; total cost, $12,757.65.

Clark-street viaduct, over tracks of the Chicago & Northwestern Railway Company, at the intersection of North Water Street; built by the Keystone Bridge Company; dimensions same as those of the Wells-street viaduct; height of roadway, 24 feet; cost, $33,542.43.

During the year, an iron bridge was also built over the tracks of the Pittsburgh, Fort Wayne & Chicago & Chicago & Northwestern Railway Company of Water and Lake streets. It was 98 feet long and 18 feet wide. The Clybourn-place bridge, built in 1873, was a superstructure of the combination Howe truss, with iron turn-table. Its length was 140 feet, and cost $11,750. The Thirty-fifth-street (Douglas Place) bridge was a wrought-iron turn-table, combination Howe-truss structure; length, 140 feet; cost, $3,875.50.

The next year, March 1, 1873, the report was as follows: Bridge over Chicago & Illinois Central Railroad; iron superstructure; draw, 225 feet; roadway, 18 feet; sidewalk, 15½ feet; cost, $29,935. Randolph Street, iron superstructure; draw, 157 feet; roadway, 18 feet; sidewalks, 15½ feet; cost, $10,350. Fullerton Avenue, pine bridge, length, 255 feet; width, 20 feet; cost, $8,490 Viaduct on North Halsted Street, crossing the tracks of the Chicago & North-Western, Pittsburgh, Chicago & St. Louis and Milwaukee & St. Paul railways, length of bridge, 180 feet; two spans, 50 feet each; one span, 70 feet; one span, 93 feet; two roadways, 18½ feet; sidewalks, 12 feet; total width, 62 feet; height, 26 feet; cost of substructure, $36,179.77; superstructure, $81,428; raising buildings to grade, $36,900.24; total cost, $125,683.61, of which the railway companies paid $76,077.77. During the year, the crossways of Lake and Kinzie-street bridges were re-constructed, and the Western-avenue bridge was lowered seven feet, at a cost of $1,000. The repair account of the Department amounted to $26,000.22.

This left the bridge report with thirty-one draw and two pile structures, of which eighteen were combination, ten iron, three wood, and two pier. During March 5, to December 31, 1875, the Department built several new brick bridge-houses, and re-constructed nine bridges and five viaducts, the repair expense being $24,175.43. The Madison-street bridge was completed. It was an iron superstructure; draw, 157 feet; roadway, 18 feet; sidewalks, 6 feet; whole width, 33 feet; cost of superstructure, $11,495; repairs on substructure, $3,505; total cost of bridge, $15,000.

On September 19, 1876, the commissioners of the Board of Public Works retired from office, the ordinance passed by the City Council on September 18 having abolished the Board, and vested its power, duty and authority in the Mayor. George W. Wilson was made superintendent of streets, bridges, and public buildings.

The general repairs during the year on bridges amounted to $142,110.85, and on viaducts to $17,645.35. Indiana street bridge was overhauled, and five bridges were re-constructed. During a gale, May 5, 1876, the Fuller-street bridge, a wooden structure erected in 1825, was destroyed. The cost of repairing and replacing this bridge was completed this year, with details as follows: Over Blue Island Avenue, at Throop Street, over the tracks of the Chicago & North-Western and Chicago, Burlington & Quincy railways, the south part of which was of wrought-iron truss-girders, those on Blue Island Avenue being 66 feet long and 7½ feet high, forming two roadways, 8 and 7 feet wide; north part supported by 14 wrought-iron plate-girders, each 46 feet long; 28 inches deep; substructure, Cox Bros contractors; superstructure, Keystone Bridge Company; viaduct begun, October 15, 1875; completed, August 25, 1876; total cost, $102,173.99.

On September 5, 1876, Wisconsin-avenue viaduct, over the tracks of the Chicago & North-Western, Chicago, Milwaukee & St. Paul and Pittsburgh, Chicago & St. Louis railway companies; width of roadway on Milwaukee avenue, 42 feet; two sidewalks, 8½ feet wide; on Desplaines street, roadway, 48 feet wide, two sidewalks, 8½ feet wide. On Milwaukee avenue, one span 94 feet long, one 71, and one 60½; two roadways, 36 feet wide. On Desplaines street, one truss span, 71 feet; two spans, 42 feet; two roadways, 21 feet. The south part was built by the American Bridge Company, and the north part by the Leighton Bridge Company. This viaduct was opened for travel May 25, 1876, and was the largest and most expensive in the city, costing $1,469,371.55.

The year ending December 31, 1877, there were sixteen viaducts in the city, all of iron except two, and costing $615,339.55. There were thirty-two draw or pivot bridges in use, all iron or combination except two. Four new bridges were built during the year, as follows:

Fuller Street, to replace one destroyed by storm, a combination draw or pivot structure; completed August 4, 1877, at a cost of $4,210; swing and turn-table, by G. W. James, contractor; length, 127 feet; roadway, 10.5 feet; width over all, 19.5 feet.

North Avenue, combination swing bridge and turn-table; Conos, Starke & Co. contractors; begun, August 25, 1877; completed in January 1878; cost, $17,495; length, 150 feet; roadway, 17 feet; sidewalk, 4 feet; width over all, 29 feet.

North Halsted Street, new combination and turn-table swing bridge; W. T. Howard, contractor; begun, June 22, 1877; completed October 8, 1877; cost, $2,100; length, 150 feet; roadway, 17 feet; width over all, 20 feet.

This year also saw the final completion of the Harrison-street structure, which was delayed by land-condemnation cases. This litigation being adjusted, work was pushed on the bridge, which was a wrought-iron and turn-table swing bridge.

The American Bridge Company, who were the contractors, began work June 22, 1876, and completed the bridge October 23, 1877. It is 175 feet long; roadway, 19 feet; sidewalks, 4.10 feet; width over all, 31 feet; cost, $41,345.51. The repair account of the Department for the year amounted to $20,322.14.

In 1878, the repair account amounted to $19,017.67, of which $2,585.33 was on viaducts. On May 10, proposals were received.
In 1882, the repair account was $67,353.93. On July 25, the Folk-street viaduct was begun, the contractors being the Central Bridge Company. It had two spans, and was 173 by 22 feet, with two sidewalks 15 feet wide. The structure carried a moving load of 3,000 pounds to the lineal foot of the bridge, in addition to a dead load of 13 tons. The tresses were 22 feet, and the weight per lineal foot 3,490 pounds. Its total cost was $115,009.49, the expense being paid entirely by the Chicago, Burlington & Quincy Railway Company.

In 1883, the bridge repairs aggregated $64,970.01. A new bridge was built this year over the West Fork of the river, at Ashland Avenue, with a span of 160 feet, and one roadway 20 feet wide, the contractors being the Detroit Bridge Works, and the cost $10,500. On November 22, the schooners "Granger" and "Aug. Parker," and the steam-larger "Hustice," colliding at Rush-street bridge while the structure was swung on the center protection, a center post was displaced and the bridge broken in two. On September 28, the schooner "David Vance" struck the west abutment of Adams-street bridge, and carried away the east span of the viaduct and a portion of the bridge.

The expense for repairs to bridges in 1884 was $53,344.54; for structure and bridges and viaducts, $90,583.10. During this year was begun the construction of the Rush-street bridge, the largest swing-bridge known, 240 by 59 feet, supporting a weight of 657 tons. In July a formal test was made by experts, and the new steam machinery was approved. The south approach piled in during the erection of the structure, the pressure of the earth also carrying down a small brick building. The cost of the bridge was $155,019.55.

The viaduct over the tracks of the Chicago & North-Western Railway at Halsted Street and Chicago Avenue, begun November 26, 1883, was completed November 23, 1884, the cost, exclusive of land damages, being $285,534.41, of which the railway company paid $135.506.50. The Centre-avenue viaduct, over the tracks of the Chicago & North-Western and Chicago, Burlington & Quincy railways, begun March 18, was completed December 13. It was a superstructure of four spans, 209 by 58 feet, the weight of the iron work being 604 tons, and cost exclusive of land, $152,730.12, of which the Chicago & North-Western Railway paid $109,586.00, and the Chicago, Burlington & Quincy Railway $42,144.12. The total length of bridge approaches in substructure was 7,353 feet, of which 6,005 feet consisted of masonry. The total length of iron work in substructure was 1,704 feet, and the weight 1,124,000 pounds. The city paid $260,005.29 of the cost of this viaduct and the railroad companies $207,672.13. A new viaduct was also begun at Erie Street, extending west from the river, 450 by 38 feet, to cost $465,778.

The following bridges were in operation in 1884:

Three years after he removed to Chicago, and, in May, 1879, was appointed commissioner of public buildings, Mr. Kirkland's first wife, Jane Hewittson, died in 1847. In 1855, he married Miss Eliza Maria Kirkland, a second cousin. His two sons by his first wife are R. B. Kirkland, for four years district attorney of Jefferson County, and who has just formed a partnership with Congressman James H. Ward; and James K., the assistant manager of the machine shops of the Grand Trunk Railroad, at Port Huron, Mich. Jeanette Law, daughter by the present marriage, is the wife of William Edgar, secretary of the Building Department. At present Mr. Kirkland is not connected with any secret society in this city, but while a resident of Scotland was a prominent member of the Masonic fraternity, and postmaster of the shipping lodge. He has been a member of the St. Andrew's Society since his arrival here, is an active worker in that body, and has three times been its president.

**WATER DEPARTMENT.**

The fire of October 9 reached the Chicago pumping works at 3 o'clock Monday morning, and the sides of the old records, the walls of that structure were but slightly injured, the roof, floors, and other parts of the building were entirely destroyed. The water-tower was unharmed and the machinery only slightly damaged. The loss on the buildings and machinery was $75,000. The machine-shop, a substantial brick structure, 50 x 120 feet, was almost a total loss. The damage to the North and South division reservoirs amounted to $20,000, and their use was permanently discontinued. Some 5,000 water service pipes were melted and damaged, and a serious loss of water ensued. Great trouble was caused by debris covering the supply pipes and by the loss of water books.

The repairs to hydrants in the burned district aggregated $10,000, and 370 water meters were repaired and reset at a cost of $6,000. On account of the immense amount of water, the amount pumped for six months ending April 1, 1872, was larger than at any other corresponding period in the history of the city, this loss of water costing the city $237,410. A set of water maps, showing the location of water mains, and the drawing of the details of the construction of the lake tunnel, were
CORPORATE HISTORY.

destroyed. This latter, a record of one of the most important works ever undertaken by the city, received a prize medal at the Paris exposition of 1867. Numerous other papers and records in the engineer's office were burned, only a portion of some plat books being saved.

The entire loss at the works was $248,910.

During 1871, no considerable amount of improvements were made, attention being mainly directed to the forwarding of work already commenced, and the repairing of the fire damage. The injunction suit, which had stayed the commencement of the new lake tunnel for eighteen months, was decided in favor of the city, and Steel & McMahon were awarded the contract for this work, which they commenced on July 12, 1872, with a limit for its completion fixed at July 1, 1874.

The old tunnel of 1867 needed no repair, but the water works machine-shop was re-constructed as before. The engine of 1867 was put in operation October 17, that of 1857, November 10, and that of 1853, November 30; but being insufficient, in their operation, to the augmented needs of the city, a new engine was procured. This was put in place, except the setting of the boilers and the perfecting of the water and steam connections. Its adoption was found necessary immediately after the fire, the old engine, despite the fact that several cottages near the river, private wells and artificial lakes had supplied some of the demand, forcing only a medium head of water.

In 1871-72 the quantity of water delivered was 8,423,890,666 gallons, being an increase of 407,206,120 gallons over the previous year. There were 91,129 feet of pipes laid, costing $316,165.19, making 287 miles and 3,587 feet then laid, 3,155,146-2000 tons of pipe being purchased; 115 fire hydrants were erected, making a total in use of 1,667, and 3,187 taps were made. The receipts from all water assessments and taxes were $145,531.64; total income to April 1, 1872, $1,477,410.32. The total cost of additions to the works for the year was $452,719.20, the State appropriating funds for the January interest on the bonded debt. To the date named, including work then in progress, the total expenses of the water works were $4,718,615.18; paid for by 6 per cent. bonds, $8,030,000; 7 per cent., $3,790,000; making $4,820,000 less discount and cash, $935,517.88; amount of one mill tax of 1871, $280,746.47; balance from water rents, $56,386.59. The cost of delivering water in 1872, per million gallons, was $12.02.

During 1872, the Board of Public Works purchased a lot of ground on Canal A, at the intersection of Ashland and Blue Island avenues, containing 153,792 square feet, upon which it was designed to erect a new pumping works to supply the southwestern portion of the city. The new water-tunnel running to the crib, and thence by a land tunnel across the city, was to supply these works, and on this tunnel work was commenced on the shore end July 12, 1872, at the crib end October 2. The new engine at the water works, designed by Chief-Engineer Cregier, and constructed by the Knapp Fort Pitt Foundry Works, was completed and started to supply water to the city through a 30-inch main pipe on November 27, 1872. This engine completed the mechanical equipment of the works most perfectly. Its steam cylinders, 70 inches in diameter, had a 10-foot stroke, and rested upon plates supported by four 9-inch columns extending from lower plates, and the working beams were 28 feet, of cast iron, and weighed 20 tons each. The main columns were 24 feet 7½ inches from base of pedestal to top of cap, and weighed 17 tons each, serving as air vessels, and connected with the check-valve chambers. A 50-inch pipe, the water-pumps having a diameter of 57 inches, and a 10-foot stroke. The upper bed plate was 59 feet, 3½ inches long, weighing 18 tons, the crank end resting on stone foundations, and the fly wheel was 25 feet in diameter and weighed 40 tons. There were three boilers, each 20 feet long, 12 feet in diameter and having sixty-six 5½ inch tubes. This splendid engine—which, with the boilers, cost $188,400—has proven its value and utility since being put in place, in 1873-74 pumping 58 per cent. of all the water delivered in the city, and during its first six and one-half months' operations, with two and one-half million revolutions, pumping 6,448,000,000 gallons.

By 1873, a long line of water improvements had been consummated, among them the completion of a new water tunnel on May 19, it having been commenced on January 15, and costing $13,279.70. This was under the river near Rush-street bridge. Two shafts, one 84 feet, at Michigan Avenue, and one of 68 feet, at Pine Street, were also sunk, to form a four hundred and ninety-two feet drift. The old pipes were broken, and this tunnel was increased in dimensions, shafts 8 feet, tunnel proper 6 feet in internal diameter, costing $13,279.70.

In July, 1873, the Department ordered the commencement of the land extension of the new lake-tunnel across the city to the West pumping works. Working shafts were sunk at Illinois, Kinzie, Polk and Van Buren streets, and the fire shafts at Erie, Kinzie, Kinzie Market and Taylor streets. The tunnel of 1867 had a capacity of 50,000,000 gallons, and cost to construct $157,844.95. The new one, with which the land extensions noted connected, had double this capacity, although its cost was only $100,000. On July 7, 1874, the land and water structures were both completed, and water turned in the water-tunnel, which cost $411,510.16 and the land extension $54,500. On October 26, of the same year, Murphy & Co., Quintard Iron Works, contracted to supply the two pumping engines for the West Division pumping works designed to cost $243,500, and to have a capacity of raising 30,000,000 U. S. gallons 155 feet high every 24 hours. The new crib structure was completed and telegraph cables extended through the tunnel to the same from the new pumping works. After the completion of the West Division pumping works, two new engines were added at that place, making ten engines in operation, with a combined capacity of 130,000,000 gallons daily. By 1884, the water system of the city had attained a marvelous perfection and utility.

For that year the total water delivered reached 29,286,554,465 gallons, a daily average of 80,017,900 gallons, or about 9.52-ton per cent. above the average of 1873. The cost of delivery was $187,967.46, average cost per million gallons $6.40-90.00. There were in use, of water pipes of 4 to 36 inches diameter, 253½ miles; total number of valves, 4,022; fire hydrants, 1,616; fire cisterns, 26; new house-service taps, 92,133; water meters, 2,585; water motors, 144. Of the water produced at a cost during 1874 of $202,564.27, the North pumping works supplied 15,605,560,785 gallons, with six engines, expense $183,232.07, and the West pumping works, four engines, 13,680,933,650 gallons, at a cost of $60,334.20. The water works receipts were $1,184,041.26, and the total expenditures, $1,182,244.15. Up to December 31, 1874, the total cost of the water works of the city was $10,099,632.70, of which amount only $1,029,160.21 was expended previous to 1861, when the works were transferred from the water commissioners to the Board of Public Works. The total revenue from water rents up to 1885, has been $15,530,071.67, the operating expenses and maintenance, including interest ($5,307,008.52) on bonded debt, and bonds cancelled being sold $11,878,555.40, the total surplus over expenses, $4,651,516.21. The amount of water furnished up to 1874 was 43,554,000,000 gallons, revenue $3,425,024.12, average revenue per million gallons, $74.1; 7½.

The following table shows the amount of water furnished and revenue received, year by year, since that time:
internal diameter and 167 feet high, with a 30-inch branch pipe leading to the discharge masts of the engines. S. G. Artingstall designed the engine and boiler houses and the tower, Earnshaw & Gobel did the masonry work, Gindrele Brothers the cut-stone work, and the American Bridge Company the iron work. There were six boilers, 7 feet long, with 64 and one-half inch tubes in each boiler. In 1876, the extension to these works was projected, and was completed for regular service in July, 1884, the machinery being similar to that used in the main structure, at a cost of $257,500; the total being $721,681.01. The repairs to engines and boilers for eight years, ending with 1884, has been $9,640.17.

In 1884, these pumping works delivered 37,926,648 gallons per day, under a head of 90.5 feet, and at an expenditure of $69,354.20. The number of gallons pumped since the works were started, and cost of same, are given in the following table:

* The daily consumption of water per capita, in 1884, averaged nearly 114 gallons. There were in use at the end of that year, of 36-inch diameter pipe, 41,174 feet; 30-inch, 59; 25-inch, 160; 24-inch, 80,230; 16-inch, 65,143; 12-inch, 185,604; 10-inch, 3,012; 8-inch, 570,149; 6-inch, 1,176,397; 4-inch, 750,355; 3-inch, 15,637; total 2,868,962 feet or $43,192,520 miles.

On July 10, 1874, the Board of Public Works advertised for two pumping engines, with boilers capable of working separately or connected, with a capacity each of delivering fifteen million United States gallons of water daily, that were to lift above the surface of the water in the well 155 feet, and to consume not more than 100 pounds of coal per ninety million pounds of water raised one foot high. They were to be completed by October 1, 1875, and to be removed if they failed in any of the requirements made. These engines were designed for use at the West pumping works on Ashland Avenue, and the stringency of the terms to bidders was severely criticised at the time. The Quintard Iron Works, however, performed the work with A. A. Wilson as designing engineer and Henry Mason as superintendent of construction. The engines and boilers cost $243,500. The foundations for the engines and buildings were built by William D. Cox, with William Bryson as engineer in charge. These foundations included a weir well, supply and dry well, the land-tunnel being connected with the semi-circular weir well, 26 feet in diameter, by a branch tunnel 7 feet in diameter. The supply-well was 44 feet long and 10 feet wide. The foundation was built of large-sized blocks of stone, and the engine and boiler-houses were constructed of brick, with pressed brick and stone trimmings on front. The engine room was 100 x 66 feet, the tower 190 feet high, and the stand-pipe in the tower was five feet high.

Hermann Lieb, formerly superintendent of the Water Department, was born in the canton of Turgis, Switzerland, on May 24, 1826. From the year 1845 until the revolution of 1848, in company with his elder brother, he followed mercantile pursuits in Paris, France. Entering the "Garde Mobile," after the eventful days of February, 1848, he took part in all the fierce conflicts which raged in the streets of the capital. Coming to America in 1851, he engaged in business in New York, afterward moving to Boston, and, in 1854, to Cincinnati. In 1856, Mr. Lieb located at Deserter, Ill. On April 15, 1861, two days after the bombardment of Fort Sumter, he enlisted as a private in what was subsequently Co. B, 8th Illinois Infantry, under General Richard J. Oglesby. In July of the same year he was chosen captain of the company, serving in such capacity in the battles of Fort Donelson and Shiloh and the siege of Corinth. In the fall of 1862 he became major of the regiment, and accompanied Logan's Division to Nashville, where he was placed in charge of the skirmishers. At the battle of Milliken's Bend he received a painful wound in the leg, and obtained a month's leave of absence. Returning to his command, under orders from General Computer he raised a colored regiment of heavy artillery, whose subsequent record was of the best. He was afterward appointed inspector-general of the Department of the Mississippi, and was brevetted brigadier-general. At the close of the War General Lieb went to Springfield, where he founded the "Illinois Post," removing to Chicago in 1868, in partnership with Lorenzo Brenzano he started the "Abend Zeitung." Selling his interest in that paper in 1870, he went to Mississippi with the intention of making his home in the South. His German colonization scheme, however, proved premature, and failed. General Lieb came again to Chicago and founded the "German American." Subsequently he purchased the "Union," a German democratic paper, which, as the "Chicago Demokrat," is still published. In 1873, he was elected county clerk on the people's ticket, being succeeded in November, 1877, by E. F. C. Klocke. He assumed charge of the Water Department in August, 1879, and resigned therefrom, on account of political pressure, in 1885, leaving a most honorable record for rectitude throughout his public service. General Lieb was married to Miss Sarah Stevens, of Auburn, Maine, on December 2, 1869.

Sewage System.—The Sewerage Department sustained a loss of $14,000 by the great fire, mainly con-
fined to injury to catch-basins and man-hole covers. This amount also includes the cleansing of sewers and basins of debris that accumulated during the conflagration.

The improvements of 1871 embraced 78,166 feet of sewer laid, and an expenditure of $373,640. Up to April 1, 1872, there had been built—sewers in the South Division, 274,701 feet; West Division, 365,426; North Division, 210,751 feet; or over 331 miles of sewers. Up to 1884, the showing of the Department was as follows: West Division, 224,356; South Division, 118,973; and North Division, 96,201; of which 222,840 feet were of brick and 101,534 feet of vitrified pipe. The cost of construction aggregated $6,375,592.20. The total value of the outstanding bonds was $3,622,500, and total interest paid from the beginning of operations up to 1885, $4,104,672. By years, the showing of total cost of sewers and catch-basins, since 1870, is as follows:

</table>

Of the different sewers in place in 1884, there were of nine feet in diameter, 13,470 feet; eight feet, 2,492; seven feet, 1,406; six and one-half feet, 3,512; six feet, 23,355; five and one-half feet, 9,511; five feet, 72,999; four and one-half feet, 79,601; four feet, 101,540; three and one-half feet, 41,601; three and one-quarter feet, 665; three feet, 85,779; two and one-half feet, 142,028; two and one-quarter feet, 6,359; two feet, 585,005; twenty-inch, 1,625; eighteen-inch, 40,703; fifteen-inch, 156,791; twelve-inch, 312,122. By wards, the public sewers were divided as follows: First Ward, 80,509 feet; Second Ward, 54,608; Third Ward, 73,462; Fourth Ward, 154,607; Fifth Ward, 224,936; Sixth Ward, 197,096; Seventh Ward, 43,072; Eighth Ward, 105,421; Ninth Ward, 64,655; Tenth Ward, 53,602; Eleventh Ward, 63,633; Twelfth Ward, 63,793; Thirteenth Ward, 105,598; Fourteenth Ward, 226,830; Fifteenth Ward, 154,863; Sixteenth Ward, 75,956; Seventeenth Ward, 64,655; Eighteenth Ward, 107,308.

The Gordion Knot.—The great problems ought to be solved in connection with the sewerage system of the City of Chicago, was the cleansing of the bed of the Chicago River of sewage sediments and local impurities, without having the poisonous deposits washed out through the mouth of the river into the lake, and possibly contaminating the public water supply, which is taken from the bottom of the lake, three miles distant from the shore. To this end, all operations have had in view the cleansing of the natural current of the South Branch of the river so that it shall set down the Illinois & Michigan Canal instead of flowing toward the lake; and continuing the waters of the North Branch past its junction with the main river down to the canal outlet. For this purpose immense pumping-works have been erected at Fullerton Avenue, on the North Branch, intended to force water from a lake tunnel into the river basin, thereby creating a strong current to the south; and twin pumping-works have been erected in Bridgeport, at the entrance of the canal, on the West Branch of the river, which takes the polluted water from the river and pours it into the supplementary basin of the canal, thus creating a vacuum in the river and inducing a strong current in a southerly and westerly direction.

The operations of the dual pumping-works have been measurably successful, and are understood, perhaps, for ordinary seasons; but whenever a freshet sets in, it is invariably the case that the country on the line of the Desplaines River, from Chicago city line all along the river valley, from twelve to twenty miles distant, is entirely submerged, the water often covering an area of twenty or thirty square miles. In the vicinity of Twenty-second Street, during a heavy freshet, the water in the West Branch of the river not infrequently rises six or eight feet, while in the basin of the main river, north of Van Buren Street, the rise is generally from eighteen inches to two feet. During the prevalence of a freshet, and often continuing two or three days, not less than 150,000 cubic feet of water a minute empty from the Desplaines River into the West Branch of the Chicago River. The flow of water from the Desplaines is much greater now than in former years, primarily because of the clearing up and ditching of swampy lands and acres of marshy country, that for years had been covered with thick underbrush; the removal of these natural obstructions affording the periodic rains uninterrupted course, so that a fall of rain which formerly was days in finding its way to the city, now sweeps in upon it in a flood in the course of a few hours.

But the principal cause of the great influx of water is the existence of the so-called Ogden Ditch, an excavation dredged by the late William B. Ogden, in 1868, through his lands across twelve miles west of the city, for the purpose of draining the large area of the Desplaines valley, some twelve or fifteen square miles, which, previous to his excavation, was submerged nearly the entire year. The Ogden Ditch, or Canal, is twenty-five or thirty feet wide, and extends through Mud Lake, in a northerly direction, about two hundred feet; then makes a sharp right-angular turn to the east, and continues some three hundred feet, forming a junction with, and emptying into, the West Fork of the Chicago River. During the season of the floods, the Ogden Ditch overflows its banks, receiving drainage and surface water beyond its capacity for discharge. To offset the trouble, and regulate the disturbances created in part by the Ogden Canal and in part by the rapid flow of surface and drainage water, the city constructed, in 1874, on land acquired from Mr. Ogden, a rude dam of piling, on which was spiked heavy planks, and filled with earthwork to a sufficient depth to withstand the force of water. The top of this dam was on a level with the adjoining lands, and was built across the east arm of the Desplaines, and parallel with the north angle of the Ogden Canal, and served to wall out, to some extent, the waters of the big ditch, the flood of the Desplaines River, and the surface water from the Desplaines valley on the west and south.

This dam has been of good service, and has accomplished all that was expected of it; but at the same time it has been, from the first, a bone of contention, and has stirred up the ire and provoked the animosity of the neighboring property owners, who wished their lands flooded in the fall and winter, that they might reap abundant crops of ice for commercial purposes, and who again desired their lands drained in the spring and summer, for the successful pursuit of agriculture. It was their custom for a number of years, therefore, when the spring rains commenced to descend, and there was a reasonable prospect of a freshet, to repair to the dam with axes and other aggressive implements, knock the planking from the piles, tear up the earth-
works, and permit the water to have free course into the West Fork of the Chicago River; then, in the fall, before the wet season set in, to again fill in the earth on the dam, replace the planks on the piles, and permit the land to be flooded through the winter, thus insuring for themselves an abundant harvest of ice. In 1885, the city put a stop to these practices, by constructing a new and permanent dam on the site of the original works, excavating to proper depth, laying a solid masonry foundation, and building up the façade of the dam with heavy blocks of stone; then filling in with rip-rap material and gravel to the width of twenty-five feet, sloping down to the water's edge, and constructing a solid roadway over the dam, completing a wall and much destruction, and making the city liable for extensive damages.

The Desplaines River is decidedly mercurial in its tendencies, being down to-day and up to-morrow. It will this week be nearly dry, so as to be fordable at many points, and a week later will be so swollen with rains and freshets as to overflow its banks and sweep everything before it. The early settlers of Illinois were accustomed to float down the Desplaines, from points fifty to seventy-five miles up the river, boating it where the depth of water would permit, and dragging or carrying their boats through shoals and over dry places.

Notwithstanding the existence of the city dam, it was found by actual measurement, that, during the approaches which can not be readily thrown down or penetrated.

Another cause for the great rush of waters in this locality, is found in the fact that the State, in 1871, purchased a strip of land thirty-three feet wide, about a mile west and parallel with the city dam, and constructed thereon a public roadway of stone, six feet high, through the low and swampy region, thus damming in the water on the south, which has no egress save by one small watercourse.

The city acquired of Mr. Ogden the perpetual right to maintain the dam it located, and has the privilege of extending it south to where the Ogden possessions adjoin the land of Hon. John Wentworth, which it will soon be necessary to do. But beyond the Ogden line the city can not go, Mr. Wentworth absolutely refusing to sell, or to permit the dam to be built across his land to the banks of the Chicago River, some three hundred feet further south. As the city dam is raised only to the height of the adjoining land, which has always been a swampy district, submerged most of the year, it does not encroach upon property rights. The dam, however, would be far more efficacious if it could be raised a foot or eighteen inches; but in doing so the country to the west would be inundated for miles beyond the present outflow, and probably as far as Joliet, entailing a freshet of April 20–22, 1885, the Desplaines River was so swollen that 123,757 cubic feet of water a minute found its way over the top of the dam, through the West Fork, into the Chicago River; while the volume of water coming down the North Branch of the Chicago River, derived wholly from the watershed of the northwest section, was 26,467 cubic feet a minute, causing a rise in the main river of nearly two feet; a portion of the water flowing east into the lake, and a smaller portion flowing south into the canal. Yet this fall of water was only about one-half the quantity which usually enters the city during the height of the flood season.

The practical operation of the river sewerage is this: In the dry season, when the river and lake are low, and the water in the river is at a stand-still or sluggish, the machinery of the Fullerton-avenue pumping works, which forces water from the lake tunnel into the river, or reciprocally from the river into the lake, is utilized to swell the volume of water in the North Branch of the Chicago River, and creates a strong southerly current; while at the same time the pumping works at the head of the canal, at Bridgeport, acting in correspondence, lifts the black, dirty water out of the West Branch of the river and empties it into the supplementary canal basin, thus creating a vacuum in the river, and inducing
a current from the north. The water in the canal, which is usually raised from six to twelve inches in consequence of the water pumped into it, is prevented from flowing back into the river and buffeting the southerly current, by a lock, built in the canal in 1884. The lock is constructed of timber, the walls being crib-work, composed of 2 x 8-inch plank, laid flat, one on top of the other, spiked together and filled with broken stones. The lock chamber is two hundred and forty feet long between the gates, and nineteen feet wide. The floor is formed of 10 x 12-inch sleepers, bedded in the ground, and covered with two thicknesses of two-inch plank. Outside the lock are waste-gates, thirty-eight feet high.

**SECTION OF CANAL PUMPING WORKS.**

**PUMPING-WORKS AT BRIDGEPORT.**

Frequently, during the prevalence of strong easterly gales, the water in the lake rises from eighteen inches to two feet, and, flowing into the mouth of the river, raises it from twelve to eighteen inches, creating a strong southerly current down the South and West branches of the river, and also up the North Branch toward the Fullerton-avenue pumping works. At such times, pumping operations are suspended at the Bridgeport works, the lock of the canal is thrown open, and the entire volume of water in the river, with the sewage, filth and sediment, is washed down the canal, and its place occupied by pure lake water, while the filthy river water, forced up the North Branch, is pumped through the conduit into the Lake. When the North and West pumping-works are acting in correspondence, the Fullerton-avenue pumping-works deliver from the lake into the North Branch of the river 24,000 cubic feet of water a minute, while simultaneously the Bridgeport pumping works remove 60,000 cubic feet of water per minute from the West Branch, and deliver into the canal basin, the reciprocal action creating a strong and effective current at all times, save when the river is swollen by a freshet and general inundation. At such times, every effort of engineering skill and mechanical invention has thus far proved inadequate to cope with the action of the refractory elements, and the entire body of water in the main channel of the river and its several branches and tributaries is swept into the lake.

Although the capacity of the canal which drains the West Branch of the river is comparatively small, and the current consequently moderate, still the volume of water carried off daily is by no means inconsiderable. The mean velocity of water entering the canal is 0.9 inches a second, the height of the water being eight-tenths of a foot above city datum, and the area of the cross-section of the canal 381.1 square feet showing that the amount of water passing into the canal is 219.13 cubic feet a second, or 18,932,832 cubic feet every twenty-four hours.

In order to give an idea of the extent to which the Chicago River serves as a common sewer, it may be stated that 7,097.33 surface acres drain into it, from ninety sewer-discharge openings, the area of these terminal openings aggregating 921.81 square feet. In addition, 1,276.43 acres in the South Division of the city drain directly into the lake. The water of the North Branch, from the rolling-mill south, is usually highly discolored, with a perceptible odor; of the main river, nearly free from deleterious matter, with little odor; of the South Branch, highly discolored, with considerable odor; of the West Fork of the South Branch, nearly pure, with no perceptible odor; of the South Fork of the South Branch, extremely foul, charged with decomposing animal and vegetable matter, and odor very offensive.

While the highest engineering skill obtainable has been brought to bear on the question of the disposal of the public sewage of Chicago, and while money has been spent lavishly in building the most improved machinery for rendering the river an available and efficient agent for this purpose, it must be conceded that thus far only indifferent results have been attained; and as the population of Chicago shall double and quadruple, it will be found imperatively necessary to push to a successful solution this perplexing problem.

The Fullerton-avenue Conduit, which was completed and put in operation January 9, 1880, is a brick tunnel,
circular in section, and twelve feet in internal diameter. It is 11,898 feet long from the lake shaft to the North Branch of the Chicago River, 4,276 feet at the bottom, from the River to Racine Avenue, being level and 13 feet below city datum; while east of Racine Avenue is a vertical reverse curve connecting the upper and lower grades, which at this point is 27 3/4 feet below datum. Thence the conduit continues by a series of descending grades to the lake-shore shaft, where it is 54 1/2 feet below datum, the grade from this point to the lake shaft, a distance of 1,000 feet, being level. The west end of the conduit excavation was an open cut, while from Racine Avenue eastward it was tunnelled. The upper part of the lake-shaft is a cast-iron cylinder, 1 3/4 inches thick and 24 feet long, lined with brick, and having an internal diameter of 12 feet, the dimensions of the shaft below the cylinder being the same. The top of the cylinder is 4 3/4 feet below city datum, and is located in a wooden chamber 34 by 18 feet inside, with openings on the east side into the lake, which are fitted with gates, to be closed only when the cover is on the shaft, and to prevent its being lifted or damaged by the violence of the waves. At this end the water is shut off from the conduit by a conical cover of boiler-plate iron, on the lower end of which is a strong inclined flange fitting on a corresponding flange cast on the top of the shaft, with a packing of rubber tubing between the two flanges, rendering the joint water-tight. The cover projects above the water, and an opening permits access to the shaft, which is protected from the turbulence of the lake by a pier of pile-work, securely braced together, filled to the water level with loose stones, and built so as to offer the least resistance to ice and storms. On the pier and over the shaft is a house, fitted with a winch for raising or lowering the cover of the shaft. The shafts at the lake shore (Larrabee Street and Sheffield Avenue) are twelve feet internal diameter, while at each street intersection are shafts of six feet internal diameter. All shafts are carried up to the level of the street, are so arranged as to form ready connections with the sewerage system, and are domed over, with openings on the top for access, provided with strong covers and with ladder-irons.

At the river end, where the machinery is located, the conduit forms two semi-circular channels, passing on each side of a wrought-iron chamber, where the two channels are re-united, forming one channel of size and section uniform with the main conduit, and continuing to the outlet at the river, where it is protected by a heavy masonry dock wall, in which is placed a series of iron rods, to guard against floating debris entering the tunnel and obstructing the wheels when the current is from the river to the lake. The water is forced through the conduit by means of two screws similar to those of an ordinary propeller, one fixed at either end of a horizontal shaft forty feet in length and placed in the center line of the conduit, passing through a boat-shaped iron chamber, ten feet in its greatest diameter. The shaft and screws are operated by two single-cylinder condensing engines, having cylinders twenty inches in diameter and thirty-inch stroke, with side-valves, cut-off motion, and reversing-gear, permitting the engines, which are placed on top of the chamber, to run either way, reciprocally. The driving-shaft is eight inches in diameter, and the engines are coupled to the middle or crook-sections by connecting-rods sixteen feet long, this section carrying also eccentrics for working the valves. The screws are four-bladed, six feet and seven inches in diameter, with a pitch of eight feet, the blades being twelve inches in width. The total area of the four blades of each screw is equal to one-half the total area of a complete turn of the helicoid.

There are three cylindrical boilers, sixteen feet long and sixty-six inches in diameter, with forty five-inch longitudinal tubes in each boiler. The boilers have thirty square feet of grate surface each, and, one thousand square feet of heating surface, and are connected with a brick chimney three feet nine inches square inside and one hundred feet high. The boilers are calculated to stand a pressure of eighty pounds to the square inch, and the engines to work at a rate of one hundred and twenty-five revolutions a minute. The size and form of the screws are novel and without precedent, a propelling wheel having never before been used for the purpose of forcing water in a confined channel; but it has been found to work satisfactorily, and to perform the duty required of it with the greatest economy. With one hundred revolutions of the screw, a head of four feet is maintained in the line of the conduit, a force sufficient to deliver twenty-four thousand cubic feet of water a minute.

Careful observations, with experiments continually being made through two days, gave results embraced in the accompanying table, which shows the velocity of water in the conduit, measured at different positions with an electric current meter. Diameter of the conduit, twelve feet;
length, eight thousand nine hundred feet between stations; obstructions to flow, sixteen shafts of six feet diameter, two shafts of two feet diameter, two bands of forty-five feet radius; angle, thirty degrees.

During 1884, the pumps delivered the water mainly from the river into the lake, 5,175,000,000 feet being forced in that direction, as against 1,238,000,000 feet from the lake into the river.

The cost of operating the works during the year was $20,246.63. The effect of pumping from the lake into the river was unsatisfactory, the water in the North Branch quickly becoming foul, and fermenting, in the main river, in three or four days, during the summer solstice, becoming very offensive, even while the pumps in the South Branch were in operation.

The propellers were operated almost continuously during 1885, usually with sixty revolutions per minute (about half their capacity), with about the same result as in previous years, excepting that the volume of water passing through the conduit was poured into the river, instead of being emptied from the river into the lake. Early in the year, the frame-house over the lake-terminus of the conduit was burned, the debris falling into the mouth of the conduit. The smaller pieces of timber from time to time passed through the conduit and wheels without detriment, but in the summer, a shock was sustained by the machinery, and it was found that a solid oak timber, four feet long and twelve inches square, had wormed its way through the blades of both screws without occasioning any perceptible damage. In November, a second timber, five feet long and a foot square, presented itself to the propeller wheel, stripping the four blades from the first wheel and two blades from the other wheel. This necessitated the shutting-down of the works for two weeks. The influx and efflux gates were closed, a diver was sent into the conduit to remove the timber, the water chamber was pumped out, and new wheels were substituted for those broken.

The following tables show the details of the operation of engines and boilers for three years:

| Year 1882 |
|------------------|------------------|------------------|------------------|
| Months. | Number of hours run. | Total revolutions. | Average revolutions per hour. | Total number of cubic feet of water pumped into the river. | Total number of cubic feet of water pumped through the river. |
| January | 657,000 | 3,132,220 | 81.0 | 459,240,270 |
| February | 655,000 | 3,041,957 | 50.5 | 414,007,110 |
| March | 710,000 | 3,599,794 | 83.5 | 531,373,240 |
| April | 700,000 | 3,054,031 | 53.5 | 423,455,000 |
| May | 817,000 | 411,276 | 54.9 | 58,072,530 |
| June | 156,000 | 696,504 | 74.4 | 141,527,700 |
| July | 610,000 | 2,020,073 | 33.8 | 334,566,000 |
| August | 726,000 | 3,415,856 | 75.5 | 709,212,220 |
| September | 652,000 | 3,071,680 | 78.2 | 63,497,390 |
| October | 728,000 | 3,422,612 | 78.8 | 710,753,400 |
| November | 701,000 | 3,286,154 | 78.1 | 676,325,870 |
| December | 721,000 | 3,372,876 | 77.0 | 679,720,020 |
| Totals | 7,093,000 | 33,956,418 | 1,844,864,750 | 4,323,022,890 |

</table>

It is interesting to note that the current through the conduit is induced with the same power when discharging into the river as when discharging into the lake. It has been demonstrated that, in pumping lakeward, the machinery does not actually displace and force before it the volume of water contained in a mile of conduit of twelve-feet diameter, but that, instead, a whirling or screw-like motion is given to the water in the conduit, which obtains an eddying current through its entire length, similar to the motion given to a conical shot discharged from a rifled musket. So strong does this current become, that if the engines of the pumping works are shut off, the propeller screws in the chamber of the conduit continue in motion several minutes.

The original cost of these works was $356,253.99. During May and June, 1882, new wheels, eight feet in diameter, were put in the conduit, materially increasing both the power and efficiency of the works.

besides improving canal navigation. The cost of operating the works during the year was $325,547.78. The operation of the pumps had no effect on the water in the South Fork of the river, extending from the pumping works on South Street, which is a great cross-pool for the accumulations of refuse matter from the Stock Yards’ slaughter-houses. This putrid stream is a nuisance, detrimental alike to the section through which it passes and to the city at large, and no effectual plan has yet been devised for cleansing it. The pumps have discharged the full volume of water that could be carried away by the canal without overflowing its banks, the quantity being about forty thousand cubic feet a minute, or about two-thirds the capacity of the works.

Colonel Jacob Thomas Foster, civil engineer, was born on June 23, 1827, at Auburn, N. Y. He was educated at the Academy, where he was graduated in 1846. He spent the following year as a rodman on the New York Central Railroad, and about six months on the Erie Canal as assistant engineer. In the latter part of 1848 he went to Milwaukuee, Wis., and engaged as assistant engineer on the Lake Shore Railroad, from that city to Chicago, where he continued until its completion, about 1853. From there he went to Racine & Mississippi Railroad as assistant engineer, and later became its chief engineer, running the line from Racine to Delavan, Wis. He then engaged in the commission and lumber business at Delavan, Wis. In 1856, he was appointed chief assistant engineer of the Iowa Central Railroad, with main office at Lyons, Iowa, running the lines for this road from the Mississippi to the Missouri River. In 1858, he was employed as assistant engineer on the Southern Minnesota Railroad, and in 1859, became cashier of the Green Bay Bank at LaCrosse, Wis. He subsequently organized, under the militia laws of Wisconsin, a battery of light artillery, of which he was made the captain. On the fall of Fort Sumter, he at once resigned the services of himself and his battery to the Government, and the company was mustered into the United States service, at Racine, as the First Wisconsin Battery, with Captain Foster as its commander. While at Racine he organized a full regiment, of twelve light batteries, and was commissioned its colonel and Governor of the State; but finding that under existing orders from the War Department he could not be mustered in as colonel of artillery, he at once took the field with his own battery, with the rank of captain. He was ordered to Wellington, Ky., and from there, in the spring of 1862, he was sent to Cumberland Gap, being assigned to General G. W. Morgan’s Division of the Army of the Ohio. While General Braxton Bragg was investing Cumberland Gap, Captain Foster improvised from the Infantry a provisional siege-battery of four 30-pounder Parrott rifled guns, officered with temporary details from his own battery, which did excellent service. The soldiers of this Battery best know them by the name of “Hog Eye Battery.” About September 15, 1862, the Union forces fell back to Greenup, on the Ohio River. From there the troops, with Captain Foster’s battery, moved up to the Ohio, and engaged the Confederates, forcing the enemy to evacuate the Ohio Valley. Going thence to Cincinnati, he turned in his armament of 10-pounder Parrott rifles, and received six 20-pounders, with which he went to the Mississippi to Young’s Point, opposite Vicksburg, being assigned to the 13th Army Corps. As chief of artillery, Captain Foster participated in the action at Chickasaw Bayou, about December 27, 1862, and in the capture of Arkansas Post. He returned to Young’s Point, and about April 1, 1863, was ordered to Milliken’s Bend. He participated in the fight at Port Gibson about May 1, 1863, and under General Grant, was in the actions at Richmond and Jackson, Miss., Champion Hills, and Black River Bridge. At the latter place he was wounded in the head with a piece of shell that destroyed the optic nerve of his right eye. He took part in the siege of Vicksburg, during which his battery threw eighteen thousand shells into the city. He was next ordered, with the 13th Army Corps, under Major-General Ord, to New Orleans, where he refitted with four 30-pounder Parrott rifles, as a siege battery. During the winter of 1863-64 he was stationed at Berwick’s Bay, relieving the spring in the New Orleans position, and later, exchanged for six 10-pounder 3-inch rifles, and his battery constituted a horse artillery (“flying”) battery. He accompanied Major-General Banks on his advance on the Red River expedition, returning to New Orleans upon its disastrous conclusion. In the celebration at New Orleans, on July 4, 1864, Captain Foster’s battery was post of honor—the head of the column—by General R. J. Arnold, chief of artillery for the department, because of the greatest precision, neat drill, discipline, military appearance, etc., the award being made after comparison with about thirty light batteries stationed in and about the city. Captain Foster was then given command of a Camp of Instruction for Artillery at Carrollton, La., and in August, 1864, was detailed as chief of artillery of the Department of the Gulf, being brevetted Second Lieutenant and mustering out, but was immediately commissioned lieutenant-colonel of the 1st Wisconsin Heavy Artillery, and ordered to Washington, where he remained, engaged in writing his report of service of his battery having expired, he was ordered to Madison, Wis., and mustered out, but was immediately commissioned lieutenant-colonel of the 1st Wisconsin Heavy Artillery, and ordered to Washington, where he remained, engaged in writing his report.

In the spring of 1874 he returned to Chicago, and was made chief engineer of the town of Lake, which he retained until August, 1875. In November, 1884, he was elected county surveyor of Cook County. Colonel Foster is a member of Englewood Lodge, A.F. & A.M.; of the Chapter, R.A.M. of Englewood; Apollo Commandery, No. 1, K.T.; Normal Lodge, No. 509, I.O.O.F.: Englewood Union Veteran Club; Chicago Union Veteran Club; and Lincoln Post, G. A. R., Department of Illinois. He was married in 1849 to Miss S. M. Page, of Ozaukee, Wis., who died in 1866. His Minn., in 1853. He was married in 1878 to Miss Sarah Genevieve, and Clark Harold. In 1869, he married Mrs. Annie Barber, at Brewerston, Ondela Co., N. Y.

**COMPTROLLER’S DEPARTMENT.**

In 1871, with a population of 306,665, the valuation of the real and personal property of the City of Chicago was $289,746,470, an increase of $13,759,620 over the preceding year. The tax levy for 1871 was $2,987,464.70, and the bonded indebtedness amounted to $14,193,000. In 1872, although the tax levy exceeded that of 1871 by nearly 50 per cent, the property valuation had decreased by $8,549,040. The valuation upon which the city tax levy was based showed a large increase in 1873 and 1874. In 1875, the State Board of Equalization was created by Act of the Legislature, and this supervising body made a sweeping reduction in the figures, and its schedule of valuations have since been operative.

After the adoption of the new city charter, on April 23, 1875, Mayor Colvin appointed S. S. Hayes as city comptroller. The city’s revenues and expenditures having outgrown primitive financial management, when Mr. Hayes assumed this office he looked upon it as an exclusive department of financing, in which the incumbent should exercise experience and abilities of the highest order, and devise ways and means to control and the finances of the city in a manner which did not admit of suggestion or interference on the part of other city officials. Although Mr. Hayes had a splendid record as a financier, and his abilities had been recognized in many responsible positions, his policy provoked constant criticisms in the press; more especially his plan to draw upon successive tax levies by means of treasury warrants. The heavy taxes and the antagonism aroused by opposition to his policy; threats of repudiation of taxes on the part of citizens and the consequent critical financial state of the city, were among the leading causes that brought about the political revolution that resulted in the election of Hon. Thomas Hoyne as mayor, in April, 1876. An account of the complications which followed is given in the political history. All of the city officials, except Comptroller Hayes, recognized Mr. Hoyne as mayor after he had been inaugurated by the new Council. Mr. Hoyne named R. P. Derrickson for comptroller, and he served, confirmed by the Council, but Mr. Hayes refused to
surrender the books, records and funds of his office.
The city treasurer thereupon declined to honor warrants
drawn by either or both comptrollers. A compromise 
was effected, Mr. Derrickson agreeing to relinquish his
claims upon the office, if Mr. Hayes would do the same,
both withdrawing upon the appointment by the mayor
of John A. Farwell, and his confirmation by the Coun-
cil as comptroller. Mr. Farwell assumed the office
June 22, 1876, and immediately instituted measures to
extricate the city from its difficulties.
By reason of the inability of the city to collect the
taxes of 1871-72-73 and 1874, on account of the fire
losses and subsequent business stagnation, and the
complications above noted, the credit of the city 
became materially impaired. A large amount of city
funds were also lost through the failure of Duncan, 
Sherman & Co., bankers, of New York, and the 
defalcation of George Von Hollen, city collector, not
to speak of the defalcation of City Treasurer Gage 
in 1872-73, which involved over $500,000. The uncov-
tered taxes amounted to nearly $100,000, for 1871; 
over $250,000, for 1872, more than $500,000, for 1873; 
nearly $1,500,000, for 1874; over $1,000,000, for 1875; 
and more than $1,000,000, for 1876. The defalcations
of ex-officials of the department of collections, 
at this date, amounted to $86,920.76. The bonded 
debt was $13,336,000; of which $3,601,000 was munici-
pal, $2,537,000 sewerage, $621,000 for river improve-
ments, and $4,177,000 water indebtedness. Through 
the advice of Mayor Hoyne to the "reform" Council, 
and with the co-operation of the heads of departments 
with the comptroller, measures of economy and re-
trenchment were devised. The fiscal year was 
changed; the expensive office of the tax commissioner 
and his assistants was abolished; the tax levies were
placed in the hands of the county collector for collection;
and efforts were made to meet matured, unpaid 
and protested obligations, as well as to create a surplus 
fund which would do away with the necessity of issuing 
tax warrants. Many wealthy merchants and several of 
the banks, notably the American Exchange National 
Bank of New York, and C. B. Blair, president of the 
Merchants' National of Chicago, came to the assistance of 
the city. Mr. Blair, at this time, may safely be accredited 
with saving the credit of the City of Chicago.

The annexed table shows in detail, by city divisions, the 
valuation, taxes levied, and the bonded indebted-
ness for each year from 1871 to 1884, inclusive:

Under a rigorous system of retrenchment, and 
superior financial management, by 1877, the floating 
liabilities had been greatly reduced, and the bonded 
debt lessened some $72,000. An Act was passed by the 
General Assembly for the collection of the unpaid taxes 
of 1873 and 1874, which had been levied under the City 
Tax Act and extended by the County Clerk. Notwith-
standing the July labor note, which cost the city over 
$30,000, a healthier financial tone prevailed.

In the ensuing year, the disorder consequent on de-
linquent taxes was partially adjusted. The personal 
property tax of the South Division was declared illegal 
by the Supreme Court, but the city obtained judgment 
for the greater portion of the uncollected taxes of 
1873 and 1874—a defect in the appropriation ordinances 
causing the rejection of sixteen per cent. of the levy 
of 1873, and of fourteen per cent. of that of 1874. The 
city abandoned, as worthless, the personal property 
tax cases of 1871, 1872, 1875 and 1876, amounting to 
$602,382.06, and closed a disastrous account of delin-
quency and litigation with the total loss through failures, 
removals, double assessments, and various other 
causes, of $1,117,986.16. The city, however, was com-
pelled to pay the more tax warrants to tide over its 
difficulties. These were drawn on the city treasury, payable 
from the taxes of 1878, and through them the entire 
annual expenses were met.

On July 17, 1878, the City Council passed an 
affirmatory ordinance, recognizing the office of City 
Comptroller and other offices created under the new 
charter; legalizing all of the acts of the various in-
cumbents, and fixing the comptroller's official bond 
in the penal sum of $100,000. The ordinance also made the 
term of the comptroller expire on the second Monday 
in December, 1879. Under and by virtue of this ordi-
nance, Mayor Monroe Heath, on June 19, 1878, re-
appointed John A. Farwell to serve out the balance of 
the term, and this appointment was confirmed by the 
Council on July 8, 1878, Mr. Farwell served until 
May 1, 1879, when he resigned, and Mayor Harrison 
appointed Theodore Tuthill Garney to the office.

During the year 1878, the bonded debt was reduced 
$307,000, of which $85,000 was represented by water 
bonds, being the first retirement of the same in the 
history of the city, with the exception of those destroyed 
in 1871, which belonged to the sinking fund.

Between this year and 1884, the property valuations 
averaged $125,000,000, the total tax about $4,000,000,
and the bonded indebtedness about $12,500,000. In the latter year, the bonded indebtedness was $12,750,500, while the revenue for corporate purposes aggregated $4,516,308.08, the total tax being $4,572,456; and, with a population of 629,985, the total valuation was $137,346,950, including the real and personal valuation of railroads, amounting to $84,750,188. A material increase in revenue was obtained from the effects of the new liquor license law, the sum received from that source in 1884 being $1,506,937, an increase of $1,120,973 over the preceding year. This new system of license partially overcame the legislation of 1874, which took from municipalities the control of their financial needs, and the limitations imposed by the Act of 1879, confining taxation for municipal purposes to two per cent. upon the assessed valuation.

In 1884, the valuation per capita, in Chicago, was $217.97, the debt $20.24, and the tax $7.73, being lower than that of any large city in the United States.

On December 31, 1884, there was a balance in the city treasury of $1,575,041.46. The funded debt in detail was as follows:

- House of Correction bonds $239,000
- Tunnel bonds 694,000
- City Hall bonds 375,000
- School construction bonds $1,000
- School bonds 1,165,000
- Outstanding city bonds 1,112,000

Total Municipal debt $3,566,000

- Sewerage bonds $2,630,500
- River Improvement bonds 2,608,000

Total Sewerage debt $5,238,500

- Water bonds $133,500
- Other bonds 3,593,000

Total Water debt $4,726,500

Total bonded debt (net) $12,751,500

The following are the names of the members of the finance committees of the Council since 1870:

Patrick J. Howard, assistant city treasurer, was born at Kingstown, Dublin Co., Ireland, on January 5, 1847. In 1849, his father emigrated to New York City, where his wife and son joined him the next year. In 1854, they moved to Chicago. Their first home was at the corner of Quincy and Market streets, where young Howard had an opportunity of becoming acquainted with the worst specimens of the mud and "pavements" of primitive Chicago. The gas works being only a block distant, he acquired some knowledge of their operations, which perhaps influenced his choice of a trade in later years. The first position he received was at St. Mary's School, corner of Madison Street and Wabash Avenue. He then attended St. Patrick's School, corner of Desplaines and Adams streets, when the institution occupied the original wooden building. His next instruction was at the Jesuit School, corner of Eleventh and Aberdeen streets, after which he became a messenger boy to a physician and clerk in a grocery. When seventeen years of age he commenced to learn the trade of a gas-fitter with R. D. McFarland. The day before the great fire he took charge of the Elgin gas works, in which position he remained until 1875, when he returned to Chicago and connected himself with the special assessment office. He was elected City Clerk for two terms, from 1879 to 1883; and at the conclusion of his service was appointed assistant to City Treasurer Dunphy. He was married in July, 1872, to Alice E. Messenger, of Elgin. They have had six children, five of whom are still living—three girls and two boys.

SCHOOL DEPARTMENT.

Through the zeal and energy of the Superintendent and his assistants, in two weeks after the fire the schools were again in operation, and every pupil was in some way provided with a seat. Scholars from the burned districts went into others which the fire had spared, those on the North Side finding accommodations in the Newberry and Lincolns schools. The Board at once set about the work of reconstruction. The Pearson street school was the first to be occupied, and by the close of the school year, ending with June, 1873, the Jones, Kinzie, Franklin and Ogden school-buildings were completed. The Jones building was, however, occupied but one year, being burned in 1874. The High-school building, of which the city took possession for the use of the courts, continued to be occupied for that purpose until January, 1872. It has taxed the resources of the Board to keep pace with the growing demand for school-buildings, an increase of four thousand pupils each year requiring from four to five new buildings to contain them. During 1884, there were from twelve to fifteen thousand children who could attend school but half a day, one portion going in the morning, and the other in the afternoon; but the accommodations are now much better, large appropriations for school-buildings having been made during the past few years, as will be seen by reference to the accompanying table, showing the work of construction since the fire:

The expenditures during the same period, with number of teachers and pupils, cost, etc., were as follows:

#### Board of Education.

- **By section eight of the School Law**, approved April 1, 1872, the composition of the Board of Education, which consisted of twenty members, each from one ward, was entirely changed and its powers materially enlarged.

- The officers of the Board, since 1871, have been as follows:
  - **Presidents**—Eben F. Raney, 1871-72; William H. King, 1872-74; John C. Ricker, 1874-76; William K. Sullivan, 1876-78; William H. Wells, 1878-80; Martin A. DeLany, 1880-82; Norman Bridge, 1882-83; Adolf Kraus, 1883-84; James K. Doddittle, Jr., 1884-85; Adolph Pickard, 1885-86; Mary F. Ricketts, 1886-87; Duane Doby, 1877-81; George Howland, 1881-85.
  - **School Agent**—Charles C. Chase, 1865-83.
  - **Clerk—Shepherd Johnston, 1860-85.**
  - **Attorneys**—James Goggin, 1874-76; W. W. Perkins, 1876-78; Richard W. Ricketts, 1878-82; William J. English, 1882-84; Michael J. Dunne, 1884-85.
  - **Building and Supply Agent**—James Ward, 1863-82.
  - **Supervisors of Schools**—Josiah L. Pickard, 1864-77; Duane Doby, 1877-81; George Howland, 1881-85.
  - **Assistant Superintendents**—Francis Hanford, 1870-75; Duane Doby, 1875-77; Edward C. Delano, 1877-80; John C. Burroughs, second assistant, 1884-85.

- **John Wentworth**—It is germane to the early history of the Board to mention the connection of John Wentworth therewith. He is the oldest member now living, having been appointed as early as 1855. The Board was originally styled "School Inspectors." When not in Congress or in the Mayor's office, Mr. Wentworth was a member, almost uninterruptedly, until the expiration of his term after the great fire of 1871. While a member of the School Board, Mr. Wentworth distinguished himself as the opponent of all extravagance and for his exposure of all the vices—such as those whose hold on raising money was the purchase of real estate, heating-apparatus, furniture and schoolbooks. He particularly resisted the efforts of the banks to avoid payment of par money for School Board deposits, and every concession to the banks was made in spite of his violent denunciation. While, through his newspaper, the Chicago Democrat, as well as in official position, he advocated liberal appropriation for school purposes, he was, in every sense of the word, for making a public dollar perform all the functions of a private dollar. It required boldness, at that time, to originate and defend the construction of the first brick schoolhouse in our city (the Lorraine, on the north side of Madison Street, between State and Dearborn streets), and yet it was built for less money, in proportion to its size, than any one ever built in the city. It was disposed of for other than school purposes before the great fire, there being no longer need of a schoolhouse in that locality. Mr. Wentworth became interested in the town of Lyons in 1854, and he found that not a portion of the section of land in that town, usually set apart by Congress for school purposes, had ever been sold, and he has used all his efforts, amid great opposition, to keep it in that condition. It is now the only entire section of six hundred and forty acres, in the State of Illinois, devoted expressly to school purposes. The sale has been often attempted by speculators, and as often successfully resisted by Mr. Wentworth. It is now generally understood that while he lives the section must remain intact, and he is looking forward to the day when the tract will be worth a million of dollars.
John F. Eberhart is one of Chicago's old citizens, and is well known for his connection with educational affairs. Mr. Eberhart was born in Mercer, Penn., on January 21, 1829, and lived there until he was eight years old. The family then moved to Big Bend, Penn., where the lad farmed and attended winter school until he was sixteen. He then went to Oil Creek (now known as Oil City), and taught school one winter. Following that, he attended two terms at Cottage Hill Academy at Ellsworth, Ohio. After another winter's teaching at Big Bend, he went to Alleghany College, Meadville, Penn., and graduated in 1853. He then took charge of the Meadville Normal School, and was also interested in the Meadville High School. He was also one of the earliest members of the Board of Education. A sketch of Mr. Eberhart appears in the second volume of this History, wherein the date of his death is erroneously given as April 16, 1865, whereas it occurred on April 16, 1885; one of the causes for which was, presumptively, a stroke of paralysis he suffered in February, 1881.

Changes by the Board.—On September 28, 1875, that part of section 69, Rules of the Board, which provided for the reading of the Scriptures and repeating the Lord's Prayer in the schools, was struck out. The subject had not been agitated, nor had it been previously considered in the Board; but at the meeting referred to, a motion was made, which was at once seconded and carried without discussion. In the fall of 1875, the number of grades in the English course was reduced from ten to eight, the first four being primary and the last four grammar.

On June, 1885, the study of Greek was dropped from the High-school course, the Board deeming its continuance unadvisable. Some thought the city should not be taxed to prepare students for college, while others considered Greek unnecessary, many being doubtless influenced by the general discussion of the Greek question, then at its height.

Music.—The study of music was seriously interrupted by the fire, which caused the absence of the teachers in this branch for three months. They resumed their duties on January 1, 1872, and spared no efforts to bring the standard up to that of the preceding year. The singing in the schools, which had previously been done by rote, from this time on took a more definite shape. Special care and attention were devoted to the proper training of the voices, pupils of all grades down to the sixth having their voices examined and being classified into proper registers. The reports for this year (1872) show pupils in the third and fourth grades singing three-part music with good success, and able to sing at sight music in which the first and second grades had been examined the preceding year. As illustrating the progress made in this branch of study, it is worthy of note that, in 1873, a large chorus of children was organized from the schools, which, with only two rehearsals of parts and one general rehearsal, rendered music, classic in its character, in such a manner as to secure the approbation of good judges. The report of the Committee on Music, in 1875, shows that instruction was left entirely in the hands of the regular teachers, the Superintendent of Music instructing the teachers, and directing their work in the several schools. During this year E. E. Whittemore, who had been closely identified with this department, was, on account of failing health, compelled to resign. The statistics of 1878 show that eighty-five per cent. of the children joined the singing classes, although their doing so was entirely optional. The popularity of the study, which this would
indicate, has since continued, it being now in a high state of efficiency.

**Drawing.**—From the "Historical Sketches" of Mr. Shepherd Johnston are taken the following facts regarding the changes in this department between 1871 and 1880:

"Misses Currier and Starr resigned during the summer vacation of 1872, and the vacancies caused by their resignation were filled August 27, 1872," by the election of Misses Carrie E. Powers and Julia H. Arms.

"Miss Arms resigned in August, 1874, and the vacancy was filled by the election of Mrs. Natalie Roemheld, who filled the position till the close of the winter term of 1875.

"The Bartholomew Series of Drawing Books remained in use till the close of the school year, 1873-74, when they were replaced by the Walter Smith System of Free-Hand Drawing, which is now in use.

"The publishers of the Walter Smith System furnished a teacher, Mr. O. J. Pierce, free of cost to the city, during the school year 1874-75, to give the regular teachers a thorough course of instruction in the system. Mr. Pierce also took charge of the instruction in drawing in the Normal school during this year. In July, 1875, Mr. Pierce was elected superintendent of instruction in drawing, at a salary of $2,000 per annum.

"At the close of the school year 1875-76, in consequence of an order of the Common Council requiring a general reduction of twenty-five per cent, in the expenditures of the city, the employment of a superintendent of instruction in drawing was discontinued, and at the opening of the schools in September, 1876, the publishers of the Walter Smith System, in order that the study of drawing might not be interfered with by such action, furnished a special teacher of drawing, Mrs. Elizabeth F. Dimock, at their own expense, to take charge of the instruction in drawing till July, 1877, when she was elected, by the Board, special teacher of drawing for the ensuing school year, at a salary of $1,500 per annum. Mrs. Dimock has remained in charge of the instruction in drawing since that date to the present time."

In 1883, it was found that the study of drawing, as well as other optional studies in the Primary and Grammar schools, was not in a satisfactory condition. This, so far as drawing and music were concerned, was owing to the fact that these studies were not in charge of the regular teachers. In the examinations, no effort was made to test candidates for teachers' certificates on these topics, and many entered with no knowledge of these subjects, and at best poorly fitted themselves afterward for teaching them. A new impulse was given to the study by the action of the Board in 1884, placing it upon the list of regular branches, prior to which time it had been optional. This was followed by a marked increase of interest, both on the part of teachers and pupils, and a great improvement in the work done.

**German.**—At the time of the fire, four thousand pupils were pursuing the study of German in the public schools; but at the close of the school year, in June, 1872, only 2,359 were so engaged. This falling off was due to the fact that on the North Side, where German had been largely taught, the school buildings destroyed by the fire were not yet re-built. Of the number above stated, 871 pupils were in the grammar grades and 1,488 in the primary. In 1874, by recommendation of the Committee on German, a graded course of study in this language was prepared, with special reference to its adaptation to the English course, and was adopted in September. German was introduced into the Brown and Dore schools during this year. In 1877, the study was taken up in the King and North Clark-street schools, and in 1878, in the Calumet-avenue school. By the close of 1879, the study had been introduced into eighteen of the district schools, as follows: In the North Division, six—the Kinzie, Franklin, Ogden, Newberry, Lincoln and North Clark Street; in the South Division, four—the Moseley, Haven, Cottage Grove, and Calumet Avenue; in the West Division, eight—the Seammon, Washington, Brown, Wells, Skinner, Dore, Carpenter, and King. In 1885, the scope of the study was still further widened, it beginning in the third grade, instead of the fifth, as formerly.

The continuous growth in this department is shown in detail in the following table:
CORPORATE HISTORY.

EVENING SCHOOLS.—The evening schools were continued each year, from 1863 to 1871, when, owing to the great fire, they were broken up, and no appropriations were made by the Council till 1873. They were re-opened in the fall of 1873, and, with the exception of the year 1876, they have been kept in operation from ten to fourteen weeks each year till the present date. In the fall of 1868, an evening High-school class was formed, under the charge of Selim H. Peabody, a teacher in the High School, in which instruction was given in the higher mathematics, bookkeeping, mechanical philosophy, and mathematical drawing. These evening High-school classes were continued in connection with the evening school, till the fire of 1871, a few weeks after the opening of the evening school this year. Up to this time the evening High-school class held its sessions in the Dearborn-school building. The sessions of the evening High-school class were not resumed until the fall of 1874, when they were held in the frame building on the High School lot. During the sessions of 1877-78, the study of short-hand was introduced in the evening High-school classes.

The following tabulated statement shows the date of the opening of the evening High-school classes each year, the length of the sessions, the total enrollment of pupils, the average attendance, the total cost, and the cost of each pupil, based on the average attendance. The number of weeks the evening schools were in session refers to the schools in which the ordinary branches were taught. For a portion of the time the evening High-school class was continued a few weeks longer each year.*

THE DEAF MUTES.—In September, 1870, a class of deaf mutes had met for instruction at the LaSalle-street Primary-school building, and then went to one of the rooms occupied by the offices of the Board of Education, where it remained until the fire of 1871. After the fire,
no action was taken in regard to a school for deaf mutes, until January, 1875. A class was then organized, and placed in charge of P. A. Emery, who was paid $1,000 a year for his services. When the New School was completed in the spring of 1876, it was located on Harrison Street and Third Avenue, the class was removed there. In 1877, an additional teacher was appointed. In 1878, the school was removed to the Third-avenue school building, and, on January 1, 1879, was again removed, this time to the Newsboys' Home. On May 29, 1879, an act was passed by the State Legislature, making an appropriation for the support of a school for deaf mutes in Chicago. The expense of this branch of educational work was $4,237.50 in 1884; and the particulars of attendance, etc., during the same year, are shown in the subjoined table:

The Chicago Institute of Education.—In the early history of Chicago, when there were less than a hundred teachers in the city and vicinity, they met for the discussion of matters of general interest. Such an association of teachers began during the administration of John C. Dore, first City Superintendent of Schools. These earlier institutions were, however, short-lived, and left no records. The present society, a voluntary association of the teachers of Chicago and vicinity, was organized in 1880, and became an Institute under the jurisdiction of the Board of Education. Its object, as set forth in the preamble of the constitution, is to "cultivate among teachers a better acquaintance, a more perfect sympathy with each other, and a general mutual improvement." Its meetings are held on the first Saturday in each school month, and in addition the Superintendent of Schools holds what are termed "grade institutes" every Saturday; meeting first-grade teachers one week, second-grade teachers the next week, and so on. These grade institutes are regularly connected with the public-school work of the city. The officers of the Institute consist of a president, two vice-presidents, a secretary and a treasurer. The officers and members of the Institute, at its organization in 1880, were:

School Session.—At the third session of the Forty-second Congress, an Act was passed authorizing the exchange of the south half of Block 87, school-section addition, located on the corner of Polk Street and Fifth Avenue, and extending from Fifth Avenue to the river, which had been held by the city for several years under a lease from the school fund, and had been occupied by the city Bridgwell, for the erection of a public school on the northwest corner of Dearborn and Monroe streets, and the walls of the old Post-office Building standing thereon. In pursuance of this Act, the Secretary of the Treasury appointed Hon. Thomas Drummond and Norman B. Judd as commissioners on behalf of the United States government; and the Mayor named Thomas Hoyne and Edwin H. Sheldon on behalf of the city; these four commissioners appointed Hon. John G. Rogers. The Commissioners reported that the two pieces of property were of equal value, the exchange was made. The object of this exchange had been to provide accommodations for the Public Library of the city; but the school fund had no money which could be used for making the requisite improvements on the building, and the city was so situated financially that it could not do the work. The Committee on School-Fund Property of the Board of Education therefore deemed it advisable to lease the property, which was accordingly done, Leonard Grover and J. G. Riall becoming the first lessees, at a rental of $7,500 per annum. In August, 1877, the premises were leased to John H. Havely for three years and eleven months, at $8,000 a year, who fitted up the old post-office building and used it for a theater. In 1877, the lease was renewed for three years and eleven months. In the fall of 1880, the School Board advertised for proposals to lease the property for some other purpose than that of a theater. In October, the Board agreed to lease the property to the First National Bank for a term of fifty years, with an option twenty years' additional renewal. In the following spring, the Bank concluded to destroy the old building, and made the offer to allow $15,000 for it and erect a new building to cost not less than $300,000. The offer was accepted by the School Board, and the present First National Bank was forthwith built.
CORPORATE HISTORY.

It was during this period that Professor Larimore distinguished himself and gave exhibition of characteristic energy, in connection with the issue of the only daily paper published in the city on the day of the burning of the hotel and post office by the tor-in-chief, Hon. Andrew Sherman, on that fatal Monday, finding the Journal office in ashes, secured the temporary use of a job-printer's press at West Side, and, notwithstanding flames threatened to drive them out every moment, yet succeeded in bringing out an issue of the Journal at its usual time of publication, that issue being the sole representative of the Chicago daily press of that day. Larimore was active in his writings and publications in the cause of education, attracted the attention of the University of Chicago, he was, in March, 1874, elected to the professorship of Physics in that institution, in consideration of his excellent connection of the same year with the University of Michigan.

He did not, however, enter upon his duties in the University, but accepted a similar position in the Cook County Normal School, at Englewood. In September, 1875, Professor Larimore was appointed to the position of teacher of Physics and Chemistry in the North Division High School, Chicago, which position he has held for the past seven years with credit to himself and the institution.

SILAS LEE Wood, principal of the Clarke School, was born in Ontario County, New York, on June 19, 1831, and is the son of Garrett and Mary M. (Ash) Wood. After receiving an excellent preliminary education in the school contiguous to his native place, he attended the State Normal School of Michigan, and graduated therefrom in the class of 1857. Immediately after completing his course at the Geneva, Wis., he taught at Eaton Rapids, Eton Co., Mich., where he remained for some time. He next taught at Mount Clemens, Mich., and then at Paw Paw, Van Buren Co., Mich., whence he was recalled to Mount Clemens, from which he was transferred to Allegany Co., Mich., shortly afterward returning to Eaton Rapids. He next accepted a position at Vassar, Mich., and afterward at Woodstock, McHenry Co., Ill., from thence he was recalled to Vassar, having been superintendent of schools for seventeen years in Vassar, Mount Clemens and Eaton Rapids. In all the schools of which Mr. Wood was superintendent, the number of scholars ranged from four hundred to eight hundred. In January, 1881, he was elected to the State Board of Education, and took charge of the Clarke School, having an experience of twenty-six years as principal teacher. Mr. Wood, while residing in Michigan, was an active worker in the Good Templars' organization, and was Deputy Grand Worthy Chief Templar in the northern part of Michigan for several years. For some time during the War, Mr. Wood was actively engaged in recruiting service in Northern Michigan, with headquarters at Kalamazoo.

JOHN HENRY LOOMIS, principal of the Wells School, was born at Sandy Hill, N. Y., on August 9, 1841, and is the son of Osmon and Jane Gill (Caldwell) Loomis. His mother's family were old settlers in Hartford, Conn., and his father's family from Washington County, N. Y. The Loomis family can be traced to long before 1638, when Joseph Loomis settled in Windsor, Conn. Mr. Loomis was graduated from the Michigan State Normal College, Il1., and finished his studies in 1866. After leaving college, Mr. Loomis was appointed to the Agricultural College, as teacher of mathematics, for about two years, and was next made Superintendent of Schools at Napoleon, O., and there remained for seven years. In 1875, he came to Chicago and obtained the principalship of the Wells School, and has served in that capacity since. He was married, in 1860, at Keene, N. H., to Miss Susan F. Foster. Mr. Loomis served in the War as a member of the Michigan Cavalry, continuing therein until the siege of Corinth, where he was injured in a cavalry charge, and on account of disability was honorably discharged. He is a member of Napoleon Lodge, No. 256, A.F. & A.M., of Ohio, and also of Post No. 28, G.A.R.

HENRY CLAY COX, principal of the Pickard School, was born in Northumberland County, Virginia, on February 25, 1844, and is the son of Carlos and Maria Louisa (MacCarty) Cox. He was educated at the State Normal University and at Knox College, Illin., during the years 1860-64. In 1859, he commenced teaching at Winterset, Madison Co., Iowa, and afterward was appointed superintendent of the Wapello County (Iowa) schools, which position he held two years. He then was made principal of the Farmington School, Fulton County, Ill., which position he retained for five years, and was then made principal of the Normal School, in Dallas County, Iowa, where he remained for two years. He was afterwards made superintendent of schools at Pontiac, Livingston Co., Ill., which position he retained from 1882 until 1884. In 1884, he came to Chicago, and was appointed to the position he now holds in the same year. He has given evidence of ability and capacity in the position of principal of the Normal School.
Chicago, and soon after was appointed to a position at the Newberry School, subsequently teaching at the Dore School for about three years; she was afterwards appointed head assistant of the Foster School, where she remained until 1879, in which year she was promoted to her present responsible position. Miss Adams is a member of the Association of Illinois.

Charlotte Lundh, principal of the old Sangamon—now Montefiore—School, was born in Sweden on February 11, 1855. Her parents, Charles and Johanna (Hawkenson) Lundh, came to this country in 1857, and settled in Chicago, their daughter Charlotte being then only nine years of age. Miss Lundh commenced her education at the Sangamon School, then known as the Washington, subsequently attending the Carpenter School in 1869, and from there was promoted to the High School, of which Mr. Howland, now superintendent of schools of Chicago, was principal. She graduated in the class of 1876, and began teaching in September, 1877, at the Wells School, remaining there seven years; and, in September, 1881, was promoted to her present position, which she so meritoriously fills.

Alice Agnes Hogan, head assistant of the Throop School, was born at Troy, N. Y., on December 23, 1859, and is the daughter of John and Margaret Hogan. Having received her preliminary education at the Dore Public School, in this city, she attended the High School in 1874; and, in 1876, entered the Normal School to receive the necessary training required for teaching, graduating in the class of 1877. Immediately after leaving the latter institution, she accepted an engagement as copyist and general correspondent in a mercantile house. Miss Hogan received her first appointment as teacher in October, 1878, in the Folk-School School, whence she was transferred to the Throop School and promoted, in 1880, to her present position.

Anna Margaretta O'Connor, first assistant teacher of the Brighton Public School, and daughter of John and Sarah (Williams) O'Connor, was born in Chicago, on April 8, 1860. Her educational training commenced at the public and high schools of this city, graduating from the Normal School in the class of December, 1876. In April, 1877, she began her career as teacher, and taught at the Holden and Brighton schools for seven years, and, in September, 1883, was appointed to her present position. Miss O'Connor received the "Holden prize," while attending that school, for general proficiency.

Kindergartens.—These institutions, of which there are twenty-five at the present time, are in no way connected with the public schools of Chicago; but are managed exclusively by religious societies or private individuals. Some of them are simply nurseries for little children or homes for the orphan and friendless. Every institution of this class is enumerated in the following list, taken from the last school-census report:

Pacific Garden Mission Kindergarten, No. 420 Wabash Avenue; Kindergarten, No. 1237 State Street; Kindergarten, Twenty-fifth street and Indiana Avenue, Chicago Home for the Friendless; No. 1926 Wabash Avenue, St. Joseph's Home for the Friendless, Nos. 407 to 412 May Street; Kindergarten, No. 122 South Morgan Street; Kindergarten, No. 334 West Randolph Street; Dr. William Semblitz, 1553 S. Halsted Street; Kindergarten, 1106 Hamilton Avenue; Frodel, No. 35 Flournoy Street; Frodel, corner Park Avenue and Colby Street; St. Agnes, No. 53 Park Avenue; Nursery, No. 175 Burling Street; German, No. 332 Wells Street; Mrs. Kie, No. 457 La Salle Street.

The remaining Kindergartens, operated by the Chicago Frodel Kindergarten Association, are:

No. 1—No. 147 Million Avenue. Supported by Mrs. E. W. Blatchford; Miss Ella Wingate, director.

No. 2—Kindergarten, Corner Twenty-second and Arnold streets. Supported by the Church of Messiah; Miss Hattie Lindsey, director.

No. 3—Afternoon Kindergarten, No. 117 Million Avenue. Supported by Mrs. George L. Dunlap; Miss Kate Putts, director.

No. 4—No. 1237 State Street. Supported by the Association; Miss M. E. Foster, director.

No. 5—Afternoon Kindergarten, corner Twenty-second and Arnold streets. Supported by the Woman's Club; Miss Hannah Brown, director.

No. 6—No. 318 Sedgwick Street. Supported by the Association; Miss Mary B. Wilson, director.

No. 7—Bethany Kindergarten, in Bethany Church, No. 797 West Jackson Street. Supported by the Association; Miss Anna Holbrook, director.

No. 8—In the Cook County Normal School. Supported by the Association; Mrs. A. H. Putnam, director.

No. 9—In the Protestant Orphan Asylum. Supported by the Association; Miss Mary Brownell, director.

No. 10—Unity Industrial School. Supported by the Association; Miss Minnie Sheldon, director.

The Chicago Manual Training School owes its existence to the philanthropy of the Chicago Commercial Club, which, at its regular monthly meeting, on March 25, 1882, discussed the question of "the need of a school for industrial training in Chicago." Papers were read, and addresses made by members of the Club, and by Augustus Jacobson and Charles H. Ham, both of Chicago, which showed the desirability and practicability of organizing such a school. So eloquent and forceful were the arguments of the speakers, and so thoroughly did the Club appreciate the importance of the project, that, at the close of the meeting, a proposition that the Club should itself undertake the inauguration of such an enterprise, met with such ready and enthusiastic response that a subscription was started upon the spot, looking to the raising of the sum of $100,000; and in the space of a very few moments the sum of $7,000 was pledged, by members, to this object.

In a short time the desired $100,000 were pledged, and a committee was appointed to prepare and report a plan for the organization of the proposed school. This committee was composed of John W. Doane, Marshall Field, R. T. Crane, John Cerrr, N. K. Fairbank, E. W. Blatchford, and O. W. Potter.

The report of this committee was made and adopted on December 30, 1882, and contained the following provisions, among others:

The name of the proposed school shall be The Chicago Manual Training School, and shall be incorporated under the statutes of the State of Illinois.

The object of the School shall be instruction and practice in the use of tools, with such instruction as may be deemed necessary in mathematics, drawing, and the English branches of a high-school course. The tool instruction contemplated shall include carpentry, wood-turning, pattern-making, iron-chipping and filing, forge-work, braving and soldering, the use of machine-shop tools, and such other instruction, of a similar character, as may be deemed advisable to add to the foregoing from time to time: it being the intention to divide the working hours of the students, as nearly as possible, equally between manual and mental exercises.

Nine trustees were elected the same evening; and at the next regular meeting of the Club (January 30, 1883), they organized as follows:

Board of Trustees: E. W. Blatchford, president; R. T. Crane, vice-president; Marshall Field, treasurer; William A. Fuller, secretary; John Cerrr, John W. Doane, N. K. Fairbank, Edson Keith, George M. Pullman.

The present site, at the northeast corner of Michigan Avenue and Twelfth Street, was selected on March 28; S. S. Beman was chosen architect on May 5; and Henry H. Belfield, at that time principal of the Chicago North Division High School, was elected director on June 9, 1883.

The corner-stone of the building was laid on September 21, 1883. The first examination for admission was held on January 3, 1884. Although the building was in an unfinished condition, school exercises were commenced on February 4, 1884, the teachers being Director Belfield, Albert L. Tucker (in charge of woodwork), and Benjamin Hyde (instructor in drawing). The first year, or junior class, only was organized, its number being limited to seventy-two. The in-
The augural address of the director was delivered on June 19, 1884.

The second class of seventy-two was admitted on September 1, 1884; the third, also limited to seventy-two, on September 7, 1885. The first class is expected to graduate on June 24, 1886.

**Equipment.**—The equipment of the school has progressed as the progress of the classes has demanded. At present (January, 1886), the mechanical equipment is mainly as follows:

- **Wood Room**—Twenty-seven cabinet-makers' benches, twenty-four speed lathes, one circular saw, one boring machine, one scroll saw, one planer, one grindstone, bench and lathe tools for seventy-two boys.

- **Foundry**—Two furnaces, with troughs, flasks, rammers, sleeves, etc., for sixty-six boys.

- **Forge Room**—Twenty-four forges, twenty-three anvils, three vises, one emery grinder, one blower, two exhaust fans, hammers, flatters, swages, etc., for sixty-six boys.

- **Machine Shop**—Eight engine lathes, two speed lathes, one drill, one planer, one shaper, one grindstone, fifteen benches, fifteen vises, bench and lathe tools for thirty-two boys.

Power is supplied by a Corliss engine of fifty-two horse-power and two steel boilers.

The following gentlemen constitute the teaching force in January, 1886:

- Henry H. Befield, Ph.D., director;
- William R. Wickes, A.M.;
- F. E. L. Beal, C.E.;
- Earl B. Penson, A.M.;
- Albert L. Tucker, D.S.;
- Elroy A. Dillon, B.S.;
- Frank M. Bennett, assistant engineer;
- C.S.X.;
- William Jones.

The School has attracted considerable attention, not from citizens of Chicago alone, but from all parts of the United States, and it has been a powerful stimulus to the founding of many other such schools in other cities. The pupils are doing very creditable work in wood and in metals. All the lathe tools and the flat, cape and round-nosed chisels used in the machine-shop were made by the pupils. So were the tongs now in use in the blacksmith-shop; a six horse-power steam engine (one of six) has been finished, and is run by the senior class. Although the pupils are encouraged to make useful articles for themselves and for the school, nothing is manufactured for sale—the idea of the school being to educate and not to manufacture.

**The Brockway Teachers' Agency.** Located in the Times Building, was established in 1882, by Mrs. L. Freeman Brockway. The object of the agency is to recommend good teachers to the best of schools. Until the establishment of this agency the only reliable educational bureaus were located in Eastern cities. But Mrs. Brockway has proved her efficiency and aptitude for the work, and has by her own untired efforts built up an institution that is a credit to the city. For many years she has been associated with the best schools of the country in the capacity of teacher, and, spending much time now in visiting schools, she perfectly understands the needs of schools and the qualifications of teachers. The agency has been a success from the beginning, and is now representing a very superior class of teachers for every department, from the Kindergarten to the college president, and lastness now extends into every State in the Union, a large number of teachers from the East being placed in Western schools. It is a most valuable aid, both to teachers and institutions of learning. It meets a need long felt in the West for
a reliable bureau of exchange in educational work. Mrs. Brockway was born in Cardington, Ohio, in 1835, and is the daughter of Dr. and Mrs. John Brokaw (or Brokaway) Freeman. When quite young her parents moved to Indianapolis, Ind., where they lived until she had arrived at her fifth or sixth year, when they moved to LaGrange, in the Western Reserve of Ohio, where she remained until eight years of age. She received her education in the public schools and through private tuition. She taught her first term of school when in her fourteenth year, and continued in the profession until the establishment of the agency, with the exception of one year. Her experience as a teacher covers a space of about fourteen years, during which time she held high positions in some of the best schools in the country, among which are Joliet, Ill., public schools, where she held a position five years; Huntington, Ind., and the Douglas School in this city. Mrs. Brockway came to Chicago with her husband in 1881, and took a position in the Douglas School, which she resigned to commence her present work, in 1882. She was married, in Kalamazoo, Mich., in 1880, to S. P. Brockway.

THE HEALTH DEPARTMENT.

After the fire, thousands of the homeless and destitute found shelter in school-houses, churches and temporary barracks of various kinds. The huddling together of so many persons, the exposure, the lack of sanitary appliances and an inadequate water-supply, formed conditions so favorable to the spread of disease, that it required the greatest vigilance on the part of the Board of Health, and taxed to the utmost the resources at its command. Notwithstanding all its efforts, ably seconded by the "Sanitary Squad," the month following the fire was one of a high rate of mortality, twenty per cent of which was caused by exposure. It being feared that the small-pox would assume the form of an epidemic, steps were taken to insure a general vaccination, which resulted in the inoculation of sixty-three thousand persons. Yet, as it will be seen by reference to the mortality tables, there were six hundred and sixty-five deaths in 1872, from this disease, and the number did not fall much short of that in 1873. In May, 1873, this city, in common with many other places in the West and South, received an unwelcome visit from the cholera. The report shows that there were forty-eight cases, and twenty-three deaths from this disease. In the fall and winter of 1872-73, a large amount of extra work was forced upon the Board by the appearance of the epidemic. It spread rapidly, until almost every block in the city was affected, and resulted in the death of eleven hundred and fifty horses during its prevalence.

THE DEPARTMENT REORGANIZED.—By city ordinance, passed on July 19, 1876, the Board of Health was abolished, and all the powers and duties of the Board vested in a Commissioner of Health. Dr. Brock, L. McVickar was the first commissioner appointed. He resigned on January 29, 1877, when the present commissioner, Dr. Oscar C. DeWolf was appointed its successor. The work of this Department is thus comprehensively stated by Commissioner DeWolf, in his report for 1878:

"To reform tenement-houses, suppress epidemics of preventable diseases, reconstruct, clean, and disinfect vaults, regulate offensive trades, inspect the food-supplies, and destroy, or confine to the rendering-tanks, everything unwholesome; to elevate the standard of municipal cleanliness in streets and alleys and yards."

In order to ensure a thorough reformation of the slaughtering and rendering establishments, an ordinance was passed by the City Council on August 27, 1877, for the purpose of "regulating the slaughtering, packing, rendering and fertilizing business," making it unlawful to engage in the occupation of slaughtering, packing, etc., without first procuring a license therefor; and pro-

viding for a proper inspection by the Commissioner of Health. This ordinance has completely revolutionized the sanitary aspect of the immense slaughtering business done in and near Chicago.

In the summer of 1882, the small-pox again appeared as an epidemic, and continued for over a year, resulting in a mortality of eleven hundred and eighty, in 1881, and twelve hundred and sixty-two in 1882.

The factory and work-shop inspection service, in connection with the Health Department, which was established by the City Council, and provided for a supervision of the conditions of danger to life and health which surround the laborers, was commenced by an Act of the State Legislature, passed on May 30, 1881, for the sanitary regulation and inspection of tenement and lodging-houses, or other places of habitation, in course of erection, at the same time extending the powers and enlarging the duties of the Health Commissioner.

It is claimed that under the operations of this law, a vast improvement has been made in the sanitary character of the dwellings erected. It is designed to explain the extent of the work performed by the tenement and factory inspectors of this Department, an extract is made from the report of Chief Inspectors Genung, made for the first nine months of 1885:

"During the first nine months of the present year, the inspectors have made examinations in 63,264 separate buildings, 51,381 of which were in places of habitation. All of the above examinations were made pursuant to the city ordinances; and 1,431 examinations were made, in addition to the above, under the State laws regulating the sanitary arrangements to be provided in habitable buildings during construction. This total of 64,648 examinations represents the first or original examination only, and in no case includes a re-examination or visit, always made necessary to enforce the requirements of the written notices served or suits brought for needed sanitary improvements. Detailed, written reports for each examination made are on file among the records of this Department, properly classified and alphabetically arranged for convenient future reference."

"A total of 19,834 written notices were served for the violation of the sanitary ordinances, divided or classified as follows, viz.: 19,105 were for sanitary defects in places of habitation; 305 for violations in factories or places of employment at labor; and 571 were for violations of the State laws in unoccupied new buildings in process of construction. The improved sanitary conditions effected in compliance with above notices were, viz.: New house-sewers constructed and connected with public sewers in street, 1123; catch-basins constructed for other than new sewers, 241; privy vaults cleaned, 8,225; water-closets constructed, 96; rooms, including wash, 1,052; costly rooms repaired, 205; filthy yards cleaned, 3,529; miscellaneous, 1,784; defective plumbing repaired, 2,529; traps applied to waste and soil-pipes, 2,856; ventilation applied to waste and soil-pipes, 44; ventilation water-closet rooms, 93; ventilation living rooms, 137; ventilation work-shops, 5; defective house-sewers repaired, 1,566; catch-basins cleared, 938; catch-basins repaired, 66; uninhabitable basements cleared of occupants, 11."

The ordinance to abate the smoke nuisance in the city went into effect on May 1, 1881, and the efforts made to carry out its provisions are extensively described in the report of the Department for 1881-82. As a result of their labors, it is stated that some of the railroad corporations had been successful in abating the objectionable smoke of locomotives, within the city limits, while others had been less active and were more censurable in the matter. The tugs had accomplished nothing toward an observance of the ordinance, but continued to darken the line of the river with their smoke.

The accompanying tables of mortality are taken from the records of the Health Department; and in regard to the reports upon which they are founded, it is claimed that such care has been taken in the preparation that they may be accepted in all their details as
thoroughly reliable. Credit is given to the physicians of the city for the general care and accuracy with which they have filled out their death returns.

In the last report of the Department, it is stated:

That in those wards and districts in which good drainage, sewerage, and other hygienic surroundings exist, a low rate of mortality will be found, whilst on the other hand, in the wards where the above conditions are only partly found, a high rate of mortality will be found to exist.

In the following tables are shown the deaths in this city since 1872, with the causes, nativities, etc.:

*Includes pneumonia, bronchitis, congestion of the lungs, and pleuritis.

The death-rate was highest in the year following the fire, when it rose to 27.67 for each one thousand of population; and the lowest in 1878, when it was 16.5. The average for the period covered by the tables is 20.5, and, except for the extraordinary mortality arising from the small-pox epidemic in 1882, would be much lower. For purposes of comparison, it may be stated that the average in other cities of the United States during the same time, was - New Orleans, 27; New York, 25.55; Washington, 23.68; Boston, 22.95; Phila-

Officers.—The officers of the Health Department since the fire have been as follows:

1874-75—J. A. Hahn (died October 25, 1875). Brook L. McVicker, president; Benjamin C. Miller, sanitary superintendent; George Schloeter (term expired April 1, 1876). Henry Gerger, Moses Hooker (resigned February 10, 1876). Joseph McDermott, Charles E. Moore, M. Mannheimer, H. D. Colvin, mayor, ex-officio; John Reid, health officer (resigned January 15, 1876); J. W. Russell, secretary.

1875-76—Brook L. McVicker (resigned), Oscar C. DeWolf (appointed February, 1877), commissioners: J. S. Knox, M.D., assistant commissioner; E. W. Sawyer, E. Garrott, J. M. Hall, medical inspectors; H. P. Wright, registrar of vital statistics; Brook L. McVicker, secretary; Louis Merki, John F. Stewart, clerks; William Leach, milk inspector; W. H. Gennings, special inspector; Alexander Sweeny, Mathew Lamb, Henry Weiland, meat inspectors; George N. Hamilton, steward; Ellen Nelson, matron of small-pox hospital.

1876-78—Oscar C. DeWolf, M.D.; commissioner; E. W. Sawyer, M.D., E. Garrott, M.D., J. M. Hall, M.D., medical inspectors; R. S. G. Paton, chemist; M. K. Gleason, registrar of vital statistics; Brook L. McVicker, secretary; Louis Merki, clerk; Reuben eleven sanitary police officers, six inspectors of factories and workshops, six stock-yards and meat inspectors, six employes at small-pox hospital.

1878-79—Oscar C. DeWolf, M.D.; commissioner; E. W. Sawyer, M.D., E. Garrott, M.D., J. M. Hall, M.D., medical inspectors; W. S. G. Paton, Ph.D., chemist; M. K. Gleason, M.D., registrar; B. L. McVicker, secretary; Louis Merki, clerk; W. H. Gennings, chief tetanis and factory inspector; P. H. McElroy, M.D., physician at small-pox hospital.

Oscar C. DeWolf, M.D., commissioner of health of the City of Chicago, was born at Chester, Hampden Co., Mass., on August 8, 1835. He is the son of Dr. T. K. DeWolf, who has been a prominent practitioner in that locality for more than half a century. Obtaining his earlier education in the schools of his neighborhood, he received the degree of Master of Arts from Williams College, and pursued his medical studies at Berkshire College, graduating therefrom in 1857. In 1858, he attended the New York Medical College, from which institution he received the degree of Doctor of Medicine, then immediately leaving for Paris, where he spent two years in the Medical Department of the University of France. In 1861, upon receiving threatening war news from America, Dr. DeWolf started for Massachusetts, where he secured William Gleason, at once appointed assistant surgeon of the 1st Massachusetts Cavalry, afterward becoming surgeon of the 2d Massachusetts, and continuing Reserve Brigade, consisting of five regiments of cavalry. He served through the War in these capacities, being attached to the Army of the Cumberland, and to the army of the Potomac during Sheridan’s Shenandoah campaign. In the fall of 1865, being discharged for disability, he returned to his home, where he established himself as a practitioner. In 1877, Mayor Heath appointed Dr. DeWolf commissioner of health, which position he has since held by successive re-appointments, notwithstanding the changes in the political administration of the city government, and when no other head of a department had been retained. He has brought the Health Department into a high state of efficiency, and himself into a National prominence in sanitary matters. His ideas upon these subjects are radical, and he looks upon the immediate future of sanitary work as containing great possibilities, notwithstanding the rapid progress of late years. During Dr. DeWolf’s administration, and through his instrumental agency, several important laws have been passed governing the construction of tenement-houses, and the ventilation, drainage and sanitary arrangement of all habitable buildings. He is a member of all the local medical societies; also of the State societies of Illinois and Massachusetts, and of the British Association for the Advancement of Science. For two years he held the chair of Surgical Pathology in the Medical Department of the University of Ohio, and is now professor of State Medicine and Public Hygiene in the Chicago Medical College. He is the author of many pamphlets on sanitary topics, which have met with general favor. Dr. DeWolf was married in December, 1857, to Harriet L. Lyman, of North Hampton, Mass.

Henry L. Hertz, coroner of Cook County, although one of the youngest, is among the most popular of newly-elected officials. He was born in Copenhagen, Denmark, on November 19, 1847, his grandparents having emigrated to that country from Hanover. His father, Martin Hertz, was chief of city detectives, a man of great prominence in his native place, and died on January 21, 1879. His mother’s maiden name was Henriette Fröhloose. Mr. Hertz received his preliminary education at the Metropolitan Latin School of Copenhagen, passing the university examination in 1866, and received the degree of Candidateus Philosophiae during the succeeding year. He next studied medicine for a year and a half. In July, 1869, he came to Chicago, with his letters of recommendation from some of the most influential citizens of his native place. He found employment in the Scandinavian Bank, where he remained until 1871. In September, 1872, he was appointed folio-writer under Norman T. Gassette, recorder of deeds, continuing in office under him, and also during the terms of James Stewart and James W. Buckway, up to the spring of 1876. In the fall of 1876, he had been elected clerk of the West Town. In 1876, declining a re-nomination. On May 1, 1878, he was appointed record-writer in
the Criminal Court, and held that position at the time of his election as coroner, November 4, 1884. Mr. Hertz received about ten thousand majority, running two thousand ahead of his ticket. While on a visit to Copenhagen, in 1872, he became a Mason, in "Zoro-babel and Frederick of the Crowned Hope" Lodge, and received the three degrees. He received the degrees in the Oriental Consistory (A. & A.S.R.), on October 1, 1874. Mr. Hertz is a member of Covenant Lodge, No. 526, A. F. & A. M.; is representative to the Grand Lodge from Scandia Lodge, No. 1221, K. of H.; is chairman of the Grand Lodge Committee on Laws and Legislation, of the I. O. U. M. being a representative of the North Star Lodge, No. 137; and is connected with Norden Lodge, No. 693, I.O.O.F.; and Lafayette Lodge, No. 144, A.O.U.W. Mr. Hertz was married, on September 1, 1880, to Miss Mary P. Power. They have two children.—Harriet May and Martin Power.

BIRTHS.—The following table has been compiled from every available authentic source. In 1878, the Commissioner first was able to present a report

* The readings of the Barometer were in each case corrected for temperature, elevation and instrumental error, and the minus sign (−) indicates below zero.

COUNTY INSTITUTIONS.

COOK COUNTY HOSPITAL.—The organization of this institution has been given in the preceding volume of this History, with an account of its transfer to the county authorities, since which time it has steadily increased to its present large proportions. It occupies a tract of land lying between Wood and Lincoln streets on the east and west, and West Harrison and Polk streets on the north and south, which was purchased, in 1874, at a cost of $145,000. The general design of the group of buildings, and the plans for the two medical pavilions, were adopted on May 24, 1875, and the latter were erected in that year. The clinical amphitheater and connecting corridors were built in 1876–77. The cost of the structures, including laundry, boiler-house, and all other improvements, was $217,874. The new administration building, on Harrison Street, which contains the offices, and main entrance, is five stories high, and, with the two isolated pavilions and corridors, was erected in 1882–84, at a cost of $828,700. The four main structures are four stories high, with attics and basements. The buildings are all of red brick, trimmed with stone. The amphitheater, which has a seating capacity of six hundred, is used for surgical operations and clinics by the students of the medical colleges of the city. The hospital has accommodations for over five hundred patients.
The City Morgue is located on the hospital grounds. The building used for this purpose contains an operating-room, with an amphitheater for students, where autopsies are made, and a dead-room, with six marble slabs and sprays. The morgue is in the basement, and has room for eleven bodies. In 1884, one hundred and fifty-seven bodies were received there, the expense for funerals being $2,872.

New rules and regulations for the government of the hospital were adopted in June, 1878, which placed the entire organization and conduct of the institution in charge of the Board of County Commissioners. The warden, clerk, matron, apothecary, and engineer are appointed by this Board, and are responsible to it for a proper discharge of their duties.

The reports of the hospital not being made in their present comprehensive form prior to 1882, the statistical information given in the table herewith presented, is therefore confined to the operations of the institution during the last four years.

The officers of the hospital have been—

The Medical Board (regular) consists of ten surgeons and ten physicians, besides one oculist and aurist and one pathologist; the Homeopathic Board comprises five surgeons and three physicians.

The total number of patients treated at the hospital during the past four years, the nature of the cases, the expense of maintenance, etc., are shown in the subjoined table:

*For eight months only. | *No record for 1883.

William J. McGarigle, ex-superintendent of the Police Department, and the present Warden of the Cook County Hospital, was born at Milwaukee, Wis., on September 12, 1856. His father, George A. McGarigle, was connected with the post-office in Milwaukee for over twenty years, a veteran of the Mexican war, and universally respected. Young McGarigle received his education in the public schools, a German-English Academy, and at a private German Institute. He then clerked in a grocery store, was connected with the United States Express Company in various capacities, and finally entered the service of the Chicago, Milwaukee & St. Paul Railroad Company. In 1868, he left the employ of the road and
CORPORATE HISTORY.

became a permanent resident of Chicago, although he had previously lived here when his father was an extensive builder and contractor, and erected many of Dr. Charles V. Dyer's buildings on State Street. In 1871, Mr. McGarigle joined the police force as patrolman, and was assigned to the Webster-avenue Station, but being a good penman, within a couple of months he was transferred to the Central Station as clerk, and after one year was attached in the same capacity to the detective department. Superintendent Rehm appointed him a detective in January, 1873, and during the next year he became sergeant in charge of detectives, which office was afterward changed to the lieutenancy. On January 1, 1878, he was appointed captain of detectives, being acting superintendent during the absence of the head of the Police Department. In the fall of 1879, he was appointed Superintendent of Police by Mayor Harrison. During his three years' administration he brought about many needed reforms, systematizing the reports of crimes brought in by subordinate officers, and also the description of property recovered, with the record of the hands through which it passed, by a set of indexed books and receipts. The establishment of the patrol system, and the perfection to which it has been brought, were also much due to the determined efforts of Mr. McGarigle, opposed as he was at the time by Superintendent Hickey and others high in authority. In 1881, Mr. McGarigle was sent to Europe to study the systems of the old countries, visiting the principal cities of England, France, Germany, Belgium and Austria, and upon his return making a comprehensive report to the City Council. In November, 1882, Mr. McGarigle resigned his position at the head of the Police Department, and made a vigorous canvass for the shrievalty, and although beaten by Sheriff Hanchett, he received a majority of 4,500 in the city, which, had it not been for the bitter fight in the Second Congressional District, might have elected him. He then occupied himself in building his fine livery establishment on Division Street, putting some $75,000 into this enterprise. On September 1, 1883, Mr. McGarigle was chosen warden of the Cook County Hospital. His skill in organizing and controlling large bodies of men peculiarly fitted him for the chief marshalship of the grand Hendricks procession of October 20, 1884, participated in by the Cook County Democratic Club, the Young Men's Democratic Club, the Iroquois Club, the National Veteran Association, and the several ward, suburban and congressional district clubs. He was the first secretary of the Sectional Underground Electric Company. Mr. McGarigle is a Mason in good standing, being connected with Lincoln Park Lodge, No. 61; Lincoln Park Chapter, St. Bernard Commandery, and Oriental Consistory; and is also a member of Apollo Lodge, No. 199, A. O. U. W. He was married in November, 1869, at Milwaukee, to Anna C. Liedmer. They have four children: George, Bessie, William and Edward.

COOK COUNTY INFIRMARY. — This, the largest of the charitable institutions of Cook County or Chicago, is variously known and designated as the "Alms-house," the "Poor-House," and the "Infirmary." The latter being the name used in making contracts and reports, may be considered official, and is, therefore, here adopted. It is located on what is called the county poor-farm, a tract of 240 acres (38 acres of which were purchased, in 1883, at a cost of $17,600), in Norwood Park township, twelve miles from the Union Depot. It consists of ten distinct buildings, arranged in a semi-circular group, connected by corridors. They are of brick, in the Gothic style of architecture. Nine of these buildings were completed in 1882, at a cost of $194,417, and the tenth was erected in 1883-85, at a cost of $23,000. The Infirmary has now accommodations for nearly twelve hundred inmates.

The buildings, presenting a frontage of four hundred and sixty feet, cover a little over two acres of ground. A convenient depot has been erected by the county on a branch of the Chicago, Milwaukee & St. Paul Railway, and the station is called Dunning.

The State Board of Charity, in speaking of this institution in its report of 1884, says:

"In its arrangement and fitting up, nothing seems to be left undone, and no expense spared, to make it a model almshouse: the sun shines in every room, twice every day. The Institution is kept in the best possible order; neatness and cleanliness prevail throughout the entire establishment."

The tabulated reports of the Infirmary, given below, show its general operations for a number of years. The actual running expenses for 1885, the Warden reports, — by reason of the amounts which are included in the table for permanent improvements and produce furnished the Insane Asylum, — were only $145,131. From the report for 1885, it is found that, of the persons admitted during the year, 1,241 were natives of the United States and 2,514 foreigners; 940 of the latter being from Ireland, 784 from Germany, and 322 from Scandinavia. There were 612 patients treated in the hospitals, 271 at the surgical clinics, and 14 in the surgical ward. Of these who died, 92 were natives of the United States and 191 foreigners.

Among the difficulties with which the Infirmary has to contend, is the constant application for admission by those not entitled to shelter. Of these, the most per-
sistent and annoying are the tramps, who come in
crowds during the winter, and tax the ingenuity of the
officials to dispose of them. A large percentage of the
inmates are paupers from other cities and neighboring
States, who are attracted to Chicago by the superior
facilities of this institution for medical care and treat-
ment. Many of the paupers are those from Europe,
who should be returned at ports of entry, but, escaping
examination, find their way to the Infirmary.

**Officers:** Wardens—1875, H. M. Peters; 1882-85, C. L.
Frey; Chief Clerk—George J. Wolf; Physicians—Dr. A. W.
Hagenbach (until 1884); Dr. A. G. Hoffman (1884); Dr. Theun-
ker (1885); Dr. E. Epler, assistant physician.

* No reports for the years from 1872 to 1875, nor for the years 1878, 1879, 1881, have been printed, nor can the items for those years be obtained.

**Cook County Insane Asylum.**—This institution
was erected on the county farm, a little over a block
northeast of the Infirmary, on ground dotted with
forest trees, and gradually sloping to an artificial lake.
The buildings front east.

Until 1870, the poor and insane were both kept in
one building. During that year a brick structure was
erected, four hundred feet in length, with a wing at the
south end having a depth of two hundred feet. In
1873, a large addition was constructed, and a fourth
story added to the original building. It was then able
to accommodate three hundred and fifty patients. The
amount expended for these buildings, including
laundry, sewers and three artesian wells (which cost
$21,655), was $59,410. Two additional buildings were
erected in 1885, at a cost of $135,000, in which the suggestions of the superintendent, Dr. Spray, were mainly adopted, resulting in a greatly improved arrangement. These additions give the Asylum a capacity for five hundred inmates.

The Infirmary and Insane Asylum, up to 1882, were under one management, a committee of five County Commissioners, which had entire control. This committee appointed a medical superintendent for the Asylum, and a warden, matron, engineer and storekeeper; but none of these officers had any power except as directed by the committee, nor had either institution any head. Quoting from the report of the State Board of Charities, 1878, "The warden is not head, and the superintendent is not head; the real head is the Committee, which had five heads." Of course, as pointed out by the Board, such an organization must have been very defective.

In 1882, the County Board adopted new rules for the government of both the Infirmary and Insane Asylum. Among other things it was provided that the warden and superintendent of the Asylum should be elected by the Board of Commissioners. These officers were placed more directly in the responsible charge of their respective departments, and given enlarged powers of management and control.

Complaints however, have frequently been made against the management, and, in 1885, charges were formally preferred, involving the sub-committee of Commissioners, the superintendent, warden and others. These charges were investigated by the State Board of Charities in November. The result of this investigation is not now fully known; but that a recommendation will be made, as urged by the superintendent in his testimony, to commit the management of the institution to a board of trustees, thus separating it from political control, there is not much question. Of the expediency of such an arrangement there is no doubt, for sufficient evidence was adduced during the progress of the investigation to demonstrate the inexpediency of a medical supervisor being hampered by men whose only qualification consisted in the political friendship of the appointing power. How intelligent government, or beneficial treatment, could be had with utterly inexperienced attendants, is an unanswerable query, and great credit is due to Dr. Spray for the success he has attained under such detrimental surroundings.

This Asylum was the first in the West to appoint female physicians, two of whom, Drs. Delia Howe and Alexander, were appointed in 1883-84. Graduated and trained female nurses have also been employed here, the first in the State, taking charge of the particular nursing and the administration of all drugs.

The figures below are compiled from the annual reports of the institution:
Included in the 449 discharged in 1885, were 231 who were sent to the Kankakee Insane Hospital. No reports were printed for the years from 1872 to 1875, 1879, 1881.

Officers.—Dr. John C. Spray was medical director from January 1, 1878, to September 1, 1882; and he was superintendent (in sole charge), from September 1, 1882, to September 1, 1884. H. A. Varnell was then appointed warden, and so continued. Dr. J. G. Kierman was medical superintendent from September 1, 1884, to September 1, 1885. Dr. J. C. Spray has been medical superintendent since September 1, 1885. Drs. Malcolm, Moore, and Thomas Conley, are assistant superintendents.

Dr. John Campbell Spray, medical superintendent of the Cook County Hospital for the Insane, was born at Bridgeport, Ind., on September 21, 1845, the son of James and Elizabeth (Owen) Spray, both members of the Quaker Church. The senior Spray was a merchant of Bridgeport, but died when his son John was nine years of age. The latter was enabled, however, to attend the common school and the Friends’ School of Bridgeport, during his boyhood, and, after having finished the study of the common English branches, was ambitious to go farther in his pursuit of education. He determined to make a way for entering the medical profession, and accordingly entered Earlham College, at Richmond, Ind., where he took a course in the higher English and classical studies. After completing his literary education there, he went to Indianapolis, where he entered the office of Drs. L. and C. H. Abbott and read medicine for three years. He then came to Chicago and studied general medicine and surgery in Bennett Medical College, graduating therefrom in the class of 1876. He had completed the full course of study as prescribed by that school of medicine—Eclectic—but he had a desire to become as thoroughly acquainted with every school of study as his means and time would permit. He entered the medical department of the Northwestern University in 1870, in the meantime commencing the general practice of his profession. He studied at the University until the fire of 1871, which destroyed his office and library. He then went to New York City, where he passed a year in general observation among the schools and hospitals. While in New York, he was married to Miss Mary A. Gunn, on August 25, 1872. His wife is a sister of Dr. R. A. Gunn, the well-known surgeon, and is a native of the north of Scotland. Shortly after their marriage, Dr. Spray and wife returned to Chicago, and he re-entered the Northwestern University, completed his studies and graduated therefrom with high honors in the spring of 1873. He then entered actively into practice in this city, and continued highly successful up to January 1, 1878, when he entered upon his duties as medical director of the Cook County Hospital for the insane, the Cook County Almshouse, and the Obstetrical and Venereal Hospitals, his appointment having been confirmed by the entire County Board of Commissioners in the fall of 1877. He continued as the chief director of these various institutions until September 1, 1882, when a change in the management of them occurred, and Dr. Spray was made medical superintendent of the Insane Asylum. To that he devoted his exclusive attention for the following two years, and, on September 1, 1884, he left the institution, owing to changes in the political aspect of the Board. However, in the following year he again received the appointment as medical superintendent of the hospital, and, in the fall of 1885, entered upon his eighth year as chief officer of the Cook County Hospital for the Insane. Dr. Spray during his attendance at the Northwestern University made a special study of nervous diseases, under the tutelage of Dr. Jewel, professor of that department of medical science in the University. Such a course of study materially assisted Dr. Spray when he entered upon the discharge of his duties as director of the hospitals, and the large and varied experience he has since had has been of infinite value to him. Almost every species of insanity has come under his observation, and, as he is heart and soul in the work, he studies and labors to effect a cure whenever and wherever possible. The management of the insane during his administration has been unquestionably the best, but the great disadvantage he has had to contend with has retarded his operations very much. The main hospital was built for the accommodation of three hundred inmates, but again and again its walls have contained nearly double the number, taxing to the utmost the energy and ability of Dr. Spray to provide for all that came. In the construction of the new hospital, in close proximity to the original buildings, Dr. Spray has, by his long and valuable experience, been enabled to introduce new features which are a marked improvement over the
old style. Dr. Spray is a man of advanced ideas, constantly studying new projects, and is always abreast of the best thoughts of the age. The prison scheme has forwarded plans that shall make the abiding place for the insane a hospital-home. He believes that every surrounding for an insane patient should be calculated to attract rather than to repel. Instead of hospitals for the insane tucked in the prison plan, confinement in dark rooms, shackling with irons, etc., his ideas are carried out in the new hospital by the arrangement of dormitories, corridors and private rooms, with plenty of light and air, and access to and from all parts of the ward. The Cook County Hospital for the Insane was the first in the West, if not in the United States, to introduce female physicians and trained nurses in the work of caring for the insane; and the innovation upon the old plan has, thanks to Dr. Spray, been of great benefit to the patients confined therein. Dr. Spray is a member of the Chicago and Cook County Medical societies, the Cumberland Club, Blair Lodge, No. 393, A.F.&A.M., and Oriental Consistory, S.R.P. and R. O. M., and is unable to devote much attention to social matters; and the fact that he has been absent from his post but a dozen nights in a period covering seven years fully demonstrates his devotion to the work in which he is so well interested.

The County Agency.—No description of the three charitable institutions of Cook County, the Hospital, Infirmary, and Insane Asylum, would be complete or fully comprehended without a knowledge of the operations and management of the office of the Cook County Agent. While established before the fire, that event brought it into more active and prominent usefulness. It is the key which unlocks the doors of each of the above-named institutions,—that organized instrumentality which every applicant for relief from the misfortunes of sickness, poverty, or a diseased mind, must use before he can become a beneficiary. The name of every such applicant is taken, and all the circumstances of his situation carefully inquired into by a "visitor." So far as possible, benefits are confined to "aged indigent persons, indigent widows and orphans, old decrepit persons and cripples, and such as are physically and mentally unable to earn a living." A "black list" is kept of all those applying for aid who are deemed unworthy. When the preliminary examination is concluded, the applicant is assigned to whatever place he may be entitled to enter.

This bureau not only passes upon the claims of those seeking admission to the County Hospital, Infirmary and Insane Asylum, but itself furnishes relief to needy families entitled to aid from the county. The amount expended in former years, especially soon after the fire, was much greater than at present. This is doubtless owing in part to the improved facilities for examination, and greater care exercised in looking up the correctness of the representations of applicants.

The annual expenditures by the county agent, for thirteen years, have been as follows:

* Including flour, corn, oat meal, rice, beans, barley and potatoes.

* Not given.

James O'Brien, county agent, son of Peter and Ellen O'Brien, was born in County Wexford, Ireland, on July 25, 1842. In the fall of 1856, he came to this country, and, after a short stay in Middletown, Conn., with relatives, went to Rome, N. Y., where he attended school until, in April, 1857, he came to Chicago. He finished his education at St. Patrick's Academy and at the Jesuit School. At the age of nineteen, he entered the employ of the Chicago, Burlington & Quincy Railway, and, after working in their yards in this city a short time, he became assistant yardmaster, which he retained for five years. He was connected with the Michigan Southern road one year, and was employed by the Michigan Central road until December, 1869. He then engaged in the liquor business on West Harrison, near Desplaines Street, and, in the fall of 1872, he elected alderman for the Ninth Ward (now the Eighth Ward), and was re-elected three terms successively. In 1875, he retired from the liquor business, and, after Mayor Harrison's election, was appointed chief sidewalk inspector, which position he held until April, 1883, when he became chief deputy assessor under Assessor Joseph Sokup. In the fall of 1883, he was appointed County Agent, which office he has administered with marked ability. His record as a public official is without blemish. Mr. O'Brien was married June 6, 1866, to Miss Bridget Long, of Chicago. They have nine children,—Peter J., John, James, Martin, Maggie, Laurence, Ellen, Robert, and Mary. He is a member of the A.O.U.W.

William C. Stevenson, chief clerk in the office of the
HISTORY OF CHICAGO.

County Agent, is a son of William and Isabella Stevenson, and was born at Norwich, Muskingum County, Ohio, on February 10, 1855. He is one of twins, both still living, their mother dying when they were three years old. When he was four years of age (his father having married again), his parents removed to Utica, Ohio, where he received his education, and assisted his father in the furniture business until twenty-six years old. In 1862, he came to this city, and shortly afterward went to Womona, Ill., where he engaged in the furniture trade until burned out in May, 1865. He then formed a partnership with M. Myers, under the firm name of Myers & Stevenson, and entered the drug business. Two years later he sold out his interest to Mr. Downey, and returned to Chicago in March, 1872, to assist in the re-building of the city. In connection with H. R. Myers, the firm being known as Stevenson & Myers, he went into the painting business at No. 118 South Clark Street, which he continued until March, 1874. He then received an appointment as clerk in the County Agent's office, and was made chief clerk thereof in 1885. His services have given the highest satisfaction to his superiors, and by his large circle of friends and acquaintances he is regarded as a thoroughly competent and reliable business man. Mr. Stevenson has been married on June 24, 1869, to Miss Zilpha M. Cowen, of Womona. They have three children.—William O., Eugene M., and George K. He is a member of Fort Dearborn Lodge, No. 9, A.O.U.W., and is a Knight of St. Albans Legion, No. 16, of the same order.

LOCAL TRANSPORTATION.

OMNIBUS LINES.—The passenger transfer and baggage express traffic of Chicago, has been practically controlled for more than thirty years by one man,—Frank Parmelee,—who started the first regular omnibus line in Chicago, on May 9, 1853, and whose business has shown a growth commensurate with that of the city.

The original outfit consisted of six omnibuses and thirty horses, and required the services of about a dozen men. There was then no regular line in the city, and Mr. Parmelee secured the control of the transfer business, by buying out the omnibuses of all the leading hotels. At that early day the service was in high demand, on account of the primitive condition of the roads and the distance of the depots. The Michigan Central depot was then located on the lake shore, at Sixteenth Street; and as all the Eastern land traffic came this way, Mr. Parmelee was obliged to inaugurate a line of covered Concord wagons, specially constructed for service on the sandy and muddy roads of the period. Although other lines have occasionally entered the field, Mr. Parmelee's hold on this class of business has continued firm, and there has been practically no opposition for several years. The service at the present time employs eighty omnibuses, seventy baggage-wagons, two hundred and fifty horses and two hundred men, the number being somewhat greater in the season of summer travel. The large stables required for the accommodation of this extensive business, were built by Mr. Parmelee, and are very complete in their appointments. The general city office of the lines is in charge of J. W. Parmelee, eldest son of the proprietor.

The dry goods firms of Marshall Field, and Davis, Morse & Co., run a line of two-horse omnibuses between the Chicago & North-Western Railway Depot and their respective places of business.

THE NORTH CHICAGO RAILWAY CO.—Immediately after the fire, this Company, which had been a great sufferer by that calamity, set to work to repair the damage and put the line again into running order. Besides having, since that time, constructed over six miles of double track and nearly four miles of single track, they have erected car-houses at the corner of Center and Racine streets, Clybourn Avenue near Racine, corner of Clybourn Avenue and Cooper Street, corner of Wrightwood Avenue and Sheffield, corner of Clark Street and Drury Court, Larrabee Street near Center, Sedgwick near Ewingia Street, corner of Racine Avenue and Belden; stables on Kroger Street, corner of Clybourn Avenue and Racine, corner of Clybourn Avenue and Ashland, on Lill Avenue near Sheffield, on Larrabee near Center, and corner of Jay Street and Belden Avenue; blacksmith shops on Kroger Street, corner of Clybourn and Ashland avenues, corner of Wrightwood Avenue and Sheffield, corner of Clark Street and Drury Court; and the fine building in which are situated the general offices, at the corner of Clark and Division streets. The latter was erected in 1883, is a three-story structure of brick trimmed with stone, and cost, with site, about $55,000.

As to the lines of road which have been constructed entire since the fire, and which now are included in the North Division system, one and one-eighth miles of double track were completed on Lincoln Avenue from Center to Wrightwood, in 1872; two and one-fifth miles of double track on Wells Street from Randolph to North Clark, by November, 1875; one and one-eighth miles of single track on Center Street, from Clark to Racine Road, and four-fifths of a mile on Webster Avenue from Lincoln Avenue to Racine Road, in 1878; one and two-fifths miles on State Street, from Lake to Clark, via Division, and one-quarter of a mile on Larrabee, from Center to Webster Avenue, in 1880; one and two-fifths miles of double track on Clybourn Avenue from North Avenue to Fullerton, in 1881; half a mile of double track on Sedgwick Avenue, from Center to North Avenue, a mile of single track on Market, from Chicago Avenue to Division, in the year 1882; seven-eighths of a mile of single track on Garfield Avenue, from Lincoln Avenue to Racine Road, and one-half a mile on Fullerton Avenue, from Lincoln Avenue to Racine Road, in 1884; one-half mile on Racine Road from Fullerton Avenue to Clybourn, commenced in 1878 and completed in 1884.

The officers of the road, since date of organization, have been as follows:

John B. Turner, president, February 18, 1859, to January 8, 1867; V. C. Turner, secretary and treasurer from February 18, 1859, to July 4, 1865, vice-president from July 4, 1865, to January 8, 1867, and president from January 8, 1867, up to date; H. N. Towner, secretary and treasurer, July 4, 1865, to December 6, 1873, and Hiram Crawford, from December 6, 1873, to date; Lucian Tilton, vice-president, January 12, 1875, died in March, 1877; George W. Dunlap, vice-president, from January 20, 1879, to April 5, 1881.

CHICAGO CITY RAILWAY CO.—Between 1865 and 1875, the lines of this system were not extended to any great extent; but, during the latter year, the Wabash Avenue line was built, also a line on Indiana Avenue from Thirty-first to Thirty-ninth Street, and one on Thirty-ninth from Cottage Grove Avenue to State Street. In 1877, cars were placed on Halsted Street, and run to the city limits.

In October, 1880, S. W. Allerton, one of the directors of the Company, visited San Francisco, and witnessed the successful operation of the cable system.
LOCAL TRANSPORTATION.

The lines which had been there constructed were in fine working order, but it was yet to be demonstrated that the system could be utilized in a region of harsh winters, deep snow and frosts. Mr. Allerton brought the matter formally before the Company, and the day after his return from California, C. B. Holmes, its superintendent, started for San Francisco to conduct a personal investigation. Upon Superintendent Holmes's return to Chicago, arrangements were at once entered into for putting the system into operation. The brick structure between Nineteenth and Twentieth streets was completed during the season at a cost of $50,000. It stood structure high, with stone facings, its dimensions being 151 by 250 feet. The four engines which operate the cable were manufactured at Worcester, Mass., by Jerome Wheelock, at a cost of $35,000. The boilers, costing $30,000, were made by Babcock & Wilcox of New York City. On January 17, 1881, the City Council granted the company the right to operate the cable; and, on June 27, ground was broken near Harmon Court. The State-street line, to Thirty-ninth Street, was ready for use in June 1881, after there had been used in its construction 8,000,000 pounds of iron, 250,000 bolts, 50,000 wagon-loads of gravel, 30,000 barrels of English cement and 12,000 of American cement, 350 cords of stone, and 213,000 brick. In the work of construction, one thousand five hundred men and two hundred teams were employed. One of the greatest obstacles to be overcome was that met with in the water, gas, and sewerage pipes, which, in many cases, had to be almost entirely reconstructed, but, under the personal supervision of C. B. Holmes, the work was successfully accomplished. Four hundred men were instructed in the operation of the system; and, on January 28, 1882, the first public trial took place. On the afternoon of that day, a train of seven cars, with two grip-cars, under the guidance of Superintendent Holmes, was started from the corner of State and Madison streets, and conveyed the city and county officials, with a number of prominent citizens, to the engine house, on Twentieth Street, making the run in twenty-one minutes. Here a platform had been erected, from which speeches were made by Mayor Harrison, Mr. Holmes, Judge Caton, S. B. Cobb, ex-president of the Company, William Bross, General Henry Strong, and others.

In May, 1882, ground was broken for the Wabash and Henry Grove-avenue line, at Twenty-first Street. It was completed during the season, 60,000 wagon-loads of gravel, sand and crushed stone, 20,000 barrels of cement, 230,000 brick, 36,000 square yards of granite paving, 9,000,000 pounds of iron, 275,000 bolts and 550 cords of rubble stone, being used in its construction. Over $2,500,000 were expended in the laying of nineteen miles of single track and the twenty miles of cable, the equipment and erection of buildings.

During the first year of its operation, over six million more people were transported than during the previous year, under the old system.

Many marked improvements have been introduced in the Chicago system. The splice used in San Francisco proved virtually useless, and a different one was invented by Thomas Nash, an employee of the road. Another important invention is the moment brake, the patenentee of which is T. L. Johnson, of Indianapolis. Its advantage is that it comes in contact with every wheel of the train, and is an almost instantaneous check. As now perfected, the cable system of Chicago transports one hundred thousand people daily, with ability to move five times as many, and actually does the work of two thousand five hundred horses. In an address delivered by Superintendent Holmes before the American Street Railway Association, on October 19, 1884, he gave the following interesting details:

"The construction consists of an underground tube, through which the cable, supported by pulleys, passes in continuous motion and at a uniform rate of speed. The tube is provided with sewer connections for drainage, and an open slot on the top through which passes a gripping device which is attached to a car. The cable is kept in motion and its speed regulated by a stationary engine or engines. The rope is endless, and the splices must possess great strength but not increase the diameter of the rope, as any enlargement would incur severe and dangerous traction. It should be coated with pine tar and lubricated with linseed oil to protect it from rust and the too harsh action of the grips. The grips which impart motion to the cable, and the sheaves which carry it around the sheave-gear, should be made of a material about as hard as, and the same as, and the hilly or level character of the road. In cases of sharp deflections from a level, pulleys are required to depress the rope, as these must be added to allow for the grip to pass over them, the wear upon the cable is serious. To meet these conditions, flexibility and toughness, combined with strength and freedom from crystallization, are needed. Another important feature in a cable system is the device for avoiding the necessity of having the rope extend above the height of the road. The extent of vibration will depend on its length, amounting in one four miles long to some five feet, and is caused by the sudden grasping of the cable by a heavily-loaded train. As the rope settles some two and a half inches between every two carrying-pulleys over the entire road, the sudden tightening and stretching of the cable produces an accumulation. If this were not instantly taken care of, the rope would drop from the carrying-pulleys and shear with great force. Provision is therefore made for taking care of the permanent stretch of the cable, amounting, sometimes, to two hundred feet. The gripping attachment consists of a lever and a lower lever, between which the rope is passed. As the movement of a lever, one pound pressure on the handle of which produces four hundred pounds on the cable. A small sheave is placed in each end of the jaw, upon which the cable rides while the car is standing. Provision is also made for throwing the grip, and entirely free from it, at any time or place. The length of the grip is such that it passes some three inches above the carrying-pulleys, and does not come in contact with them. The cable is brought into the open jaws at an elevation of one-half inch, at an angle on one side of the tube. The necessary for lining the grip performs two thousand miles of service, when it requires renewal. In Chicago, a speed of eight and one-half miles an hour is attainable over one-half the lines, and nine and one-half over the other half, except in a few places, where the speed is one-half the above rates, and can be made as much less, at any point, as may be desired. More power is required during a snow storm, but, in ordinary conditions the operation of twenty and one-quarter miles of cable in Chicago has required 472 horse-power, of which 359 was used in moving the machinery and cables and 55 to move 240 cars. The cable is raised about twenty thousand pounds, and is doing work which would require two thousand five hundred horses. In Chicago, the cost was perhaps greater. It would be necessary in most cities, owing to the nature of the ground. Along the thoroughfare where it operates and even over parallel and cross streets, the real estate has increased in value from fifty to two hundred per cent.

Since the construction of the Halsted-street line to the city limits, in 1877, the following extensions of the horse railway system have been made:

In 1881, on State Street from Thirty-ninth to Fifty-fifth Street. In 1882, to Sixty-third on the same thoroughfare. In 1883, on Halsted Street from the city limits to Forty-seventh Street. In 1884, on Halsted Street to Sixty-third and on Sixty-third to Clark; on Wentworth Avenue from Thirty-third to Sixty-third Street, on
Archer Avenue from the River to Brighton Park, on Hanover and Butler streets from Archer Avenue to Thirty-first Street, on Thirty-first from the Lake to Archer Avenue, on Ashland Avenue from Archer to the city limits, and on Stanton Avenue from Thirty-fifth to Thirty-ninth Street; a total of over twenty-eight miles built in 1834, the largest amount in the history of the road. The Chicago City Railway Company now (1885) operates, including the cable system, eighty-seven miles of track.

Following are the principal officers of the Company, from the time of its incorporation up to date:

**Presidents**—Liberty Rigelow, March 28, 1859, to September 26, 1864; Benjamin F. Carver, September 26, 1859, to April 5, 1861; William H. White, April 5, 1861, to August 11, 1863; David A. Gage, August 11, 1863, to August 8, 1864; S. M. Nickerson, August 9, 1864, to January 11, 1872; M. D. Hennessy, January 11, 1872, to January 8, 1874; S. R. Cobb, January 8, 1874, to May 24, 1881; Daniel A. Jones (acting), May 24, 1881, to January 23, 1882; C. R. Hoiles, January 23, 1882, to date.

**Secretaries**—George W. Fuller, March 28, 1859, to January 13, 1868; M. D. Hennessy, January 13, 1868, to January 11, 1872; J. F. Johnson, January 11, 1872, to January 9, 1873; W. N. Evans, January 9, 1873, to April 25, 1884; H. L. Windsor, April 25, 1884, to date.

**Treasurers**—George W. Fuller, March 28, 1859, to January 13, 1868; M. D. Hennessy, January 13, 1868, to January 11, 1872; J. F. Johnson, January 11, 1872, to January 9, 1873; W. N. Evans, January 22, 1873, to January 29, 1873; T. C. Pennington, January 29, 1873, to date.

**Superintendents**—D. A. Gage, May 11, 1860, to August 11, 1863; Franklin Parmerlee, August 11, 1863, to August 8, 1864; Charles H. Walker, August 9, 1864, to December 1, 1866; Daniel Thompson, December 1, 1866, to January 13, 1870; K. T. Crane, January 13, 1870, to January 13, 1873; C. B. Holmes, January 13, 1873, up to the present time.

**The Chicago West Division Railway Company.**

The losses of the West Division Railway Company, by the fire of 1871, were much less than those of the companies operating the lines of the North and South divisions. No portion of their tracks was injured except for the comparatively small distance lying east of the river. The general offices of the company on State Street were burned and their business interrupted for a few days. Their total loss by the conflagration was not in excess of $20,000, and their carrying power was in no wise diminished. The barns and rolling stock of the company, and nearly the whole mileage of tracks were in the West Division. They soon began, indeed, to transport an increased number of passengers, owing to the great addition to the population of the West Division. Immediately succeeding the fire, the stream of travel was so great between the South and West divisions, that, to accommodate it, the West Division Railway Co. and the Chicago City Railway Co. established a joint line between Twenty-second Street and Union Park, over which passengers were transported for one fare. This, besides being a great convenience, enjoyed an immense patronage. It was continued for several months.

From this period to the beginning of 1875, but few new lines were opened by the company. The rapid growth of the West Division then demanding greater street railway facilities, new construction began imperative. The most important of the new lines opened was probably the Indiana-street route; and important extensions have been made on Chicago Avenue, Ogles Avenue, South Halsted Street, Canal Street and Canalport Avenue, West Twelfth Street, Milwaukee Avenue, Randolph and Lake streets, Madison Street, Van Buren Street and Blue Island Avenue.

In 1881, the employes of the company struck for an increase of wages to twenty cents per hour, causing a delay to traffic of about thirty-six hours. Their demands were finally acceded to. The present officers of the company attribute the success of the more recent strike of June, 1885, to the settlement then made. On the latter occasion they asked for the reinstatement of men belonging to the Union of street-car employes, who were then discharged by the company for various reasons, and were again successful.

On July 30, 1883, the corporation received from the municipal government a general extension of its franchises for twenty years.

In 1884, this corporation operated its lines over seventy-five miles of track. It issued a daily average of 3,246 horses, made 1,631,503 round trips, and hauled its cars a total of 7,735,335 miles. It is now (1885) using 3,733 horses and 555 cars, which make an average of 3,029 round trips, covering 22,500 miles a day. The company employs 2,200 men, 1,100 of whom are conductors and drivers.

The present officers are—President, J. Russell Jones; Vice-president, Benjamin F. Campbell; Secretary and Treasurer, George L. Webb; General Superintendent, Dewitt C. Cregier.

Robert Heartt, foreman of the O'Neill-street barns of the West Division Horse Railway Company, was born at Troy, Rensselaer Co., N. Y., on October 3, 1815. Although a clothes by trade, when he came to Chicago, October 12, 1836, walking all of the way, he commenced life in the West by working on the horses in the United States, then by driving a stage for Lathrop Johnson on the old Milwaukee road. In the spring of 1837, he was appointed assistant builder to Nelson R. Norton, who had the contract for constructing the Dearborn-street draw-bridge, at 8¢ a day and twenty-five per cent. of all the money expended. Mr. Heartt spent the succeeding year in fishing at Green Bay, and, in the summer of 1839, he became a clerk in the Chicago warehouse owned by John Kinzie and David Hunter. During 1840, he became known throughout Illinois, Wisconsin and Indiana, engaging as he did in hauling grain and produce to and from their markets. A fine farm in Mercer County engaged his attention the succeeding year, but as his market for his grain was one hundred and eighty miles from the place of raising it, he returned to Chicago, and, in 1844, engaged again in the teaming business. He subsequently was employed by Charles M. Gray, the well-known manufacturer of cradles, and when Mr. Gray obtained from C. H. McCormick a contract to turn out one hundred reapers and a manufactory was established on the North Side, under the firm name of Gray, McCormick & Ogden, Mr. Heartt became engineer, and so continued for three years. In the spring of 1850, he removed to Niles, Ill., and built a saw-mill which was principally engaged in sawing logs for the Northwestern (or Milwaukee) plank road. For many years, until 1864, he was engaged in traveling over the South, purchasing horses and disposing of them in Kentucky. Upon returning to Chicago, he was engineer in his brother's tobacco factory, went into the livery business in 1865, and established the Lumberman's Omnibus Line, on Halsted Street, in 1869. Although this was an unfortunate enterprise in which he lost heavily, he continued in it until 1875. He then connected himself with the West Division Company, having held the position of foreman from the commencement to the present time. Mr. Heartt was married on January 6, 1856, to Sally Ann Huntington, a native of New York, and celebrated his golden wedding in Chicago. He is the son of Daniel B. Heartt and Jane (Culender) Heartt, who had the pleasure of observing the first of Chicago's golden weddings. His mother is still living, being in her ninety-seventh year. Mr. and Mrs. Heartt have but one child, William, who is a member of the Fire Department. Daniel B. Heartt, another son, was thrown from his engine in 1866, while going to a fire, and received fatal injuries.
PARKS AND BOULEVARDS.

These elements of the beauty of Chicago are worthy of an extended description; not alone for the addition thus made to its appearance, but also for the incalculable advantage to the general public. For the wealthy, the Boulevard drive is a hygienic luxury, and for the poorer citizen the Parks afford a breathing-place, where pure air can refresh him after his weekly toil amid vitiated atmosphere.

As may be seen, by reference to the map, the boulevard system encircles the entire city, and renders the parks readily accessible to the visitor. As an additional incentive to the population to frequent the parks, the authorities supply free concerts there at stated periods during the summer. The desirability and utility of this branch of Chicago’s reality can not be too highly eulogized, and it is undoubtedly true, that the system of parks and boulevards in this city is unequaled by any other upon the continent.

SOUTH PARK.

The South Park Commission had its inception in the passage and approval, on February 24, 1869, of “An Act providing for the location and maintenance of a Park in the towns of South Chicago, Hyde Park and Lake.” By the provisions of this Act, a board of five members was to be appointed by the Governor, their term of office being five years. The lands to be selected by the commissioners for park purposes were designated by the Act; and it was further directed that in case the title to the lands so designated could not be acquired by purchase at an agreed price, or by gift, proceedings for condemnation were to be instituted under the provisions of the Act of June 22, 1852, relating to the “Condemning right-of-way for purpose of Internal Improvements.” A method was provided for estimating the benefit or damage to property-owners, for borrowing money, and for taxing property to meet the annual interest upon such bonds, as well as the amount needed annually for the improvement, maintenance and government of the park. At an election, held on March 23, 1869, the Act was ratified. On April 16, 1869, an Act amendatory of and supplemental to the Act of February 24, was approved, and on the same day Governor Palmer appointed as commissioners, John M. Wilson, George W. Gage, Chauncey T. Bowen, L. B. Sidiway and Paul Cornell. On April 30, an organization was effected by the election of John M. Wilson as president, Paul Cornell as secretary, George W. Smith as treasurer, and George W. Gage as auditor.

The first work of the Commission was to select the land designated by the Act, to survey the same, and inquire as to its value. Its probable cost was estimated at $1,865,750, and, under the terms of the Act, the Commission made application to the Circuit Court for the appointment of assessors to impose that amount upon the property benefited. The Circuit Court denied the application, and the Supreme Court thereafter awarded a mandamus directing the performance, by the lower tribunal, of the act requested. After the appointment of the assessors, it was learned that the cost of the land needed would greatly exceed the original estimate. By Act of June, 16, 1871, the Board was authorized to revise and enlarge their earlier estimate; and under the power so conferred, it was decided to increase the assessment to $3,320,000. The Commission issued bonds, secured upon the park and improvements, for the full amount of $2,000,000 therein named. Most of the bonds were negotiated in New York, and from them, together with those issued in part payment for lands purchased, the Board realized $1,827,399. More or less difficulty was encountered in acquiring title to the land condemned, and considerable litigation ensued, appeals from the judgments of condemnation being taken, and carried, in many instances, to the Supreme Court.

In 1869, the Commission employed Olmstead & Vaux, landscape architects, of New York, to furnish plans and specifications for the improvement of the park grounds. These gentlemen, after a careful topographical survey, submitted an elaborate scheme, covering all the land adopted by the Board. Work was at once commenced under this plan, and was carried forward rapidly. A nursery, comprising five acres, was soon opened, and there were set out sixty thousand young trees, of various kinds, at cost of about $17,000. Work on the roadways and sewers, as well as the grading and preparation of superficial planting space, were progressing rapidly, when the conflagration of 1871 necessitated a suspension of operations.

The offices of the Commission, which were supposed to be fire-proof, suffered with the surrounding buildings. The loss was a serious one; they contained the original plans and specifications for the improvement of the park; the atlases of the towns of Hyde Park and Lake, showing all the subdivisions in those towns, and the divisions and ownership of the unsubdivided lands; all the records of the Board and books of account, together with all contracts, estimates, accounts, and vouchers, subsequent to May 5, 1871; and also the special assessment-roll for benefits, nearly completed. The Commission met the emergency, not only by the suspension of work, but by the discharge of all employes except a small police force and a few men employed to protect and preserve the Board’s property from trespass and destruction. Those members of the Commission who were entitled to salary or compensation declined to receive any subsequent to September, and the chief engineer, George W. Waite, relinquished all claim to any salary after October, 1871. The only contracts entered into by the Board, during the remainder of the fiscal year, were for the sinking of an artesian well and for the purchase of standard trees to replace those which failed to survive the severe drought of the previous summer.

It was not possible, however, that there should be a long interruption of the work of improvement. Apart from the legal questions relating to the obligation resting upon the Commission to proceed with the work with due diligence, justice to those whose property was to be assessed, and good faith to the bond-holders, alike required it. In the following year, new boulevards were laid out and graded; water-mains were extended; old sewers were examined and cleaned, and a substantial new sewer, 1,900 feet long, emptying into the canal, was built; and one hundred and fifty acres were plowed and fertilized.

On September 1, 1872, W. H. S. Cleveland was appointed landscape architect. Up to that time, no
ornamental work had been done on the park, and the only portion of its area which had then been made accessible to the public was the northern extremity of what was known as the Upper Division. Across this portion, Bayard Avenue had been constructed, connecting the southern extremities of the two principal avenues of approach from the city, forming a continuous pleasure-drive of four miles in length. Grand (then known as South Park) and Drexel boulevards had been partially laid out, but planting had been done only on the first. The design for the former avenue contemplated a road two miles in length and two hundred feet in width; a driveway fifty-five feet wide occupied the center; on either side was a grass border, twenty feet in width, the borders being separated from side roads, intended for business traffic, by a row of trees. The proposed length of the west division of the park were put under cultivation; new water-tanks were erected, supplied by mains from the artesian well; artificial lakes were excavated; a temporary music-pavilion erected; and an old building neatly fitted up as a restaurant. Open-air concerts were given weekly in the pavilion, by Hans Balatka’s orchestra, the attendance being so large as to necessitate the throwing open of the adjacent grounds to the public. A new greenhouse was built during that year, making three in all; and, a large quantity of valuable plants and shrubs having been forwarded to the Commission from the Botanical Gardens, at Washington, D. C., many citizens conceived the idea that a well-organized botanical garden would be an ornament to the park, and also a source of great pleasure and practical value as a means of education. The Commis-

of Drexel boulevard was a mile and a half, and its width two hundred feet; the original design comprised a central ornamental space, one hundred feet wide, arranged with paths and with grass-plats, planted with trees and shrubbery, a driveway running on each side. Under Mr. Cleveland’s direction, the central driving-space was narrowed to ninety feet, the driveway on each side being widened five feet. During this year, five hundred trees were set out along the lines of these two boulevards. Another nursery was planted on the line of Bayard Avenue, containing more than twenty-five thousand specimens, together with evergreens numbering some twenty-one thousand specimens, as well as about eight thousand shrubs.

During 1874, the work of improvement was pressed forward rapidly, although the Commission found itself much hampered in its work by the failure of the authorities to enforce the payment of delinquent taxes, which, in three years, amounted to more than one-eighth of the total levy; when to this was added the commissions paid to town and county collectors, the actual deficit reached nearly fifteen per cent. of the amount allowed by law. The character of the improvements was similar to that of preceding years. About two hundred acres

Entrance to Jackson Park.
mens of native plants were set out in the garden, and
seeds of various species soon collected in sufficient
quantity for exchange.

In 1875, the Board, by resolution, named that por-
tion of the park between Fifty-sixth and Sixty-seventh
streets, and Stony Island Avenue and Lake Michigan,
hundred and fifty acres had been tilled, seeded down,
and planted with forest trees of from three to twelve
inches in diameter, that portion of it known as the
“south open green” had been laid out as a lawn—prob-
ably the most extensive in America; and the four
main boulevards, Grand, Drexel, Pavilion and Oakwood,
had been built and completed, affording

eleven and one-half miles of road. A
connecting drive between the east and west
divisions of the park, besides other minor
boulevards, some five miles in length, had
been constructed. The nursery furnished
several thousand trees each season, which
were planted in the park, their places in
the nursery being supplied by young stock.
The floral department and botanical gar-
den were well established, with good hot-
houses, steam-forcing apparatus, etc., and
the Board found itself able to furnish there-
from all the plants for the walks and drives
in the parks.

Many difficulties had been encountered
by the Commission in obtaining land,
owing to the exorbitant prices demanded
by property owners as soon as the park
bill went into effect, and on account of
vexatious legal delays where the parties
interested could not agree. The assess-
ments had been confirmed by the court
and divided into eight annual installments,
bearing interest at the rate of seven per
cent from the date of confirmation, June
27, 1872. The financial panic of 1873
had materially crippled the resources of
many property owners, who were com-
pelled by necessity to contest the several
installments. Another, and smaller, class
of contestants were influenced by a senti-
ment of general hostility to the enterprise.

Judgment was recovered in the County
Court, on the delinquent list, for the first
and second installments, but refused by
that tribunal on the third, the court being
of opinion that the revenue law had so
modified the mode of collection that no
judgment could be rendered. From the
decisions in reference to the first and sec-
ond installments the property-owners ap-
pealed; while the Commission took an
appeal from that relative to the third in-
stallment. All the legal questions involved
were presented and argued at the Septem-
ber term of the Supreme Court, in 1875,
and the validity of both special assessment
and tax upheld.

The decision of the Supreme Court
had the effect of bringing into the trea-
ury of the Commission more than $800,000, during
1876. Three park-plaques were also introduced in
that year, similar to those used in Eastern cities.

Owing to the financial stringency of the period, the
Commission levied a tax for 1876, of $200,000 only, in-
stead of the usual $300,000. Of this amount more than
$142,000 were expended in paying interest on the
bonded debt, leaving a balance very little larger than
was necessary for the maintenance of the parks and
boulevards. There were virtually no funds with which
to extend improvements. A large proportion of the
money received during the previous year, as well as
of that received this year, from the payment of special

Lake Park, and the twenty acres at the intersection of
Western Avenue and Pavilion Boulevard as Gage Park,
the latter being named in memory of George W. Gage,
one of the original members of the Commission, who
died on September 24, 1875.

The labors of the Board, up to 1875, may be briefly
summed up as follows: The whole amount of land
purchased was one thousand and forty-five acres, of
which seven hundred and eighty acres had been paid
for in full, and abstracts of title were being examined
with a view to the purchase of an additional half-mile
of frontage on Western Avenue. Nearly four-fifths of
the west division of the park had been completed; three
assessments in consequence of the Supreme Court's decision, was absorbed in the liquidation of out-standing indebtedness. That indebtedness, which at one time amounted to some $800,000, owing to the non-payment of the taxes and assessments as contemplated by the park laws (the destruction of the assessment-rolls in the fire of 1871 having delayed for eighteen months the collection of the park revenue), had been, at this time, nearly all paid off. In addition to these payments, $200,000 of South Park bonds, which would have matured on January 1, 1878, had been retired, and the financial outlook was favorable.

During the years following, unimproved portions of the acquired territory were brought under cultivation, new drives were built, and new features of ornamentation were carried forward.

On July 21, 1877, the Board, by resolution, suspended the further operations of the Botanical Board, placing the garden under the general control of the State, for the purpose of making improvements. This action was taken to avoid the large and constantly increasing outlay required for its maintenance, which involved constant care and enlargement.

In 1880, the Commission owed no floating debt; the interest on the bonded indebtedness had been reduced to $37,300; and a sinking fund had been created, under the operation of which a certainty existed that the bonded debt would be paid at maturity. Great suspicion had been exercised in the acquisition of the territory selected (under the law) for park purposes. Every precaution was taken to prevent any undue encroachment upon the Board's funds. By December 1, 1880, the Commission had acquired title to all the lands required for park purposes, with the exception of one lot, comprising one acre, used for school purposes, and some two hundred acres, in the East Park, known as the Phillips tract. Possession of the land last mentioned had long since been obtained, but owing to the conflicting claims of various owners and pseudo-owners the title has not yet been quieted. Much litigation has been had, and, the property having been divided, separate suits as to different portions were brought in both the State and United States courts. A motion for a new trial in the former tribunal is now pending, in order that a larger verdict may be secured by claimants than that rendered on December 16, 1884, which was for $155,400—a material reduction of that given on November 5, 1883, which was for $350,000.

Despite the unavoidable expenses connected with litigation incident to a faithful execution of the trust reposed in the Commission, the Board found sufficient funds at their disposal available for purposes of improvement. New and substantial buildings for necessary uses were erected and ornamental structures sprang into existence on every hand.

As time progressed, West Park became Washington Park, while the memory of President Garfield, was perpetuated in one of the principal boulevards. An extensive and substantial breakwater was erected. In 1884, a pavement beach was laid in Jackson Park along the lake shore, from Fifty-sixth Street to the Fifty-ninth Street inlet, and the breakwater was extended to a point about two hundred feet south of Sixty-third Street.

One of the most beautiful adornments of the parks was that furnished by Messrs. Drexel Brothers, of Philadelphia, who, in memory of their father, after whom Drexel Boulevard was named, placed at the head of that street was a bronze fountain of exquisite design and elegant workmanship.

At a comparatively early period in the history of the South Parks, the Commission was anxious to secure the control of Michigan Avenue and Thirty-fifth Street (from Michigan Avenue to Grand Boulevard), as otherwise the South Park system would be incomplete. Considerable litigation resulted over the Board's efforts to carry out its design, but a decision of the Supreme Court, in 1880, confirmed the Commission in its possession. The plan decided upon for its improvement contemplated flagstone sidewalks, eight feet in width, with grass-plots between the sidewalk and the stone curbs; elm trees were to be supplied, where not already growing, and uniform lamp-posts erected; a fifty-foot driveway was to be constructed, eight feet on either side to be of stone or composition block, and the center thirty-four feet to consist of a surface of six inches of clear bank gravel, upon a foundation of twelve inches of limestone Macadam. The estimated cost of the improvement was $551,063. The Commission adopted the necessary ordinances, prepared assessment-rolls, and filed them for confirmation. A portion of the property abutting on the line of Michigan Avenue between Jackson Street and Park Place, and work was pressed forward on the remainder of the proposed boulevard as rapidly as the collection of assessments would permit. The care of the boulevard on Michigan Avenue and Thirty-fifth Street has entailed a large annual outlay, and the Commission has felt indisposed to assume additional expense. No legislative sanction for an increase of the tax levy has been asked, however, the Board being of the opinion that their present resources—despite the fact of their taxation for the maintenance of Michigan Boulevard—are sufficient for a reasonably rapid improvement of the property under their care.

The Commission, at the close of 1884, owed no floating debt. The financial condition of the Board, as set forth in the report of that year, may be thus summarized:

Bonded debt due December 1, 1883:
- Seven per cent., due 1894, $203,000
- Six per cent., due 1895, $100,000
- Five per cent., due 1900, $45,953.23
- $351,063

Reduction in 1884, through bonds paid January 1, 1885:
- Seven per cent.
- Six per cent.
- Five per cent.
- $594,000

It is believed that this indebtedness will be discharged at maturity, through the operation of the interest and sinking fund.

The names and terms of office of the members and officers of the South Park Commission, from the date of its organization until December 1, 1884, were:

Commissioners.—John M. Wilson, from April 16, 1869, to May 2, 1872; George W. Gage, from April 16, 1869, to September 24, 1875; Chauncey T. Bowen, from April 16, 1869, to February 1, 1871, and from May 2, 1872, to 1877; L. B. Silvey, from April 16, 1869, to 1873; Paul Cornell, from April 16, 1869, to 1873; Potter Palmer, from February 1, 1871, to April, 1874; James Morgan, from April, 1874, to 1879; Cornelius Price, from 1876, to 1881; John B. Sherman, from 1877; John R. Walsh, from 1878; Martin J. Russell, from 1879; Bernard Callaghan, from 1881; Louis Wahl, from 1883.

Presidents.—John M. Wilson, from April 27, 1869, to May 2, 1872; Chauncey T. Bowen, from May 2, 1872, to 1876; James
Morgan, from 1876, to 1879; John R. Walsh, from 1879 to 1883; Bernard Callaghan, from 1883.

Secretaries.—Paul Cornell, from April 30, 1869, to March 1, 1871; W. L. Greenleaf, from March 1, 1871, to March 19, 1873; H. W. Harmon, from March 19, 1873, to 1879; Paul Cornell, during 1879; H. W. Harmon, from 1880.

Auditors.—George W. Gage, from April 30, 1869, to March 13, 1871, and from March 6, 1875, to September 24, 1875; L. B. Sidway, from March 13, 1871, to March 6, 1875, and from September 24, 1875, to March, 1876; Paul Cornell, from March, 1876, to March, 1877; Cornelius Price, from March, 1877, to 1880; Martin J. Russell, from 1880.

Treasurers.—George W. Smith, from April 30, 1869, to March 1, 1870; J. Irving Pierce, from March 1, 1870, to March 13, 1871; Isaac N. Hardin, from March 13, 1871, to March, 1872; J. Irving Pierce, from March, 1872, to March, 1877; George Schneider, from March, 1877, to 1882; George M. Iogg, from 1882 to 1884; Thomas Brennan, from 1884.

Superintendents.—W. M. Berry, from 1872 to 1881; M. W. White, from 1881.

Engineers.—J. H. Sams, from 1872 to 1881; J. F. Foster, from 1881.

Attorneys.—Joseph F. Bonfield, from 1880 to 1881; Duple & Judah, from 1881 to 1882; M. W. Fuller, from 1882.

Collectors.—W. L. Greenleaf, from 1872 to 1879.

The following table shows the areas and distances of the South Parks and boulevards, as completed and improved, to 1884:

1884...41,116.00

Total...$8,173,553.08

Following are given some sketches of real-estate men. This class of our citizens, by their energy and foresight, have been among the most earnest promoters of the park system, and to their indefatigable perseverance the success of the movement may be largely ascribed:

Nelson Thomasson entered into the real-estate business in 1869, while on "awaiting orders," and resigned from the Army in 1879. He was born in Louisville, Ky., in October, 1849, and was educated in that State. His father was an old line Whig and a representative in Congress for many years from Kentucky, during the same period in which Hon. John Wentworth represented Chicago in the House. Mr. Thomasson came to Chicago in 1887, and studied law in the office of Judge John G. Rogers, graduating from the Law College of Chicago in 1860. When the war broke out he enlisted and immediately went into the Sturges' Rifles. He was promoted October 31, 1861, to the rank of second lieutenant, in Co. "E," 5th United States Infantry; to first lieutenant, Co.
reached Chicago. S. connected the suburban Illaines, Henry's related 1870, Lake, the prominent left portion Maquoketa, is the He Winnepeg. New that practical their valued real estate; he also deals extensively in Boulevard property. In October 1869, he bought one hundred and sixty acres in Section 27, Town 38, Range 14, for which he paid $450 an acre, and in February, 1869, he sold the same for $500 an acre, making over twenty-five thousand dollars by this single operation in five months; this property is now designated as Nelson's subdivison. He is a member of Oriental Lodge, No. 38, A.F. & A.M., and of Apollo Commandery, No. 1, K.T.

JOHN ALLES, JR., was born on November 7, 1851, at Winterset, Iowa, in a family of Welsh ancestry. His father is an old resident of Winnetka, having located there in 1835. Mr. Alles received his early education in the schools of his native village, and in 1865, when he was fifteen years of age, his father, a farmer, removed to a farm bordering to his father, situated near Winnetka in Cook County. For two years he continued his farming, and at the end of that time came to Chicago, and opened a real-estate office in partnership with Mr. D. W. Emerson. He was married in 1869, and has continued to live in the business. He is a member of a prosperous and influential family, and has managed his property independently until the present time. His real-estate lies principally at Des Plaines, a suburban town of Chicago, and his manner of business is in the most substantial style. It consists of buying a tract of land contiguous to the city, and, by subdivision, a -provement of the same, it is made valuable. He designs his own plans of cottages, erects them upon the lots, and pursues an independent course of business. He is a member of the Knights of Pythias, Teutonia Lodge, No. 97.

JOHN A. BARTLETT was born at Oxford, Worcestershire, England, on April 18, 1829, a son of Eleazer and Harriet (Auburnd) Bartlett. His early school-days were spent in the schools of Worcestershire County, fitting him for attendance at the academy at Webster, Mass., where he afterward went. Leaving school at the age of eighteen, he learned the machinist's trade, becoming proficient as a practical machinist. On the 13th of October, 1851, he arrived in Chicago, and the year following entered into business with R. T. Wright, of Rawson, Bartlett & Co., wholesale boots and shoes, located at Nos. 222-223 South Water Street. Under this organization, the firm continued till 1859, when it was changed to Rawson & Bartlett, by the withdrawal of the silent partner, and their place of business removed to No. 24 Lake Street. In May, 1856, the firm suffered greatly by fire, but, saving a portion of their goods, took quarters at No. 30 Lake Street and continued till 1862, when the death of the senior partner worked a dissolution of the firm, but his interest being assumed for a consideration by his brother, the business was continued under the same style until January, 1866, when two partners were taken in, Mr. Rawson retiring in January, 1867, and the firm became Bartlett, Howes & Bush, and continued till 1869, when Mr. Bartlett sold his interest to S. W. Rawson, his former partner, and entered his employ as a salesman, where he remained for the next year, or until the spring of 1870, when, having paid a short visit to -alifornia. After returning from the Pacific coast, he opened a real-estate office in Chicago with A. P. Downes, for seven years this partnership continued, when it was dissolved by the death of Mr. Downes. In 1876, Mr. Bartlett returned to New York, and the present time. He was married in Boston, on January 25, 1851, to Sarah A. Wentworth. They have one son, Charles A., who is engaged in the electricity business in the city. Mr. Bartlett has never held a political position until recently, when he voted for the office of assessor in the Town of Lake, which position he now holds.

CHARLES F. GREGORY was born near Sunbury, Delaware Co., Ohio, on November 29, 1840, the son of Isaac and Amy (Clark) Gregory. When he was eight years of age, his family moved to Clinton County, Iowa, and there, in the common schools. Mr. Gregory received his early education. At the age of sixteen he went to the University of Iowa, and was taught for two years, and afterward attended Cornell University, at Ithaca, N. Y., and there, while he was teaching, he went to Rochester, Minn., and dealt in unimproved land in that State and the country adjacent. For eighteen years he was one of the wealthiest dealers in real estate in the Northwest, and now owns many thousand acres of the fertile lands lying in for the following territory. He came to Chicago on January 15, 1854, and established an office. He was married on November 3, 1870, to Miss Ida F. Drake, of Dover, Minn.; they have one child, Jessieillian, seven years of age. In 1857, he attended the Mendota Academy, and the way was surveyed through the country north of Lake Superior, Mr. Gregory owned a large tract of land near the proposed route, and as property suddenly advanced he partied with his interest at a high figure, thereby closing a deal, the results of which alone made him wealthy. He is at present an extensive land owner, being the vice-president of the Battle River Valley and Northwestern Land Company, which he heads.

CHARLES GARDNER was born at Hancock, Berkshire Co., Mass., on August 20, 1837, a son of Silas H. and Charlotte (Coggswell) Gardner. On his father's side he comes from an old Rhode Island family, and by the marriage of his mother is connected with the celebrated Coggswells of Eastern Massachusetts. Many famous and honorable names occur in that genealogical line, of whom Dr. Obadiah R. Holmes, whose son was Andrew Jackson. Emerson are not the least. Hon. John Wentworth, of this city, is his great-uncle, and the Coggswell family by his mother's family, and a long line of celebrated New England divines are sones of the same root. Mr. Gardner's early education was received in the institutions at present schools of Hancock, Berkshire County, after which he attended the State Normal School, at Westfield, and, returning to his native village, taught school for one term. At this time, his father died, and the management of a large farm occupied his time for the following three years. He then entered Williams College, and, after taking the regular course, graduated in the class of 1864, with the degree of B.A., and took the degree of M.A. in regular course. After leaving college he offered a position on the State Dead of the County, but, declined it to accept the position of assistant superintendent and principal of the Reform School, at Waukesha, Wis. He returned to his old school in that institution in September, 1864, until February of the following year, when he received an invitation to teach in the Greek department of the University of Chicago, and at an annual meeting of the board was appointed tutor; this appointment, however, was soon after cancelled, owing to some factional disagreement. In February, 1866, while at his home in Hancock, Mass., he again received notice that his services were desired in the Chicago University, and he accordingly took the position of tutor in that institution, which he retained until 1870. He then resigned and commenced to study law in the office of Miller, VanArman & Lewis, where he remained for one year, during which he was also a partner in a religious paper published in Chicago. In 1872, he established a law-office which has followed this business until the present time. Mr. Gardner has been twice married; first, on August 29, 1866, to Miss Louisa M. Crapo, daughter of Seth Crapo, for many years a prominent dry goods dealer in Albany, N. Y. By this marriage he has two children,—Lewis C. and Henry G. His second marriage occurred June 23, 1877, when he was united to Miss Emma A. Shute, of Concord, N. H. She died June 11, 1878, leaving one child, Walter A. While engaged in teaching, Mr. Gardner was a contributor to the columns of the daily papers, and became associate editor of a stockholder in, what was known as the Western Monthly and afterward as the Lakeside Monthly. His knowledge of the classics enables him to occupy the place of a valued contributor to the journals of the day, and his efforts occupy a prominent place in Chicago journalism. Coming from a long line of clergymen and theologians, his mind has been brought into prominence and a religious and theological cast of mind, which has not only brought him into prominent church relations—he is a member of the Fuller- ton Avenue Presbyterian Church—but has led him to make use of his metaphysical knowledge of the Bartlett continuing to ask questions of a doctrinal and critical character. A vigorous and independent thinker, with a mind trained to the closest metaphysical analysis, in his, when once he entered upon that field nothing could prevent him from thoroughly investigating into the correctness of ideas as he advanced. These studies embraced the Greek, both of the New Testament and the Septuagint version of the Old, and his office books are filled with rare and unique copies of Greek and the Latin language, constantly resort. He is regarded as one of the most thorough Greek scholars living, and his criticisms have
found a wide circulation and are received with profound respect, both East and West. For some years the project of a new translation of the New Testament was urged upon him by his friends, and gradually the matter took shape in his studies, and the work began under pressure of severe financial reverses and in a season of great business depression. It was, however, finally completed, and the book of Matthew given to the world. Among careful Bible students and scholars it has met with a cordial—even flattering—reception, and it is hoped that it will speedily be followed by the publication of the whole Testament. His profound knowledge of the Greek of the Septuagint renders him a fit person to undertake the difficult work of a translation of the Old Testament from that venerable version; and to the extreme gratification of his friends, it is understood, that the colossal undertaking is already under way. As an example of his method, we insert his version of the Lord's Prayer:

"Pray ye, therefore, as follows: Our Father who art in heaven, Hallowed be thy name, May thy Kingdom come. Thy will come to be also upon the earth, even as it is in heaven. Give us to-day our daily bread. And remit unto us our debts, because we have remitted unto our debtors. And bring us not into trial, but deliver us from the Wicked One. For if ye remit unto men their errors, your heavenly Father will remit yours also. But if ye do not remit unto men, neither will your Father remit your errors." Matthew vi: 9-15.

FRANK NOWAK, real-estate dealer and loan and insurance agent, first entered the business with William Kaiser in January, 1873. In March, 1876, this partnership was dissolved, and on the fifteenth of the same month, Mr. Nowak became a partner of Albert Pick, the Austrian consul, which co-partnership lasted for one year, since which time Mr. Nowak has continued the business alone. He is at present agent for the Germania Insurance Company, of New York; the Travelers, of Chicago; Greenwich, of New York; United Firemen’s, of Philadelphia; the Alkamania, of Pittsburgh; Boutman’s, of Pittsburgh, and Ohio, of Dayton, O. With this large line of influence and reliable companies, he also carries on a heavy real-estate and loaning business. He was born in September, 1843, in the hamlet of Richena, Bohemia, fifty-six miles from Prague, from whence he came, with his father, Joseph Nowak, in 1856, to Chicago. In 1857, he engaged with his father in the hardware business, to which he was admitted as partner in 1862, and remained with him up to the year of his entry into the real-estate business. His father is now retired from active mercantile pursuits and is enjoying the substantial results of his own and his son’s industry. Frank Nowak is secretary of the Southwestern Building Loan and Homestead Association and likewise secretary of the Building and Loan Society of the Sixth Ward.

JOHN QUINCY WELLS was born in Ontario County, N. Y., on March 31, 1849. During his youth he studied at a preparatory school in Albany and afterward entered Williams College, from which he graduated in 1871. He then took a position in a banking house at Canadigua, N. Y., where he was engaged until the early part of 1872, when he came to Chicago, where he has since resided. On coming here he went into the office of Ogden, Sheldon & Scudder, loan agents, taking the position of cashier. He remained in connection with that firm until 1876, when they retired from business. He succeeded to a portion of their business and became agent of the Equitable Trust Company, of New London, Conn. He acted as their agent until they withdrew from the loaning business in Chicago, and since then has represented their real-estate interests here. For this corporation and others in the East, Mr. Wells is a real-estate representative, his connection with the trade the past ten years qualifying him for the responsible position. Annually there occurs a large number of foreclosures on realty in this county, and to these properties in which his clients are interested Mr. Wells devotes his special attention. Mr. Wells was one of the charter members of the Union Club of this city, but after making his residence at Riverside withdrew his membership, and is now only identified with the Union League Club. He was married at Riverside, on November 25, 1873, his wife being Miss Josephine, daughter of the late Ezra L. Sherman, of Chicago. Mr. and Mrs. Wells have three children: Grace, Alice, and Goldington Fillings.

HENRY WHipple was for over fifteen years a Methodist Episcopal minister in regular work, but now for some years has been a local preacher and a dealer in real estate at No. 155 Washington Street. He is a native of Ohio, born at Naybrook, Ashtabula Co., on September 15, 1852. His mother, whose maiden name was Celinda Wright, was the daughter of General Wright, for many years agent of the Western Reserve. His father, Angel Whipple, moved his family into Illinois in 1859, and settled on a piece of wild land near the village of Kosce, Winnebago County. The village was started the year before, and contained at that time about half a dozen houses. Mr. Whipple bought a claim of 640 acres of land adjoining the village, but to give his children better school privileges moved, in 1840, to Mount Morris, in Ogle County; but returned to the farm in 1842, where he died in January, 1853. The family were afflicted with weakness of the lungs and throat, and J. W. Whipple, an elder brother of Henry, had gone to Texas as a home missionary, partly to try the effect of the climate on his health, but expecting shortly to die there. The hygienic experiment proved successful and he recovered his health, and was followed by other members of the family for the
same purpose, and finally Henry rented the farm and took his widowed mother, his sister and two younger brothers, James and Lewis, and moved there in December, 1847. Leaving the family there to form a permanent home, Henry returned to Illinois in the fall of 1848, and entered Mt. Morris school once more—this time to study for the ministry. He finished his studies in one year, and in the fall of 1850, was married to Charlotte P. Grant and joined the Rock River Conference of the Methodist Episcopal Church. As a result of this union they now have one living son, also a member of Rock River Conference and now stationed at Tampa, Ill. In the fall of 1865 Mr. Whipple was sent to Chicago and served the Desplaines-street Church for two years, and the East Indiana-street Church for two years; then, after an interval of two years spent in Galena, was returned to Chicago and took charge of the City Mission for a period of five consecutive years. His throat by this time gave out; in the midst of his greatest usefulness, he was compelled to take a supernumerary relation for a term, but his health not showing signs of improvement he finally located and went into business. After leaving active labor in the regular work, in 1865, he had made some purchases of real-estate and began to do some building and commission work; and when he finally was compelled to locate, he formed a partnership with William M. True, purchased a large tract on the North Side, and devoted himself wholly to business. In 1869, he bought out Mr. True and the firm of Whipple & True was dissolved. The great fire inflicted heavy losses on him and greatly deranged his business by the destruction of all his books and papers, but he resumed business again at once and went on without going into bankruptcy. During the War, Mr. Whipple was eloquent and active in promoting the Union cause, and did much with voice and pen to forward the good work. He was at the time pastor of the Indiana-street Church, and because so many of his near relatives were in the South it was hinted that he would be indifferent and lukewarm, if not actively hostile, to the Union cause. But Mr. Whipple astonished and electrified his audience by the earnestness and eloquence with which he pleaded the cause of the Union, and urged the liberation and enfranchisement of the negro; slavery being the disturbing element of the Government.

WEST SIDE PARKS.

The Act incorporating the West Side Park Commission was passed on February 27, 1869. It provided for the appointment, by the Governor, of a board of seven members, whose term of office should be seven years, and conferred upon this body the powers, and imposed the duties, necessary to the opening of the contemplated parks, together with the boulevards leading to them.

On April 26, the Governor appointed Charles C. P. Holden, Henry Greenebaum, George W. Stanford, E. F. Runyan, Isaac K. Hitt, Clark Lipe, and P. W. Gates, as commissioners. An organization of the Board was effected on May 5.

While the limits within which the improvements should be made have been fixed by the Act, their loca-
a speculative valuation upon all land likely to be benefited by the improvements. The Commission, however, took a firm stand, refusing to buy unless large concessions were made from prices which it believed to be purely speculative.

Early in the progress of their work, the Commission found itself hampered by difficulties which, under the then existing legislation, it was unable to overcome; and in 1872, it suggested, and took steps to secure, amendments to the law then in force. The first desideratum was, the connection of the boulevards in the West and South divisions. The rate of taxation for park purposes (one-half mill on the dollar) had been found inadequate. The repugnance of the average citizen to the payment of a tax for purposes which he considered ornamental, had to be overcome.

The Commission directed attention to the almost unparalleled appreciation of real estate in the Town of West Chicago, consequent upon the improvements undertaken by the Board, as shown by the assessed valuations. By the law creating the Commission and authorizing the location of the parks, twelve square miles were added to the Town of West Chicago and City of Chicago. This land, in 1868 (the year before it was thus added) was assessed and paid taxes on $429,660. In the year 1869 (the first year it was assessed by the City of Chicago), the amount, including the assessment on the lands afterward taken for park and boulevard purposes, was $6,355,256. The town assessment for the same year was $3,638,831. In 1870, the city assessment, excluding the lands taken for parks and boulevards, was $7,440,066. The town assessment for the same year was $8,532,968. The rate of taxation levied by the city, in each of these years, was fifteen mills on the dollar; which, in 1869, produced a revenue to the city of $96,828.45; and in 1870, a revenue of $111,609.90. The rate of taxation in the Town of West Chicago, in 1869, was seven and three-tenths mills; which produced a revenue on the assessed value of this added territory, over and above the assessment of 1868, of $19,946.29. The rate of taxation in 1870, in the town, was eleven and four-tenths mills, producing a revenue on this increased assessment (that year the lands selected for parks and boulevards were excluded from assessment) amounting to $28,970.87. It thus appears that the total additional revenue received by the city and town from the added territory, from the time the park bill went into effect up to the close of 1870, was $351,456.11. The interest on the indebtedness incurred by the purchase of the park lands, and the expenses of the Board up to March 1, 1871, amounted to $89,814.86; showing a net gain to the revenue receipts of the city and town of $261,641.05.

A bill for an Act designed to increase the amount to be raised by taxation for park purposes was drafted by the Commission, and submitted to the Chicago legislative delegation before its introduction into the Legislature. The limit of revenue to be derived from this source was fixed by the Board at $150,000 per annum; but the representatives from Chicago, when consulted, reduced the sum to $80,000. During the following winter, an Act, popularly known as the "Park Act," was passed (approved June 16, 1871), providing for the levy and collection of a tax, for the improvement of public parks and boulevards, of three mills on the dollar upon the State and county assessment, with a proviso that the aggregate amount thus raised should not exceed the sum last mentioned.

Of the entire amount of land required by the Commission under the plan finally adopted, four hundred and fifty acres had been acquired prior to May 12, 1870. On that date, the Board filed a petition in the Circuit Court of Cook County for the appointment of assessors to ascertain the value of the lands in cases
where an agreement with the owners could not be made, and to assess the cost of the land already purchased, increased by the value of the lands condemned, upon the interests specially benefited. On May 19, 1870, the Circuit Court appointed Nathan Allen, Pleasant Amick and Garrett L. Hoodless such assessors, whose report was filed with the Board on July 12, following; and after due notice given and hearing accorded by the Commission, that body, on July 25, procured confirmation of the same by the Circuit Court. The three annual payments to be made on the land purchased fell due on November 1, 1871, 1872 and 1873, from to constitute a sinking fund for the retirement, at maturity, of the bonds which it was proposed to issue, at a low rate of interest, to meet the rapidly accruing obligations. This suggestion of the Board met the approval of the taxpayers, and steps were taken to secure the desired legislation. No provision of law of the character proposed was enacted until 1879; but at its next session the Legislature passed "An Act in regard to the completion, improvement and management of Public Parks and Boulevards, and to provide a more efficient remedy for the collection of delinquent taxes." This Act defined the relative duties of the Park Com-

respectively, with interest at eight per cent. per annum from the date of purchase. The first assessment ordered to meet these obligations was for $231,835.73. The amount collected, less commission for collection, was $169,887.51, leaving a deficiency of $55,810.91, for which judgments were rendered against the property at the August term of the County Court, in 1871. Appeals from these judgments were taken to the Circuit Court, and were there pending when the court records were destroyed in the conflagration of October, 1871. To remove the incentive for such contests on the part of property-owners, and at the same time lighten the burden of meeting the necessary assessments, the Commission proposed a scheme of legislation, whereby, in lieu of raising the needed funds by three assessments annually, ten should be made, the money arising there-

mission and corporate authorities, outlined the character of the improvements to be made, and contained some stringent provisions, in considerable detail, for the enforcement of the payment of delinquent park taxes. It also authorized the Commission to negotiate for an extension of time in which to meet maturings obligations, at a rate of interest not to exceed eight per cent. Some measure of relief, of the character proposed, was rendered necessary from the fact that a number of the larger taxpayers had contested in the courts the payment of special assessments made to meet these obligations as they matured. Pending this litigation, these assessments were not available to pay debts of the Board. Two features of the law were of special importance. The construction of sewers was authorized, and the cost was directed to be assessed
equitably upon all the property benefited, thus reducing the amount necessary to be expended from the general park fund for this purpose; and while the three-mill tax provided for in the Act of 1871, was retained, the $80,000 limit fixed by the earlier law was removed.

In 1877, irregularities were charged in the conduct of the Board’s finances, and investigations were ordered by both the Commission and the West Town Board. The Governor, in the exercise of his official discretion, deemed it best that the Board be entirely reorganized. Certain of the commissioners thereupon tendered their resignations to the Governor, who accepted them. The Executive at once filled the vacancies thus created, and removed the remaining members of the Commission, appointing new commissioners to fill the places of those removed. After somewhat protracted legal proceedings, an entirely new Board came into official existence on July 5, 1878. At that time, the treasury of the Board was in a condition far from satisfactory, and an overdue indebtedness of $124,360.41 had accrued. This was largely attributable to the inability of the former Board to collect the special assessments levied to pay maturing bonds; it should not be ascribed to mismanagement on the part of the Commission. It was evident that measures must be taken at once to discharge this debt, reduce the annual interest charge, and restore the credit of the Board. Office salaries were reduced from $9,776 to $3,752, and the amount thus saved applied to the employment of laborers in the parks. In February, 1877, the Supreme Court rendered a decision sustaining all the park assessments, thus rendering a large fund available for the payment of pre-existing indebtedness. Through collections made from this source, and the practice of careful economy, the new administration paid, during its first fiscal year, $36,595.94 on account of the former indebtedness. The Board again prepared a bill for authority to issue bonds for the purpose of funding this debt at a low rate of interest. This was granted by Act approved May 31, 1879, which empowered the corporate authorities to borrow a sum not exceeding $300,000, issuing therefor bonds of the denomination of $25 or any multiple thereof, to run for not more than twenty years, and bearing interest at a rate not greater than six per cent, per annum. To create a sinking fund from which to meet the interest as it accrued and redeem the bonds at maturity, the Board was directed to reserve a portion of the park tax, not exceeding one-half mill on the dollar. Under this Act, the Commission, on July 1, 1879, issued bonds to the amount named, payable in twenty years and bearing five per cent interest. The bonds were sold at par on the day of their issue, and the money applied to the redemption of overdue paper.

The financial situation at the beginning of the next fiscal year was considered by the Board as satisfactory, there being sufficient assets to meet all current claims. The Board, therefore, felt at liberty to proceed energetically with the work of improvement. A clearer conception of the amount and character of the work done up to this time may be obtained by an understanding of the original designs for each park. The improvements have been carried out substantially in accordance with these plans.

In 1871, Messrs. Jenney, Schermerhorn and Bogart, architects and engineers, were employed by the Commission to prepare designs for the improvements of the parks, and superintend their construction.

Douglas Park—The proposed area of Douglas Park was one hundred and eighty-two acres, of which one hundred and seventy-one and fifteen one-hundredths acres had been secured when the engineers and architects presented their first reports. The problem of
drainage was one of the first which presented itself. It was believed that a large amount might be saved in the cost of sewerage, by providing a reservoir in each park, sufficiently large to receive all the water falling upon the entire park area during the severest storms, from which it might easily be drained into the street sewers. To accomplish this, excavations were made for lakes in each park, with banks sufficiently raised above the water level to form a reservoir and receive the natural drainage. The earth removed for the formation of these lakes furnished a portion of the material needed to secure graceful undulations of surface. In Douglas Park, a very large water surface, covering one-fourth of the area of the park, was decided upon. Another mo-

tive that induced this step was the prospective necessity for a very large amount of material (estimated at five hundred thousand cubic yards), to be employed in "filling-in" when city grades in the vicinity of the park were established. The lake thus became the principal feature of the park; the architectural constructions were placed near its banks; the drives encircled it; frequent vistas were arranged; the esplanade, with its shade-trees and music-stand, was located on an island in the center of the lake, connected by a bridge with the eastern shore. Openings were arranged in the planting, so that the architectural features might be seen from the drive. The principal entrances to the park from the city are Ogden Avenue and Twelfth Street. The latter was treated as a broad plaza, of triangular shape, ornamented with a fountain. Immediately within the entrance was arranged a circular space, designed to serve as a site for a Douglas monument, from which this entrance was styled Douglas Gate. At the Ogden Avenue entrance was laid out a circular space, with central planting, to shut off the direct view from the avenue into the park. The drive then passes, by gentle curves, a little

to the north, crossing the narrows of the lake. In connection with this drive was placed the esplanade, with its concourse. The music-stand was placed on the esplanade, and trees were arranged on concentric and radial lines. The bridge parapet was continued around the water-side of the esplanade, and along a part of the drive where it bordered the lake, giving to the drive, at this point, the effect of a bridge. A refectory, with broad verandah and boat-landing, was erected on the shore of the promontory to the south. Douglas Boulevard leaves the park on the northwest. Its junction with the park-drive was treated, formally, with a green space surrounded by shade-trees; a fountain, with a large basin, was placed in its center, and cut-stone

VIEW IN GARFIELD PARK.

watering troughs at its corners. Provision was made, on the south line of the park, for a boulevard to connect with the South Park. In the southeast corner of the park, which is very near the Chicago, Burlington & Quincy Railroad tracks, was erected a waiting-house, for the accommodation of those leaving by that road.

Garfield Park.—This park (formerly known as Central Park), embraces one hundred and eighty-two acres. Its northern boundary is the Chicago & Northwestern Railway tracks, and its southern limit is the Barry Point Road. It is divided into northern, central and southern sections by Lake and Madison streets, which public interest required should be kept open to traffic. To conceal these streets from view, the design of the engineer was to construct a low, retreating wall, and an embankment on either side of each roadway; the embankment to be as steep as the material would permit on the side toward the street, and sloping gently into the park on the opposite side, and the banks to be densely planted with trees and shrubs, to obstruct both view and dust. Crossing the two streets, and connecting the sections of the park, it was proposed to con-
struct a viaduct of masonry, with a single arch of about sixty-eight feet span. These bridges were to be of sufficient width to accommodate a walk fifteen feet wide, and a border for planting of a width of twenty feet, on either side of a driveway of fifty feet. Different designs for improvement were suggested for the three sections of the park. The central and larger, containing eighty-three acres, was selected for the highest ornamentation. A large lake was proposed to be excavated, for the same reasons as prompted that feature in Douglas Park. The design included a division of the lake by a peninsula, allowing the construction of a cross-road, affording a short drive or a quick transit through the parks. Washington Gate, on the eastern side, on a direct line with the center of Washington Boulevard, was to afford ingress from the most important avenues of the West Division. On the shore of the lower lake were to be picnic grounds, opposite an island, where was to be erected a chalet, a pavilion and a rustic shelter. It was designed that this portion of the park should be pastoral in character, and its architecture and construction simple and rural. In contrast to this, the plan contemplated elaborate ornamentation of the upper lake and its surroundings; a large and imposing terrace, a gilded and highly-colored music-stand, of the Byzantine style of architecture, tiled floors, cut-stone parapets, and circular corner-pavilions were among the devices designed. Close to the drive-way was the refectory. Outside of the terrace was to be a second drive. Broad boat-landings, with vine-covered arbors, were to afford sheltered seats for pedestrians and serve the double purpose of convenience and ornamentation. The northern portion of the park embraced but thirty acres, and was separated from the central portion by Lake Street. The landscape architects employed to submit a design for improvement were of opinion that an extensive close-cut lawn would afford a pleasing and striking contrast with the wildness and aridity of the surrounding prairie, during the drouth of midsummer. It was suggested that such a lawn might serve an excellent purpose for croquet parties and baseball games, while a proposed shelter at the lower end would furnish a place where refreshments might be provided. The design originally submitted contemplated the devotion of the southern section of the park to the purposes of a museum of natural history, and for greenhouses, plant-houses and a winter garden.

HUMBOLDT PARK.—The natural features of Humboldt Park were, in some respects, more suitable for improvement and adornment than either of the others. On the one hand, the ground is sufficiently high to require no filling in; and, on the other, its territory was not crossed by public highways which the Commission had no right to close. From the city, the important approaches to this park are Central Boulevard and Grand Avenue on the south, and Division Street and North Avenue on the east. Taking advantage of the boulevard between Grand Avenue and the park, the engineers suggested a grand plaza, embracing the whole width (four hundred feet), adorned with a monument and fountains, and bordered by a double line of shade-trees. The Division-street entrance was planned as a quadrant of two hundred feet radius, bisected by the avenue, the sectors being proposed as sites for monuments. To secure an undulating surface, as well as to meet the requirements of drainage, a large lake surface was an imperative necessity. The lake was to extend in a somewhat diagonal direction nearly across the center, so arranged as to allow the most extended vistas within the capabilities of the park limits. Near the center of the lake were to be two terraces, inclining on a diagonal from the southeast to the northwest. A fountain was to adorn the lower terrace, while in the center of the upper was to be reserved a site for a Humboldt Monument. The general scheme for the adornment of the park, the plans for walks, drives, for pleasure grounds, plateaux (including the concourse), architectural structures, etc., were similar to those suggested for Douglas and Garfield parks.

BOULEVARDS.—The system of parks in the West Division of the city is completed by boulevards connecting the different parks, extending north and east to the boulevard from Lincoln Park, and south to the boulevard from the South Parks, thus forming a continuous drive around the city, varied at intervals by the different parks and the enlargement at each point of divergence or change of direction. In design, the boulevards are elongated parks. As however, the width forms but a small fraction of the length, the drives naturally become straight lines, and a formal character is stamped upon the whole design.

The boulevards which pertain to the West Park System may be briefly sketched as follows: Leaving Douglas Park on the west is Douglas Boulevard, two hundred and fifty feet in width. One hundred feet of
in width; through the other, an eight-foot path. Side roads, twenty-five feet in width, adjoined these borders, flanked by sidewalks twenty-four feet wide. Six lines of trees were proposed, thirty feet from centers, on lines bordering the side roads and the drives. The general design submitted for the improvement of Humboldt Boulevard, leading in a general northeasterly direction from Humboldt Park, was similar to that for Central Boulevard. A central driveway, of fifty feet in width, was placed between two neighboring roads, each twenty-five feet wide, adjoining which were broad walks and a bridle-path.

The plans suggested have undergone some modification, but their main features were adopted. A considerable part of the work contemplated has been completed.

In accordance with legislative enactment and a petition signed by the owners of a majority of the frontage of the abutting property, the City Council, on September 29, 1879, conveyed to the Commission, by ordinance, the control of Washington Street from Halsted Street to Central (now Garfield) Park, reserving all powers in relation to sewers and water and gas-pipes, and their connections. Plans and specifications for the improvement of the street were adopted by the Board, and the estimates were confirmed by the court, without opposition, on March 21, 1881. The sewer connections were repaired, water-pipes lowered, water and gas mains altered and connections made, and work was be-

in width; through the other, an eight-foot path. Side roads, twenty-five feet in width, adjoined these borders, flanked by sidewalks twenty-four feet wide. HISTORY OF CHICAGO.

George Wilson Stanford was born on February 21, 1833, at Westerly, Steuben Co., N. Y., his parents being Charles and Jerusha (Chadwick) Stanford. He worked upon his father's farm until he was twenty-one years old. On attaining his majority (1854) he went to St. Paul and began his professional studies. One year later he removed to Kenosha, at which city he was admitted to the bar in June, 1856. Early foreseeing the possible future metropolitan character of Chicago, he at once established himself there. Two years later, he formed a partnership with Jasper D. Ward (afterward a member of Congress from this city). This partnership terminated in 1856, when Mr. Ward removed to Colorado. He was appointed a member of the Board of West Chicago Park Commissioners by Governor Palmer, in 1859. He was, on its organization, chosen president of the Board and was re-elected eight times, and, from the hour of his appointment until the date of his resignation, in 1877, devoted not only his best energies but the greater portion of his time to his official duties. It was his professional eye that detected the legal imperfections and inconsistencies of the original Act creating the Board, and it was he who suggested the main features of the supplemental bill which afterward (in its fundamental parts) received legislative sanction, and under which the West Side park and boulevard system has become one of the city's chief attractions.

To appreciate Mr. Stanford's labors in this regard, it must be remembered that the Commissioners encountered no little opposition in their labors from constitutional "tax-fighters," and the adoption by the Board of the conservative and conciliatory policy urged by Mr. Stanford went far toward nullifying a baseless hostility. The litigation, inseparable from the prosecution of any public improvement, which was encountered in carrying out the law was conducted under his supervision, and with marked success. It is not too much to say that to his unbending interest and unwearying devotion in the discharge of the duties of this trust, is to be attributed no small share of the growth toward symmetry and beauty noticeable, during his administration, of the West Side system. Mr. Stanford's first wife was Miss Martha P. Allen, of Herkimer County, N. Y.; his second marriage occurred in 1870, his bride being Miss Lydia C. Avery.

LINCOLN PARK.

The original Act creating the Lincoln Park Commission was approved on February 8, 1869. In this Act, E. B. McCagg, J. B. Turner, Joseph Stockton, Jacob Rehn, and Andrew Nelson were named as commissioners. An organization of the Board was effected on March 16, 1869, by the election of E. B. McCagg as president. As the law contemplated that Lincoln Park should be a city park, the Board, acting under its provisions, early applied to the Mayor of Chicago to issue city bonds to an amount sufficient for the purchase of the land to be embraced within its limits. The Mayor having refused to take any action in the matter, the Commission made application for a mandamus to compel the issuance of the bonds. In the course of the legal proceedings thus instituted, the original Act was declared invalid, and, on June 16, 1871, another Act was approved, providing for the appointment of a new Board, a question having been raised as to the power of the Legislature to name the commissioners in the law. In November, 1871, the Governor appointed as such Board, Samuel M. Nickerson, Joseph Stockton, Belden F. Culver, William H. Bradley and Francis H. Kales.
PARKS AND BOULEVARDS.

The original Board did little beyond topographically studying the territory to be embraced in the park, and preparing plans for its improvement. The most noteworthy event during their administration was the partial completion, and formal opening to the public, of the Lake-shore Drive, fronting the park.

The first act of the new Board was to acquire the land needed. Proceedings in condemnation were completed, and title secured to all the territory. The Act of June 16, 1871, authorized the levying of a special assessment for park purposes upon the lands benefited, by the corporate authorities of the towns of North Chicago and Lake View, within whose limits the park is situated. Under this law, in 1873, an assessment was made, and confirmed by the Circuit Court. An appeal having been taken to the Supreme Court, serious defects in the law were discovered, and new legislation was asked by the Commission, in order that the law might conform to the decision. Under an Act approved February 18, 1874, the assessor and supervisor of North Chicago made another special assessment, which was sustained, on appeal to the court of last resort, on all lands in that town deemed benefited by the proposed improvement.

Its frontage of two and a quarter miles on Lake Michigan affording an opportunity for a driveway with unsurpassed views, Lincoln Park enjoys one conspicuous advantage over the other city pleasure-grounds. Its natural features, however, are such as render its improvement a work of no small difficulty. Much of the land embraced within its limits was originally a barren, sandy waste; its entire surface is sandy and destitute of natural shade; and the constant menace of encroachment by the lake necessitated unceasing vigilance. To subjugate the soil, more than one hundred thousand cubic yards of clay, and tens of thousands of yards of black soil have been employed. Resort was had, for many years, to temporary expedients to protect the shore. Their inutility and the gravity of the threatened danger soon convinced the Commission of the necessity for a permanent breakwater of a substantial character, and, in 1878, its construction was commenced. The system adopted was that known as the Netherlands plan, consisting of brush mattresses laid along the shore, in a depth of from three to five feet of water, the surface paved with stone. The cost averaged nine dollars a lineal foot, and the work has proved adequate to the resistance of all storms by which it has been tested. As the work progressed, the space back of the break-

VIEW IN LINCOLN PARK.

water was filled and graded, and improved by appropriate planting. Despite these natural obstacles, the park has been converted into a delightful pleasure resort, and has constantly grown in popular favor. Bordered on two sides by a dense population, and easily reached, it is pre-eminently the resort of the people; its pleasures are enjoyed by the poor as well as the rich. The improvements have been mainly designed by Olof Benson, and have been carried forward under his superintendence. The treatment of the park has been of the simplest and most economical character consistent with good taste and the public requirements, and costly architectural display has been studiously avoided. The aim of the Commission has been, from the outset of the work, to limit the expenditure to the means under its control, and, with the exception of the obligations incurred under the law in the purchase of land, the Board has no debts. No commissioner has ever received any compensation for his services, and during the ten years from 1869 to 1879 the entire amount expended in salaries hardly exceeded $31,000.

During the spring of 1878, the pier at North Avenue was converted by the Board into a floating hospital, the
HISTORY OF CHICAGO.

object being to afford a spot where ailing children might find benefit from the invigorating breezes of Lake Michigan.

The Commission also availed itself of the funds at its disposal for the exercise of the truest charity in another direction. A winter force of laborers, as large as could profitably be employed, was recruited from the ranks of the unemployed workmen of North Chicago and Lake View, by the adoption of which system many families were relieved from want.

The value of a zoological collection, as one of the features of the park, was early recognized by the Commission. Economic reasons, however, forbade any outlay in this direction beyond that needed for the proper care of such specimens of natural history as were donated to the Board. The collection mainly embraced animals peculiar to the country; it is neither large nor rare, yet for years it has proved a source of much interest and pleasure to visitors at the park. Paddocks, covering several acres, have been inclosed for the accommodation of deer and elk, and a series of admirably designed bear-pits constructed. In speaking of the animal collection, in its annual report for 1879, the Commission says: "Propositions have frequently been made to the Board to furnish a collection of animals equal in variety to any in this country; a small admission to be charged until the purchase-price was met. All such offers have been declined."

Much difficulty was encountered in relation to the water supply. Two artesian wells (one thousand one hundred and fifty and one thousand five hundred feet deep, respectively) were sunk at an early day. After some years the supply thus secured materially diminished, and proved adequate only for the purpose of supplying the lakes within the park—a season of drought rendered very difficult the preservation of lawns and trees; and, in 1877, the Commission was compelled to have recourse to the water-works of Chicago and Lake View, the water-tax forming a not inconsiderable item in the expenditures of the Board.

The appended tables afford an epitomized statement of the cost of Lincoln Park to the public, and the manner in which the funds have been disbursed:

One of the most attractive features of the park is the floral display, which is hardly surpassed elsewhere.

The members and officers of the Lincoln Park Commission, from its original date of organization, have been—

**Commissioners—** Ezra B. McAgg, 1869-71; J. B. Turner, 1869-71; Joseph Stockton, from 1869; Joseph Kehm, 1869-71, and 1874-76; Andrew Nelson, 1869-71; Samuel M. Nickerson, 1871-74; William H. Bradley, 1874-72; Francis H. Kales, 1872-74; Belden F. Culver, 1874-77; F. H. Winston, from 1874; A. C. Hesing, 1874-76; T. F. Withrow, from 1876; L. J. Kadish, 1876-83; Max Hjorstersberg, 1877-80; Isaac N. Arnold, 1880-84; Charles Catlin, from 1883; J. McGregor Adams, from 1884.

**President—** E. B. McAgg, 1869-71; B. F. Culver, 1871-74; F. H. Winston, from 1874.

**Secretary—** E. S. Taylor, from 1871.

**Treasurers—** John Dekoven, ill 1883; C. J. Blair, from 1883.

**Superintendents—** Old Bensen, 1871-83; H. J. DeVry, from 1883.

**Pleasant Amick,** dealer in real estate, is one of the best known citizens of Chicago, and one, too, thoroughly well-liked. He has been a resident of this city since 1844—over forty years—and has conducted with the west town or city Assessor and Collector's office, either as principal or deputy, for fourteen years; exhibiting while in office a capacity and fairness in his delicate duties which won for him universal favor from all parties. Beginning with the fall of 1864, he was elected Collector for the West Side on the same ticket with Abraham Lincoln in his second term, and the following year refused the nomination in favor of Jacob Gross,—the one-armed soldier—our present State Treasurer. In 1865, he was elected City Assessor by the Council and was succeeded, in 1866, by the late Major Lew H. Druery. That fall he opened a real estate office in the Major Block, removing to the Bryan Block just before the fire—which was largely responsible for his sudden removal therefrom in October, 1871. In 1874, he ran again for County Treasurer, but was again defeated. Mr. Amick served as deputy in the real-estate department during his two terms, and as chief deputy during that of his successor, Thomas Brennan. The following year, 1875, he was defeated by Joseph Sokup by a bare majority, after all deductions, of about one hundred and fifty, but served as his chief deputy during his term of office. In 1880, he ran again and was elected by three thousand four hundred and two majority, running ahead of his ticket over three thousand votes. In the close election of 1881, he again won by one hundred and eight majority, but was the only one elected on the republican ticket. At the end of his term of office he finally abandoned political life, and has since devoted himself to his real-estate business, for which his long service as assessor, and the large circle of friends he formed by its means, give him peculiar advantages. Mr. Amick is a native of Cassopolis, Mich., born on October 14, 1854. His parents, Jacob and Rachel (Corron) Amick, were natives of West Virginia, and...
came to Michigan about 1830. Five years later they moved to Plato, in Kane Co., III., where they lived on a farm until the spring of 1844, when they came to Chicago. Young Amick attended the Scannmon School, until 1848, under A. D. Sturtivant, who was then principal, when he entered the grocery store of C. D. Robinson—now in California. The following year he began to work for J. B. Doggett, a grocer, with whom he remained until 1855. He was then twenty-one years old, and having accumulated some capital, started in the same business for himself at No. 58 West Randolph Street. He succeeded very well and continued until the year before the War, when he sold out. In 1859, his father went to California where he died in 1858, leaving the family on the hands of Pleasant—his oldest son. That duty he discharged faithfully, rearing and educating two younger brothers, both of whom entered the Army and each made a singularly meritorious record. Their names were Hiram and Myron J. Mr. Amick was himself unfitted for the hardships of the field by reason of a physical infirmity, and was engaged in general trade during the greater part of the War. In 1860, Mr. Amick was made a member of National Lodge, No. 596, A.F. & A.M., in Chicago. He had become an Odd Fellow in 1856, being one of the Charter members of Fort Dearborn Lodge, No. 218, but has affiliated only with the Masons for some years. On November 14, 1864, while still in the employ of J. B. Doggett, he married Miss Julia S. Bishop, who, with her brothers and sisters, were his companions in the old Scannmon School. Two children were born to them.—Frank S. and Stella J.

THOMAS CARLINE, one of the early settlers and prominent real-estate men of the West Side, is a native of England, and was born on October 22, 1819. In May, 1840, he came to Utica, Oneida Co., N.Y., where he remained for over fourteen years, working hard and accumulating a little property. In the year 1854, he came West, visiting many of its most promising localities. Even at that early day he was convinced that at or near St. Paul and Minneapolis was to spring up a flourishing city. After visiting St. Louis, however, he came to Chicago, having been greatly impressed with the energy and enterprise of its people and its fine geographical location. On August 15, 1854, he located in the city and has never had reason to regret his choice or change the idea he then formed as to its future greatness. He even predicts that in five years from the present time (1886) Chicago will contain a round million of inhabitants. Although Mr. Carline reached the city when the cholera was at the height of its ravages, he at once engaged in the real-estate business, and has so busied himself continuously up to the present time. Although sixty-six years of age, he still enjoys a vigorous constitution which has been built up by hard work and close application. His time is now fully occupied in looking after his own real-estate, which is situated all over the city. The bulk of his property, however, which is both of a business and residence nature, is located on Lake Street, between May and Curtis, on Randolph between the same streets, and Ann and May, on Curtis Street between Fulton and Lake, and on South Desplaines. Mr. Carline's wife was formerly Miss Sarah Bradbury. They have two children living, Mrs. J. W. Newburn and Mrs. F. F. Hutton. Mr. Carline has had little opportunity to indulge in social pleasures, his life has been such a busy one. The only order of which he is a member is that of the I.O.O.F., with which he has been connected for over thirty years. He is a member of Excelsior Lodge, No. 32.

VOPICKA & KUBIN.—This real-estate firm was established in 1882 by Charles J. Vopicka and Otto Kubin. Both gentlemen are Bohemians, the former coming to this country in 1876, the latter in 1866. Mr. Vopicka was for some years engaged in the trunk manufacture of Mr. Secor, of Racine, Wis., and afterward for C. F. Schumacher & Sons, one of the oldest real-estate dealers in Chicago, commencing with them in 1880. Mr. Kubin after arriving in this country in 1857, came to Chicago. In 1870, he commenced working for Mandel Bros., remaining with them until the formation of the present firm of Vopicka & Kubin. This firm has a fine office at No. 207 West Twelfth Street, and have sold during the past year about $300,000 of real estate. Besides dealing in real estate they also are loan and insurance agents, and agents for the following passenger steamship lines—the North German Lloyd, the Hamburg American Packet Company, the Inman American and Red Star Lines. The First National Building, Loan and Homestead Association of Chicago meets weekly in the office of Vopicka & Kubin. This Association was incorporated in the spring of 1882, under an act of the Legislature of Illinois, which went into force July 1, 1879, and which was passed to enable associations of persons to become bodies corporate, and to

VIEW IN UNION PARK.
members are permitted to become members and shareholders by paying twenty-five cents per week on each share held. It was through the existence of this and similar associations that Vopicka & Kubin have been enabled to make such extensive sales. The Second National Building, Loan and Homestead Association was organized in April, 1854; Charles J. Vopicka, president; Josef Kubin, vice-president; Otto Kubin, secretary, and Albert Silhanek, treasurer. The purposes of the Association are similar to those of its predecessor.

DANIEL R. McAuley, dealer in real estate and loans, at No. 182 West Madison Street, was born in Chicago, on March 17, 1857. He passed through the public schools and afterward took a special course in the Christian Brothers' Academy. Leaving school at the age of fifteen he entered the Fidelity Bank, as a messenger boy. He remained with that institution until the time of its failure, in 1876, at which time he had charge of her local collection books. The two years following he was employed by the receivers of the defunct concern and the State Saving Bank. He then entered the real-estate office of E. A. Cummings & Co. He remained with this firm until June, 1873, when, in partnership with his step-father whose name, by strange coincidence was also McAuley, embarked in the real-estate business, which was successfully carried on under the firm name of M. & D. K. McAuley, until February 1884, when Daniel purchased his step-father's interest, and has since continued the business alone. Daniel's father was one of the pioneers of Chicago, having come to this section in an early day, when what is now the metropolis of the prairies was but a mere village, and was quite an extensive dealer in real estate. Daniel R. McAuley has made a success of his business, which may be attributed to his enterprise and ability. As an important factor in the reputation of the city he has won a prominent rank by honest, earnest effort. He was married in November, 1883, to Miss Nellie T. Seacuell.

LEWIS J. Swift, real-estate and loans, is a native of Hartford, Conn. His father, Lemuel Swift, removed from old Hadley, Mass., in an early day, and settled in Hartford. Lemuel J. was born on January 10, 1820, the youngest of two families. The senior Swift was a painter by trade and amassed a considerable fortune, but, dying while the youngest child was but four or five years old, the widow and her children were made penniless by the dishonesty of a partner and the delays of the law. On account of delicate health, Lemuel was taken from school at the age of eight, and at ten put to work on a farm, where he worked and recuperated his constitution until he was fourteen, when he went into a dry-goods store. At twenty-two he and Joseph Williams were in partnership in the dry-goods business in Hartford, which continued for three years. In 1846, he left Hartford for Owego, in Tioga Co., N. Y., where he became associated with the well-known Chicago wholesale jeweler, Newell Matson, then handling dry goods, jewelry, Yankee notions, etc., at Owego. With short interruptions this acquaintance and business relation, in various forms, lasted until 1869, long after both came to Chicago. His first engagement with Mr. Matson lasted for six years, and after three years spent in Danville, N. Y., in independent trade with Charles Truman, as Swift & Truman, he returned to Matson for another year. Again, after a short interval, he took charge of a farm store in Danville, Ohio, for Matson, and remained there during four years. Early in the spring of 1855, he came to Chicago and was a year with James H. Hoag in the same line of business. In 1864, Mr. Matson bought a controlling interest in the business of Mr. Hoes, and Mr. Swift again entered into the employ of Matson & Hoes, where he remained until 1869. In that year, he began to solicit insurance—both life and fire—for the late Professor William H. Wells for two years—and afterward for William E. Rollo and others, until 1874. The great fire was a serious interruption to his affairs although he lost nothing directly by it, but he ultimately resumed the business, which he continued until he went into the real-estate business in 1874. In 1875, he formed a partnership with George Dunlap, which as Dunlap & Swift, lasted until April, 1884, when Mr. Swift bought Mr. Dunlap out. His business has always been confined to the West Side, where he does a general real-estate and brokerage business. He attends also to house renting, loans and collections. He was a member of the old Tabernacle Church from 1858, and his connection with the Second Baptist Church dates from its organization. It then numbered two hundred and sixty members. In 1864,—now it has over one thousand three hundred. Mr. Swift has held nearly every possible official relation to the Church during his membership. He has been superintendent of the Sunday School, clerk for nineteen years (when he was also financial agent), deacon and trustee. All these positions he has now resigned except that of trustee, his age and cares excusing him from further service. In 1842, he was married to Miss Harriet Tyler, of Hartford, Conn., by whom he had four children, only one of whom is now living—Mrs. Clara Nourse, wife of John A. Nourse of this city. In 1860, his wife died, and, in 1869, he married Miss Adeline Kneidell.
men, shrewd, enterprising and liberal. A sketch of his life deserves a place in this volume, as it is typical of what unbounded energy and perseverance will accomplish. Mr. Quill was born in Drewscourt, County Limerick, Ireland, on July 13, 1832, a son of Patrick and Mary (O'Brien) Quill. In 1852, he emigrated to America, leaving his people in his native land. His first employment was as fireman in Sweeney's Hotel, on the Bowery, New York City. He went to work, in September, 1852, and remained there until October 1, 1853, when he came to Chicago. Mr. Quill was a raw Irish lad when he came to America, and innocent to a great degree. The first employment he found was polishing marble, for the firm of Schurman & Hoffman; he remained with them for three years, and then was employed by H. & O. Wilson, marble dealers, located on State Street, where the Hale Building afterward was erected. At the outbreak of the War, he was engaged in teaming, and when opportunity afforded bought job lots of flour. Eventually he entered into the manufacture of paste, at No. 96 West Quincy Street, supplying bill-posters, paper-box manufacturers, etc., a business to which he devoted his entire attention. Mr. Quill has been one of the lucky dealers in real-estate, and is a great believer in the constant future increase of property values. He owns a large amount of real-estate, both in Chicago and the suburbs. Space will suffice to give but one instance of his transactions: In 1879, shortly before the wholesale trade concentrated so largely on Adams, Monroe, Franklin and Market streets, Mr. Quill bought of Philo Otis a piece of ground, twenty-five feet front on Adams Street, between Franklin and Market, for $120 per foot. Land commenced to rise in value, and after holding it from August, 1879, to the spring of 1880, he sold it for $1,200 a foot, the buyer assuming a mortgage. The transaction netted Mr. Quill $30,000. With a portion of this money he erected a handsome block of seven residences on the corner of Aberdeen and Van Buren streets. Mr.

Quill refers with great pride to the fact that after the great fire his creditors offered to compromise with him, but he refused and paid dollar for dollar. He was married in this city on December 9, 1855, to Margaret Hickey, who has borne him seven children: John, Mary, Maggie, Nonay, Dennis, Nellie and Daniel.

BOULEVARD CONTRACTORS.

DOLESE & SHEPARD.—Chicago has become noted the world over for its handsome park system, and particularly for its fine boulevards. The latter have been laid during the past eighteen years, and in their construction the well-known paving contractors, Dolese & Shepard, have had more to do than any other firm in the

half miles: Indiana Avenue, between Thirty-ninth and Fifty-first streets, one and one-half miles; South Chicago Avenue, from South Chicago to Stony Island Avenue, two and one-half miles; the drive-ways in the West Division of South Park; Drexel Boulevard, between Fifty-first and Sixtieth streets, one mile; all the drives in South Park proper, two miles; from Illinois and Michigan Canal to Forty-third Street, one and one-half miles; Lake Avenue, between Thirty-ninth and Fifty-fifth streets, two miles; Forty-third Street, from State Street to Lake Michigan, two miles; Forty-seventh Street, from State Street to Lake Michigan, two miles; Forty-sixth Street, between Drexel Boulevard and Woodlawn Avenue, one-half mile; Fiftieth Street, between Drexel Boulevard and Lake Avenue.
one mile; Fifty-first Street, from State Street to Lake Michigan, two miles; Woodlawn Avenue, between Forty-fifth and Fifty-first streets, one mile; Ellis Avenue, between Thirty-ninth and Forty-seventh streets, one mile; South Park Avenue, between Sixtieth and Sixty-third streets, passing the club-house of the Washington Park Club, one-half mile; South Chicago Avenue, from Stony Island to State Street, three and one-half miles; Michigan Avenue (Thornton Road) from Ninety-first Street to Riverdale, five miles; Archer Avenue, from Ashland Avenue to Summit, nine miles.

They have furnished nearly all the material used on Michigan Avenue, between Jackson and Thirty-fifth streets, and on Grand Boulevard; on Wentworth Avenue, between Thirty-sixth and Fifty-fifth streets; on Forty-seventh Street, between Halsted and State streets, one mile: and from State Street to Lake Avenue, one and one-half miles; on Lincoln and Lake View avenues, north of Lincoln Park; on Ashland Avenue, between Twelfth and Twenty-second streets; on several miles of streets in Englewood and Town of Lake; on Dearborn Avenue, Vernon Avenue, Johnston Place, etc.

BIRD'S-EYE VIEW, SOUTH FROM WATER TOWER.

Thirty-seventh Street, Rhodes Avenue, and on many other prominent thoroughfares, too numerous to mention. They have constructed the walks and drives in Oakwood, Roschill, and the Bolumian (Irving Park) cemeteries, and besides their immense city and country business, have built three or more miles of streets in Pullman, and have furnished the material and partly constructed walkes, drives, boulevards, etc., in several leading interior cities. Dolese & Shepard own sixty-one acres of land at the intersection of the Belt Line and Chicago, Burlington & Quarternary Railroad, at Hawthorne, Cicero Township, on which their almost inexhaustible quarries are located. In early years their supply of stone was procured from Iolston, Stony Island and Cheltenham quarries, but their Hawthorne quarries are now so developed that they easily yield all that the firm demands in their business. The plant consists of a series of large flux-mills, Macadam houses, fifty employés' cottages, numerous car-tracks, engine-houses, a branch railway, three miles long, connecting with the Belt Line and Burlington roads, one hundred "guidola stone" cars, and everything in the way of modern machinery and appliances that could possibly be of advantage to their immense business. Seventy-five cars belonging to the Belt Line are also used exclusively by Dolese & Shepard, and they have every facility for handling their heavy product of stone. Their capacity in mining and loading of stone on cars is fifteen hundred tons per diem of ten hours. They deliver two hundred tons of limestone a day to the Union Steel Company's rolling-mills, and three hundred tons a day to the South Chicago rolling-mills. The slag used by Dolese & Shepard in the construction of Macadamized streets is the entire product of the Union Steel Company's rolling-mills, which amounts to thousands of tons a month. The average number of employés is three hundred men and seventy-five teams, but during the busy season this number is sometimes doubled.

Their plant represents an investment of nearly $250,000. The senior member of the firm, with his headquarters at Hawthorne, attends solely to the executive work; the city office is in charge of Mr. Shepard. Dolese & Shepard also operate a large stock farm at Summit, where they are now farming seven hundred and fifty acres of land, most of which is owned by them. There grain and hay are raised for consumption by their own stock, and the teams used in their business are there quartered during the winter season. This farm carries on one of the largest and most extensive quarry and Macadam works in America.

John Dolese was born in Chicago, on February 12, 1837, and nearly all his life has been passed here. There are but few men now living here, who was born in Chicago forty-five and fifty years ago, and Mr. Dolese is among the very few. His father, Peter Dolese, came to Chicago in 1833 or 1834, and a year or two later, married Miss Mathilda Libe, of Detroit. They were both of French descent, coming to this country from the districts of Alsace and Lorain. Dolese, a brother of Peter, was also here at that time, identified with the liquor-importing business. The first child of Peter and Mathilda Dolese was named John in honor of the brother, and was born in a building situated at the southeast corner of Lake and LaSalle streets. The family removed to Peru, Ill., in 1837 or 1838, remaining there until the death of Mrs. Dolese, in 1840. The father then took John to Europe, where the latter remained with his grandfather's family until 1844, the father being occupied in making frequent business trips between France and America. About July 20, 1844, John Dolese returned to Chicago, and since that time has been a permanent resident. He went to Dearborn School, opposite the present site of McVicker's Theater, and was afterward engaged with his father until he had attained his twentieth year. He then commenced business on his own account, first engaging in teaming and transportation about the city. After several years, he commenced taking contracts for paving streets and making roadways in the town and villages in the vicinity. In 1856, he formed a partnership with James H. Shepard, under the style of Dolese & Shepard. They have continued in partnership ever since, meeting with the most gratifying success. They have had more to do with the paving and making of the grand boulevard system of Chicago than any other firm. The immediate execution of the great work...
has been under the personal supervision of Mr. Dolese. Not only for the financial consideration has he worked to make the boulevards a source of pride to the citizens, but in beautifying his native place he has taken as much genuine pleasure in doing his work as honestly and well as could be wished for by the people themselves. The South Park chain of boulevards has already become famous, and as Dolese & Shepard have built the greater proportion of the same they have reason to feel proud of their lasting work. Mr. Dolese was married, in August, 1857, to Miss Katherine Jacobs, of Chicago. They have nine children,—William, now engaged in the general teaming business; Matilda D., Minnie, Rosa, John, Jr., Henry, Peter, Ida and Laura. The family residence is at Brighton Park, and Mr. Dolese is a school trustee of the Town of Cicero, in which township he has resided for many years.

Jas. H. Shepard was born near Cleveland, Ohio, on October 15, 1838. He was reared and educated in that vicinity, and resided there until twenty-five years of age. After obtaining a thorough common school education, at the age of eighteen he entered into the mercantile business as a clerk. The plant of the Cleveland Rolling-Mill Company was located at Newburg, Ohio, and during his residence there he was chief clerk of their supply-house at the works. In 1863, the Union Rolling-Mill Company of Chicago, an off-shoot of the Cleveland corporation, tendered Mr. Shepard the position of bookkeeper and cashier in their office. He accepted, and has since made Chicago his permanent home. He continued in the employ of the rolling-mill until ’86, when he formed a partnership with John Dolese, and established the paving and quoining business of Dolese & Shepard. Mr. Shepard has general charge of the contracting and financial business of the firm, and has his office in the city, while his partner attends to the executive work of the company. Mr. Shepard is prominently known in financial and commercial circles, and enjoys the highest reputation for honor and integrity. He is a member of Calumet, Washington Park, Riverside Gun, Pullman Athletic, and other well-known clubs: of Hesperia Lodge, No. 411, A. F. & A. M.; Chevalier Bayard Commandery, No. 52, R. T.; and is prominently known as a staunch republican. Mr. Shepard was married, on December 17, 1868, to Miss Margaret M. Taylor, a native of Portland, Me. They have two children,—Henry Elias and Laura Jennie.

**RAILROAD HISTORY.**

**INTRODUCTORY.—**The year 1872 marked the beginning of a new era in the railroad history of Chicago. Even as late as 1871, the railroad companies had with comparatively little confidence in the realization of the hopes of the citizens, that Chicago was destined to be the great inland commercial metropolis of America. Such a lack of faith is not, however, a matter of surprise. Not even the most sanguine of prophets, looking over the ruins of 1871, could have imagined that before two decades had passed, a new city would arise, in greater beauty and added wealth, to become like Rome, the point where all roads should lead.

At the beginning of the period covered by this volume, less than eleven thousand miles of railroad centered in Chicago, and the total number of trains leaving the city daily was seventy-five. The aggregate earnings of all the companies were $82,776,984, of which $29,175,119 were net profits. The following table shows the total mileage, the gross receipts and the net earnings of seventeen roads centering in Chicago at the close of 1884:

</table>

As regards the number of trains daily leaving the city over the roads above named, at the present time (1885), in comparison with that in October, 1871, the growth is a still greater. One hundred and eight trains, exclusive of those strictly local, arrive and depart daily, and if the suburban trains were added, this number would be more than trebled, many companies running such trains at intervals of from fifteen to thirty minutes during those hours when the pressure of travel is greatest.

The policy of the railroads has been here, as around most large cities, to build up the suburbs, by affording ample accommodations, at reasonable rates of transportation, to those who sought homes beyond the city limits. The effect has been pronounced and salutary. The territory adjacent to Chicago has been filled with villages of great beauty. Persons who prefer to dwell apart from the noise and whirl of the metropolis have been enabled to combine the quiet of country with the conveniences of city life; and those whose means forbid the purchase of homes at the rates governing the price of real estate in Chicago have found pleasant abodes, easy of access, within their reach.

The growth of the railroad systems centering in Chicago has been so rapid during the period since the fire of 1871, that the corporations, while enlarging their terminal facilities and extending the length of their side tracks, still complain of a lack of adequate accommodations in the city.

A new feature has been, within the last few years, introduced into freight transportation, by the successful construction and operation of refrigerating cars for the carrying of fresh meats and other perishable freight.
The business is ordinarily conducted by the payment of a royalty by the railway companies to the owners of the cars, who also receive a percentage of the earnings. There are in this city, at present (1885), two concerns operating these cars, of which one (the Tiffany Refrigeration Car Company) has contracts with eighteen of the express and despatch companies, many of them being among the most extensive common carriers in the country. Strawberries from the South are now put down in the Chicago market in a perfect condition as they can be found in the home market, and fresh beef can be transported from Cheyenne to Boston, unaffected in any way by atmospheric conditions or length of journey.

The Lakefront.—Few items connected with the city's history have awakened more general public interest than the controversy over the question of the ownership of the lake front. The tract in dispute covers the "southwest fractional quarter of fractional Section 10, Town 39 north, Range 14 east of the third principal meridian," which embraces the greater part of that portion of the city lying between Madison and Kinzie streets on the north and south, and Lake Michigan and Michigan Avenue on the east and west.

In order to obtain a clear comprehension of the questions involved, a brief reference to the original occupation of the tract and the claims of the Beaubien heirs is essential.

The original title was vested in the United States by the cession of the Northwest Territory. Under authority conferred by Acts of Congress, approved May 3, 1803, April 21, 1806, and June 14, 1809, the President directed the occupation of the fractional quarter-section (or a portion of it) as a military post. It was first so occupied in 1804, and so continued until August 16, 1812. In the latter year, Jean Baptiste Beaubien purchased a small house near the banks of the Chicago River, near what is now known as Rush Street; by subsequent action of the water, this house was washed away. In 1817, Beaubien bought, for $1,000, another house, on the same fractional quarter-section. Here, he lived for many years, and on this residence he based a claim to a right to purchase the entire fractional quarter-section as soon as, under Act of Congress, April 20, 1816, it should be surveyed. The massacre of 1812 compelled the evacuation of the post; its subsequent occupation did not occur until 1816, and in 1823, the garrison having once more evacuated, it was left in charge of Dr. Alexander Wolcott, Indian Agent. After some correspondence between Dr. Wolcott and John C. Calhoun, then Secretary of War, on October 21, 1824, George Graham, then Commissioner of the General Land Office, advised Mr. Calhoun that fractional section 10 had been duly set off. In the ultimate hearing of the claim of the Beaubien heirs, it was urged that this made the tract a special reservation, since up to that time it had been already occupied under the Acts of Congress above cited. In 1828, it was again garrisoned by United States troops, and, in 1831, the troops were withdrawn and the post left in charge of Oliver Newberry. There appears to have been an attempt made very shortly thereafter to obtain a title, by pre-emption, to the land upon which Fort Dearborn had been erected, since, on July 28, 1831, Roger B. Taney wrote the Commissioner of the General Land Office, inclining a letter from T. J. V. Owen, then Indian Agent at Chicago, saying, "as this piece of ground is the public reservation, you are required to take such measures as will secure the interest of the United States."

On February 12, 1835, the President of the United States issued a proclamation which, in terms, ordered the sale of certain tracts in the Northwestern land district, and the closing of the Chicago land office. The land ordered to be sold included the fractional quarter-section upon which the Beaubien land was located, which at that time covered, by Government survey, nearly seventy acres. Chicago was named as the place of sale, and June 15, 1835, was fixed as the date. An appearance before the Register of the Land Office was made by Beaubien, who certified as to his pre-emption right, and afterward, on May 28, 1835, entered and purchased at private sale the southwest fractional quarter of Section 10, paying to the Receiver $1.25 an acre. On June 30, 1835, the Commissioner of the General Land Office ordered the cancellation of the conveyance by the Receiver, on the ground that the land conveyed, being a military reservation, was not subject to sale like other public lands. Beaubien denied the Commissioner's right so to decide. On July 2, 1836, an Act of Congress confirmed the previous sales of public lands, and recited that "in all cases where an entry has been made under the pre-emption laws, such entries and sales are hereby confirmed, and patents shall be issued," etc.

In April, 1839, Secretary of War Poinsett, under the Act of March 3, 1819, appointed Matthew Birchard an agent to sell a part of the reservation. Mr. Birchard, after reserving a portion for light houses, etc., laid off the remainder in lots and streets, and proceeded to dispose of the same by public sale.

In 1839, United States Deputy Marshal Talcott made another survey of a part of the fractional section 10 (sand bar), which added 26.17 acres to it, showing the accretions by a map. The legality of the sale of 1839, ordered by the Secretary of War under the Act of 1819, was disputed by Beaubien's heirs, who claimed that the Act authorized the sale only of useless and abandoned military reservations, and that "the naked title to this fractional quarter-section is vested in the United States in trust for the settler (Beaubien) and his heirs." The latter claim is based upon an old decision of the United States Supreme Court, known as the Fort Armstrong case, which held, in effect, that a purchase of a portion of the Federal domain did not divest the Government of the legal title until the actual issue of a patent to the purchaser. The heirs urge that Fort Dearborn addition has never been "restored" to the public domain, and that when restored, it must be restored to the heirs of the early settler, he having been in possession before the reservation of the land for military purposes in 1824, and, in fact, since 1812.

In 1849, the United States Circuit Court, District of Illinois, set aside the certificate of entry issued to Beaubien, and during the same year the United States Supreme Court declared the certificate void on the ground that the land in question was a military reservation. In 1854, Congress passed a special act for the relief of Beaubien, to compensate him for any damages that he might have sustained.

* The Beaubien heirs now (1885) have a bill pending in both houses of Congress looking to the "restoration" of Fort Dearborn military reservation to the public domain.

---

*The claims of the heirs cover the land as far west as the Chicago River, 30 acres, whose value, in round numbers, is $1,000,000.00.
property; and on November 26, 1877, Gassette sold his interest to Alexander McGlashen, who, on April 8, 1885, executed a mortgage covering the whole fractional quarter-section, as custodian (coupled with an interest), to George W. Reed, for $810.500. On March 17, 1889, the trustees of the Beaubien heirs made a lease to one Nathan Whitman, which purported to convey that portion of the land in dispute lying between Randolph and Madison streets, Michigan Avenue and Lake Michigan, also Dearborn Park. On March 24, 1885, another lease was made, covering the land between Randolph and Kinzie streets, on the North Side.

The various steps taken in connection with the controversy as to title between the Illinois Central Railroad Company and the authorities, will perhaps be most succinctly stated in their chronological order.

By the Act of June 22, 1851, the Legislature of Illinois authorized the Illinois Central Company to “construct, maintain and operate” a lateral branch from Twelfth Street (their then northeastern terminus) to the South Branch of Chicago River, on such terms and conditions and in such a manner as might be stipulated between the company and the Chicago Common Council. On June 14, 1852, a city ordinance was passed, whose provisions were accepted by the company. It provided, in effect, that the Illinois Central road should enter Chicago at or near the intersection of the southern border of Lake Michigan, whence the track should follow the lake shore, or on near the margin, to the southern boundary of Lake Park (Park Row), and thence in a northerly direction to Randolph Street; the depot of the road to be located on such land as the company might acquire between the northerly line of Randolph Street and the river. In this ordinance the city expressly disclaimed undertaking to obtain for the company any right-of-way “or other right, privilege or easement not in the city’s power to grant.” This wording is of importance, as it has since been relied upon as tending to disprove the legality of the Illinois Central’s claim to the property in dispute. The charter of the road fixed the right-of-way at two hundred feet. By the ordinance just mentioned, the width of the right-of-way between Park Row and Randolph Street was fixed at three hundred feet, its west line not to be less than four hundred feet east of the west line of Michigan Avenue and parallel thereto. In consideration of the license granted, the ordinance required the company to erect a breakwater, “of regular and sightly appearance,” from Park Row to Randolph Street, not more than three hundred feet east from and parallel with the west line of the right-of-way granted to the company.

In 1855 and 1856, the Common Council granted (upon terms) additional land to the company by ordinances, which ordinances were also accepted by the Central. The theory was subsequently advanced that these grants were inherently void and of no legal effect. On April 16, 1869, the State Legislature passed, over the veto of the Governor, an act which conveyed, in fee, to the City of Chicago, all the right, title and interest of the State of Illinois to the property lying “east of Michigan Avenue and north of Park Row and south of the south line of Monroe Street, and west of a line running parallel and four hundred feet east of the west line of said Michigan Avenue, being a strip of land four hundred feet in width, including said avenue, along the shore of Lake Michigan, and partially submerged by the waters of said lake.” Power to sell and convey the property east of the avenue was granted to the city, “in such manner and upon such terms” as the Common Council might direct; the proceeds of such sales to constitute a “Park fund,” to be dividedequitably among the three divisions of the city, on the basis of taxation. The title of the Illinois Central Railroad to the land, “without prejudice to the rights of the property granted to the city, whether such title had been obtained by charter or by “grant, appropriation, occupancy, use or control, and the riparian ownership thereto incident,” was confirmed; and “all the right and title of the State of Illinois in and to the submerged lands constituting the bed of Lake Michigan and lying east of the tracks and breakwater of the Illinois Central Railroad Company, for the distance of one mile,” between certain named limits, were granted in fee to that company. Annexed to the grant last named, was a proviso that the grantee should have no right to convey—a proviso which has since been made the basis of a claim that the entire grant was inoperative. Other provisions were attached, guarding against obstructions of the harbor and relating to the liability of the lands to municipal and other taxation. The tax payable to the State on the gross receipts from the use, leases and other income derived from the land granted, was to be same as that fixed in the charter of the road—seven per cent. By the terms of this Act, also, were granted, in fee, to the Illinois Central, the Chicago, Burlington & Quincy and the Michigan Central Railroad companies, the land between the north line of Monroe Street and the south side of Randolph Street, and between the east line of Michigan Avenue and the Illinois Central track and roadway, for depot purposes. In consideration of the latter grant, the three companies were to pay to the city of Chicago the sum of $600,000 in four equal quarterly payments, the first of which was to be made within three months after the passage of the Act. The sum so paid was to be placed in the “Park fund” and distributed in the manner above indicated. The same provision was made respecting the payment by the Central of seven per cent, of the gross receipts arising from leases or other uses of the lands as was attached to the grant of the lands submerged. A somewhat peculiar provision of the Act, and one which provoked much hostile criticism, was contained in section 6, which empowered the Common Council of the city to quiteclaim to the three companies the land granted for depot purposes, and provided that in case of the refusal or neglect of the Common Council to quitclaim such land, within four months from the passage of the Act, the companies were to be discharged from all obligation to pay the balance remaining unpaid to the city.

Within the time limited for the payment of the first installment of $200,000, the three companies tendered, jointly, to the city, the sum named. No little excitement, however, had resulted from the passage of the Act, in certain quarters, and the constitutionality of the law had been violently attacked. Under these circumstances, the city declined to accept the money tendered, and it was left with the City Comptroller, who held it, in an individual capacity, in trust. The entire amount was afterward returned to the companies; the Chicago, Burlington & Quincy and the Michigan Central withdrawing their respective proportions shortly after deposit, but the Illinois Central Company leaving its money in the hands of the trustee for several years.

Before the expiration of the four months from the passage of the Act, within which the Common Council was directed to quitclaim and release the property, certain parties who were strongly opposed to the occupation of any of the land granted for railroad purposes, obtained permission from the Attorney-General of the United States to file an information, in his name, in the
United States Circuit Court for the Northern District of Illinois, praying for an injunction restraining the city from releasing, or the railway companies from occupying, the land granted for depot purposes, by the Act. An injunction was awarded by the court, and no steps were taken toward the erection of a depot. The record of this proceeding was destroyed in the fire of 1871, and has never been fully restored. The injunction, however, is claimed to be still in force.

The provisions of the Act of April 16, 1869, relating to the submerged lands were, it is claimed by the Illinois Central Company, formerly accepted by that corporation on July 6, 1870, and the railroad company also alleges that between that date and April 17, 1873, it had expended $500,000 in reclaiming and reducing to profitable possession a considerable portion of such lands.

On the date last mentioned, the Act of April 16, 1869, was formally repealed by the State Legislature. The constitutionality of the last mentioned enactment was assailed by the company on three grounds; first, that it impaired the validity of contracts; second, that it interfered with vested rights; and third, that it was in violation of that provision of the fundamental law which prohibited the release or impairment of any tax imposed upon the Illinois Central Railroad, the original Act containing a provision that the company should pay to the State seven per cent. of their gross receipts arising from the use and occupation of the land granted.

At the March term of the Circuit Court of Cook County, in 1883, Attorney-General McCartney filed an information against the Illinois Central Company, the City of Chicago and the United States, the proceeding being somewhat in the nature of a bill in equity to quiet title and remove the cloud upon the title of the State to the submerged lands forming part of the bed of Lake Michigan, which had arisen in consequence of the matters above described. This action was subsequently removed to the United States Circuit Court for the Northern District of Illinois. The Canal Commissioners intervened, and filed a cross-bill, alleging an interest as trustees in a portion of the land granted for depot purposes, and asking that the information be so amended as to cover the question of title to the whole of the Lake Front Park south of Madison Street, as well as the submerged lands included within the scope of the original information. The request of the Commissioners was refused by the court, but leave was granted them to become parties to the action and therein assert their claims to the submerged lands. The City of Chicago answered the information, substantially admitting all its allegations. The proceedings are still pending.

A brief synopsis of some of the chief legal points advanced by the opposing counsel may be of value as aiding in an intelligent comprehension of the status of the controversy. The two informations proceed on different theories. In the earlier action, an injunction was prayed for on the ground that the land in question had been designated by the United States as "public ground, forever to remain vacant of buildings," and had been granted to the State solely upon this condition; that, consequently, from the moment that the State conveyed any portion of the tract for building purposes, the title reverted to the United States, and that the grant made in the Act of 1869 was void. In the latter action, the State of Illinois set up its title and denied that it had ever divested itself of the same. The State alleged that the Act of April 16, 1869, was void ab initio, not only on account of the incapacity of the Illinois Central Railroad Company to receive the grant, but because the grant itself, while it purported to create a fee in the company, coupled the words of conveyance with a repugnant restriction, since it prohibited conveyance, the right to convey being an indispensable adjunct of a fee. In addition, the State, in the later action, set forth the repealing Act of 1874, and alleged that no action had been taken by the railroad company under the Act of 1869, towards the reclaiming and reducing to profitable possession of the submerged lands. The company urges that if the provisions of the restriction were repugnant to the grant, the language of the grant itself was paramount, and the restrictions were of no efficacy, although it (the company) was willing to observe them; it set forth the claim that the repealing Act was unconstitutional and void for the reasons stated in a former paragraph, and alleged, further, that it had, between the passage of the Act of 1869 and the date of its repeal, expended the sum of $500,000 in improvements, relying upon the validity of the enactment.

In February, 1886, a public meeting was held relative to the occupancy of the lake front by the railroad companies, and there the Hon. John Wentworth made the following argument:

"This is the whole thing in a nutshell. Illinois extends to the center of Lake Michigan and the State owns the bottom of the lake to the current. The navigable waters belong to the United States, and the lake front belongs to Chicago. The interest of these three are not clashing, and there need be no fear that any one of the three wants to steal the lake front. There is no probability that the State or the Nation will do anything adverse to the interests of Chicago. The trouble is, that the men who want to dodge the question and divert attention from what the railroad is doing pretend that there is great conflict between these three parties.

"The real thing to be feared is, that a foreign corporation will get possession and build up a rival city, greatly to the detriment of the present city's interests. All that the Illinois Central Company wants is, that the Government, State, and city shall let it go on and do what it pleases, and thereby fortify it a title which it claims to have acquired by an Act of the Legislature of 1869, which was repealed by the next Legislature. Governor Palmer vetoed that bill of 1869, and his argument was exhaustive and unanswerable. But the Legislature corruptly passed it over his veto. The city has never recognized any rights acquired by that legislation.

"Now, the Illinois Central is running a pier out into the outer harbor, and the duty of the military works. It is very strange that the railroad did not make or try to enforce its claim while Lincoln was Secretary of War. I can not account for the conduct of the present Secretary of War. He has had his officers here report what is necessary for purposes of navigation. They reported that vessels of such and such draft—I can't give the exact figures—can now come only so near the shore, and that the waters inside of this line are not needed for purposes of navigation. The Illinois Central intends to build its pier below Fourteenth Street out to that line, and then turn it north and inclose the whole of the shallow water. It will then fill in the closed space and thus acquire some thirty or forty acres, which will be worth millions. To the dockage thus created all the great lumber interests down on the river and many other interests would be transferred, and the Illinois Central would have a monopoly of a very large business, which it now has the exclusive right to."

"I hold that the conduct of the Secretary of War is very deceptive. The interests of navigation may require that some of the shallow water, which his officers report is not needed, shall be deepened and made navigable. It is not for army officers to say what the interests of commerce may hereafter require. The Government has several dredgeboats here, and with small expense can dredge out earth enough to make the waters navigable clear up to the present shore.

"I hold that the Government, the State, or the city, should part with nothing, and if any other party claims to have any interest there, it should be compelled to support its claim in the courts of the United States. It would be a farce for the United States, or the State, or the city to commence suit. They have possession, and have had it, and should enforce their right against all trespassers."
Illinois Central Railroad.

The management of the Illinois Central has always recognized the fact that its interests were closely identified with those of Chicago. An illustration of this is afforded by the fact that of 19,372,210 bushels of grain forwarded from stations in Illinois and 4,684,390 bushels forwarded from stations in Iowa, during 1871, 18,796,100 bushels were received at Chicago. This year witnessed a decrease of $124,474.36 in the net earnings of the road, as compared with those of 1870.

In 1871, a traffic agreement was entered into with the Chicago, Burlington & Quincy Railroad Company. During 1871, there was substituted for this contract one embracing not only that road but also the Chicago & Iowa and the Chicago, Dubuque & Minnesota roads, under the terms of which the Illinois Central secured the eastern traffic of the latter line between Dunleith and Forreston, as well as lower tolls between the main line and Chicago, via Mendota and Forreston, on all northwestern traffic.

The Land Department, in 1871, sold 48,927.31 acres of the land donated to the road for construction purposes, receiving therefor $459,154.26, the average price per acre being $9.39. The cash receipts from land sales during 1871 (including payments on land notes) were $1,633,153.53, of which $1,000,000 was added to the construction-bond fund. Among the losses of the company in the great fire were the trustees' records and a part of the bonds delivered. As a result, further literal compliance with the terms of the construction-mortgage was prevented. To protect the purchasers of bonds, it was decided to place at the disposal of the trustees a fund sufficient to pay all the bonds. Up to the close of 1871, bonds had been received to the amount of $13,605,500. These had been either cancelled or destroyed. On December 31, the construction-bond fund under the trustees' control, amounted to $2,630,000; to this was to be added, in 1872, $300,000 from the fund; and the aggregate sum, with its accumulation of interest, was deemed sufficient to meet the outstanding balance of the original issue of $17,000,000 construction-bonds.

In the fire of October, the passenger and freight depots, the land office and several smaller buildings of the company were destroyed, besides twenty-six freight cars. On the station grounds was Elevator "A," owned by private parties, the destruction of which seriously crippled the capacity of the company for handling grain. The freight depot was at once re-built.

In 1872, the earnings of the road exhibited a still farther and more marked decrease, showing a falling off of $629,740.61. Of this decrease, $135,000.68 were in receipts from passenger transportation in Illinois, and $4,861.54 from the same source in Iowa, while the freight traffic in Illinois showed a diminution of $432,337.69. In Iowa, however, the receipts from freight transportation were $67,299.66 in excess of the preceding year. A comparison of the working expenses shows that the cost of operating in 1872 exceeded that in 1871, by $294,914.70. A portion of this increase was chargeable directly to repairs at Chicago consequent upon the fire, and to the protection of the road on the lake shore, but chiefly to an excess in train service required to move the additional tonnage, consisting mainly of coal and other cheap freights,—the coal traffic alone amounting to 371,600 tons, an increase of 112,000 tons over 1871. The wisdom of the traffic agreement with the Chicago, Burlington & Quincy, and other companies, was proved by a net increase of $189,164.56 in the earnings of the first named road, which was caused by the fact that under the new agreement the Iowa traffic passed a greater distance over that line. The total transportation of freight in 1872 was 2,359,321 tons, equivalent to 272,290,000 tons moved one mile; the average revenue was 2.15 cents per ton per mile, being sixteen cents less than the average for 1871.

The terminal facilities of the road at Cairo were greatly improved during 1872, by purchasing from the Cairo trustees one thousand five hundred feet of the Ohio levee, for a freight transfer station and car-ferry for the connection with the Mississippi Central, with which company and the New Orleans, Jackson & Great Northern (both operated under the same management) a contract was made during that year. Under the terms of this agreement, the former road was to be extended to Cairo, and a mutual interchange of traffic was arranged.

The Land Department, in 1872, sold 41,677.57 acres, for $336,918.68, an average price of $8.80 an acre. The aggregate sales up to the close of the year amounted to $2,530,052.09 acres, the price received amounting to $23,622,553.17. The expectation of the management that the sum received from this source would, in addition to funds already on hand, with accumulations of interest, reach a total sufficient to retire the outstanding construction-mortgage bonds, was realized, and at the close of 1873, all of the original $17,000,000 issue had been redeemed, with the exception of $3,074,000 not due until April 1, 1875. The entire receipts of the land office during 1874 were $458,675.89; its expenses $30,814.42. In 1874, 34,523.40 acres were sold for $262,652.33, leaving 298,105.82 acres of the original grant yet undisposed of.

In 1873, the Cincinnati & Lafayette Railway was extended to Kankakee, forming, with the Illinois Central, a direct line between Chicago and Cincinnati, and a running arrangement was effected between the two companies, which proved mutually advantageous, and has been in force ever since.

The expenditure chargeable to permanent improvement in 1872 was unusually large, reaching $502,496.36. Of this sum, $99,488.51 were used in making improvements at Cairo, to facilitate the transfer of cars to the Southern Line. A new dock was constructed at Chicago, and an addition of 91,298 square feet of land was made in the lake, opposite Madison Street, in order to give the Michigan Central Company possession of the land leased them in 1872. Over 4,000 tons of steel rails were used in renewals, and a general system of replacing iron rails with steel, as rapidly as renewals were needed, was entered upon. The total net earnings for 1873 were $2,530,052.09. The net result from the traffic in 1874 was $2,775,362.78.

The connection with the Mississippi Central at Cairo was effected on December 24, 1873, and at the conclusion of the first year's operation under the agreement between that company and the Illinois Central, the experiment was pronounced successful.

The earnings, in 1873, showed a decrease from those of 1874. The year was one of unusual business depression, on that portion of the road which had ordinarily proved most productive there was a partial failure of crops; added to these drawbacks, the road suffered from the competition of adjacent lines.

The year 1876 was, in some respects, an exceptional one in the history of the company. Its earnings were materially lowered, and its dividends proportionately diminished. In Iowa, where the Illinois Central controlled hundred miles of leased lines, adverse
legislation compelled reduction of from twenty-five to forty per cent, in tariff charges. A bad harvest and short crops had preceded, diminishing the volume of traffic at the time when compensation was compulsorily reduced. Another cause for diminution of revenue was the contest of some of the trunk lines for the grain trade of the West. Their ramifications had been extended, until, at various points, they touched the Mississippi, and, in order to control traffic from points of production, engagements for through freight to New York from several points in Central Illinois had been made at rates as low as those ruling between New York and Chicago. In consequence, all inducement to ship grain directly to this city disappeared.

The stringency of the times forced many local lines of railway into bankruptcy. Thirty-five different corporations, operating some three thousand miles, were either actually in the hands of receivers or threatened with proceedings in insolvency. The Illinois Central was urged to purchase or lease several of these roads. The terms offered were, in many instances, far below the original cost, in some cases the sum asked being only fifteen per cent of their par value.

Default having been made in the payment of the interest due on the $5,000,000 bonds of the railways composing the Southern line, both roads were put in the hands of a receiver on March 10, 1876, and before the close of the year the railways were in the hands of trustees of the mortgage, for sale for the benefit of the bondholders. This step placed the entire line from Cairo to New Orleans under control of the Illinois Central. James C. Clarke, then general manager of the Central, was, on January 1, 1877, made general manager of the line. Under the new ownership, repairs were made to the plant, bridges and other structures; nearly two hundred miles of track were re-laid, and during the following spring ten thousand tons of steel rails were laid. The receipts of the road were applied, under orders of the court, partly in paying local debts and partly in improving the property. Nearly three-quarters of the stock of the new Southern Consolidated Company—the purchasers—was owned by the Illinois Central, who also advanced, for necessary purposes, about $1,000,000. Even during the transition period of 1877, the traffic showed a decided gain, the deliveries at Cairo of freight destined for the South having increased nearly fifty per cent. over those of 1876.

The outlook for the company at the close of 1877 was encouraging. The competition of the trunk lines ceased to menace the Central's traffic. The facilities for water communication, during eight months of the year, were so much improved that the actual cost of transportation to the seaboard by that route was less than half that of railroad transportation. The net earnings for 1877 were $2,516,656.39. In July, 1877, the Gilman, Clinton & Springfield Railway passed under the control of the Central management.

In 1878, the net gain from traffic, over 1877, was $468,667.80, and the gross income $5,147,387.64. Low tolls on the Erie Canal, and cheap freights by lake, drew to the lines of water transportation an immense volume of business, the receipts of grain at Chicago having been 35,000,000 bushels in excess of those of any previous year. A spur, thirty-seven miles long, was built in 1878, running in a southwesterly direction from Otto, on the Chicago division, and proved a profitable investment. Its cost was about $350,000.

The net income for 1879 was $3,401,815.66; and the balance to credit of income account, on December 31, 1879, was $2,072,839.80. There were $386,276.15 expended on construction account in Illinois. Nearly eight thousand tons of steel rails were laid on the main line and branches.

The company's receipts for 1880 were $3,747,532.97. From this fund, two semi-annual dividends of three per cent. each were paid (aggregating $1,740,000), the interest on the bonded debt was discharged, $842,523.56 was expended in permanent improvements, leaving a surplus of $501,641.14. The amount expended in construction included the re-laying of fifteen miles of track with steel rails, the construction of three iron bridges, nine heavy freight engines and two hundred and twenty-seven cars; also additional double-tracks at the entrance to Chicago, and a new dock. The branch line from Otto was extended to a junction with the Northern Division at Minonk, affording an independent connection between that division and the Chicago branch.

The following summary shows the receipts and expenditures of the company during 1881:

On January 1, 1883, the Illinois Central took formal possession, as lessee, of the Chicago, St. Louis & New Orleans Railroad, increasing its mileage to 1,908 miles, and the New Orleans line was thenceforth known as its Southern Division.

Several new branches were built during 1882. One, ten and one-half miles in length, was opened from Buckingham, on the Middle Division, to the newly discovered Essex coal-fields. The extension of the Middle Division to Bloomington was commenced, as well as a branch to South Chicago, both of which were completed in 1883. The construction of two important branch lines, connecting with the Southern Division, was also commenced; one from Jackson, Miss., to Yazoo City, forty-eight miles, the other a continuation of the Kosciusko branch from that point to Aberdeen, ninety-seven miles.

During 1883, the last of the redemption mortgage bonds were paid, and the mortgage of February 1, 1864, satisfied and discharged of record. The only lien upon 703½ miles of the Illinois Central line at the end of 1884, consisted of the outstanding bonds issued under the $15,000,000 mortgage of August 10, 1874.

The year 1883 was a prosperous one. The gross traffic receipts were $13,064,743.39, being an increase of $103,035.68. The net income, from all sources, was $5,764,391.95; the surplus being equal to more than ten per cent. on the capital stock.

The gross earnings for the year 1884 fell somewhat below those for 1883, amounting to $12,190,833.39; the net earnings were $4,826,514.32, a sum which was also somewhat lower than that which represented the net earnings for 1883. The company's net receipts from all sources (including traffic, sales of lands, interest of investments, etc.) were $5,287,627.10. Payments were made from this sum on account of permanent improvements, interest, rental, sinking funds, etc., amounting to $2,423,488.39, leaving $2,864,138.71 available for the payment of dividends, purchase of equipment, etc.
From this fund were paid the usual semi-annual dividends (amounting to $2,320,000); $250,000 was set apart by the directors to pay for additional equipment; and $294,138.71 were carried forward to the surplus dividend fund, and held as applicable to the payment of the next succeeding dividend.

months and was then sent to Detroit as an apprentice in the Detroit Locomotive Works. He remained there for about fifteen months, and obtained a very good general knowledge of the workings of engines. He was then fifteen years old, and returned to Chicago. He next went to work in a stove factory on Clark Street, piling up hot staves. His employment necessitated his presence in the drying kiln, which was heated to a temperature of 135° and 140° Fahrenheit.

EDWARD T. JEFFERY, general superintendent of the Illinois Central Railroad, was born in Liverpool, England, on April 6, 1843. His father, William S. Jeffery, was born at Glannock-on-Clyde, Scotland, though of English descent, and was a mechanical engineer in the merchant marine service, and afterward in the British Navy. Mr. Jeffery's mother's maiden name was Jane McMullen, her ancestors being English, but the place of her birth being at Donpatrick, Ireland. Until he was five years old the family resided in the City of Liverpool, that place being the headquarters of the senior Jeffery when he was not at sea. In 1846, the family came to America, locating at Wheeling, West Virginia. The following seven years of his boyhood Mr. Jeffery passed there, and during the greater portion of the time was at a private school, where he gained the first rudiments of an education. In 1856, the family came to Chicago, and in September of that year Mr. Jeffery, then thirteen years old, entered into the employ of the Illinois Central Railroad, little dreaming of the magnificent future before him. He was ambitious, of course, but at that early day his aspirations only arose to the height of good pay for the work performed. He entered the office of Samuel J. Hayes, superintendent of machinery, where he was employed about the office for two months, running errands, doing odd jobs, etc., and was then put to work in the tin and coppersmith shops as an apprentice. He served there for four years and this was not entirely suitable to him, so, on July 5, 1858, young Jeffery applied for a position with the Illinois Central Company, and he was put to work in the shops. Mr. Hayes, upon whom he had formerly worked, finding the lad again in the employ of the company, requested him to come to his office and take a place there. Mr. Jeffery did so, and was given a place as an apprentice in mechanical drawing. This seemed in every way perfectly suited to the nature of Mr. Jeffery, and he became enthusiastic and assiduous in his work, and determined to be first himself thoroughly and completely for the profession of master mechanical draughtsman. He commenced a series of systematic studies that occupied his time for a period of ten years, embracing all the special as well as general studies. So ardent and ambitious did he prove to be, that up to the time he was eighteen years old, he was given the privilege to study or work, as he felt inclined. He thus combined the theoretical with the practical, and by the time he was nineteen years old he was on the rolls of the company as one of the regular mechanical draughtsmen. At twenty he was placed in full charge of the mechanical drawing department. He applied himself to study during leisure hours in the week, in the evenings and on Sundays, and when Mr. Jeffery was twenty-five years old, few men of his age had so liberal an education. Upon being placed in charge of the mechanical drawing, Mr. Jeffery was also made pri-
of salary or a promotion in position, and though he has again and again been tendered offices of like nature at a high salary he has declined them, preferring to remain with the road with which he has literally grown up and to which he has become greatly attached.

In 1855, the International Railway Congress was held, and Mr. Jeffery, as a delegate from the Illinois Central Railroad Company, was the only American representative there. In early days, Mr. Jeffery was president, for a few years, of the Young Men's Literary Society of this city. Mr. Jeffery is a prominent and active member of the American Railroad Master Mechanics' Association, of the Calumet and Indianapolis clubs, and belongs to Blair Lodge, No. 393, A.F. & A.M. Although not mixed up in politics at all, he is deemed a "modem" democrat. Mr. Jeffery is now a director of the Cincinnati, Indianapolis, St. Louis & Chicago Railroad, but devotes all his time to the interests of the Illinois Central. On April 21, 1877, he was married to Miss Virginia O. Clarke, of Frederick, Maryland; they have two children, James Clarke and Edna Turner.

THOMAS DORWIN, general northern passenger agent of the Illinois Central Railroad Company, has been in the service for over thirty years. He was born in Courthand County, N. Y., in the year 1854. He can off to sea when a boy and saw many foreign shores. After indulging in various other occupations which carried him over a great portion of the United States, he finally entered the employ of the Lake Shore & Michigan Southern Railway Company, at South Bend, Ind., taking charge of the warehouses at that point. This was before the Fort Wayne Line was completed, and the surrounding country drew its supplies from this locality. In 1856, Mr. Dorwin was sent to Galesburg, Ill., where he was being placed in charge of the transfers and shipments of the Northern Central road. He remained there until his absorption by the Chicago, Burlington & Quincy Company. When the Peoria & Oquawka Line was finished to Galesburg, he became station agent there, and when that road was consolidated with the Chicago, Burlington & Quincy he was transferred to Peoria, where he was made yard-master of the Toledo, Peoria & Wabash Railroad, and put in charge of the warehouses. After holding this position for some time, he was a conductor of a train for a year, and then went to Galesburg, where he remained with the Chicago, Burlington & Quincy road until 1866. During that year, he was made general western passenger agent of the Southern & Mississippi Railroad, and after serving two years in this capacity, with headquarters at Kansas City, was sent to Louisville, as general southern agent of that road. In one year, he was transferred to St. Louis, and was made western passenger agent of the same road. Next he was general western passenger agent of the Vandui line, and afterward was made general passenger agent of the Missouri, Kansas & Texas Company. He held this position for five years and, in 1856, was made general agent of the Texas Pacific Road, with headquarters in Chicago. In 1878, he was called to his present responsible post.

OBAN OTT, general purchasing agent of the Illinois Central Railroad, was born in Saratoga County, N.Y., in the year 1820. At an early age, he took to railroading, and his pursuits have been with the common schools and, after finishing the higher branches, entered upon the study of law. In 1847, he was admitted to the courts of New York, but was forced to forego the practice of his chosen profession owing to the decline of his health. Believing that it would be of benefit to him to come West, he started for Chicago and after a few months passed in recreation he located at Long Grove, Lake Co., Ill., and commenced filling the courts of this state in 1848. In 1852, Mr. Ott was appointed a paymaster in the Construction Department of the Illinois Central Road, which was then building the main line south to Cairo. After this work had been completed he was appointed station agent at Mendota, Ill., where he remained for one year, and was then transferred to Dunleith, where he acted in a like capacity for three or four years. He was then appointed Assistant Superintendent of the Chicago Division, and located in Centralia, which position he held for some time, and, in 1866, was transferred to the Land Department of the road, being appointed comptroller, and in 1872 was made the general purchasing agent of the company, with headquarters at the general office in Chicago. Mr. Ott has had charge of that department for nearly fourteen years, and his long term of service with the Illinois Central and in the position he now occupies, has greatly increased both his knowledge and his worth and value to the corporation.

He was married in July, 1848, at Albany, N.Y., to Miss Lydia Nash; they have two children—James W. and Katie.

JOHN C. WELLING, general auditor of the Illinois Central Railroad Company, was born near Trenton, N. J., on February 24, 1840. He received his education at the schools in Trenton and Lawrenceville, N. J., until finishing his studies, in 1858, when he entered the employ of a firm of which his father was a member, in the grain and lumber business at Titusville, N. J. He remained there until July, 1859, when he was appointed clerk in the office of Mr. Jeffery, general agent of the Illinois Central Railway, at New York, paymaster of the United States Army. He was in the government service until August, 1866, and then resigned his position to take the office of cashier of the Ironton Railroad & Mining Company, whose mines were located near Aliquippa, Pa., and owned by Robert Lenox Kennedy, of New York. In December, 1870, Mr. Welling was called to New York City by Mr. Kennedy, and he became his private secretary, serving him in confidential relations, until the date of his entry into the service of the Illinois Central Railroad Company, in the spring of 1874. He first held a clerkship in the financial office of the company in New York, and, on July 29, 1874, was promoted to the office of accountant, and removed to Chicago to take the position on September 1, 1874. Two years later he was made auditor, and on January 1, 1883, he was elevated to the office of general auditor, and now has supervision over the accounts of the entire Central Railroad Company. Mr. Welling was married, on November 5, 1874, at Belvidere, N. J., to Miss Charlotte V. Paul. They have one child living—John Paul Welling. Mr. and Mrs. Welling reside at Hyde Park, where they are attendants at the Presbyterian Church.

WILLIAM J. YOUNG, commercial agent of the Illinois Central Railroad Company, was born at Lancaster, Glengarry Co., Ontario, Canada, on March 29, 1843. He was brought up on a farm, and attended the country schools until he came to Chicago and entered the service of the Illinois Central Railroad Company, on July 25, 1861; with which corporation he has since been connected, with the exception of a few months in 1871. He first commenced work for this company as a day laborer in the freight-house here, but so remained only a few weeks, when he was transferred to the yards, and kept the records of freight-trains received and forwarded. In this capacity he served about a year, and was then placed in charge of all freights received and discharged from vessels. In March, 1866, he was again promoted and transferred to Centralia, Ill., and took charge of the freight office there for a year. He then returned to the local freight office in this city, where he occupied several clerical positions until March, 1871, when he was appointed agent at Sioux City, Iowa. In July of that year, he resigned that position and withdrew from the company's service, having decided to return to Chicago and go into the produce commission business. He was thus occupied until the great fire in October, and the believing he could do better, returned to the Illinois Central Railroad. He was made freight agent, and held that position until January 1, 1882, when he was appointed to the office of commercial agent. Mr. Young was mar-
In New York City, on December 29, 1870, to Miss Fannie J. Smith, of that city. They have one daughter, Ella.

**R. W. Brown,** master carpenter of the Chicago, Rock Island & Pacific Railroad, was born at Bellows Falls, Vt., on February 13, 1821. He was brought up in his native town, learning his trade and residing there until he was twenty-two years old. On September 18, 1843, he entered into the employ of the Illinois Central Railroad company with which he has been principally identified since. He was first employed as a foreman of repairs on bridges and buildings for the company at Waverly, near Springfield, Mass. He was with that road for nearly three years, and, in the spring of 1847, he went to Boston and engaged in the restaurant and catering business. This not proving satisfactory, he had arranged to take a position of some responsibility with the Western Railroad in September of that year, and resumed work at Springfield. He remained there until December, 1853, and then took the position of car-builder in the works of Tracey & Fales, of Hartford, Conn. He remained in their employ until June, 1856, and then took the foremanship of the passenger car department of the American Car Company, at Seymour, Conn. In 1852, Mr. Snow decided to make Chicago his home, and on removing here took a contract to build six coaches for the old Galena road. His works were then located on West Kinzie Street; and he subsequently moved them to where the car-works of the Illinois Central are now located. In 1859, or 1853, he took a contract to build all the passenger coaches for the American Central Car Company, but before he had fairly finished the contract the company failed. In 1856, Mr. Snow removed to Madison, Wis., and went into the furniture business. He had been there that summer when the Illinois Central made overtures for his services as general foreman of their car-works, they having come into possession of the property of the defunct American Car Company. Their proposition was accepted, and he went to Chicago and entered the service of the company; with which he has been connected for over twenty-eight years, with the exception of the time from March, 1872, to January 15, 1875, when he was traveling mechanical inspector of the Pullman Palace Car Company. Upon his return to Chicago in the latter year, he was made master mechanic of the car department and holds that office at the present time. During his service with the Illinois Central, Mr. Snow has personally super- vised the construction of every passenger car run on their lines, with the exception of a few that were purchased, owing to the urgent demands for them in years past. The entire number of cars run through his subordinates trains have their origin in the years, 1856, Snow's connection with the road, and the superior construction of the Illinois Central coaches is ample evidence of his ability and skill as a mechanic. Mr. Snow was married, on September 28, 1854, at Springfield, Vt., to Miss Cora E. Dyke, a sister of E. F. Dyke, of the well-known firm of Atchley, Dyke & Co., of this city. They have two children,—Frank and Lotta Louise.

**Mr. Harper,** superintendent of the Illinois Central Railroad Company, is a native of Germany, but came to this country when he was a lad. He was born on November 25, 1840, at Dann, Rhine Province, and lived in his native town until fourteen years of age. He came to America in 1854, and he held a half and a half and a third of the company for the four years, a resident here. On August 13, 1855, he went into the Weldon Shops of the Illinois Central Railroad as a machinist's apprentice. He served his time at the shops until August 31, 1859, when he was made foreman of the car department, and remained with the Illinois Central until June, 1865. He was then offered the foremanship of the erecting shop of the Chicago, Rock Island & Pacific Railroad and accepted the position, working for that company in the same capacity until October, 1867. From October, 1868, to December 31, 1872, he was foreman of the machine shops and general foreman of the Rock Island road. On January 1, 1873, he returned to the employ of the Illinois Central and took the position of master mechanic. He so remained until November 1, 1882, and was then appointed to the position of superintendent of machinery. Mr. Schiwack was married in this city on February 11, 1870, to Miss Christine Schiwack. They have nine children: Charles H., Henry C., Joseph T., Magargilie, Louise, William, Eddie T., Gertrude and Robert. The eldest son, Charles, is serving his apprenticeship in the shops with his father, and the second son, Henry, is studying with Mr. Adams & Sullivan architects.

**William Harper,** master carpenter of the Illinois Central Railroad, is one of the oldest mechanics of this city, and is one of the oldest employees of the Illinois Central Railroad. Mr. Harper was born in Virginia, on June 17, 1811, but his family moved to Ohio when he was a child, and it was there he was reared to commerce. He attended the common schools, and learned the trade of carpenter, serving his time in the City of Cleveland. After finishing his apprenticeship he "struck out for himself," and went to Green Bay, Wis., where he passed four years, following his vocation, and then came to Chicago, remaining a few months, and then went to Buffalo, afterward to St. Louis, and finally locating at Joliet, Ill., in the same year. In 1840, he finished the National Hotel there, and married Miss Jane M. Hughes on March 11, 1841. In the fall of 1841, they came to Chicago, and have resided here continuously since. Mr. Harper worked in the old hydraulic mills, which then stood at the foot of Lake Street, and which were superintended by Ira Millmore. He was afterward engaged in work for Alexander and Shepard, railroad companies & Wilcox, all pioneers of the city. On September 18, 1853, he closed his engagement with the last-named firm and went into the service of the Illinois Central Railroad Company as a journeyman. On January 1, 1857, he was placed in charge of the carpenter work of the road between Chicago and Cairo, and, in 1875, took full charge of the same work between Sioux City, Iowa, and Cairo, Ill., the work south of that, he went back to Cairo and New Orleans. Although nearly the alloted age of three score and ten, when men retire from business cares, Mr. Harper is still a vigorous, hearty man, having in hand the details of every master carpenter's department. Mr. Harper has, without doubt, erected more buildings than any other master-carpenter in Chicago. Mr. and Mrs. Harper are the parents of four children: George W. Harper is a member of a firm at the Union Stock Yards; Charles, in the employ of the Illinois Central; and William H., general agent of the Southern Pacific Railroad, at El Paso, Texas; the only daughter, Jennie, is the wife of W. B. Adams, of Joliet. Mr. Harper joined the Independent Order of Odd Fellows about 1859, but the last ten years has been a non-affiliated member.

**Oliver A. Berry,** trainmaster of the Illinois Central Railroad, was born in Pennsylvania, in the year 1814. He resided in that State the earlier part of his life, entering into the railway service there in 1835. In those days the State owned and operated the Philadelphia & Columbia Railroad, which now forms the eastern end of the Pennsylvania system. Mr. Tuton was engaged in transportation work on that road for the first four years and, in 1839, was appointed by the State to the position of superintendent of road and bridges, and a half and a third of the State, and an intendent of motive power, retaining that office for the same length of time. In 1842, he returned to the transportation province, with which he remained till 1844. He then retired from the road and entered in other pursuits until March, 1852, when he came West and went to farming, which he continued for twelve years. In 1864, he went into the employ of the Illinois Central Company as yard and dock master in this city, which position he held until 1871, when he was made local freight agent, and that office he holds at the present time. The weight of years falls to tell upon the iron constitution of Mr. Tuton, one of the oldest officials in the service with the Illinois Central, and he discharges the business of his office with promptness and vigor well worthy a man far younger in years. He was married, in Philadelphia, in 1834, to Miss Sarah Ann Varindie. They have had eleven children, seven of whom are living. Mr. Tuton, a member of the local order while a resident of Philadelphia, but is now non-affiliated.

**Chicago & North-Western Railway.**

This company's history, during the period under review, exhibits many of the salient points shown by that of other roads. An examination of the mentioned tables will not only afford a comparative view of the business of the road, but will also show a steady and (to some extent) compulsory reduction in the rates of freight transportation joined to an almost constant increase in tonnage.
In 1871, the gross earnings decreased 6.71 per cent. from those of 1870. The reduction of operating expenses (including taxes) was 21.24 per cent., and the increase in net earnings was $1,029,555.86.

In the consolidation of the Galena & Chicago Union Railroad Company with the Chicago & North-Western Railway Company, the latter came into possession of the Beloit & Madison Railroad, extending to Madison, Wis., where it connected with the Prairie du Chien division of the Milwaukee & St. Paul Railroad. The business of the Madison branch for many years was comparatively light. The company, in 1867, had purchased the La Crosse, Trempealeau & Prescott, and the Winona & St. Peter railroads; and, in 1871, obtained control of the Baraboo Air Line Railroad. After consolidating that road, and the Beloit & Madison, with their own, steps were taken to construct the line of about one hundred and twenty-six miles from Madison to the termination of the La Crosse, Trempealeau & Prescott Railroad near La Crosse.

Of the roads purchased in 1867, the Winona & St. Peter was the most valuable. The length of the road on May 31, 1871, was one hundred and forty miles, extending from Winona westward, through the State of Minnesota, to St. Peter with a branch to Mankato, on the Minnesota River. The franchise was valuable, granting the right of construction as far as the Big Sioux River, in Dakota, and carrying with it a land grant from the United States Government of 6,500 acres a mile. One hundred and twenty miles of the original line remained to be completed in 1871, while the land at that time certified to the original company since the franchise, and which came into the possession of the Chicago & North-Western directory, was a trifle over 207,000 acres—an asset which, at a reasonably low estimate, might be valued at $1,000,000. A further grant, under State law, gave to the company 800,000 additional acres (the estimated value of which was $4,000,000), contingent upon the completion of thirty miles of road annually.

An extension of three and one-half miles, from the Minnesota River to Mankato, was constructed. Another branch, two and one-half miles in length, was built in Illinois, from Geneva, on the Dixon air line, to St. Charles. Negotiations were also concluded during the year for the purchase of the Iowa Midland. The charter of the company authorized the extension of the road across Iowa, and was available for whatever branches the interests of the line might demand. The road was operated under a perpetual lease (until its purchase in 1884) as a part of the Chicago & North-Western Company.

A movement was made to re-open the Elgin & State Line Railroad. Many years before, this piece of road had been laid with strap-rail and operated in connection with the Elgin & State Line division of the Galena & Chicago Union Railroad, before the consolidation of the latter company with the Chicago & North-Western. The rails, however, had long since been removed, and the old grading and right-of-way suffered to remain uncultivated. The growth of the village of Lake Geneva, and its increasing prominence as a summer resort, inducing a belief that the improvement and re-opening of the branch would prove profitable, an arrangement was made by which the old grading and right-of-way were secured, and a charter was obtained under the name of the State Line & Union Railroad Company.

The company's losses in the fire of 1871 were very serious, amounting to more than a million dollars, there being, however, a partial insurance in good companies. Among the most important property destroyed were two large grain-elevator (from which the company derived an annual rental of $25,000), besides two other elevators, belonging to private parties, situated on the North-Western tracks, but used exclusively in the company's business. The passenger depot of the Galena division, with many smaller buildings, were utterly destroyed, as well as the large block occupied by the company's general offices. Of the rolling stock, one hundred and thirty-five freight-cars, standing on the track and in the warehouses, were burned. The actual value of the property destroyed was less than the inevitable loss of business resulting from the first effects of the fire. Within sixty days after the fire, however, the receipts of the company had recovered. The construction of two new elevators—one on the company's ground and one on the old site on their tracks—was at once commenced, the capacity being 1,500,000 bushels, and they were completed in time for the ensuing harvest. Two large temporary wooden freight-houses were erected, to supply the immediate and pressing wants, and the re-building of the burned warehouses was at once commenced.

For the year ending May 31, 1872, the revenue showed a decrease of $292,753, or 2.56 per cent., in gross receipts. Of this deficit, $143,966.16 belonged to the first week following the fire, and $279,454.49, nearly the entire amount, was within the first four weeks. The total decrease in earnings during the six months ending November 30, 1871, amounted to $765,562.21, while the revenue for the six months following showed a gain over the corresponding months of the previous year, of $472,809.21. The extra amount and price of labor and materials required for temporary accommodations in Chicago, and in expensive renewals and repairs consequent upon the fire, affected the operating expenses, which, during the year, amounted to $668 per cent of the gross earnings, and, if taxes and charges to account of fire losses be included, reached $972 per cent.

The construction of the Menominee extension, designed to fill a gap of one hundred and twenty miles in the company's lines between Fort Howard and Escanaba, was supplied by the use of stage-coaches in winter and steamboats during the season of navigation. Grants of land, aggregating 800,000 acres, had been made by both the General Government and the State of Michigan, none of which would be available unless the line were completed in 1873. By February, 1872, fifty miles had been put in operation.

The line from St. Peter, Minn., to New Ulm—thirty miles—was opened in February, 1872. The Iowa Midland Railway was finished to Anamosa in October, 1872, and a connection there made with the Dubuque & Southwestern Railway, with which corporation reciprocal traffic arrangements were made.

During the year ending May 31, 1873, the mileage of the road was increased 145.42 miles, of which 108.5 miles were on the main lines. The financial results of the year's operations were not satisfactory. The tonnage of freight carried showed an increase of 17.86 per cent. over the preceding year, but the revenue from this source increased only 15.95 per cent., the rate per ton per mile having decreased nearly ten per cent.; the number of passengers carried was 11.44 per cent., in excess of those carried the year before, but the gain in passenger earnings was only 7.64 per cent.; the gross earnings increased 11.7 per cent., but a necessary
crease of service showed its result in an increase in the percentage of operating expenses to 64.21 as against 59.72 during the year preceding. In consequence, the net earnings exhibited a decrease of $434,410.25.

During the year, a branch road outside and west of the city, leading from the Wisconsin Division main line, at Swing Park, six miles from Chicago, to an intersection with the Galena Division line, about five miles west of the Wells-street passenger station—known as the "Circle track"—was constructed and put in operation.

The general office building, completed this year, on the corner of Kinzie and Market streets, is of brick, substantially built and conveniently arranged. Its cost was $1,202,176.02. The new machine and repair shops were built of brick and stone, with iron truss roofs.

The report of the Land Commissioner showed the sale of 24,296.18 acres of land in Michigan and Wisconsin, at an average of $4.78 an acre. The number of acres remaining May 31, 1875, was

</table>

These lands were of varied character. Many acres were timber land, and several alternate sections had been granted to the company in the very heart of the mining districts. The stagnation in the lumber and iron ore interests, however, rendered the sales light.

The year's business showed a decrease in gross earnings of 12.14 per cent., more than one-half of which was the result of the "Granger legislation." There was an average reduction of 0.852 cents per mile per passenger—passenger rates aggregating $15,267.96. In freight rates, the reduction was 0.8742 cents per ton per mile, amounting to $791,819.05; the total loss from lowering of rates being $1,008,087.91.

In the annual report of the company for 1877, the advantages of location enjoyed by the road are thus spoken of:

"The three main lines of the company's railway and their ramifications cover the quadrant of a circle, whose radius of over five hundred miles sweeps the north, northwest and south of Chicago. Nearly every variety of production and industry incident to the vigorous activity of that country, from Lake Superior on the north to the transcontinental traffic via Omaha on the west, is embraced within the limits of these including lines. The iron ore, the copper, stone, minerals and timber of the Upper Peninsula of Michigan; the manufactures, agriculture, commerce and immense lumber interests of Wisconsin; the corn, wheat and growing prairies of Minnesota and Dakota, and the great and diversified products of some of the finest and most thriving portions of Illinois and Iowa, from the Lakes to the Missouri River, all contribute in greater or less degree to the volume of traffic which supports our revenues."

The construction of two additional branches was commenced during the year. One, about twenty-five miles in length, and known as the Menominee River Railroad, ran from a point twenty-two miles south of Escanaba, and was designed to opened up a new mining region. A lateral road, sixty miles in length, was also designed, and its construction commenced, to serve as a branch of the Cedar Rapids & Missouri River leased railroad in Iowa. The line was to be known as the Maple River Railroad, and the cost of its construction was assumed by the parties interested in the Cedar Rapids road.

The financial results of the fiscal year ending May 31, 1878, were satisfactory. The net earnings of the entire road, including the leased and proprietary lines, were $2,464,487.16—more than double those of the preceding year.

On June 6, 1877, the LaCrosse, Trempealeau & Prescott Railroad, was formally consolidated with the Chicago & North-Western Railway. The annexation of this line made the entire mileage of the Chicago & North-Western Railway 2,078.14 miles.

The amount of land sold during the year was 21,084.18 acres, and the total amount received and paid into treasury on account of land grants, was $186,496.80.

The several Minnesota branch lines constructed or completed during the year were as follows:

- Minnesota Valley Railroad — 25 miles.
- Rochester & Northern Minnesota Railroad — 25 miles.
- Plainview Railroad — 16 miles.
- Chatfield Railroad — 12 miles.

The sum of $855,209.16 was expended for construction on the Chicago & North-Western Railway proper, and $767,919.08 on the proprietary lines. Various improvements were made in Chicago; a brick warehouse was erected east of State Street, and a new double-track steel draw-bridge was built across the North Branch of the Chicago River, south of Kinzie Street, to replace a single-track wooden bridge.

The net earnings for the year ending May 31, 1880, were $4,080,167.90. One hundred and thirty eighty miles of road were constructed during the year, making the total mileage of roads owned and controlled by the company, 2,512.77. The construction expenses for the year were $1,810,034.07.

A permanent lease of the Des Moines & Minneapolis road was entered into during the year, being part of the Chicago & North-Western Company, by purchase in 1884. The length of the road is forty-eight miles, and its acquisition secured for the company a continuous line to Des Moines. The Sheboygan & Western (formerly the Sheboygan & Fond du Lac) Railway was also formally united with the Chicago & North-Western. The company also acquired the Galena & Southern Wisconsin, and the Chicago & Tomah railroads, at that time constructed with a narrow gauge for a distance of ninety-two miles, between Galena, Ill., and Woodman, Wis., with branches to Plateville and Lancaster, Wis. An extension of the Chicago & Tomah road was contemplated, with a standard gauge direct to Madison, where it would connect with the main line to Chicago, and with a proposed Madison and Milwaukee line to Milwaukee.

The construction of the extension toward the Missouri River, in Central Dakota, was pressed forward rapidly. This road leaves the main line of the Atchison, Topeka & Santa Fe Railway at Tracy, Minn., and runs westerly across Dakota, with lateral branches. The Minnesota portion of the line—forty-six miles—was called the Chicago & Dakota Railway, while the portion lying in Dakota took the name of the Dakota Central. The length of the line to the Missouri River was about two hundred and fifty miles, and one hundred and seventy miles had been completed up to the close of the fiscal year 1880, the entire track having been laid with steel rails.

A branch line about twenty-six miles in length, called the Iowa & Southwestern Railway, was projected and surveyed during the year, and its construction commenced the following year. The discovery of valuable beds of iron ore in the Letcher Mountain district, in Michigan, led to the survey and construction, in 1884, of about thirty-six miles of new road to connect with the Lake Superior line, as well as another extension in a northerly direction, for about twenty-two miles from the end of the Menominee river road, for the accommodation of new iron mines in that district.

During 1881, the company purchased the valuable working coal mines and properties of the Consolidation Coal Company, in Iowa, also the road and mines of the
Iowa Railway Coal and Manufacturing Company, near Boone. The former of these purchases represented about seventeen hundred acres of the best coal lands in the State, on which three distinct mining properties were already opened.

With a view of diminishing the number of corporations and separate organizations included in the system owned and operated by the company, an effort was made during 1881 to bring together, capitalize and merge, under authority of law, the various properties situated in each State, so far as could be conveniently effected independently of the organization of the Chicago & North-Western Company.

The Elgin & State Line Railroad Company, the St. Charles Railroad Company, and the State Line & Union Railroad Company, in the States of Illinois and Wisconsin, were consolidated under the name of the Elgin & State Line Railroad Company.

The Chicago & Milwaukee Railway Company, the Northwestern Union Railroad Company, the Milwaukee & Madison Railroad Company, the Chicago & Tonah Railroad Company (which had previously been merged with the Galena & Wisconsin Railroad Company), and the Sheboygan & Western Railroad Company, were consolidated in the States of Illinois and Wisconsin, under the name of the Chicago, Milwaukee & North-Western Railroad Company.

The Winona & St. Peter Railroad Company, the Plainview Railroad Company, the Chatfield Railroad Company, the Rochester & Northern Minnesota Railway Company, the Minnesota Valley Railway Company and the Chicago & Dakota Railway Company, were united in Minnesota, and formed the Winona & St. Peter Railroad Company.

The year was a prosperous one, financially. A comparison of the earnings and expenses for the fiscal years 1880 and 1881 shows an increase of 11.44 per cent. in gross earnings, but a decrease of 7.42 per cent. in net earnings. This disproportion was the result of an increase of 17.23 per cent. in operating expenses, mainly due to the purchase of the mining properties before referred to.

In 1882, much was done in the way of construction. The Iowa Southwestern was completed, its length being 51.8 miles. The more important line of the Toledo & Northwestern Railway was pressed forward, 290 miles of the 366 miles were completed by the close of the year and the entire line was finished during 1883. An extension of 71 miles of the St. Peter road in Dakota was also commenced in 1882, and completed in 1883, as well as extensions of the Lake Superior & Menominee River lines. In November, 1882, purchase was made of a majority of the capital stock of the Chicago, St. Paul, Minneapolis & Omaha Railway Company. Delivery and payment were to be made during the summer of 1883. The management of the corporation was reorganized and placed under the control of the Chicago & North-Western Company on December 16, 1882. The system embraced 1,147 miles of well equipped railroad.

In 1883, an extension of 78.22 miles was made of the Toledo & Northwestern line, securing connection with the Southeastern division of the Dakota Central. The extensions of the latter road, during the year, were 71 miles from Watertown to Redfield; 547 miles from Ordway to Columbia; and 30.55 miles up the valley of the Big Sioux River. An extension of road was also made in Michigan, to accommodate various mine openings; 6.71 miles of new road were added to the system in Wisconsin, and in the same State 75 miles of the narrow-gauge roads, before mentioned as the Chicago & Tomah and Galena & Southern Wisconsin, were changed to the standard gauge and laid with steel rails. In Iowa, the Maple River line was extended 31.5 miles. The net outlay for construction, equipment and extensions during the year was $4,669,833.10.

During the year, all the proprietary lines in Michigan became a part of the Chicago & North-Western Railway. Two of the branch lines in Wisconsin were absorbed, and on June 8, 1884, was effected the consolidation of the Elgin & State Line and the Chicago, Milwaukee & North Western Railways with the Chicago & North-Western.

During 1884, the following leased and tributary lines, operated by the company in Iowa, were purchased: Chicago, Iowa & Nebraska Railroad, from the Mississippi River bridge at Clinton to Cedar Rapids; Cedar Rapids & Missouri River Railroad, from Cedar Rapids to Council Bluffs, these two constituting the main line across the State, and the Maple River Railroad, a valuable connection running into Northwestern Iowa,—total, 487.97 miles; the Sioux City & Pacific Railroad, from Sioux City to Missouri Valley Junction, thence across the Missouri River to a connection with the Union Pacific Railroad at Fremont, Neb.; the Missouri Valley & Blair Railway & Bridge Company, owning the bridge and its approaches over the Missouri River at Blair; and the Fremont, Elkhorn & Missouri Valley Railroad, from Fremont to Valentine, near Fort Niobrara, Neb., with the Creighton branch, 311 miles; total, 418.42 miles of tributaries, and the Blair Bridge property.

During 1885, the construction of about seventy-five miles of railroad, projected as a coal road, was begun under the charter of the Northern Illinois Railway Company, extending from the coal deposits adjacent to LaSalle, Ill., to Belvidere on the Freeport line, where it formed a direct connection with the lines of this company for the distribution of coal in Wisconsin and throughout the Northwest. This furnished a connecting link between two important branches of the company's lines.

In pursuance of the company's policy to reduce the number of its minor corporations, the Iowa Midland Railway Company, Stanwood & Tipton Railway Company, Des Moines & Minneapolis Railroad Company, Ottumwa, Cedar Falls & St. Paul Railway Company, and Iowa Southwestern Railway Company, were merged, during the year, with the Chicago & North-Western Company.

The items charged to construction account during the year (exclusive of the Sioux City & Pacific, and Fremont, Elkhorn & Missouri Valley lines), amounted to $20,195,763.53. The control of the two lines last named was acquired by the purchase and transfer of their capital stocks, both roads being operated independently of the Chicago & North-Western Company.

The total number of miles of road operated by the company on May 31, 1885, was 3,845.31, of which 3,502.06 were laid with steel rails.

The appended statistical tables show the financial operations of the company from 1871 to 1885, together with condensed statements of both passenger and freight business during the same period.
ROBERT STANLEY HAHN, general passenger agent of the Chicago & North-Western Railroad, was born at New Castle-on-Tyne, England, on November 2, 1852, the son of George Robson and Elizabeth (Davison) Hahn. His parents came to this country when he was but two years of age, and with them he travelled about this country, to the various pastoral charges to which his father was assigned by the Methodist Conference. George R. Hahn being a clergyman of that denomination. The pulpit he occupied were in Pennsylvania and New York States, until 1875, when he went to Minnesota, and is now at Fargo, D. T., superintendent of the North Dakota Mission of the Methodist Church, which comprises Northern Dakota, Montana, and the region in that vicinity. K. S. Hahn was educated at the preparatory schools of the districts where his father was pastor, and afterward at the Wyomissing Seminary, at Kingston, Penn., where he took a thorough course, preparatory to entering college. Instead of matriculating at college, however, he entered into the employment of the engineer's department, of the Lehigh Coal and Navigation Company, the corporation that is now the New Jersey Central Company, until May, 1875, and then went to St. Paul and took charge of the engineer department of the St. Paul & Duluth Railroad. After remaining in that position for some time, he was transferred to the position of chief clerk to the auditor and general ticket agent, and from that position was promoted to the office of assistant general ticket agent, and then to general ticket agent. In February, 1881, Mr. Hahn left that road and entered the employ of the Chicago & North-Western Railroad as general traveling passenger agent, although his position virtually was that of assistant to the general passenger agent, and on November 1, 1884, he was promoted to the position he now occupies. In 1879, he was married to Miss Reeta Cooke, daughter of Andrew T. Cooke, of Hope, N. J., they have one child, Beside.

HIRAM R. MCCULLOUGH, first assistant general freight agent of the Chicago & North-Western Railroad, was born at Elkhart, Indiana, on October 7, 1850, and is the son of Hiram and Sarah (Ricketts) McCullough. He received his education at Elkhart N. J., and at Washington College, at Lebanon, Va. In 1871, he first entered into business life by coming to Chicago—the goal for young men of energy, perseverance and talent—and entered the employment of the Illinois Central Railroad, as clerk, in December of that year. He remained in the office of that road until 1876, when he was promoted, and accepted, the position of division freight agent at Winona, Minn., where he remained until 1878, and then came to Chicago as division freight agent, and on November 1, 1884, he was appointed to the position he now occupies.

Mr. McCullough was married, in 1879, to Miss Martha Hughitt, of Chicago; they have two daughters, Belle and Florence.
October, appointed to the position he now occupies. He was married, in 1867, to Miss Sarah F. Kiker, of Victory, V. Y., and has one son, James N., who was born in 1868. Mr. Knapp was a Master Mason in Evergreen Lodge, of Freeport, and also received the chivalric degrees in the Freeport Commandery. Mr. Knapp still manifests the effects of his early outdoor, vigorous life in his many energetic transaction of the business that devolves upon him. This is one of his characteristics,—doing with all his might what comes to his hand; for instance, while agent at Freeport he would run special trains or perform any necessary work whose doing would be beneficial to the interests of the company. Hence the reason for his being retained with this company for twenty-six years is easily explained, and it is probable that his tenure of office is only limited by his tenure of existence.

CHICAGO & ALTON RAILROAD.

At the commencement of 1871, the Chicago & Alton Railroad Company was operating 511 miles of railway, as follows—

- Owned by the company: 
  - Dwight to West St. Louis, 242 miles.

- Under perpetual lease:
  - Chicago to Joliet (Joliet & Chicago Railroad) 38 miles.
  - Bloomington to Godfrey (St. Louis, Jacksonville & Chicago Railroad) 151 miles.

During that year, a road was constructed from Roodhouse, on the St. Louis, Jacksonville & Chicago road, to a point on the east bank of the Mississippi River opposite Louisiana, Mo., a distance of 37.6 miles. The construction of this line included the building of an iron bridge, 1,200 feet in length, across the Illinois River. Upon the building of this branch was expended $1,217,067. The franchise was obtained through the St. Louis, Jacksonville & Chicago company. A steam ferry-boat, capable of transporting across the Mississippi an entire passenger train, or twelve freight cars, was placed upon the route between Louisiana, Mo., and the eastern shore, and, under the terms of a contract and lease between the Chicago & Alton and Louisiana & Missouri River companies, the former corporation constructed fifty-one miles of road from Louisiana to Mexico, Mo. These two lines (comparing the branch from Roodhouse to Mexico) were opened for through traffic on October 30, 1871, making a total of 511.6 miles of road operated by the Chicago & Alton company during the last two months of the year. Track-laying between Mexico and Jefferson City was begun.

The importance of the line between Roodhouse and Mexico lay in the fact that it formed a connecting link between the lines operated by the Chicago & Alton company and the St. Louis, Kansas City & Northern Railway; the co-operation of the two companies securing a through line between Chicago and Kansas City, shorter than any other then in operation.

The percentage of operating expenses (exclusive of taxes) to the gross earnings was 56.13; the percentage of operating expenses and taxes, 58.36, an unusually high ratio, the result of exceptional causes. In March of that year, a tornado destroyed the engine-house and depot buildings at East St. Louis, and seriously damaged other property of the company. In the Chicago fire, in October, the engine-houses and buildings at East St. Louis, and property amounting to $100,000, not covered by insurance, was sustained. The cost of repairs and rebuilding rendered necessary in each case was charged to operating expenses.

The tonnage of freight carried showed an increase of nineteen per cent. over that of 1870, but owing to a decrease in rates of transportation the aggregate earnings from this source were only thirteen per cent. in excess of the preceding year. One element of the total freight tonnage may be specially mentioned, on account of the extraordinary increase exhibited in six years; in 1865, 6,000 tons of coal were transported; in 1871, 384,936; while in 1873 the tonnage reached 549,000 tons.

The line from Mexico to Jefferson City, Mo., was completed during 1872, the last twenty-five miles, from Fulton to Jefferson City, having been opened for traffic on July 16.

Increased competition and consequent lowering of rates caused a marked decrease in the earnings of 1872, the gross receipts being $5,156,335.71, and the net earnings $1,879,147.44. While the tonnage of freight during the year increased 6.88 per cent., the revenue therefrom was diminished 3.5 per cent.

The gross receipts show a falling off of $122,854.52, or 2.3 per cent., as compared with 1871; the net receipts exhibit a decrease of $318,938.02, or about 14½ per cent. This disproportion was due to an increase in the operating expenses, which amounted to 61 per cent. of the gross earnings, as against 56.13 per cent. in 1871. The causes for this result may be mainly traced to the Chicago fire. The destruction of elevators and warehouses rendered it impossible to obtain stored grain arriving in this city without resorting to very expensive expedients, the cost of which was charged by the company to operating expenses. For a considerable portion of the year storage could not be had at any outlay, and among the disastrous results of the conflagration was the forcing of grain traffic to other markets. So far as the Chicago & Alton road was concerned, the effect was serious. Grain and lumber, at that time, constituted the bulk of its freight, and the farmer usually disposes of the one and procures the other in the same market. With a remarkably good crop in 1872, the grain shipments to Chicago over the Chicago & Alton road were reduced one and one-half millions of bushels, and the return freights in lumber were lowered nearly $8,000,000.

Experience having demonstrated that the steam-ferry across the Mississippi River at Louisiana, Mo., was wholly inadequate, the river at that point being liable to serious and prolonged blockades of ice, in 1873 the Mississippi River Bridge Company was organized, and on June 30 was commenced the construction of a bridge, which was so far completed on December 24 as to admit its use for the passage of trains.

The first year of its operation proved the wisdom of its construction. During 1874, the earnings from passenger traffic were $89,499.95, and from freight traffic, $48,888.01, the net profit being 7½ per cent. on its cost. The entire work was accomplished in less than six months, at a cost of $765,000. The length of the bridge is 2,812 feet: its superstructure is of wrought iron, and rests upon piers and masonry of the most substantial character. The draw-section is 46 feet in length, and at the time of its construction was the longest in the world. So perfectly was it constructed, that although a steam engine was provided for operating it, one man, unless high winds prevailed, could open and close it, unaided by this appliance.

The panic of 1873 exerted a depressing influence upon all business, including railroad traffic; yet the gross earnings of the company during the year exceeded those of 1872, by more than $346,000, or over six per cent., while, owing to a reduction of operating expenses, the net earnings were more than twelve per cent. greater than those of the previous year.
The year 1874 presented a less favorable showing, the gross receipts from traffic falling off six and three-quarters per cent. from 1873. The causes for this decrease may be found in the steady diminution of rates for freight transportation, due in part to adverse legislation and in part to an unwisely directed competition; a partial failure of crops, the decrease in the amount of corn transported reaching twenty-four per cent.; the diminished coal traffic (twenty-six and one-third per cent.), the result of a three-months' strike of the miners in the Braidwood district and a ten-months' suspension of work by the Joliet Iron & Steel Company, caused by a strike of the operatives.

Under the terms of the lease of the Louisiana & Missouri River Railroad, the latter company had agreed to furnish the right-of-way, grading and ties, to complete its line from Mexico to Kansas City. This provision of the contract was not complied with. The net earnings of the leased line for 1874 were less than the amount of rent paid for its use, and its operation for many years had been a source of loss. The questions thus arising between the two companies were submitted to arbitration, and the modifications of the lease made by the award were more favorable to the Chicago & Alton company; the payment of any rental beyond the thirty-five per cent. of gross earnings, less taxes, was abrogated, and any excess paid as interest, beyond the rental thus established, was made a debt against the Louisiana & Missouri River company.

In March, 1875, the Chicago & Illinois River Railroad, from Joliet to the Mazon River, traversing the Wilmington coal-fields, upon a line parallel to the Alton, at a distance of about four miles, was leased. In November, the two companies made an agreement with the Chicago, Pekin & South-Western Railroad Company granting the latter the right to run its trains over the new line.

The gross earnings for 1875 were less than for any year since 1868.

The traffic over the Louisiana & Missouri River road improved during 1876. Its original estimated value was based upon its probable worth as a part of a through line between Chicago and Kansas City; but the company had failed to complete its line from Mexico to the last named city. As a result, the Chicago & Alton company was left entirely dependent upon the St. Louis, Kansas City, & Northern Railroad for its connection. While these two companies had a common interest in that portion of the traffic which could be best promoted by their joint action, they were still, to a considerable extent, competitors. In undertaking to carry out its contract, the Louisiana & Missouri River Railroad Company was reduced to bankruptcy.

In response to a circular addressed to shareholders on December 1, 1877, assent to an extension of the line to Kansas City was received from more than three-fourths of the holders of both preferred and common stock. On account of the difficulty experienced in securing a settlement with the floating-debt creditors of the Louisiana & Missouri River company, it was deemed best that the extension should be operated under a franchise obtained through the medium of a new organization. This new corporation, known as the Kansas City, St. Louis & Chicago Railroad Company, secured domination of the right-of-way and a limited amount of other local aid, all of which were to be assigned to the Chicago & Alton company, and the construction of the road and its subsequent operation were to be wholly in its interests. On March 15, 1878, the newly-formed company executed to the Chicago & Alton road a perpetual lease. Work was vigorously pressed, and by the first of July the line was in actual operation. The amount expended on the construction of the line, including a steel bridge across the Missouri River, depot buildings, grounds and all other appurtenances, was $3,592,027.95. The value of the extension may be judged from the fact that, although in operation only about half a year, it contributed fifty-six and one-half per cent. of the total increase in gross earnings during 1879, while in 1880 its earnings were $1,261,991.56 or $2,742.28 per mile.

On December 3, 1877, the Mississippi River bridge, at Louisiana, Mo., was leased to the company, per perpetuity, at a fixed rental of $63,000 per annum. A covenant in the agreement required the Alton company to retire the bonds of the bridge company at maturity, after which the rental was to be reduced to $21,000 per annum,—the amount required to pay seven per cent. dividends on the stock.

The financial affairs of the Chicago & Illinois River Railroad Company had, for nearly the entire period of its existence, been seriously embarrassed, and on September 3, 1879, its property, of every description, was sold under judicial decree on foreclosure of its first mortgage. The property was purchased at the foreclosure sale by the Chicago & Alton company; and, on September 5, the sale having been confirmed by the court, was deeded to that corporation.

The total length of road operated on January 1, 1880, is shown in the annexed table:

In summarizing the financial condition of the road on December 31, 1880, the directors, in their annual report, said:

"Our company has expended large sums obtained from time to time by the sale of stock and bonds for permanent additions to its leased lines and for rolling stock used on them. The leases are perpetual, and the property thus held may be considered as owned, subject to the payment of annual rent. By capitalizing, at seven per cent., the amount of annual rent in addition to that represented by the several amounts of bonds constituting the funded debt, we arrive at the following result:

"Total amount of stocks and bonds ... $26,888,522 00
"Capital represented by Joliet & Chicago Railroad Company, less $1,056,000 of bonds ... 1,500,000 00
"St. L., J. and C.R.R. (based on last year's earnings) ... 5,494,773 00
"K.C., S.T.I., & C.R.R., less $1,000,000 of 1st mortgage bonds owned by our company ... 1,743,600 00
"Louisiana & Missouri River R.R. (based on earnings of last year) ... 2,284,532 28"
The financial results of the operation of the Chicago & Alton Railroad Company, from 1871 to 1884, were as follows:

* Including government tax on dividends of $10,499.13.
The dividends declared by the Chicago & Alton Railroad Company from 1863 to 1885, have been: 1863—August 1, 3 1/2 per cent. on preferred stock, and 2 1/2 per cent. on common; 1864—February, 3 1/2 per cent. preferred, common being passed; August, 3 1/2 per cent on preferred, 6 per cent. on common; 1865—February, 5 per cent. on both preferred and common; September, 3 1/2 per cent. on preferred and common. From March, 1866, to March, 1875, semi-annual dividends of 5 per cent. were paid on both preferred and common stock; from September, 1875, to March, 1876, 4 per cent. semi-annually was paid on both; from September, 1877, to September, 1880, the semi-annual dividend was 3 1/2 per cent.; from March, 1881, to March, 1884, was 4 per cent., and since that time the company has paid a quarterly dividend of 2 per cent. on both preferred and common stock.

Chauncey Kelsey, auditor of the Chicago & Alton Railroad, was born at Cincinnati, Ohio, on May 1, 1846. When quite young his parents removed to Columbus, Ohio, where he was brought up and educated. He attended the public schools and, when about to graduate from one of the high schools, was offered a position as clerk in the freight department of the Cleveland, Columbus & Cincinnati Railroad, at Columbus. He commenced work with this road on April 13, 1865, and was there until February, 1866, occupying various positions in the freight department of the company. At the close of his engagement there, he took a position with the Indianapolis, Columbus & Indiana Central Road, occupying a clerical position and remained with them through the consolidation of the line with the "Van Buren" and up to June, 1871. He then took the post of clerk in the general office of the Indianapolis, Bloomington & Western Railroad, at Urbana, Ill., and, on May 1, 1872, was appointed assistant auditor. In October of the same year, he was elected to the auditorship and he filled that important office until April 1, 1880, when he tendered the position he now holds, that of auditor of the Chicago & Alton Railroad, with headquarters in this city. Mr. Kelsey was married, in 1876, to Miss Kate Smith, daughter of C. W. Smith, the general manager of the Chesapeake & Ohio Railway. Her death occurred December 21, 1882. They had one son, Charles Smith Kelsey, named in honor of his paternal grandfather.

Charles E. Lambert, general western passenger agent of the New York, West Shore & Buffalo Railway Company, is a native of West Troy, N. Y., where he was born on May 20, 1836. His father, Augustus Lambert, was a Connecticut ship-builder, but came to New York City at an early day and was one of the pioneers of West Troy. His mother, Constance Conger, was of French extraction. When only fourteen years of age young Lambert commenced his long railroad career, as an office boy with the Troy & Boston Railroad Company, at West Troy. Passing through all the grades of the clerical, baggage, ticketing, baggage master, and agent, depot ticket agent, traveling passenger agent, general passenger agent, and agent superintendent, Mr. Lambert finally left his old home for Chicago in 1881, as general western agent for the Hoosac Tunnel Route. He performed the duties of that office until January 1, 1884, when he was appointed to his present position.

W. H. Hurlburt, general western passenger agent of the New York, Lake Erie & Western Railroad, was born at Roxbury, Conn., on March 11, 1846. Subsequently he remodeled his farm at Bridgeport, Conn., engaging in various mercantile pursuits, until, in 1870, he went to Omaha, Neb., as passenger agent of the Northern Missouri road. Mr. Hurlburt next served as travelling agent of the Burlington & Missouri River Railroad, and became the northern passenger agent of the Chicago, Burlington & Quincy line, and subsequently the general travelling passenger agent of the road. On January 1, 1876, he was appointed the general western passenger agent of the Chicago, Burlington & Quincy line, and in September, 1881, general passenger agent of the Canada Southern road, with headquarters at Buffalo. He assumed his present position on April 10, 1884.
in 1853, being stationed at Denison, Tex. When General Manager Talmadge took charge of the affairs of the Wabash, St. Louis & Pacific in 1863, as his first appointment he gave Mr. Winans the local freight agent of the line at Chicago, such was his high regard for the abilities of this gentleman. This office Mr. Winans still retains, serving his company with the same faithfulness and efficiency that characterized his past career. Mr. Winans was married in 1871, to Miss Lillie Handt, of New York City. They have one child, a daughter, named Ionia Valерьe. For twenty years Mr. Winans has been a member of the Masonic fraternity and is a Knight Templar.

Benjamin V. Jackson, general northwestern agent of the Chesapeake and Ohio Railroad, was born in 1834, and resided at Parkersburg, W. Va., the earlier portion of his life. The date of his birth was March 10, 1834. During his boyhood, Mr. Jackson attended the public schools in his native town, and later entered the University of Virginia. He remained there for some time, and as he was about to graduate and take the degree of Bachelor of Arts, he left the school and commenced business. Mr. Jackson first entered the railroad service as a train clerk on the Marietta & Cincinnati Railroad, now known as the Cincinnati, Washington & Baltimore Railway. This was in 1853, and he remained with them but one year, when he was offered employment in the Second National Bank of Parkersburg. He took a primary position at first, but rapidly won his way, and within two years he was made teller of the bank. In 1857, he was offered a lucrative position as bookkeeper for the Novely Mills of Parkersburg, but he only remained with them six or eight months, resigning his place in order to go into business for himself. His first venture was freight transportation on the Ohio River, and he handled it successfully. In the latter part of 1871, he devoted his whole attention to a large oil refinery at Parkersburg, and he devoted his whole attention to that business. By dint of hard work Mr. Jackson rapidly accumulated a large competence. But in the spring of 1872, he lost his most valuable property, valued at $80,000. It was a heavy blow, and not only was it disastrous to him then, but the liabilities of his firm hampered him in after years.

He is a Mason, and a member of the Masonic fraternity and is a Knight Templar.

The Chicago & Iowa Railroad was opened for business during the year, extending from Aurora to Forreston,—eighty-three miles,—where a junction was formed with the main line of the Illinois Central Railroad. The Chicago, Burlington & Quincy company made a traffic agreement with this corporation, under the terms of which the latter was to send all its business over the line of the former between Aurora and Chicago. Contracts between the two companies had been formed, the Illinois Central and the Chicago, Dubuque & Minnesota Railroad companies were also concluded during the year, whereby a line was formed from Chicago to Dubuque, over which the business of the Chicago, Dubuque & Minnesota, the Illinois Central north of Forreston, including that of the Dubuque & Sioux City road, was to pass over the Chicago & Iowa and the Chicago, Burlington & Quincy roads, between Forreston and Chicago.

The companies acquired by purchase, during the year, the Chicago & Rock River Railroad. Its route extended from Rock Falls, opposite Sterling, crossing the Illinois Central at Amboy, and thence running nearly parallel with and in the vicinity of the Chicago, Burlington & Quincy road into Chicago. Shortly after its acquisition, it was extended westward from Rock Falls, forty-five miles, to Shabonna's Grove, on the Chicago & Iowa line, the extension being completed and opened for traffic in July, 1872. During the latter half of 1873, the Illinois Grand Trunk extension was completed to Clinton. Owing to some difficulty in reference to the use of the Chicago & North-Western company's bridge across the Mississippi at that point, surveys were made and preparations completed for the construction of another bridge across the river, in order to establish complete connection with the Chicago, Clinton & Dubuque and the Chicago, Dubuque & Minnesota roads. A bridge company was organized, stock subscribed, and the necessary State and Federal legislation obtained.

In 1872, the Burlington & Missouri River Railroad was transferred, by perpetual lease, to the Chicago, Burlington & Quincy Company. On December 31, 1872, the latter corporation took formal possession of the line. The line annexed crosses Iowa from Burlington to the Missouri River, connecting at Omaha with the Union Pacific line; at Omaha, Plattsmouth and Nebraska City with the railroad system of Nebraska; and by its branches and connections reaching to the eastern terminus of the Kansas Pacific, the Atchison, Topeka & Santa Fe, and the system of Kansas roads. Yet another advantage was that an eastern terminus at Peoria was obtained, affording connection with the Pennsylvania system as well as with other east-bound lines, and materially reducing the distance between the last named point and the Missouri River.

A new Western connection was formed the same

CHICAGO, BURLINGTON & QUINCY RAILROAD.

The total mileage of the Chicago, Burlington & Quincy Railroad, at the opening of the fiscal year ending April 30, 1872, was 706 miles. This was increased during the year succeeding to 761 miles, by the opening of the Illinois Grand Trunk Branch from Minnesota to Prophetstown, forty-five miles, and that portion of the Fox River Valley branch, between Aurora and Geneva, ten miles, in May, 1871.

The capital stock of the company was increased during the year by the sale, to the stockholders at par, of 20,594 shares; and the net earnings of the road for the year, above operating expenses and taxes, amounted to $12,23 per share of the capital stock thus increased. A reduction of rates, however,—due, in part to a strong competition between the trunk lines leading west from the seaboard,—joined to other causes, made the results of the year's operations less satisfactory than they would otherwise have been, or than was anticipated. The Chicago fire occasioned an almost complete interruption of the freight business, especially that which was local to the road. From the close of navigation to the end of the fiscal year, the lack of adequate storage room in Chicago, added to the incapacity of Eastern roads to receive freight, operated unfavorably, not only to the business local to the road, but also, to a large extent, rendered it impossible for it to receive freight from its connections west, at the Mississippi.
year, by the completion of the Missouri, Kansas & Texas road (880 miles in length), to Hannibal, where the Chicago, Burlington & Quincy connected with it by means of the Quincy, Alton & St. Louis line, running from Quincy to Hannibal, Mo., a distance of 18 miles. Prior to the acquisition of the Burlington & Missouri River line, the General Government had made valuable grants of land to the latter company, to aid in the construction of their road through Iowa. With reference to the title of a considerable portion of these lands, the most practicable mode of completing the purchase, the directory of the Chicago, Burlington & Quincy company authorized an exchange of stock.

During 1875, the company extended aid toward the construction of the Albia, Knoxville & Des Moines Railroad, and obtained a lease of the line in perpetuity. On December 6, 1875, a preliminary contract was made for the perpetual lease of the Quincy, Alton & St. Louis Railroad, the length of which is forty-six miles; its route being from Quincy to Louisiana, Mo., with a branch to Hannibal, along the rich bottom lands on the east bank of the Mississippi.

On October 1, 1876, the directory of the Chicago, Burlington & Quincy company acquired control and commenced the operation of the St. Louis, Rock Island & Chicago Railroad, the action of the Board having been ratified at a special meeting of the stockholders, held on December 1. The fixed annual rental of the road was $175,000 for the period of its charter, with provisions for renewal. The route of the road thus acquired extended from a point of junction with the Chicago & North Western road, near Sterling, to Rock Island, a distance of $2.5 miles, and using the Chicago, Rock Island & Pacific road near Rock Island for a distance of twelve miles, and the Indianapolis & St. Louis road, near St. Louis, for a distance of twenty miles, under running arrangements with those companies, and with a branch extending from Sagetown, on the main line of the Chicago, Burlington & Quincy road to Keithsburg, eighteen miles distant; in all, a distance of 270 miles of road, absolutely acquired, besides rights over the roads above named. The importance of the acquisition to the company may be seen, when it is stated that the main line of the road crossed the main line of the Chicago, Burlington & Quincy road at five different points, diverting business and reducing rates. Its control by the company was a carrying out of the policy to convert, so far as practicable, competing lines into contributors.

The event of the year 1880, in the company's history, was the acquisition of the Burlington & Missouri River Railroad of Nebraska, including both main, stem and leased lines, 836 miles of which were then in actual operation, and about 109 miles in course of construction. A valuable grant of Nebraska lands was thus gained, of which 270,000 acres were sold in 1880, for $1,292,625.86. When the consolidation was effected, it was deemed equitable by the management to distribute stock to represent a part of the surplus earnings which had accumulated and had been invested in very valuable additions to the company's property at low prices. Accordingly, on May 31, 1880, a stock dividend of $6,217,240 was declared.

Preliminary steps were also taken during the year
toward procuring a lease of, or effecting a consolidation with, the Kansas City, St. Joseph & Council Bluffs road.

Seventy-eight miles of extension of Iowa branches were built in 1880, making the total length of the road at the close of the year (including the Burlington & Missouri River of Nebraska) 2,772 miles. The total outlay for construction and equipment during the year was $8,207,899.71. Of this amount, $39,663.09 was expended for real estate in Chicago, which was followed, in 1881, by an outlay of $265,671.42 for the same purpose.

In 1881, the company found new terminal accommodations in this city at the Union Depot on Canal Street, between Madison and Van Buren, the depot being occupied in common by the Chicago, Burlington & Quincy, the Chicago & Alton, the Chicago, Milwaukee & St. Paul, and the Pittsburgh, Cincinnati & St. Louis companies.

In 1881, the company acquired control of the Burlington & Northwestern road, running from the Keokuk line to Lacedale, on the Hannibal & St. Joseph road, 199 miles west of Quincy, and thence to Kansas City. Arrangements were also perfected the same year for the control by the company of the St. Joseph & Des Moines road, running from St. Joseph to Albany, Mo., where connection was made with one of the branches of the Chicago, Burlington & Quincy. A lease was also obtained of the St. Louis, Keokuk & Northwestern road, extending from Mt. Pleasant, Iowa, to Dardenne, a point thirty miles from St. Louis, from where the company obtained the right to use the Wabash tracks into that city.

The average length of road operated directly by the Chicago, Burlington & Quincy Company in 1880, was 2,822 miles, and in 1882, 3,100 miles. In addition, the company controlled, and practically operated 700.87 miles of railroad, as follows:

<table>
<thead>
<tr>

<td>700.87</td>
</tr>
</tbody>
</table>

The construction of a Colorado branch was begun in September, 1881, and the line to Denver, Col., was opened on May 28, 1882.

In 1883, a sufficient amount of the securities of the Hannibal & St. Joseph Railroad were purchased by the Chicago, Burlington & Quincy directory, to give the latter company control and practical ownership of the line, whose length was 292.35 miles. The road, however, as well as some others above mentioned, practically controlled by the company, continued to be operated by the corporations nominally owning them. The acquisition of the Hannibal & St. Joseph Road was regarded as the best solution of the southwestern question, and as placing the Chicago, Burlington & Quincy in a strong position at Kansas City.

An extension of branches and construction of new road increased the length of the line directly owned by the company to 3,322.5 miles on December 31, 1883, exclusive of nearly 1,000 miles practically owned and controlled by the company, but nominally operated by separate corporations. This mileage was increased in 1884 to 3,467.4 miles.

The entire property of the company, on December 31, 1884, was as follows:

- **Permanent investment in construction** $1,576,856.99
- **Materials on hand** 1,807,657.68
- **Cost of investment in securities of Hannibal & St. Joseph and other branch roads** 7,088,847.53
- **Sundry investments** 411,035.67
- **Suspended debts and excess of bills receivable over bills payable** 9,664,822.08

**Excess of cost of property over all liabilities** $32,963,69.98

Traffic earnings of the Chicago Burlington & Quincy Railroad, together with the tonnage of freight and number of passengers carried from 1873 to 1884:

* For the fiscal year ending April 30, 1873.
† Only the eight months between May 1, 1875, and January 1, 1876, are covered, owing to a change in the limit of the fiscal year.
J. L. Lathrop, general auditor of the Chicago, Burlington & Quincy Railroad, was born in the home of his father, Abraham, Mass., on November 14, 1810, the son of Joseph and Jane Maria (Lentner) Lathrop, of New York, the family being well-known and of great antiquity in New England. He attended the common schools of his native place and, after leaving home until April 1835, when he made his initial entry into commercial life by becoming clerk in a general country store, where he continued for two years. He then engaged in other stores, but in the same line of business, until about 1835, when he took charge of a small store in a southern town and remained in that section about three years. He then went to South Hadley, Mass., and engaged in a manufacturing establishment, where he stayed for four years, and then canvassed for one winter, remaining East afterward. Mr. Lathrop then became an employee of the Connecticut-River Railroad Company, this being his first railroad experience. After staying there a short time, he entered a manufacturing establishment at Mt. Savage, Md., and remained with that institution until its financial collapse, after which Mr. Lathrop went to Boston, Mass., and continued there for some nine or ten years in various capacities. He then went to New York and stayed for two years, and afterward, in 1857, removed to Hamilton, Wyo., as secretary and treasurer of the Hannibal & St. Jl. Railroad Company, and occupied that position until about 1873; and after that year remained in the employment of that company, managing its estates and transacting various financial enterprises in its behalf and otherwise. In this connection it is germane to remark that during Mr. Lathrop's life he has been prominently identified as manager in many important and valuable fiduciary capacities, and has been instrumental in developing some of the most valuable mines and mining interests in Missouri. He remained in Missouri until 1877, and in that year entered the employment of the Burlington & Quincy Railroad Company, as assistant general auditor under George Tyson. Upon Mr. Tyson's death, in 1880, Mr. Lathrop was appointed to the position he holds at present. He was married in 1848 to Miss Ann S. Day, of Williamsville, N. Y., and they have the following children,—John I., Jr.; Lizzie Jane, Joseph, Mary Ashley and George Barrett.

A. H. HINCKLEY, general purchasing agent of the Chicago, Burlington & Quincy Railroad Company, is a native of Northampton, Mass. After receiving a good education in Boston he decided to come West, and, in the full of 1846, located at Burlington, Iowa, having accepted a position with the Burlington & Missouri Railroad. At first, clerk to the general superintendent, he afterward became assistant general freight agent, and held important positions with the Burlington & Missouri Railroad Company in Nebraska, being general freight agent and subsequently general superintendent thereof. When the latter line was consolidated with the Chicago, Burlington & Quincy road, in 1873, Mr. Irving resigned his position to accept the office of general purchasing agent of the Chicago, Burlington & Quincy Railroad, which position of trust and responsibility he still holds, being now at the head of the department representing all the consolidated lines embraced in the Chicago, Burlington & Quincy system.

N. B. Hinckley, assistant general auditor of the Chicago, Burlington & Quincy Railroad, was born at Milton, Mass., on February 21, 1843, and received his education at Milton Academy at the close of which he was the son of Joseph Hinckley, artist of some note at Milton. His early life, from eighteen years of age until he was twenty-three, was spent at sea, part of the time in the United States Navy during the War of the Rebellion. In 1866, he commenced his mercantile life, with the house of Russell & Co., in China, and remained with them until he accepted a position with the Chicago, Burlington & Quincy Railroad. He entered the service of this corporation in September, 1879, as clerk to the assistant general auditor, and was appointed to his present position in the early part of 1880. He was a Made Master Mason in Victoria Lodge, No. 271, A. F. & A. M., of Hong Kong, and held office in the same and also in Zion Chapter, R.A.M., and Celestial Encampment, K.T., of Shanghai, China. On November 24, 1881, he was married to Isabella Mack, of Belmont, Mass. They have two children, Thomas Leslie, born August 20, 1882, and David Mack, born December 13, 1885.

Charles M. Higgins, assistant auditor of the Chicago, Burlington & Quincy Railroad, was born in Chicago on July 11, 1856, the son of George M. and Anna E. (Tyng) Higgins. George M. Higgins is one of the early settlers of this city, having located here about the year 1843, and has for a number of years been identified with its real-estate interests. Charles received his education at the Lawrence Scientific School, of Cambridge, Mass., and entered there in 1864, and leaving in June, 1867. On August 10, 1867, he commenced his business career in the engineer department of the Burlington & Missouri River Railroad, in Iowa, performing office work during the winter of 1867-68. In the summer of 1868 he did field-work on surveys for the road; and, in November, 1868, he was transferred to the mechanical department of the same road, in charge of the office and draughting for the consolidated road, including experimental work. On March 1, 1875, he left the Chicago, Burlington & Quincy and went to Peoria, Ill., as secretary and purchasing agent for A. L. Hopkins, receiver of the Toledo, Peoria & Warsaw Railway, and there remained for three years when he was transferred to the position of purchasing agent of the Chicago, Burlington & Quincy Railroad, at Chicago. He retained that appointment until March 17, 1879, when he was transferred to his present position as assistant auditor, in which capacity he has held various responsible positions in engineering statistics and other special duties. He has held that position uninterrupted since. He was married on May 21, 1879, to Miss Lottie Goodridge, of the following children,—Annie T., George M. and Morton F.

Paul Morton, first assistant general freight agent of the Chicago, Burlington & Quincy Railroad Company, was born at Detroit, Mich., in 1839, the son of J. Sterling and Caroline French (To) Morton. When he was six months old his parents removed with him to Nebraska City, and in that State he procured a common school education, although the majority of his education he derived from actual experience and contact with business men and commercial methods. At the age of fifteen of age he became an office boy in the general offices of the Burlington & Missouri, in Iowa, at Burlington, Iowa, and for six months, after which he occupied the same position in the general freight offices of the Burlington & Missouri, in Nebraska, at Plattsmouth, Neb. He was promoted clerk in that office in 1873, and was then transferred to the general offices of the Chicago, Burlington & Quincy, and subsequendy appointed toy clerk, December 31, 1875. He was appointed to the position of assistant agent, December 31, 1875, and transferred to the position of city agent, December 31, 1875, after part of 1876. He was assigned a position in the general freight office and remained therein until June 29, 1872, where he was made first assistant general freight agent, from which position he was advanced to that of first assistant agent, December 31, 1875, and transferred to the position of city agent, December 31, 1875.

A number of his marks has arisen from the position of city agent to that he at present occupies is more abundant evidence of his capability and business ability, and to his name. Mr. Morton was married, in 1880, to Miss Lottie Goodridge, of Chicago. They have two children,—Caroline and Donald.

G. H. Ross, second assistant general freight agent of the Chicago, Burlington & Quincy Railroad Company, was born in 1837, at Boston, Mass., the son of Samuel E. and Ruth (Hews) Ross. He received his education in the common schools of Boston, and when fifteen years old embarked on a sea-faring life, which he followed for about eighteen years, when he removed to South America, and ultimately arrived at San Francisco, Calif., where he commenced his varied experience in business upon the firm of a gold-hunter, and he again entered into commercial pursuits. He, after a while, returned eastward and entered the employment of the Chicago, Burlington & Quincy, as clerk in the office of the Telegraph company, in Chicago, in 1874, and in 1874, being promoted to the position of cashier in that office. He was then transferred to Burlington, Iowa, and was chief clerk, under the administration of John W. Miller, division freight agent; and, in September, 1881, he was transferred to Chicago, and in April, 1882, he was appointed to the present position. From the brief resume of his wanderings it may be readily inferred that the life of Mr. Ross has been replete with adventure and experience, but since his connection with the railroad business, he has found a sphere for which he is especially fitted, and wherein his advance proves his capacity. James F. Morgan, superintendent of Telegraph of the Chicago, Burlington & Quincy Railroad, was born at Monongahela City, Penn., in 1852, the son of Andrew and Nancy W. (Collins) Morgan. He received his education at the common schools of his native place; and, when eighteen years of age, commenced the battle of life by entering the employment of the Pacific & Atlantic Telegraph Company, as messenger. He remained with this company for some time, and then learned the science of telegraphing and its practical application, which enabled him, in 1870, to take up his position as operator at Vinton, Iowa, on the line of the Burlington, Cedar Rapids & Northern Railroad, where he remained until 1872, when he was transferred to the St. Louis, St. Paul & Minneapolis Railroad, in Iowa, at Red Oak, Iowa; after which, in 1872, he re-entered the service of the Pacific & Atlantic Telegraph Company at the city of Vinton, Iowa, where he remained for one year. He next entered the employment of the Chicago, Burlington & Quincy Company at the same city and remained with them for two years, afterward entering the service of the Chicago, Burlington & Quincy Railroad Company, and occupied positions of operator and train dispatcher until June 20, 1882, when he was promoted to his present position. He is a member of the National Union Mutual Benefit
CHICAGO, ROCK ISLAND & PACIFIC RAILROAD.

A brief synopsis of the company's history prior to 1871 will aid in securing a comprehensive view of its subsequent growth and prosperity. The main line, 181 1/2 miles, was completed in 1854. During the same year, the Peoria & Bureau Valley completed its line from Bureau Junction, on the line of the Rock Island road, to Peoria, 46 3/4 miles, and the latter company became a lessee in perpetuity at an annual rental of $125,000.

In 1852, the Mississippi & Missouri Railroad Company was incorporated in Iowa, its line to run from Davenport, by way of Des Moines, to Council Bluffs, on the Missouri River. In 1854, an agreement was entered into for the construction of a bridge across the Mississippi, between Davenport and Rock Island, each company to bear a portion of the expense, and each guaranteeing the payment of the bonds issued by the Bridge Company for this purpose. The Mississippi & Missouri company soon became financially embarrassed, and its portion of the guaranty was carried out by the Chicago & Rock Island company. In 1866, the former road was purchased, under foreclosure sale, by the Chicago, Rock Island & Pacific company, of Iowa, a corporation organized in the interest of the Chicago & Rock Island company, of Illinois. On August 20, 1866, the two latter companies were consolidated. At the time of the consolidation, the Iowa portion of the main line extended only one hundred and thirty miles from Davenport, to Kellogg Station, forty miles east of Des Moines. The completion of this section of the road was pressed rapidly forward, and in June, 1869, the entire main line, from Chicago to Council Bluffs, was opened.

In addition to the road built from Davenport to Kellogg Station, the old Mississippi & Missouri company had, before the consolidation, built about fifty miles of the Oskaloosa Branch, extending from Wilton, on the main line, by way of Muscatine, to Washington, Iowa. In 1872, the branch was extended to Sigourney, a distance of twenty-eight and one-fourth miles; in 1875, from Sigourney to Oskaloosa, twenty-five miles; in 1876, to Knoxville, twenty-four and three-fourths miles; making the entire length of the Oskaloosa Branch, one hundred and twenty-eight miles.

In 1869, the Chicago & Southwestern company, a corporation formed under the laws of Iowa and Missouri, commenced the construction of a road from Washington, on the Oskaloosa branch, to a point in Missouri on the Missouri River, nearly opposite Leavenworth, Kas. In order to raise money for its construction, oyertures were made to the Chicago, Rock Island & Pacific company, and on October 1, 1869, an arrangement was entered into between the two companies, whereby the former agreed to guaranty Chicago & Southwestern first mortgage bonds to the amount of $5,000,000. The mortgage contained a proviso that if the former company should be required to pay either principal or interest of the bonds, it should be subrogated to the right of the original holders, and be entitled to demand a foreclosure. As the line was constructed, it was turned over to the Chicago & Rock Island company for operation on account of the Southwestern company. The main line, two hundred and sixty-nine miles, was completed in 1871. While it was being built the Southwestern company, in order to secure funds for the construction of a branch to a point on the Missouri River opposite Atchison, Kas., issued bonds for $1,000,000. These bonds were secured by a mortgage which was declared to be a first lien on the branch and a second lien upon the main line. No guarantee of these bonds, either direct or indirect, was given by the Rock Island company. On the completion of the branch, the Southwestern company ceased to pay interest on either class of bonds. Provision for the payment of interest coupons on the bonds secured by the mortgage on the main line was made by the Chicago & Rock Island company, which continued to operate the road on account of the Chicago & Southwestern. Being unable to make satisfactory permanent arrangements, the former company, in 1874, instituted foreclosure proceedings. A number of the Atchison Branch bondholders intervened, and resisted the application, alleging a guarantee by the Chicago & Rock Island company of the bonds held by them. After litigation extending over three years, the United States Supreme Court, in 1877, confirmed the judgment previously entered by the Circuit Court, exonerating the company from any liability on account of the Atchison Branch bonds and ordering a foreclosure and sale of the main line, free from all lien under the Atchison Branch mortgage.

In 1871, the Des Moines, Indianola & Missouri Railroad Company commenced the construction of a line from Des Moines to Indianola, a distance of twenty-two miles. The Chicago & Rock Island company became the owner of its bonds, and operated the road, as completed. Foreclosure proceedings were commenced in 1876.

In 1872, the Des Moines, Winterset & Southwestern Railway began the construction of a branch from Summerset, on that road, to Winterset, twenty-six miles. The bonds having become the property of the Chicago, Rock Island & Pacific company, for advances made, the mortgage was foreclosed and a decree of sale entered in the spring of 1877.

The losses of the company in the fire of 1871, included the passenger depot (owned jointly by the Rock Island and Lake Shore companies), the general offices, the freight depot and a quantity of rolling-stock. The direct pecuniary damage resulting was $200,000, of which $345,439.60 was recovered from insurers. The work of re-building the passenger depot, on a larger and better plan, was commenced in 1872.

The Mississippi River bridge, work on which had been begun in 1869, was opened in 1874.
that corporation, with right-of-way, provided the latter would lay the track and complete and operate the road. The offer was accepted, and, during the year, the track was laid.

During the fiscal year 1876, the Oskaloosa Branch was completed by the construction of twenty-four and three-quarter miles of track from Sigourney to Oskaloosa. This branch runs from Wilton, twenty-five miles west of the Mississippi River, south to Muscatine, then. nearly to Oskaloosa, a distance of one hundred and three miles. An addition of nearly three miles of track was also made on the South Chicago Branch.

The most important event in the history of the company during the fiscal year 1876-77, was the formation of the Iowa Southern & Missouri Northern Railroad Company—duly incorporated, with full power to purchase the main line of the Chicago & Southwestern, the Des Moines, Indiana & Missouri, and the Des Moines, Winterset & Southwestern railways. In September, 1876, the Southwestern company conveyed the new corporation its main line, subject to the rights of the holders of outstanding bonds. On November 1, a sale of the entire property was made under a decree of foreclosure, and the Iowa Southern & Missouri Northern company became the purchaser. The new corporation likewise purchased of the Des Moines, Indiana & Missouri Railway Company, its road, extending from Des Moines to Indianola, and also completed arrangements for the purchase of the Des Moines, Winterset & Southwestern Railroad.

The property at this time owned, leased or controlled by the Chicago, Rock Island & Pacific was—

A serious accident, by which eighteen lives were lost and thirty-five persons were seriously injured, occurred during the fiscal year 1877-78, near Altoona, Iowa. The disaster was caused by the washing out of a twelve-foot arch culvert, in consequence of which a train was precipitated into the stream below, which had been swollen by a sudden and violent storm. This accident, with others of less importance, demonstrated the necessity of still further improvement in the roadbed and track, in order to bring it up to a standard of excellence which should insure the highest degree of safety and economy in operating, and the management at once resolved upon making the necessary outlays.

During the fiscal year 1878-79, a scheme was successfully carried out, by which the interest on the company’s bonded debt was reduced from seven to six per cent. The annual saving of interest from this source was $90,000, the bonded debt remaining the same.

In 1878, two branch roads, known as the Audubon and Harlan branches were opened, being respectively twenty-five and thirteen miles in length, and running to the centers of Audubon and Hardin counties, Iowa.

In the early part of 1878, the company received proposals looking to a lease of the Keokuk & Des Moines Railway (one hundred and sixty-two miles), running between the points named. The line had been a formidable competitor of the Chicago, Rock Island & Pacific, and the proposition was accepted. The lease of this road and the building of the branches in Iowa increased the total number of miles of road owned and controlled by the company to 1,231.

In December, 1879, an arrangement was effected with the Hannibal & St. Joseph Railroad Company, whereby, for a period of twenty-five years, the Chicago & Rock Island trains were allowed to run from Cameron to Kansas City, over the track of the former road, and to use, jointly with the Hannibal & St. Joseph Railway, the tracks, freight depot, and other facilities of the latter at Kansas City. An agreement was also made with the Union Passenger Depot Company, whereby the Chicago, Rock Island & Pacific company were accorded, on equal terms, the same rights and privileges in the Union Passenger Depot at Kansas City as were enjoyed by eight other companies whose trains ran to that point. An equitable traffic contract was also made with the Hannibal & St. Joseph Railroad Company, to transport passengers and freight of the Rock Island company between Cameron and Kansas City. Under these agreements, trains began running between the last named point and Chicago, over the Rock Island route, on January 5, 1880.

The decided advantage to the company of this arrangement was shown by a notable increase in earnings; the gain in gross earnings for the fiscal year ending March 31, 1880, over the preceding twelve months being $1,687,829.05, and in net earnings, $935,155.43.

The policy of extending the road in Iowa by the opening of branches was not abandoned in 1880. The construction of three such branches, averaging fifteen miles each, was commenced during the year, and completed in December, as well as a short branch, two and one-half miles in length, extending from a point on the Keokuk & Des Moines Division to Keosauqua.

On January 1, 1888, the company sold and transferred to the Pullman’s Palace Car Company one-half interest in the control and management of their line of sleeping and parlor coaches; the Pullman Company paying one-half the appraised valuation of the equipment and one-half the net receipts, besides withdrawing all claims arising out of alleged infringements of patents.

The sales of land during the year demonstrated the wisdom of the company’s policy of opening up territory to actual settlement by the construction of branch lines. On March 31, 1880, only about 185,000 acres remained unsold, and the Land Commissioner, in his report for the year, expressed his conviction that the result of another good crop would be the sale of the greater part of the desirable lands.

On June 2, 1880, the Chicago, Rock Island & Pacific Railroad Company was consolidated, by vote of the stockholders, with other railroad companies owning or leasing lines in Iowa and Missouri, and became the Chicago, Rock Island & Pacific Railway Company. At date of consolidation, the new company became the owner of 1,538 miles of railway, and operated, under lease, 273 miles, making a total of 1,511 miles. Subsequent to that date and during the year 42.6 miles of branch lines were built, as has been already stated.

The large increase in traffic to and from the Southwest, which resulted from obtaining an entrance into Kansas City, convinced the directors of the expediency of constructing a line from Davenport to Muscatine, along the western bank of the Mississippi. Surveys were made and work begun in August, 1880, and on November 6, 1881, the new branch (26.9 miles in length) was opened for traffic. Its construction reduced the time of the southwestern trains, while at the same time, by forming a connecting link, it practically completed a second line between Davenport and Des Moines. The
RAILROAD HISTORY.

The total mileage of road operated by the company was thus increased to 1,351 miles.

The history of the two succeeding years presents no items of special interest. A steady reduction in freight rates and a general depression in business caused a reduction in earnings. The demand for the company's lands still continued, the average price received per acre being $9.63 in 1884 and $10.91 in 1885, and the number of acres unsold, to which title was believed to be perfect, on March 31 of the latter year was only 18,652.

The financial operations of the Chicago, Rock Island & Pacific Railway, during the years 1872 to 1885, inclusive, were as follows:

Richard Hampton Chamberlin, superintendent of the Illinois Division of the Chicago, Rock Island & Pacific Railway, was born in Mendon, Morris Co., N. J., in 1826, the son of Benjamin C. and Mehitable (Matlock) Chamberlin. When quite young he was sent to his parents to live in Little, Penn., where they remained about two years, and then removed to Pottsville, in the same State, and from thence to Carlisle, Penn., where they stayed about three years. Then the family moved to Lancaster, Penn., where young Chamberlin attended the common schools for four years, after which he was at a boarding-school at Little, Penn., where he also attended school under the tuition of Mr. Beck, about one year and a half. Then the family moved to Philadelphia, where his father kept the Third Street Hall, the firm of partners being Chamberlin & Buck. There Mr. Chamberlin remained for six years, and, at the age of sixteen, was apprenticed to Robert Brewer in the chair manufacturer's business, and remained there until his eighteenth year. But when he had been two years serving his time his parents moved to New York City, and young Chamberlin, being badly treated and receiving but $25 a year for his hard work, got homesick and ran away to rejoin his parents. His employer followed and was taken, and, after some negotiation, his father and Mr. Brewer exchanged indulgences, and thus young Chamberlin gained his freedom. He then went under instructions to William Walling and finished his trade after which, being twenty-one years old, he went as assistant foreman to Mr. Ingersoll, who gained some celebrity in the Tweed difficulty, and, after staying there some little time, he went to Troy, N. Y., and for Warren, Ill., Adams & Co. Being in the factory on Adams Street, and remaining there until that factory was burned down, about two years later. He then went to New York City and continued in the chair manufacturer's business, in which he failed, but paid all his debts in full, owing no one at the time of shutting down his factory. He then accepted an offer made by Burger & Brother, who had re-built their factory, and worked for them at Troy for some time; but a better offer being made by Taylor, Seymour & Co., he left the former firm and went to work for the latter at West Troy. From there Mr. Chamberlin went to New York City, and was conductor of the Fourth Avenue City Railway Company's line, when it first opened. He stayed there for three years, and was then transferred to the Delaware Division of the New York and Erie Railroad as head brakeman, under Superintendent Hugh Riddle, whom he remained for one year. He then, for about four years, was conductor on extra freight trains, after which he was conductor on passenger trains until 1873. In that year, he went to the New York, Oswego & Midland Railroad, and remained until June 1874, when he engaged in the hotel business at Ellenville, Ulster Co., N. Y. He sold out his business in September, 1874, and left there on November 12, 1874, to come to Chicago, arriving here on the sixteenth of that month and taking the position of conductor on a passenger train on the Illinois Division of the Chicago, Rock Island & Pacific Railway on Friday, December 18, 1874. On January 1, 1875, he was appointed to the position he has at present, and which he has annually increased until since the latter part of May, 1877, Mr. Chamberlin is a member of Mystic Star Lodge, No. 725, A.F. & A.M.; of the Master Masons of Delta Chapter, No. 191, K. of P., and Delaware Commandery No. 9, K.T., of Port Jervis, Orange Co., N. Y.

John F. Phillips, cashier of Chicago Rock Island & Pacific Railway Company, was born in Brattleborough, Vt., on July 14, 1837. He received his early education in the common schools of his native town, and in Massachusetts, whither his family removed while he was a lad. In 1860, Mr. Phillips came West, and located in Chicago, where he has ever since resided, and has always been connected with the Chicago, Rock Island & Pacific Railway Company. He first held a position as clerk in the purchasing agent's office, and was afterward transferred to a similar position in the paymaster's office. In 1867, he was promoted to the office of paymaster, which he held until July 1, 1885, when he was appointed to his present position, that of cashier. Mr. Phillips was married, in 1857, to Miss Besse Webster, of Chicago, and their residence is in Hyde Park. They have three children,—Lottie, Robert, and Earnest. Mr. Phillips has long been a member of the Masonic order, and now belongs to Apollo Commandery, K.T., and Oriental Consistory, S.P.R.S., No. 32.

Barclay William Perkins, private secretary to the president of the Chicago & Rock Island Railroad, was born in London, Eng. land, in 1855, the son of Charles and Susan (Bird) Perkins. He was educated at Thanet College, Margate, England, a collegiate institution, where he was, maintained until he took the direct aments of Oxford University. In 1871, Mr. Perkins entered into business from a clerk in the establishment that publishes The Ironmonger, a London trade-journal, and whose habitat was on Cannon Street. After remaining with this firm some little time, he entered the employment of Richards, Powers & Co., of Fenchurch Street, London, extensive canvassers and shippers of coal. In 1873, Mr. Perkins came to the United States and Chicago, and here entered the real-estate office of Belden F. Culver, with whom he remained until 1874, and subsequently with various firms until 1878, when he entered the employment of the Rock Island Railroad. His first position in the general offices of that road was in the law department, where he remained until 1882, when he received his present appointment. Mr. Perkins was married, in September, 1854, to Miss Matinie Hutchins, of Chicago.

George L. Rhodes was appointed city passenger agent of the Chicago, Rock Island & Pacific Railway, on October 1, 1880. He lived five years in Iowa, and in 1875 married the daughter of Mr. Charles R.拼命, of Chicago, Illinois, and has been in the employ of the Rock Island Railroad since then. He was reared on his father's farm and received his education in the common schools of that locality, and at Madison University, remaining at home until he was twenty-three years old. He then determined on trying his fortune in the Western country, and came to Chicago in 1874, and immediately perceived that there was money in the cattle business. He went to Indiana and remained there about two years, buying stock and shipping it to this city. But he desired to see some of the farther Western country, and estimating that if he had been fairly successful in Indiana, he could be more fortunate in Missouri, and, accordingly, he went to Kansas City and entered the real-estate business in partnership with Dr. M. M. Munford, remaining in that business association for two years. On the dissolution of the partnership, Mr. Rhodes removed to Chicago, where he remained until after the great fire; and Dr. Munford entered the journalistic field, wherein he has since become celebrated. After his return here, Mr. Rhodes occupied various positions, among others that of excursions agent, until by his own endeavors he was enabled to make trips to Denver with emigrants, settlers, and excursionists. He occupied this position until 1878, when he went to Cleveland as joint agent for the Land and Passenger Department of the Union Pacific Railroad, which position he resigned in order to accept the one he has at present, and which he certainly is eminently qualified to fill.

Keen, genial, decisive and courteous, Mr. Rhodes not alone daily demonstrates his efficiency as a passenger agent but also makes personal friends of those with whom he comes into official relations. He is a man of good presence and fine appearance, and in his personal life a noble, wholesome gentleman, who has always lived in good standing with his associates and the public, and who receives every compliment from friends and strangers. His are the qualities which make him a desirable companion for the most intimate and most important friends, and his presence endows society with a charm and a luster which are rare in this day and age.

Chicago, Milwaukee & St. Paul Railway

The connecting line of this road between the cities of Chicago and Milwaukee was constructed in 1873. The policy of the management has since been one of extension.

In May, 1878, the company purchased the greater part of the stock and lands of the Dubuque & Southwestern Railroad, in Iowa, extending from Farley, a point on the Illinois Central Railway twenty-three miles west of Davenport, in a southerly direction for fifty miles, to Cedar Rapids. During the same year the company availed itself of an opportunity to secure the entire remainder of the first mortgage bonds of the Madison & Portage Railroad Company, a portion of which issue had been purchased in 1871. In the latter year, the line had just been completed from Madison to Portage City, and formed a connecting link between the LaCrosse and Prairie du Chien divisions of the Chicago, Milwaukee & St. Paul road, about midway between Milwaukee and the Mississippi River. The road was in possession of and operated by the Milwaukee & St. Paul Company from the date of its completion. Foreclosure proceedings upon the first mortgage bonds were instituted in 1878, and in 1880 the line became the property of the Chicago, Milwaukee & St. Paul Company.
The Minnesota Midland Railway Company was organized in 1877, to construct a narrow-gauge railway from Wabasha, on the River Division of the Milwaukee & St. Paul line, westerly across the State of Minnesota; and in May, 1879, sixty miles of the Midland road were completed, extending from Wabasha to Zumbrota. The control of the road being deemed important, the purchase was made. The operation was under a contract of lease, although the securities were almost entirely owned by the lessee.

The Viroqua Railway Company was organized during 1878, to construct a railway from Sparta, on the line of the LaCrosse Division, southerly to Viroqua, Wis., thirty-two miles, and municipal aid to the amount of $50,000 was furnished. Ten miles of the road were constructed and operated in 1878; the remainder was completed in 1879; and in 1880 the road was transferred to and became a part of the line owned by the Chicago, Milwaukee & St. Paul company.

Besides the purchases above recited, an extension of one hundred miles was made under authority granted by the Iowa Legislature, conferring upon the company the land grant applicable to the construction of a road from Algona to a junction with the Sioux City & St. Paul Railway. In 1883, extension of eighty-five miles, on condition that the road should be completed by January 1, 1880. The grant was accepted and the road completed within the year, with fifteen miles in addition, which took the line to within twenty miles of the east line of Dakota Territory. The land grant thus earned by the company embraced 200,000 acres in Northwestern Iowa.

In 1879, the Oshkosh & Mississippi Railway, twenty miles long, was leased, the securities, however, as in the case of the Minnesota Midland, being mainly owned by the lessee.

During 1880, the following roads were purchased:

</table>

In addition to the purchase of the lines above mentioned, the mileage of the road was increased by the construction of 349 miles of branches and extensions, distributed among the States crossed, as follows: In Illinois, 25 miles; in Wisconsin, 21 miles; in Minnesota, 36 miles; in Iowa, 42 miles; in Dakota, 221 miles.

The purchase of the Chicago & Pacific Railway gave the company (with the construction of twenty-six miles of additional road) a direct route from Chicago to the Mississippi River at Savanna, and thence to Marion and Cedar Rapids.

By the purchase of the Chicago, Clinton, Dubuque & Minnesota Railway, the Milwaukee & St. Paul secured a continuous line along the Mississippi River from Minneapolis to Rock Island and Davenport, as well as a short route between Chicago and Dubuque.

In connection with the purchase of the Southern Minnesota road, the company became the owner of 315,000 acres of excellent farming land along the line acquired. A land grant of 125,000 acres from the General Government was also secured by the completion of one of the extensions of the road. Through a series of agreements made with the McGregor & Missouri River Railroad, 130,000 acres in addition were obtained. For the management and disposal of the lands thus obtained, a Land Department was organized in 1880.

In 1881, an aggregate extension of road amounting to 442 miles was made which, added to the 3,775 miles previously owned by the company, made it the owner of 4,217 miles of completed railway. The most noteworthy of the year's extensions was the building of 198 miles on the Chicago & Pacific Western Division, extending from Marion to within sixty-four miles of Council Bluffs. During 1882, the road was completed to the latter city, making a continuous line between that point and Chicago, 498 miles in length, and opening a connection with the Union Pacific and other railroads at the Missouri River. The entire increase in mileage during 1882 was 393 miles, making a total of 4,520 miles of complete railway owned by the company.

By the building of additional lines, of which 146 miles were in Dakota, 50 miles in Iowa, and 44 miles in Wisconsin. These additions made the total mileage of the road at the close of the year 4,760 miles, to which 44 miles were added in 1884.

In 1885, besides adding largely to its grounds for yard and depot purposes in Chicago, the company secured, in its own right, suitable facilities for the storage of grain.

In 1880 was expended on new works in Chicago, $306,376; in 1881, $236,615; in 1882, $210,000; in 1883, $1,354,813; in 1884, $1,684,122.

For real estate in Chicago was expended, in 1881, $422,009.37; in 1882, $168,700.07; in 1883, $1,008,91; in 1884, $225,527.20.

For buildings in Chicago was expended, in 1883, $997,711.30; in 1884, $994,053.62.

In 1881, the board of directors, deeming it of importance to secure a cheap and reliable supply of fuel, purchased three thousand acres of coal lands at Bruseville, sixty-one miles southwest from Chicago, at a cost of $633,000; and two thousand acres of coal lands near Ord, Os- sian, Iowa, at a cost, including improvements, of $210,000.

GEORGE O. CLINTON, division superintendent of the Chicago, Milwaukee & St. Paul Railway, has had a varied and diversified experience among the railroads of the West, and has held positions in nearly every capacity from brakeman to a director. An experience of thirty years necessarily gives to a man an absolute knowledge of the duties and responsibilities of railroad life. Mr. Clinton first entered the railroad service, in 1857, as brakeman on the Milwaukee & Prairie du Chien Railroad. He remained in that position for a year and was then made baggagemaster, and subsequently promoted to a freight conductorship. He acted in the latter capacity until 1861, the breaking out of the War determining his future pursuit. When the call for men was made, Mr. Clinton, as lieutenant and adjutant, went to the front with the 1st Wisconsin Cavalry. He served three years, and during that time was commissioned as captain of Co. "B," 1st Wisconsin Cavalry. When Captain Clinton was mustered out (1866), he went to Iowa and commenced buying grain. He also took a contract for grading and construction on the McGregor & Western Railroad, now the Iowa and Minnesota Division of the Chicago, Milwaukee & St. Paul road. In 1874, he went to Kansas and took a contract for grading fifteen miles of road on the Kansas Pacific line, which was afterward merged into the Union Pacific Railway. When this work was completed he returned to Wisconsin, located at Ft. Howard, and became identified with the lumber trade. He remained there until 1879, and then became a director of the Madison & Portage Railroad, and superintendent of the construction of that road, which was built between the cities above named. The Sugar River Valley Railway Company was authorized, in 1861, to build a railroad from Madison to Portage City. It graded about twenty miles of the road and secured the right-of-
Cleveland, Palinesville & Ashubula Railroad, from Erie, Penn., to Cleveland, Ohio. 96 miles.
Cleveland & Toledo Railroad, from Cleveland and Lake Erie to Toledo. 113 miles.

With a branch, or Northern Division, from Elyria to Milbury, via Sandusky. 76½ miles.

These two roads were consolidated, under the name of the Lake Shore Railway Company, in March, 1869.

Michigan Southern & Northern Indiana Railroad, from Toledo, Ohio, to Chicago. 244 miles.

This road and the Lake Shore Railway Company were consolidated in May, 1869, under the name of the Lake Shore & Michigan Southern Railway Company; and in August, 1869, the Buffalo & Erie Railway Company was consolidated with the last named organization, the new corporation retaining the name of the Lake Shore & Michigan Southern Railway Company. The combination thus formed continued a continuous line of road five hundred and forty miles in length, from Buffalo to Chicago.

In addition to the main line, the company, at the beginning of 1872, owned the following branches:

Ashubula, Ohio, to Jamestown, Penn. 36 miles.
Elyria, Ohio, via Sandusky, to Milwaukee, Wis. (connecting with main line). 76½ miles.
Toledo, Ohio, to Elkhart, Ind. (air line). 131 miles.
Adrian to Jackson, Mich. 46 miles.
Adrian to Monroe, Mich. 37 miles.

The company also owned the entire capital stock of the following roads, which, however, still remained under separate organizations:

Detroit, Monroe & Toledo Railroad, from Toledo to Detroit. 65 miles.

The following roads were operated by the Lake Shore Company under leases:

Jamestown & Franklin Railroad, from Jamestown to Oil City, Penn. (connecting with Ashubala Branch). 51 miles.
Kalamazoo, Allegan & Grand Rapids Railroad, from Kalamazoo to Grand Rapids, Mich. 58 miles.

The great fire of October, 1871, resulted in serious loss to the company. In addition to the destruction of the valuable passenger depot owned and occupied in conjunction with the Chicago, Rock Island & Pacific Road, the burning of the Grand Pacific Hotel, in which the company had an interest of $125,000, proved a source of untold disaster, in addition, from the losses which may be characterized as indirect, the direct pecuniary results resulting from the conflagration were estimated by the management at $325,000.

During 1872, the Northern Central Michigan Railroad was opened from Jonesville, on the main line, seventy miles west of Toledo, to Lansing, a distance of sixty miles.

On June 19, 1873, the president of the road, Horace F. Clark, died, and was succeeded by Commodore Cornelius Vanderbilt.

The reports of the directors for 1873 and 1874, signed by Commodore Vanderbilt, give the following account of the condition of the road:

When I was elected your president, July 1, 1873, I found the financial condition of this company to be as follows: Capital stock $29,730,000, all issued; funded debts, $99,750,000; floating debts, $6,277,285, including a dividend due August 1, $2,093,315, besides bills and pay-roll for June, $1,478,686. There was not a dollar in the treasury. Contracts for construction and equipment, amounting to one hundred thousand tons of steel rails, etc., to the amount of $7,894,345, had been made and the work had progressed until 1873, whatever for meeting the large payments, the panic of 1873 occurred in September, and disclosed the fact that the dividend just paid ($2,093,315) had been borrowed in call, of the Union Trust Company. That institution closed and passed into the hands of a receiver, who called the large loan at a time when money could not be borrowed on the best collateral security. After giving the Trust

LAKE SHORE & MICHIGAN SOUTHERN RAILWAY.

This company was formed by the consolidation of the following roads:

Buffalo & State Line Railroad, from Buffalo to Pennsylvania State line 58 miles.
Erie & North-East Railroad, from the Pennsylvania State line to Erie, Pennsylvania. 80 miles.

A consolidation of these two roads, under the name of the Buffalo & Erie Railroad Company, was effected in 1867.

way for about thirty of the thirty-nine miles. This company became insolvent, and, in 1870, Mr. Clinton, James Campbell and others, became the purchasers, organized a company, and, in 1871, completed and leased it to the Milwaukee & St. Paul company, by whom it is at present operated. Mr. Clinton remained in connection with the Madison & Portage company until 1877, and then took a position as freight conductor on the Chicago, Milwaukee & St. Paul line. He commenced work where he had left off years before, but having a strong will and determination to overcome adversity, went to work to regain his former position. He was employed for three weeks as freight conductor and was then made a yard master at Milwaukee. He remained with that road until August, 1880, and on September 1st of that year, having been tendered the position of local freight agent of the Wabash line in Chicago, came here to take the effectual this month. On the 15th of October, and thence to St. Louis as superintendent of the St. Louis, Bridge & Union Depot Company. In June, 1882, he was appointed superintendent of the Rio Grande Division of the Texas Pacific Railroad, and remained there until September 1, 1883, when he received the appointment of superintendent of the Chicago Division of the Chicago, Milwaukee & St. Paul Railway, and also of superintendent of the Council Bluffs Division, in Illinois, of the same line, which runs from Chicago to Savannah, Ill. Mr. Clinton is also superintendent of the Chicago & Evanston Railway, which is an auxiliary of, and operated by, the Milwaukee & St. Paul road. Mr. Clinton was married at Albany, Green Co., Wis., to Miss Charlotte Campbell, daughter of James Campbell, on November 6, 1860. They have three children, the eldest of whom is Charles A. Clinton, who is now baggage-master on the Chicago & Evanston Railroad. Their other children are Edith L. and James E.
Company ample security of my own for the debt, I undertook to enable the company from its financial difficulties.

Immediately upon the accession of the new management, a policy of retribution was adopted and carried out. The work of extending a double-track from Elkhart to Chicago,—one hundred miles,—was stopped within seven miles of Elkhart, and strenuous efforts were made to procure a release from other large contracts; but so much material had been purchased and so much work done, that the effort proved ineffectual. The outlay for construction, however, was largely reduced. To meet the pressing necessities of the road for construction and equipment, and also for the extinction of the large floating debt, the directors resolved upon placing a second general mortgage of $25,000,000. The expectation of the directory was that $12,000,000 of these bonds would retire the $6,000,000 issue of 1882 bonds, and extinguish the floating debt. The remaining $13,000,000 were to be held in reserve for purposes of construction and equipment. The actual increase in the company’s funded debt during the year 1874, was $6,316,416.68 in second mortgage bonds, sold at 90 per cent., yielding $5,697,416.68. This proving insufficient to extinguish the debt, the usual dividends of the year were passed, and the undivided earnings of 1873 and 1874—$2,413,315.34—applied to the cancellation of these obligations. This policy aided materially in placing the company upon a sound financial basis, without a dollar of floating debt, and restoring it to its position as a dividend-paying road,—a dividend of three and one-half per cent. being paid on February 1, 1875, from the earnings of the last half of 1874.

The sale of bonds and increase of debt came to a full stop in 1874. No increase in the aggregate funded debt was made after the troublesome floating debt inherited from a previous administration; on the other hand, a move was made in the opposite direction, by providing for a sinking fund. At the close of 1875, after meeting every obligation legitimately chargeable to the year, and providing for the dividend payable on February 1, 1876, besides satisfying the sinking fund, there remained in the treasury, for the first time in the company’s history, a very considerable balance.

After an immunity of seven years from serious accident, at the close of 1876, occurred the Ashtabula disaster on December 29. The cause of the accident has never been satisfactorily explained. Its nature and effects are well known. Among those who perished were many citizens of Chicago, and not a few homes in this city were called to mourn some member of the domestic circle. The accident entailed a loss upon the company of $495,722.42, or nearly one per cent. of the entire capital stock.

Another change of presidents occurred in 1877, when the late William H. Vanderbilt succeeded his father, whose death occurred on January 4, in that year.

1877, the company invested $200,000 in the purchase of stock in the Pittsburgh & Lake Erie road, which has proved a valuable investment.

The year 1879 closed the first decade in the history of the consolidated company. The miles of road operated were as follows:

- Main line, Buffalo to Chicago: 540.49 miles
- Five L. S. & M. S. Branches: 324.53 miles
- Total miles L. S. & M. S. Railway proper: 864.87 miles
- Three propitiatory roads, owned wholly by the L. S. & M. S. Railway: 160.07 miles
- Three leased roads: 152.73 miles
- Total miles operated: 1,177.67 miles

1879, the company purchased $1,384,700 of the capital stock of the Canada Southern Railway Company, which practically gave it control of the latter road, and removed a threatened competition, the original design having been to extend the Canada Southern line to this city.

The years from 1880 to 1883 were most prosperous. There was a continuing increase of earnings, both gross and net, though in 1884 a reduction of nearly twenty per cent, in business caused a falling off of nearly $4,000,000 in the former. Stringent economy in administration, however, so far kept down the operating expenses that the net earnings were lowered by only about one-half that sum.

The most noteworthy event in the history of the company during this year was the acquisition, in 1882, of a controlling interest in the New York, Chicago & St. Louis Railway. This was effected by the exchange of $6,527,000 second mortgage bonds for 140,500 shares of capital stock of the latter company. This exchange made the total funded debt of the road $4,192,000 at the close of 1882.

1884, a further increase of $3,250,000 was made. The total amount of the bonded debt at the opening of the year was $16,192,000.

The following tables show the financial operations of the company from 1871 to 1884, and the amount of freight and number of passengers carried, with the rates of transportation and the revenue derived therefrom:

A. G. AMSDEN, superintendent of the Western Division of the Lake Shore & Michigan Southern Railway, controls the line between Chicago and Elkhart, Ind., a distance of one hundred and one miles. He was born in York, Washenaw Co., Mich., in 1838, the son of Aratus and Mary (Cook) Amsden; and received his education in the district school and at Olivet Academy. His father was a farmer, and also did house and sign painting for the neighbors, and young Amsden worked upon the farm and also learned the painter’s trade. He followed these pursuits until April 15, 1861, when he enlisted as a private in the 6th Indiana Infantry Volunteers, which regiment was afterward changed to a heavy artillery regiment. He was successively promoted corporal, sergeant, and orderly sergeant of Co. "F," and, in November, 1864, was commissioned as second lieutenant, and, in November, 1864, was commissioned first lieutenant. In June, 1863, he received a severe gun-shot wound in the left thigh, during the assault on Port Hudson; and, in August, 1864, he received two saber cuts in the same thigh while he was out with a scouting party. In the spring of 1864, Lieutenant Amsden was appointed post ordnance officer at Port Hudson, and remained there on duty about fourteen months, when he was ordered to Fort Morgan, Ala., and there was assigned to duty in charge of the Ordnance Department of the Defense of Mobile, and continued there until his must out on September 12, 1865, his regiment having been mustered out in the latter part of August, in the same year. He then went to Detroit, Mich., and spent the winter and the following spring; after which he worked at carriage painting at Manchester, Mich., for five years. In March, 1871, Mr. Amsden commenced his railroad experience by entering the employment of the Lake Shore & Michigan Southern Railway as warehouseman at South Bend, Ind. He occupied that position for three months, and was then promoted cashier of the station, where he remained until May, 1872, when he was appointed private secretary for the superintendent of the Michigan Division. He was such secretary for two years and eleven months, and was then, on May 1, 1875, made treasurer of the Kalumau Division; and, on June 1, 1875, was appointed division superintendent of that Division, where he remained until January 8, 1884, when he was promoted to his present position. Mr. Amsden is a member of Ourinct Post, No. 79, G.A.R., and of Manchester Lodge, No. 148, A. F. & A. M., Manchester, Mich. He was married in November, 1857, to Miss Alice E. Spencer, of Manchester, Mich.; they have two children,—Eva U. and Wallace H.

Cyren D. ROY'S, attorney for the Lake Shore & Michigan Southern Railway, was born in Lamette County, Ill., in 1839, the son of Benedict and Melissa (Dunn) Roys. He prepared for college at the academies of Barry and Newbury, Vermont, and was graduated from Adrian College, Mich., in June, 1862, with the degree of A.B., having removed to Adrian in 1860. Mr. Roys graduated from the law school of Ann Arbor University, Michigan, and was admitted to the bar immediately afterward. In the same year he enlisted in Company "I," 1st Michigan Light Artillery, and was immediately promoted sergeant; before the regiment reached the scene of action he was commissioned first lieutenant of Battery "I," and as such officer served in the Tennessee and Atlanta campaigns, and was mustered out in March, 1864. In June, 1864, the degree of M.A. was conferred upon him by Adrian College.

Mr. Roys did not follow any active business for about eighteen months after he left the Army, in consequence of ill-health; and his first law practice was commenced in Leavenworth, Kansas, in 1867, where he remained for two years and then came to Chicago, arriving here in September, 1869. Immediately thereafter he was admitted to the Illinois bar, and then commenced his practice in this city, at first occupying a desk in the office of Messrs. Dent & Black, but not being associated with any other gentleman in the practice of his profession at any time. In 1868, Mr. Roys had his first son for the Lake Shore, and, in conduct of that was so able that he had all its business. After that time, and is 1870, he was officially recognized as the attorney for the road, which position he has held since. One of the most celebrated suits in which this gentleman has been engaged was the "Sackett's-'the Western Indiana suit," which occupied all the courts here for many months; and wherein also engaged James L. High, George W. Kyes, and as the representative for the Rock Island road—Thomas F. Withrow. In the case applications were made to Mr. Roys for his briefs from lawyers all over the country, such was the reputation he gained from his management of the suit. Mr. Roys is a
member of King Solomon Lodge, No. 10, A.F. & A.M., Leavenworth, Kansas. He was married in December, 1868, to Miss Julia Catherine Morehouse, of Elkhart, Ind.

MICHIGAN CENTRAL RAILWAY.

While the net earnings of the Michigan Central Railway Company for the fiscal year ending May 31, 1872, showed an increase of $415,259.29 over those of the preceding year, many difficulties were encountered in transacting the business of the road. The winter of 1872-73 was one of extraordinary severity, and for two periods, of about a month in all, passage by ferry at the Detroit River was rendered impossible by accumulation of ice, resulting in the storage, on side-tracks, of from one thousand to one thousand two hundred loaded east-bound freight cars. The extreme cold of a very long winter, and a heavy traffic, produced a damaging effect upon the iron rail of a single track and a correspondingly worn and tough condition of machinery.

In view of these drawbacks and of the increasing competition, the management decided upon an extensive policy of improvement. In their report for the fiscal year 1872, the directors said:

"The result is the large necessary expenditure on capital account, already made and making, to enlarge the capacity of the whole line and to build the main track of the road. The directors are fully of the opinion that the result will be an increase of the operation, a reduction of the expense, and in the end, the benefit of the whole community."

The most natural eastern connection of the Michigan Central was, at that time, the Great Western of Canada. Improvements were made, at the same time, being made in the track of the company's buildings in Chicago, and at the sleds for the track which was to serve both the line and the New York Central lines.

The fire of October, 1871, destroyed all the company's buildings in Chicago, with all the freight in store. The facilities for handling freight were, of course, reduced to a minimum, while, at the same time, the fire created a wholly unprecedented demand for building material, which class of freight was shipped over the line to such an extent as to have had its effect on the ordinary shipments of merchandise. To fill all the sidetracks of the western half of the road with loaded cars. During the winter, cars were, on the average, waiting for entrance into Chicago. The disaster, although terribly destructive in other respects, enabled the company to procure additional ground in this city for station purposes, thus relieving the management of the difficult and inadequate room, under which it had labored for many years.

The Michigan Central, prior to 1872, had aided in the construction of the Western and Saginaw Railroad, and had become owner of more than one-third of the capital stock of that company. In 1872, the former company acquired control and assumed the management of the road.

During 1873, the Central acquired control of the Detroit & Bay City, which it managed and operated, running their own equipment over the road.

"Railroad war" that raged from January to July, 1874, between the various lines leading west from New York had the effect of materially lowering rates on west-bound freight and deranging those on east-bound shipments, the result being, to quote the language of the directors, in their report for 1874, "that the whole business during that time has been [was] done at not much, if any, above cost, and is now going at much less than the cost of doing it."

Notwithstanding the fact that the results of the large outlay already made on account of construction and improvement had not met the expectations of the management, the directors decided that a continuation of the policy was demanded by self-preservation, and during the fiscal year ending June 1, 1874, large additional amounts were expended.

The completion of the International bridge at Niagara, during the year, was an event of much importance in the progress of improvement, as it superseded the old and inconvenient passage by means of a ferry. Its effect was greatly to improve the Grand Trunk route between Detroit and Buffalo, and also to give passage to trains of the Canada Southern road, then open from Detroit and connecting with the lines leading east from Buffalo.

The years 1875 and 1876 were characterized by the same general features as the two preceding—an increase of business, a lowering of rates, and generally unsatisfactory financial results.

A change in the management of the road was made in 1877, by the retirement of James F. Joy from the presidency as well as from the directors. He was succeeded, as president, by Samuel Sloan, of New York. The year was not a successful one, financially, the net earnings showing a falling off of $256,377.13 from those of 1876. In commenting upon this decrease, the directors attribute it, mainly, to the trunk-line warfare on west-bound freight, which seriously impaired the Central's income by producing a constant lowering of rates.

In the latter part of June, 1878, an entire change of management was made, and a new board of directors chosen. William H. Vanderbilt was elected president; among the directors were Cornelius and William K. Vanderbilt, Augustus Schell, Samuel F. Badger, Edwin D. Worcester (all of New York) and Anson Stager of Chicago. The Michigan Central thus became an integral part of the "Vanderbilt system."

During 1878, dividends amounting to four per cent were paid, for the first time since 1873. In order to relieve the overcrowded condition of the road in the city and to reduce the cost of handling freight, sixty acres of land were purchased for freight-yard purposes at Kensington, the junction of the Michigan Central and Illinois Central roads.

The year 1880 was the most successful since the organization of the company, the particular concomitants being the largely increased volume of traffic, the considerable and permanent improvement of the property, and a resulting dividend of eight per cent, paid to share-holders. One of the features in the history of the company for the year, which deserves special mention, is the unprecedented sale of lands, at greatly advanced prices, there being 47,124.41 acres sold, at an average price per acre of $4.45. There had been a steady appreciation in the prices realized. In 1877, the average price was $8.74 an acre; in 1878, $8.86; and, in 1879, $11.46. The assets of the Land Department, on January 1, 1881, were thus summed up by the Land Commissioneer:

<table>
<thead>
<tr>

Amount due on land contracts: $61,358.41
Cash on hand, December 31, 1880: $8,143.73

Total: $3,712,891.64
On April 1, 1881, the company leased the Detroit & Bay City Railroad, and assumed its debts.

In December, 1882, an agreement was entered into with the Canadian Southern Railway Company, under which, for a period of twenty-one years from January 1, 1883, the Michigan Central assumed the operation and management of the Canadian Southern and its leased lines. At the time of the execution of the agreement, the latter line had partially built (and during the next twelve months completed) a line from Essex Center to the Detroit River, opposite Detroit, with a suitable ferry to that city. During 1883, it constructed, under its agreement with the Central, a branch of its main line from Welland to the Niagara River, just below the falls (crossing the river upon the well-known "canti-lever" bridge), and increased its equipment to an extent sufficient to meet the demands of the through traffic. The provisions of the agreement with regard to earnings, expenses, etc., may be summarized as follows: After paying the common charges, the balance of earnings was to be divided in the ratio of two-thirds to the Michigan Central Company, and one-third to the Canada Southern.

The provisions of the agreement with regard to earnings, expenses, etc., may be summarized as follows: After paying the common charges, the balance of earnings was to be divided in the ratio of two-thirds to the Michigan Central Company, and one-third to the Canada Southern.

The financial operations of the Michigan Central Railway (including Branches) during the years 1872 to 1884, inclusive, were as follows:

The freight and passenger business of the Michigan Central Railroad, from 1872 to 1884, inclusive, were as follows:
The following sketches are of some of the prominent railroad officials, the headquarters of whose lines are in other cities:

**Henry C. Barlow**, traffic manager of the Mexican Central Railway, was born in the town of Niles, Mich., on August 15, 1832. He is a son of Lemuel and Hannah (Orent) Barlow, and at the time of his father's death came to Chicago with his mother. They lived in Chicago until July, 1883, when they removed to Amboy, Ill. He was afforded such advantages as his education permitted during his early years, and at the age of fourteen years was apprenticed to a sash and blind merchant. For some time he was employed in the counting house of a cotton commission house in Chicago, and later in the counting house of G. C. Condon, with a salary of ten dollars a month and board. He worked there for just a year and then joined his brother, who was agent for the Marquette, Houghton & Ontonagon Railroad, at Negaunee. He assisted him in his office and learned the science of telegraphy and thus practically commenced his railway career. He remained there for a month and then went to Toledo, Ohio, and became a salesmen for a large wholesale hardware house. He passed eight months there and then decided that he would prefer the railroad business as an occupation. In accordance with that desire he went to Warren, Ill., and commenced his highly successful career. In 1872, he was appointed agent at Grafton, Texas, on the Central Pacific Railway, and remained there until July, 1883, when he was transferred to the position of clerk in the local freight office of the Chicago & Northern Central Railway. He then remained there until March, 1885, when he was ordered to Chicago to represent the Texas, New Mexico & Pacific Railroad, and to that position he continued until August, 1885. He has been with the railroad ever since.

**Frank Ferris**, commercial agent of the Missouri Pacific Railroad Company, was born in Peckskill, N. Y., on March 21, 1853. He was brought up in his native State and received his education at Williams College, Williamstown, Mass., and at one of the leading institutions of the East. He received a collegiate and classical course of study, graduating from the college in 1876. In August, 1878, he was appointed agent at the Central Pacific Railway, at Oakland, Calif., and remained there until 1883, when he was transferred to the position of general manager of the Hoosac Tunnel Line, at Rochester, N. Y., where he remained for about eight months. In the following March he was made contracting agent for the Hoosac Tunnel Fast Freight Line, at Astor, N. Y. In July, 1883, he was made general agent of the Wabash system, at Quincy, Ill., and remained there until June 1, 1885, when he became private secretary to H. M. Hoxie, vice-president of the general managers of the Commercial & Great Northern Railways, whose headquarters were at Pittsburgh, Pa., and his principal duties were those of a commercial manager. In 1886, he was made general agent of the International & Great Northern Railways, whose headquarters were at Palatine, Texas, and was employed until the consolidation of the Texas-Pacific System in 1888, as general manager of the Wabash Railroad, and engaged in the management of the Arkansas Valley, the Texas & Pacific, the Gulf, Colorado & Santa Fe Railroads, and the formation of what is now known as the Southern Missouri, which embraces the following railroads: The Missouri Pacific; Missouri, Kansas & Texas; Central Branch of Union Pacific; Missouri, Kansas & Texas; Missouri, Kansas & Texas Northern; and the International & Great Northern; and Galveston, Houston & Henderson; having a total mileage of six thousand and forty-five miles. On January 1, 1886, he went to Laredo, Texas, as general agent of the system at that point, where he remained until the following December. He was afterward made contracting agent, with headquarters at Kansas City, where he remained until May, 1889. He then received his appointment as commercial, freight and passenger agent for the same system, for the Republic of Mexico, with headquarters at the City of Mexico, where he was located until October, 1891. He was then transferred to this city as commercial agent of the company, and remained here until the present time.

**T. B. Gaut**, general agent of the Union Pacific Railway, was born in New Hampshire, on June 30, 1841. He was reared in New England and received an excellent education in the public schools. In 1863, he decided to try his fortunes in the West, and obtained a position with the Chicago & North-Western Railway, as clerk in their office at Rockford. He continued as such for about five years, when he was promoted to agent at that station. He remained in the employ of the company until 1871, when he went to the manufacturing business at Rockford. Three years later he closed out and went to work for the Chicago, Milwaukee & St. Paul Railway, taking the station agency at Owatonna, Minn. He continued there three and one-half years, and was then appointed general agent of the Wabash system, with headquarters at Omaha. He resigned his representative position in 1883. After that, he continued to work for the Central Pacific in 1886. In 1888, he left the railway service and came to Chicago to make his permanent home. He became president of the Western Union Telegraph Company, which holds extensive and constructing fence wires for railroad protection, and was quite successful in that line of work. Notwithstanding his determination to keep out of the railway service, on January 1, 1883, he accepted the position of general agent of the Union Pacific. He has held the position with the title of general manager of the company, and the duties of his position have increased in number and importance, and he is now recognized as one of the leading officials in the West.
I. N. Sawyer, contracting freight agent of the Northern Pacific Railroad, was born at Dover, N. H., on February 26, 1842. He spent his early boyhood in his native town, attending its school and afterward his education at Providence, R. I., at the institution known as the Friends' College. When the War broke out in the spring of 1861, Mr. Sawyer was about completing his college course and required by the call of his country to enter the service. He entered Co. "K," 11th New Hampshire Infantry Volunteers, and was made sergeant. He was in active service all through the War and was in many of the most important engagements. He was made captain and later major of the regiment of which he was second lieutenant. He served under the staff of Brevet Major-General S. G. Griffin as brigade inspector until the close of the War. President Johnson signed his commission as brevet major of volunteers just before the surrender of the Confederates. When he was mustered out Mr. Sawyer came to Chicago and commenced bookkeeping for Dake & Woodman (wholesale bakers) and afterward for George H. Brooks & Co., a commission firm then on South Water Street. He remained with them until 1868, and the following year he took a position as bookkeeper with the Pullman Car Company and later on was made assistant auditor. He was in the service of the Pullman Company until 1873, and during that time he was in the real-estate business on his own account. For three years Mr. Sawyer was engaged in this pursuit, and during that time transacted a very large business. In 1877, he was tendered a position with the Northern Pacific Railroad, with headquarters in Chicago. His duties were connected with the freight department, under the administration of Mr. Wright, then president of the road. Mr. Sawyer has been with the Northern Pacific since that time, and is now in the rank of freight agent for the Chicago. Mr. Sawyer was married on November 15, 1871, to Miss Emma, daughter of Lorin P. Hilliard, one of Chicago's earliest residents and formerly county treasurer for Cook County. Goodno, M. G., city passenger agent of the Northern Pacific Railroad, was born at Troy, N. Y., on August 16, 1846. The earlier part of his life was spent in Ogdensburg, where he attended school and commenced business life. Mr. Goodno first entered the railway service, with which he has been identified for the last eighteen years, in 1868. He went to work for the Grand Trunk Railroad, taking a position as traveling agent in the Eastern territory. He remained with them for three years, and then went to Kansas City, Mo., where he was in the Pullman service as conductor for about two years. In the latter part of 1875, he went with the Union Pacific Railroad, in whose employ he was for about five years, serving in various capacities. Mr. Goodno also became connected with the Erie & Chicago road and the Chicago, Burlington & Quincy Railroad. He was then sent to Omaha as the western passenger agent of the Michigan Central line, and remained there for some time. He took a position with the Northern Pacific company on September 1, 1884, as their passenger agent in this city, which office he now occupies. Mr. Goodno is one of the most active, energetic and reliable agents in the city and possesses in the fullest degree the confidence and good opinion of the Northern Pacific administration. He was married at Ogdensburg, N. Y., in 1868, to Miss Abbie Meal, and they have had five children, one of whom, Forest S., is now dead. The remaining children are Maude, Becky, Bessie and George.

Baltimore & Ohio Railroad.

The Baltimore & Ohio Railroad Company secured an entrance into Chicago in November, 1874, over the line of the Illinois Central road, with which company a contract was also made for the use of depot grounds. The project of an extension of the road to Chicago was conceived in 1871-72. A line was accordingly constructed from a point about ninety miles north of Newark, Ohio (on the Lake Erie Division), to Chicago,—a distance of 260 miles. The location secured at once the two great advantages of low grades and directness, the distance from this city to Baltimore, by this route, being 274 miles, and to Washington 784 miles. The point of divergence was chosen with a view to the ultimate concentration, upon this route, of the traffic of the main line and of the Pittsburgh, Washington & Baltimore Railroad, as well as that between Pittsburgh and Wheeling. The value of the line was estimated, by the directory, on its completion, at $6,357,893.43. The following table affords a comprehensive view of the financial results of the operation of the branch since its opening:

About the time of the completion of the branch, forty acres of land were purchased at Chicago Junction, fifty-six acres were donated at Gurnee City, and forty acres at South Chicago, for depot grounds, machine shops, engine houses, etc. In this city, a brick freight warehouse, was erected in 1875. Connections were made with the Stock Yards, and ample preparations made for an extensive traffic in live-stock.

During 1877, some changes were made in the corporate constitution and control. The original legal name,—the Baltimore, Pittsburgh & Chicago Railway,—did not properly represent or characterize the line finally adopted, and was changed, under the laws of Ohio and Indiana, to the Baltimore & Ohio Chicago Railway Company. The line, however, is still known as the Chicago Division of the Baltimore & Ohio Railroad.

The extension of the Baltimore & Ohio line to this city was not viewed with favor by other of the trunk lines, who believed that in it they saw a formidable competitor. Much jealousy was engendered, and a fierce commercial rivalry raged for some time. By mutual consent of the Baltimore & Ohio and Illinois Central companies, the use of the depot of the latter was abandoned by the former in 1875, and the city terminus was fixed at the Exposition Building, on Michigan Avenue.

Edmund Clark Lawrence, city passenger and freight agent of the St. Paul, Minneapolis & Manitoba Railroad, was born in Delaware County, N. Y., on June 30, 1843. His parents removed to Millington County, Ohio, when he was thirteen years old. His father being a farmer, the son was reared in the country and attended the district school. Upon his maturity, he decided to follow farming individually, and so continued until the age of thirty, when he entered the employ of Mr. J. DeKalb, of the lumber business in DeKalb, until the summer of 1875. He was then offered a position as general agent for the land department of the Kansas Pacific Railway, and, selling out his farming interests, he opened an office in Millington, Ill., and from that time to the present has been identified with railroad corporations. He remained at Millington but two months, the company deemed his service of such value as to warrant his placing him in charge of the Chicago office of the land department. Mr. Lawrence's long and practical experience as a farmer fitted him for the position he occupied, and he was of value as an agent for the disposal of the company's lands. He remained with them until January 1, 1880, when the consolidation of the Union Pacific, Kansas Pacific and Denver Pacific railroads was completed. He was then appointed general traveling agent of the land department of the Chicago, Milwaukee & St. Paul Railroad, having for his principal work the advertising of their lands along the line in Iowa. He remained with them until they had effectually sold for over eighty thousand acres, which comprised the bulk of their lands in Iowa, and, in 1881, took a position as traveling passenger agent. He now occupies the position as city passenger agent, with general charge of the freight business in this city for the above company. Mr. Lawrence was married at Sandwich, Ill., November 12, 1872, to Miss Ellen Dean; they have one daughter,—Cora Belle. Their two sons, Berrie and Edmund, died when five and two years of age, respectively.

Elmer H. Wood, general agent of the freight department of the Northern Pacific Railroad, was born in Sumner, Wash., on January 12, 1854. His early education was obtained in his native State at the common schools, and, after his removal to Illinois in 1870, he entered into, and graduated from, the Grand
The result of the financial operations for 1884 were as follows:

The excess of assets over liabilities at the close of 1884 was $1,068,937.33.

**Chicago & Grand Trunk Railway.**

The Chicago & Grand Trunk Railway Company is the consolidation of several independent companies controlling and operating a line from this city to Port Huron. The names of the corporations, with brief sketches of each, are as follows:

- Port Huron & Lake Michigan Railroad Company, incorporated on January 30, 1847, from Port Huron to "some point on Lake Michigan at or near the mouth of Grand River."
- Port Huron & Milwaukee Railroad Company, incorporated on February 12, 1855. Line similar to that of the Port Huron & Lake Michigan Company, with which it was finally amalgamated.
- Detroit & Lansing Railroad Company, incorporated on October 3, 1864, from Lansing to Battle Creek, Mich.
- Peninsular Railroad Extension Company, incorporated on January 3, 1868, from Battle Creek to the Indiana State line. On February 17, 1868, this company was consolidated with the former, under the name of the Peninsular Railway.
- Peninsular Railroad Company of Indiana, incorporated on October 14, 1859, chartered to construct a railway through Indiana Consolidated with the two companies last named, and the Peninsular Railroad Company of Illinois, in May, 1870. The line from Lansing to South Bend was completed and opened for traffic in 1872. The line from Port Huron & Lake Michigan and the Peninsular Railway Companies, the section from South Bend to Valparaiso was opened in October, 1873.
- Chicago & Northwestern Railway (of Michigan), incorporated in July, 1874, to construct the "missing link" between Austin and Flint, was completed and opened by January 1, 1877.
- Chicago & State Line Extension Railway Company, incorporated in August, 1873, to purchase the Chicago & Northwestern Railway, which had been sold under decree of foreclosure on April 22, 1873. Authority was thus obtained to construct a continuous line of road from Chicago to the Indiana State line.
- Chicago & State Line Extension Railway Company, incorporated in April, 1859, from the Indiana State line to Valparaiso.
- Northwestern Grand Trunk Railway (of Michigan), incorporated in August 23, 1874, to acquire, by transfer from the Master in Chancery, under a decree of foreclosure, the railway property between Port Huron and Flint.
- Michigan Railway Company, incorporated on January 6, 1880.
to acquire from purchasers under a previous foreclosure sale the rail lines between Lansing and Milton, the Indiana Railway, incorporated on January 6, 1850, to acquire, in the same manner, the line from Milton to Valparaiso.

Northwestern Grand Trunk Railway (in Illinois and Indiana), incorporated on September 3, 1879. Formed by the consolidation of the Chicago & State Line Railway and Chicago & State Line Extension Railway companies, with power to complete their road from Chicago to Valparaiso, which section was opened for traffic on February 8, 1880.

On April 7, 1886, was consummated the consolidation of the various companies above enumerated, under the name of the Chicago & Grand Trunk Railway Company.

The length of the line—exclusive of two short branches aggregating 8.76 miles—is 330.5 miles. Its capital stock is $6,600,000; its funded debt, at the close of the year 1884, was $12,000,000; its floating indebtedness at the same time was $696,221.60; the total liabilities aggregating $12,896,221.60.

The following table shows the financial results of the operation of the road during the first five years of its existence:

George Bell Reeve, traffic manager of the Chicago & Grand Trunk and the Detroit, Grand Haven & Milwaukee railways, was born in County Surrey, England, on October 23, 1810. He passed the greater portion of his boyhood in his native land. When he was twenty years old he entered the railway service, taking a position as freight clerk, on May 1, 1836, with the Grand Trunk Railway. In 1862, having previously studied the science of telegraphy during his leisure hours, he took a position as operator at the town of Belleville, for the Grand Trunk. From 1863 to 1864, he was train dispatcher at Belleville, and the two following years he passed as relieving agent on that line. Mr. Reeve has always been connected with the Grand Trunk roads, and, from the date of his first employment, has steadily gone upward till he has attained one of the most responsible and exacting posts in railway service. In 1866, he was appointed station agent at Belleville, and resided there for seven years. In 1873, he was appointed assistant general agent, with headquarters at Montreal. He thus served the company until 1881, when he was made traffic manager of the Chicago & Grand Trunk, and holds that position at the present time. In 1884, he was also intrusted with the duties of traffic manager of the Detroit, Grand Haven & Milwaukee, a separate corporation from the Grand Trunk, but controlled by the latter organization. In all lines of business there are none which require men of such exceptional ability as does the railroad service. It is only by a lifetime of effort that such men as Mr. Reeve acquire the knowledge necessary to satisfactorily handle the immense business which comes to our leading railroad corporations. Mr. Reeve has worked his way by unceasing toil, uns winger purpose, and unflinching determination, road was operated at loss until 1882. Since that time, however, it has proved profitable. During the same year, the directory made a contract for the construction of a branch road of about seven miles, from Danville to the coal fields of Grape Creek, in Vermillion County. A contract was also made with the Chicago & Western Indiana to build from South Englewood, on their line, to South Chicago, and to grant the right of use of the line.

Owing to the delay occasioned by the litigation between the Lake Shore and the Chicago & Western Indiana companies, over the question of crossing the tracks of the former at Sixteenth Street, the company was for several months prevented from using the tracks for their passenger trains only to a depot at Archer Avenue, while the freight entered the city over the Pittsburg, Cincinnati & St. Louis Railway. The right to reach the new passenger and freight depot, near the corner of State and Polk streets, was obtained about December 1, 1880, but the severity of the winter prevented a complete transfer of business until late in the spring.

The mileage of the road was somewhat increased, in 1882, by the extension of the Grape Creek line, to a junction with the Danville, Olney & Ohio River road, and the building of a thirteen-mile branch line, known as the Stawm & Indiana State Line road.

In 1885, the five lessees of the Chicago & Western Indiana Railroad—namely, The Chicago & Eastern Illinois, Wabash, Grand Trunk, Louisville, New Albany & Chicago, and Chicago & Atlantic companies—came by an agreement, owners of equal shares in the property, including the Belt Railroad system around Chicago and the Indiana elevator. The design of the erection of a new and commodious passenger depot was at once conceived, and steps were soon taken to carry the plan into execution.

On July 19, 1885, a new steel bridge over the Ohio.
River, at Henderson, was opened for traffic, thus giving to the Chicago & Eastern Illinois, through its connection with the Louisville & Nashville Railroad, an unbroken line to the South.

The following table shows financial results of the operation of the road from its reorganization until June 30, 1885:

*For ten months only.  For full line only.

**William Armstrong**, general solicitor of the Chicago & Eastern Illinois Railroad, is a native of Indiana, having been born on a farm near Vincennes, on January 17, 1849. His father was **John F. Armstrong.** During his boyhood, William worked on the farm in summer and in winter attended the country school, till the age of twelve years. He then entered the Indiana State University at Bloomington, where he remained for four years. He had determined on entering the profession of law, and while in college prepared himself for the work. He took a thorough classical course of study, and, when he graduated, in 1872, he received the degrees of Bachelor of Arts and Law. Upon the completion of his collegiate training he entered the office of General Shackleford, at Evansville, Ind., and, under his direction, took a course of law preparing for the following two years. During these years he was obliged to support himself on the munificent salary of $3 a week as a lawyer's clerk. He slept on a cot in the office, and devoted himself night and day to perfecting his studies, and though these years of preparation were hard to endure, the young man showed his willingness to submit to them until he could establish himself in business, confident that then the results would be satisfactory. Upon leaving General Shackleford's office, in 1874, he went to Washington, Ind., and began practicing law. He continued there with moderate success until January 1, 1881. He then made up his mind to come to Chicago and launch out into a larger field, notwithstanding the advice of friends to remain where he was. They were afraid the young lawyer would be unsuccessful in the metropolis, but he had the courage and determination to run the same risk that many others had, and he opened an office under the above-mentioned date. Within a few months he was doing a very fine practice, and when, in October of the same year, he was tendered the general solicitorship of the Chicago & Eastern Illinois Railroad, he accepted, and began to see the dawn of his ambition. Since that time Mr. Armstrong's practice has wonderfully increased, till now he requires the aid of several assistants in his large correspondence to which class of business he devotes his entire time. Personally, Mr. Armstrong is one of the most genial and courteous of gentlemen, a hard worker, a thorough scholar and learned in his profession. While these attorneys of the town where he began his studies are making a living out of fees before a justice's court, the young law student is now handling litigation involving hundreds of thousands, which net him an income annually far in excess of his early anticipations. Mr. Armstrong has been very successful, but his is that success that comes from hard, unyielding, conscientious devotion to his duty. He was married in Rockport, Ind., on January 30, 1876, to Miss Alice Kercheval; they have two daughters,—Iavenia and Eugenia. Mr. Armstrong has not been identified with politics since his residence in Indiana, but has served four years on the Republican State Central Committee of Indiana.

**LOUISVILLE, NEW ALBANY & CHICAGO.**

The New Albany & Salem Railroad Company was organized on July 8, 1847, under a law of the State of Indiana authorizing private companies to complete any of the unfinished works of the State. On February 11, 1848, the State, by enactment, relinquished its rights to improvements already made, and authorized the company to extend the road. The road was completed from New Albany to Michigan City (288.26 miles), and opened for business on July 4, 1852; on October 4, 1859, the name of the company was changed to the Louisville, New Albany & Chicago Railroad Company. On December 27, 1872, its property was sold under a foreclosure of mortgage. The bondholders became the purchasers and a new company was organized, under the present name, with a capital stock of $3,000,000. A consolidation with the Chicago & Indianapolis Air Line Railway Company was effected on May 5, 1881, but the new corporation retained the name of the Louisville, New Albany & Chicago Railroad Company. The route from New Albany to Michigan City, and the Chicago & Indianapolis Division runs from a point four miles west of Indianapolis to Hammond, Ind., where a junction is formed with the Chicago & Atlantic road, a distance of 158 miles. The total length of the road is 446 miles.

In reaching this city, the company use one and one-half miles of the Chicago & Atlantic road and ninety and one-half miles of the Western Indiana road, for both of which it pays annual rentals.

The following statement shows the financial condition of the company at the close of 1884:

<table>
<thead>
<tr>
<th>Capital stock</th>
<th>$5,000,000.00</th>
</tr>
</thead>
<tbody>
<tr>
<td>Funded debt</td>
<td>6,300,000.00</td>
</tr>
<tr>
<td>Floating debt</td>
<td>500,815.50</td>
</tr>
</tbody>
</table>

Total indebtedness $8,100,815.50

A statement of the company's assets and liabilities at the same time shows an excess of the former of $1,421,977.

The net income from traffic for 1884 was $263,455.32; the amount paid for interest and rentals was $481,514.76; leaving, as the result of the year's business, a loss of $218,156.44, as against a profit for the year 1883 of $232,618.41.

**John B. Carson** is president of the Chicago & Western Indiana Railroad and the Belt Line Railway of Chicago, and vice-president and general manager of the Louisville, New Albany & Chicago Railroad. He is the son of one of those men who have gradually grown into prominence in the business world, and whose uprightness as a citizen and official have merits the esteem and respect of his friends and the public. Mr. Carson is endowed, by both birth and training, with a character that has secured him well as a basis for success in life. He was born in Lycoming County, Penn., on October 23, 1853. He was the eldest son, and enjoyed the advantages of the schools of his part of the state. He entered his studies in the Christian Academy, preparatory to entering Lafayette College. Owing to financial reverses in his family he was obliged to forego the completion of his studies, and commenced life for himself with a view to the support of his mother and younger brothers. How well he succeeded, the following years of his life give ample testimony. At the age of eighteen he entered the railroad service as rodman in an engineering party, in which department he continued for two years, or until 1874, when he went into the freight office of the Michigan Southern Railroad and took a position as clerk, where he remained until 1877. Then commenced his rapid advancement in life. He was appointed western agent for the New York Central Railroad, with headquarters at Toledo, O., in which service he remained until 1886. Then he was made general freight agent of the Toledo, Wabash & Western Railroad, now better known as the Wabash, St. Louis & Pacific Railway. His headquarters were also in Toledo, and he remained there until 1873. By this time, Mr. Carson's reputation as a successful railroad official had become fully recognized; and at the earnest solicitation of the late James H. Gifford, president of the New York Central Railroad, with whom he had been intimate from boyhood, he returned to the service of that road, taking the management of the "Blue Line," with headquarters in the city of Rochester. He remained with them until 1889, when he was elected to the management of the Hannibal & St. Joseph Railroad. During his connection with that corporation he administered the affairs of the road with the most gratifying success. Taking over the management when it was at a very low ebb, he commenced a general reconstruction and brought it to a sound basis, and left it a diverging paying property and with a prominent position among the first-class railroads of the country. After the line was purchased
by the Chicago, Burlington & Quincy Railroad and consolidated with that system, Mr. Carson was elected vice-president, and held that office until July, 1884. He was then elected to the vice-presidency and made general manager of the Louisville, New Albany & Chicago Railroad, and was also elected president of the Chicago, Burlington & Quincy Railroad and the Belt Line Railway of Chicago, taking up his residence in this city. John B. Carson ranks among the most successful and prominent railroad managers of the country. He has been connected with the Western & Atlantic Railroad, and the various improvements which have contributed so largely, in the past, to the material advancement of the state, have been the subjects of his attention and thought. In all his enterprises, Mr. Carson has been prominent, and he has everywhere shown himself to be a man of practical sagacity and foresight. His interest in the development of the country has always been keen, and his influence has been felt in many of its important transactions.

William R. Woodard, general superintendent of the Louisville, New Albany & Chicago Railroad, is the son of Isaac N. and Martha Woodard, and was born in a farm in Shelby County, Ohio, on August 15, 1814. The family removed to Sandusky, Ohio, when he was a young lad and there he was brought up and educated at the public schools. In 1834, he worked as messenger in the telegraph office at Sandusky, Ohio, where he learned telegraphy. He was afterward sent to Cleveland and Toledo as operator and bill-clerk, in which cities he remained but a short time. He then opened the first telegraph office in Oberlin, Ohio, on the line of road now known as the Lake Erie & Michigan Railway, and then went to Elyria and other points for the Western Union Telegraph Company for a short time. He afterward was located at Cincinnati in the employ of the same company as operator, and in 1860 was connected with the Ohio & Mississippi Railway. For two years he acted in different capacities until he was made general superintendent; he thus had charge of the entire transportation business of the line before he was eighteen years old. There is no other instance of record where such a responsible position was attained by so young a man. Mr. Woodard from the time of his entry into the railway service was eager, ambitious and energetic, and endowed with a robust constitution and unflagging energy. The great responsibility was soon fully appreciated by the company, and he was placed in the position of general superintendent of the Ohio & Mississippi Railway. He was with him until about 1876, when he was made general superintendent and superintendent of construction of the Missouri, Kansas & Texas Railroad. This road had only fifty-nine miles of track laid at that time, and Mr. Woodard's services were desired to complete the construction of the line. He constructed six hundred and twenty-two miles of road-bed, laid the track, and saw it completed, equipped and operated by himself for a year before he left the company. Upon his withdrawal from the Missouri, Kansas & Texas Railroad, he retired to quiet railroading. He organized the Texas and Atlantic Refrigerator Company, at San Antonio, and they built refrigerator cars, ice-houses, dry-houses, etc., at a cost of $25,000. Mr. Woodard passed much of his time on the Painscastle, a steamboat, after he had been in this business ten months, upon returning to his hotel in Austin from a long cattle-buying expedition, he found a telegraph offering him the position of general superintendent of the Ohio & Mississippi line. He accepted the offer, and after a brief time, was made superintendent of the road, and continued to reside at Kansas City, Mo. He continued in this office for nearly ten years, until, upon his appointment as general manager of the Texas & St. Louis Railway made. This road had considerable difficulty in remaining itself, and, after a few years, Mr. Woodard was appointed receiver. He remained as such until May 1, 1885, when he was tendered his present office by his former associate, John B. Carson, and came to Chicago to accept the office of general superintendent of the Louisville, New Albany & Chicago Railroad. As a telegrapher, Mr. Woodard was one of the very best in the country, and stood high in the estimation of the late General Anson Stager, then with the St. Louis & Union Company. He has achieved considerable distinction as a train dispatcher, being one of the fathers of the system. As a railroad man, Mr. Woodard is thoroughly practical, having a perfect knowledge of every detail connected with the business. He has handled the shovel on a road-bed, laid rails, driven an engine, run a train, performed clerical work in freight, passenger and auditor's departments, built bridges, buildings and railroad, operated the latter and held the receivership of a company, and there is nothing in railroad work with which he is not thoroughly familiar. Mr. Woodard was married on June 20, 1863, at Seymour, Ind., to Miss Ella C., daughter of Rev. Mr. Booth. They are the parents of two sons and a daughter. The eldest son is named in honor of Thomas McKissick, who was general superintendent of the Missouri Pacific Railroad when Mr. Woodard was connected with that road; and the second son bears the name of William Conlonge, general superintendent of the Ohio & Mississippi line. The little daughter, Mr. and Mrs. Woodard is named Mary Adelaide Patti, the latter in honor of the noted diva. Mr. Woodard is a 32d Mason and a member of Tusca Commandery, K.T., of Quincy, Ill.

CHICAGO & ATLANTIC RAILWAY.

The original name of this company was the Chicago, Continental & Baltimore Rail Road Company, organized under the general railroad law of Indiana on November 8, 1871. On November 28, 1871, had been organized, under the general law of Ohio, the Baltimore, Pittsburgh & Continental Railroad Company. On February 13, 1873, the name of the former was changed to the Chicago & Atlantic Railroad Company, and on August 6, 1873, the two companies were consolidated under that name.

On November 1, 1880, the company leased from the Chicago & Western Indiana road the use of their track from Chicago to Hammond, Ind. (or State line), a distance of 18.2 miles. The road from Marion, Ohio, to Hammond, Ind. (249 miles), was turned over to the consolidated company by the contractors on February 5, 1883. On April 12, 1883, the first train run between Marion, Ohio, and Huntington, Ind., and from Huntington to Marion, Ohio, was run. The through traffic was undertaken on June 17 of the same year. At the close of 1884, the entire length of the main line and branches owned by the company was 249.1 miles, these figures being exclusive of the 18.2 miles, between this city and the Indiana State line, leased from the Western Indiana.

The company's total liabilities at the same time were

| Capital stock | $10,000,000.00 |
| Bonded debt | 6,000,000.00 |
| Floating debt | 2,350,095.15 |

Total | $18,538,095.15 |

The general balance sheet for the year showed a deficiency in assets of $749,176.22, and the financial operations of the year showed a loss of $593,734.94.

John H. Parsons, superintendent of the Chicago & Atlantic Railway, was born in New Filmore, N. Y., on May 20, 1840. He was reared in Wyoming County, N. Y., in the western part of that State, and obtained his education at the public schools. At the age of nineteen, he entered railway service, and has since been identified with that branch of business. He first held a position at Burr Oak, Mich., with the Lake Shore & Michigan Southern Railroad Company, in the telegraph office, and was afterward operator at Bronson, on the same line. After two years' service as station operator, he took the position of line inspector, and was afterward appointed general superintendent, at Adrian, Mich., in which he continued two years, and
was then made ticket agent and operator at Coldwater, Mich. He remained there for two years, and afterward was engaged at different points along the line. He subsequently went to Quincy, Mich., as freight agent and operator, and held that position for three years. In 1870, he was freight agent of the company at South Bend, Ind., and the following year was road master of the LaPorte Division. In 1872, he was made a division superintendent and had charge of the Lansing Division, and there had his headquarters. The following year he was promoted to the office of superintendent of the Western Division, his office being located in Chicago. He filled that position for ten years, and, on June 10, 1883, was tendered the promotion to superintendent of the Western Division of the Chicago & Atlantic Railway, and holds that office on thereseverse. Mr. Parsons is a vigorous and active worker, and diligently conserves the interests of the Chicago & Atlantic Railway. He was married, in Chicago, in 1852, to Kinnie M. Andrews. Many years ago Mr. Parsons became connected with the Masonic order, and is at present a member of South Bend (Ind.) Commandery, No. 13, K.T.

CHICAGO & WESTERN INDIANA RAILROAD.

This company was organized on June 6, 1879. The articles of incorporation declared the object of the corporation to be the construction of a road from the Indiana line indicated by the point to and into the City of Chicago, at Van Buren Street. The entire distance from the Indiana line to its present terminus, at Polk Street, in this city, is twenty-eight miles. The line was opened for operation to Twelfth Street, Chicago, in December, 1886, but its extension to Polk Street was not completed until June, 1883.

On April 20, 1882, the South Chicago & Western Indiana Railroad Company was organized. The proposed line of road to be constructed by this company extended from a point on the line of the Chicago & Western Indiana road,—near the intersection of the South Chicago Branch of the Chicago, Rock Island & Pacific line,—to a point on the north bank of the Calumet River.

On April 22, 1881, was organized the Chicago & Western Indiana Railroad Company. The announced object of the incorporators was to construct a line of railroad between the towns of Hyde Park and Lake View. It was built for the purpose of making a connecting line between the several railroads in Cook County, with a view to the transaction of a general transfer business.

On January 26, 1882, the three companies above named were consolidated under the name of the Chicago & Western Indiana Railroad Company.

On May 1, 1883, the consolidated company leased to the Belt Railway Company of Chicago all that portion of its line of road known as the Belt Railway system, at an annual rental of $100,000.

The original Chicago & Western Indiana road is operated under the following plan: The company furnishes terminal facilities to the Chicago & Eastern Illinois, the Chicago & Grand Trunk, the Wabash, St. Louis & Pacific, the Louisville, New Albany & Chicago and the Chicago & Atlantic companies, for which the latter pay their respective shares of the operating expenses and repairs (ascertained by the wheelage of each over the company's tracks), and, in addition, a monthly rental for the use of the yards, freight buildings and track service.

The Belt Railway.—The Belt Railway Company of Chicago was organized on November 22, 1882. The object of the corporation was declared to be "to construct, complete and operate a line of railroad which was described as follows: "Beginning at a point on Lake Michigan, near Belmont Avenue, in Lake View Town, thence westwardly about six miles, to a junction with the Chicago, Milwaukee & St. Paul, in the Town of Jefferson; thence southwardly about thirteen miles to near the centre of Section 27, Township 38, Range 15; thence due easterly about four and one-half miles to Island Boulevard; thence easterly about one mile, thence southwardly about five miles to a junction with the main line of the Chicago & Western Indiana Railroad, together with a branch to the lake at Eighty-Seventh Street, and also such branches and turnouts as may be necessary to reach warehouses, lumber or stock yards, and docks in the vicinity of said line of road, all of which is in Cook County; It being the intention that this shall be a connecting line between the several lines of railroads in Cook County, in order to transact a general transfer business."

A lease was executed between the company and the Chicago & Western Indiana Railroad Company, whereby the latter turned over to the former all the above mentioned line of road at an annual rental of $100,000, and the Belt Railway Company of Chicago commenced to operate the road on May 1, 1883.

JOSEPH N. RANNEY, general agent of the Chicago & Western Indiana Railroad, and the Belt Line Railway of Chicago, was born at Columbus, O., on December 4, 1845. He was brought up in his native city and received his education at the high school there. When the War commenced, he was only sixteen years of age. Notwithstanding his extreme youth, he was permitted to join Co. "I" of Ohio Volunteers, and served throughout the War. In 1865, Mr. Ranney came to Chicago and took the position of foreman of the freight houses and yards of the Chicago, St. Louis & Pittsburgh Railroad, at that time better known as the Pan Handle Line. He remained with that company until after the fire of 1871, and then became local agent of the Chicago, Danville & Vincennes.
Railroad, which office he held until 1878. In 1880, he took a position with the Chicago & Eastern Illinois Railroad, remaining with them until he was called to his present position, on September 1, 1889. Mr. Ramsey's duties with the Chicago & Western Indiana Railroad and the Belt Line Railway of Chicago are such as require the services of a person familiar with every detail of railroad management, and his experience with leading western roads in the past has served to make him perfectly competent for the responsible position he now occupies. He was married, in 1878, to Miss Marlowe, of Chicago. They have three daughters,—Katharine, Agnes and Frances.

PULLMAN'S PALACE CAR COMPANY.

The palace, drawing-room, sleeping and hotel cars are so intimately associated in the mind of the traveling public with the name of Pullman, that George M. Pullman has been very generally credited with having originated the sleeping-car. This is not true. Sleeping-cars first came into use on railroads in 1857, and very crude, uncomfortable arrangements they were. Their average cost, each car, was $4,000. Imperfect as they were, they were no sooner introduced than the travelling public set upon them the seal of popular approval in the form of a remunerative patronage. Mr. Pullman was quick to see the possibilities of the situation, and two years later he was busily engaged in manufacturing better cars—palaces on wheels, with elevated tops, thoroughly ventilated and elaborately upholstered, the average cost being $18,000. The project was received by railroad magnates with smiles of incredulity if not of derision. "He laughs best who laughs last," however, and Mr. Pullman has lived to verify, in his own experience, the truth of the old French adage. John W. Brooks, of Boston, then president of the Michigan Central Railroad, was one of the first to appreciate the prospective value of the Pullman cars. In compliance with a request from Mr. Brooks, Mr. Pullman visited Boston, and very shortly thereafter a number of Pullman cars were running on the Michigan Central road, under a ten years' contract.

The entering wedge was thus driven. The next problem was the manufacture. The inventor and patentee here found difficulties piled mountain high. The ideas of Mr. Pullman were as pronounced as were those of the car manufacturers, and an utter lack of harmony was the result. Mr. Pullman soon abandoned all hope of securing any satisfactory arrangement with then existing factories, and established a shop of his own. His difficulties may be imagined, when it is said that the situation comprised comparative poverty on the one hand, and on the other an incredible public. To insure success under such circumstances, more than an ordinary measure of faith and perseverance was necessary. In due time, however, success came. The first shops were opened in Detroit, and before the expiration of 1881, the annual output was one hundred and fourteen cars, or more than two completed each week. Despite the increased capacity of these works, the demand exceeded it. A still further enlargement of the shops was made and other works located, until, in January, 1883, the Pullman Palace Car Company (which had been organized in 1882), employed a total force of over seven thousand men, operated over one thousand sleeping, parlor and hotel cars, and had building and repairing shops at Pullman, Ill.; Philadelphia, Penn.; Elmira, N. Y.; Detroit, Mich.; St. Louis, Mo.; Derby, England; and in Italy.

In a general way, the contracts under which railway companies use the Pullman cars aim to make the former part owners, to the extent of three-fourths, the Palace Car Company desiring to retain only a small interest, seeking profits mainly from manufacture. Where companies do not care to purchase, the Pullman cars are run independently—the railways pulling the cars for the sake of the convenience afforded passengers,
and the Pullman Company running the cars for the privilege of incidental profits, the repairs of the car below the body being made at the expense of the railways.

The Detroit shops were selected for exclusive work on palace cars, while at the Pullman shops were manufactured passenger, baggage and express cars (the capacity of the Pullman shops being twenty-five cars a day), as well as complete equipments for passenger railways. Thus, as may be readily conceived, the combined business of the Pullman Palace Car Company aggregates many millions of dollars a year, and employment is given to thousands of skilled mechanics and ordinary laborers.

As the business of the company increased in magnitude, the advantage of centralizing manufacturing facilities became apparent. Coupled with this was the well formulated (though as yet unannounced) plan of Mr. Pullman to found a manufacturing community which should be without parallel in point of morals; from which should be excluded the refractory and contaminating elements found in other communities, and which should contain only temperate and industrious workmen; which should assist to elevate the character and condition of all classes, and give to them and their families those advantages and facilities for mental and moral education which their wages alone would not secure for them in the outside world. To say, however, that the project had its origin solely in sentimental considerations for the working classes would be untrue. It was Mr. Pullman's idea to demonstrate that such advantages and surroundings make better workmen by removing from them the feeling of discontent and desire for change which so generally characterizes the American workman, thus protecting the employer from the loss of time and money consequent upon intemperance, labor-strikes and dissatisfaction, which generally result from poverty and uncongenial home surroundings.

Mr. Pullman has invested $5,000,000 in the town of Pullman. The original purchase of land embraced three thousand five hundred acres, of which five hundred were conveyed to the Pullman Palace Car Company (which, by the terms of its charter, was not permitted to acquire or hold more land than sufficient for its actual manufacturing needs), and the remaining three thousand acres to the Pullman Land Association. In this way, control was maintained over the site for a large city; objectionable characters and business were excluded; and a city was built of uniform beauty. The average monthly rental of rooms, inclusive of all the houses in Pullman, is $3.50. This includes the better class of houses, occupied by officials, merchants and professional and business men. The average monthly rental of rooms, including basements used as kitchens and dining-rooms in houses occupied wholly by operatives, is $2.50. The latter figures are about the same as those for neighboring towns, occupied by manufacturing operatives. It should be remembered, however, that the houses in Pullman are built of brick, on broad, paved, shaded streets, with a perfect system of sewerage and drainage, and supplied with the modern conveniences and comforts of gas, water, and complete sanitary arrangements. In addition to these advantages, there are excellent schools, good markets, an admirable fire department, churches suitable to almost every phase of religious belief, a theater perfect in its appointments, and a splendid library.

The total amount of money paid to employees at Pullman, during the fiscal year ending July 31, 1885, was $2,160,241.20. The average number of operatives, including women and children, with the average earnings per day, are shown in the following table:

During the fiscal year ending July 31, 1885, renewals of contracts were made with the New York, Lake Erie & Western Railway and leased lines, and with the Pennsylvania Railroad Company, including all lines owned and operated by it. These renewals, together with new contracts, entered into with several smaller lines of railroad, cover a mileage of 12,234 miles, making the total mileage of contracts then existing 71,439 miles.

George Francis Brown, general manager of Pullman's Palace Car Company, was born on October 1, 1843, in Chicago. He is the son of Simeon B. and Minerva (Townsend) Brown, and the place of his birth was opposite the old William B. Ogden homestead on the North Side. He was educated in the public and private schools of Bloomington, Ill., and the academy at Galesburg. His entry into active business life was at the outbreak of the War, when he became chief clerk to his father, who had been commissioned captain and assistant quartermaster of United States Volunteers. He remained in this position until the close of the War, at which time he was stationed at Nashville, Tenn. In July, 1867, he went to Clarksville, Tenn., as secretary and treasurer for the receiver of the Memphis, Clarksville & Louisville Railroad. Returning North in the fall of 1868, he entered the employment of the Illinois Central Railroad, and remained with that corporation for one year; first as agent in charge of war claims and later as contracting agent in the freight department. In the fall of 1869, he was elected secretary of the Bloomington Insurance Company, with headquarters at Bloomington, Ill., where he remained until the spring of 1871, when he came to Chicago and entered into mercantile business, which terminated in the configuration of October 9 of that year. In December, 1871, he entered the service of Pullman's Palace Car Company, in the general superintendent's office, and was promoted to be assistant to the general superintendent; in October, 1875, was made acting general superintendent; and in December, 1880, was appointed general superintendent; and on May 1, 1885, was promoted to the position of general manager. Mr. Brown was married on September 27, 1865, to Miss Catherine Wager, of Philadelphia, Penn., and they have two children,—Charles Edward and George Francis.

Robert Barry, superintendent of the Central Division of Pullman's Palace Car Company, was born in New York City on March 31, 1851, the son of James and Catherine (O'Neil) Barry.
He received his education at the common schools and the free academy of his birthplace, and remained at home until his departure for Chicago, in 1849. After residing in Chicago, in 1851, he entered the service of Pullman's Palace Car Company as clerk in the purchasing department, this being his first commercial experience as well as his entry into the railway business. In April, 1857, he became the agent of the Detroit office of the Pullman Palace Car Company, where he remained until 1874 when he was made cashier of the New York office of this company, and there remained until 1880. He then traveled for one year in the interests of the Pullman Company, and, in 1881, he designated Mr. Barry assistant superintendent, which position he retained until he was appointed to his present position, to date May 1, 1881.

Edward Adams Jewett, superintendent of the Chicago Division of Pullman's Palace Car Company, was born on July 18, 1835, at St. Johnsbury, Vt., his father, Ephraim Jewett, being a merchant at that place. In 1857, young Jewett graduated from Phillips Academy, Andover, Mass., and subsequently took a partial course at Harvard University. Ill health, however, obliged him, in 1859, to sever his connection with the University. He afterward entered the employ of a large wholesale boot and shoe house in Boston, remaining with that establishment until 1861. During that year he was sent to Burlington, Vt., to settle up the affairs of a boot and shoe store which was owing his house a large amount. He left his business but purchased the Callowhill law himself, and conducted the enterprise for four years. Mr. Jewett was afterward engaged for a time on the construction of a railroad between New York and Albany, and, in 1861, he subsequently became a portion of the Central Vermont Railroad.

From 1866 to 1870, he was in the Government service as deputy collector of Internal Revenue, at Burlington. For the succeeding three years, he was in the book and stationery business in Burlington, Vt., and, in 1873, removed to Chicago and became connected with Pullman's Palace Car Company during the succeeding July. From that time until June 1, 1874, he held the position of assistant to the superintendent of the Chicago Division, and, upon the latter date he was appointed to his present position of honor and responsibility.

Mr. Jewett is a Mason of high standing, being a member of Washington Lodge. He is a member of the Chevalier Bayard Commandery, of Chicago, and Boston (Maine) Commandery. He has served as District Deputy Grand Master of the State of Vermont for one year; Grand High Priest of the Grand Chapter for two years; Grand Secretary of the Grand Commandery for one year. Mr. Jewett was married, in 1870, to Jennie M. Hubbell, a member of an old and respected Vermont family.

Alfred Ennis, general counsel of Pullman's Palace Car Company, was born on June 24, 1837, in Morgan county, Ind., the son of Mitchell and Nancy (Trent) Ennis, who were among the early settlers in Central Indiana. In 1855, he entered Franklin College, Indiana, but was a faithful and laborious student, and, by means obtained from teaching in the district schools and teaching in the gymnasium at his home, where, with his two brothers, he took charge of and cultivated the farm that season. He was appointed administrator of his father's estate. The duties thus imposed necessitated his reading the statutes of the State, which resulted in his forming a desire to study law. He read Blackstone's Commentaries during the summer of that year. When the principal part of the farm work was done for that season, he taught school, in his home district, from which he realized sufficient money to enable him to attend a law school, at Indianapolis, conducted by Honorables Jonathan W. Gordon, Napoleon H. Taylor and John Coburn. At the close of this school, he received the senior degree of the Northwestern Christian University, at Indianapolis, from which he graduated in the spring of 1860, and again returned home. He was soon employed to commence suits and conduct trials in his neighborhood. His first case was won, and he was heartily recommended as a precedent. A man named Hall, seeing a swarm of bees pass in the air, pursued them, making the necessary effort to stop them. As a result of this, the bees settled on a small dwelling on the land of a man named Hess. Hess returned home for a hive, while gone, Hess, who lived near by, discovered the bees thus settled, felled the tree, hived the bees, and carried them away. Hall claimed the bees, and took the law into his own hands. Ennis for counsel, who advised the commencement of an action of replevin. The action was commenced. On the day of the trial, Mr. Ennis, armed with such authorities as he could obtain, appeared for Hall. He fully recognized the fact that this was the then most important event of his life. He took the position that bees, although fere nature and not the subject of absolute property, rightful to one and not the subject of qualified property and ownership; that the pursuing and settling of the bees by Hall was such a subduing and reclaiming of the same as to give him a qualified property and ownership in them. Mr. Ennis's reasoning was so clear and his decision so well considered in favor of Hall. The victory thus achieved was complete, and was soon followed by others. In the fall of 1860, Mr. Ennis opened a law office at Martinsville, Ind. He soon formed a law partnership with the Hon. John W. Coburn, a member of the Supreme Court of Indiana. On November 20, 1860, Mr. Ennis was married, at Manchester, Ind., to Miss Alma L. Bridge. From that time forward, he dedicated himself to his profession far beyond his most sanguine expectations.

In the summer of 1863, the law partnership existing between Mr. Buskirk and Mr. Ennis was dissolved by mutual consent, the warmest friendship and personal esteem ever afterward existing between them. At this time, Mr. Ennis took into partnership James V. Mitchell, a worthy and highly respected young lawyer of his county. This co-partnership continued until the beginning of 1864, Mr. Ennis then formed a law partnership with Cyrus P. McNutt, subsequently professor of law in the State University of Indiana. In 1866, Mr. Ennis joined the Christian Church, of which he since has lived a worthy member. In the spring of 1867, Mr. Ennis left the partnership in his business in the electoral canvass for the Ohio as a candidate for the legislature, stopping at Louisville, Mobile, New Orleans, Sabine Pass, Texas, and Jackson, Miss. In the fall of 1867, the law partnership existing between Mr. Ennis and Mr. McNutt was dissolved.

At this time, Mr. Ennis fitted and furnished his law offices in most excellent style, at the same time adding many new volumes to his then large law library. In the spring of 1869, Mr. Ennis visited London and London. He has since visited England on business, during which visit he had many opportunities of conferring with many kind letters of introduction and recommendation to many distinguished persons both in this country and in England, among which may be mentioned one from Hon. Thomas A. Hendricks, afterward Vice-President of the United States. Mr. Ennis visited Liverpool and Chester, and spent a month in London, where he attended sessions of the various courts and saw the practical administration of justice under the old common law and equity forms of procedure. Mr. Ennis resided in Paris where he attended sessions of the various courts. He also visited Scotland and Ireland, sailing for home from Queenstown.

In the fall of 1869, he purchased in Frankfort, Ky., the region of Nicholas County, Ind., and removed there. He has since estranged many acres of land in this county, and is now engaged in cultivating the same, with great success. He is a man of sound judgment, and a gentleman of character and education. In 1870, Mr. Ennis visited Kansas, stopping at Topeka. While there, he determined to remove to that State, and, on June 9, 1871, with his family, left Martinsville, Ind., to take up his residence in Topeka. Before his departure, he was appointed by his brother, the Honorable H. H. Ennis, as a token of their respect and esteem, presented him with a series of highly commendatory pamphlets and resolutions, which had been presented the Bar by his constituents. Mr. Ennis is in his present position of honor and responsibility, which was without his knowledge. Mr. Ennis soon opened a law office in Topeka. His success was complete. He had a very extensive acquaintance, consequently his clients were not confined to this company. He has extended to Topeka, for many years, a business second to that of no other lawyer in the West, and he stood at the head of his profession. In the summer of 1882, Mr. Ennis accompanied by his family, took up his residence in Boston, where he remained for something over one year, attending to his business interests, which had necessitated his removal there. In the summer of 1884, Mr. Ennis located in Chicago, where he took charge of the legal department of Pullman's Palace Car Company. As a thorough, energetic, hard-working lawyer, business man and diplomat, he has but few equals. He is thorough in his work, has confidence in his own judgment, and is self-reliant. He has great power of light, and style, and is a convincing advocate in the law courts.

He possesses a kind, generous, liberal disposition, but has great firmness. His labors have been blessed. He is the possessor of a comfortable competency of his own making. In politics, Mr. Ennis is a Democrat, and, had its desired effect. A man of invariable political opinions, he does not allow himself to devote time to politics. He is a Royal Arch Mason and a Knight Templar; has also received the degrees of the Ancient and Accepted Scottish Rite. Mr. Ennis has four children,—Jillie Alice, Walter Balbridge, Lula May and Alma Viola.
May, 1873, he acted as assistant superintendent, and from May, 1873, until May, 1885, he held the position of division superintendent, during the entire period his headquarters were in St. Louis. When he received his last promotion he was transferred to Chicago.

Mr. Wickes is a native of England, having been born in Lancashire, England, August 29, 1846, the son of Charles W. and Sarah (Wright) Wickes. He came to this country in 1866, and, after spending a short time with a brother in Canada, was called to St. Louis to enter the employ of Pullman’s Palace Car Company.

WILLIAM RUSSELL, chief bookkeeper of Pullman’s Palace Car Company, and the son of Charles Russell, of Farnham, County of Surrey, in England, was born at Battersea, in that county, on November 6, 1838. He received his education at private schools and at Chelsea Grammar School, and from that date, until 1868, was engaged in the parliamentary printing business in Westminster. In the latter year he became a partner in a floor-cloth manufacturing concern in London, where he continued until the close of 1870, when he came to this country. Arriving in New York he at once proceeded to Chicago, and took a position with Pullman’s Palace Car Company, in which service he has since continued. His first work was as assistant in the office of his brother, Charles H. Russell, who was at that time the auditor of the company. Later he became chief accountant, and, since then, chief bookkeeper, which latter post he still occupies.

Mr. Russell was married to Miss Clarissa H. Berrill, of the parish church of St. Mary Lambeth, in England, on July 11, 1861, to Miss Amelie Maria Gibb, daughter of Richard Holt Gibb, of London. The children living are a son and one daughter. The first two winters in London, the others in Chicago. Their names are Sidney George, Reginald Charles, Stanley Edgar, Richard Clarence, Harry Albert, and Emily May. Mr. Russell has for years taken an active part in the business of the Protestant Episcopal Church, both as a vestryman of Grace Church Parish, Hinsdale, and at one time was organist of the church.

WILLIAM A. ANGELL, purchasing agent of Pullman’s Palace Car Company, is one of the oldest of the officials of that company, and one who, since his long residence in this city, has made an enviable record for probity, industry and perseverance.

In connection with the palace-car portion of the railroad system of this city, a sketch of Zenas Cobb is given. From that biographer we can best gather the claims that gentleman makes to the invention of a sleeping-car:

Zenas Cobb, inventor of the sleeping-car and an early citizen and business man of Chicago, came here in 1845. He comes of a stock where industry and intelligence have been leading characteristics. His father, Zenas, and mother, Eleanor, were old residents of New York State, the former being quite celebrated as an inventor in his time. To him is credited the first church clock and the steam audiphone and he also invented the first machine for making wooden screws. He was foreman in the founding of Dr. Cornelius Van Ness, the first president at Schenectady, and up to the time of leaving business was famous as a progressive man in ironmongery. The son received his education in his native place and in London, where he was born September 19, 1817, and at the age of seventeen entered a typographical and learned the rudiments of that trade. In 1836, he joined the firm of Elijah Cobb, in the boating business, and they ran two or three boats from Hammondspoint, on Crooked Lake, to New York. He abandoned this service about four years later and came West, settling at Cleveland and assuming charge of the business of his brother, Asa R. Cobb, then largely engaged in marine business. He remained with him for five years and then came to Chicago.

Mr. Cobb’s first venture was in the lumber line, and his yard was an old landmark near the junction of the two branches of the river at Fulton Street. He associated two partners with him in the business, but was unfortunate in his dealings with them, and for nearly twelve years was involved in litigation over their connection of business. In 1857, Mr. Cobb went into the real-estate business, and continued in that line until ten years after the panic, during that period devoting his time to invention, and meanwhile handling many pieces of property that had a historical bearing in the development of the city. In November, 1864, Mr. Cobb invented the sleeping-car berth, being five or six years in advance of inventors in this line, who came later into the field. He did not fully comprehend the value of the invention at that time, for, like all inventions it evoked some prejudice. George M. Farnham made Mr. Cobb an offer of $4,000 for his device, which the latter accepted. Although Mr. Cobb claims to be the original inventor of the system of sleeping-car berths and the practical application of the device and its utilization by improvements which have constantly arisen from the same, it is due to Mr. Pullman, says Mr. Cobb, as is the credit of their present utility and the necessity which they have become to the traveling public, that the Pullman system of sleeping cars has developed, culture and utility. The original combination of forming a bed from a seat and back was implied in the letters-patent, but the practical application of the invention was brought to perfection by the Pullman company.

Mr. Cobb was attracted to the Pennsylvania oil regions by the excitement of the hour, his genius finding new fields for the exercise of its inventive powers. He was allowed to purchase a section of land and there invented a new system for the continuous distillation of oil through one cylinder. Mr. Cobb’s invention triplicated the quantity of oil in treatment and simplified the chemical process of distillation, one end and draw the residuum from the other. The result was a production of better oil and an advanced run of sixty to four hundred barrels a day; and had the apparatus been of the size now used, an army of one thousand barrels a day could have been produced.

Mr. Cobb, engrossed with business, neglected to patent this valuable invention, and others, perceiving its utility, modified it and benefited by the principal results of his genius. In 1869, Mr. Cobb returned to Chicago and engaged in the manufacture of car-seat springs at No. 202 West Adams Street, supplying the entire Pullman service in this line. In 1875, he removed to the corner of Dearborn and Kinzie streets, where he remained until early in 1885, when he abandoned that business and engaged in fruit-growing at Los Angeles, Cal., his health demanding a change of climate. His inventions, embracing a theatre-seat, patent plow and other important improvements, have had a worldwide application, but he has made a specialty of none of these, his executive force seeming to lie in rapid construction, prompt operation, and as ready an organization of a single line as one of systems. Mr. Cobb has two sons, named Samuel B. and Henry B., both of whom were formerly associated with him in the car-seat spring industry, and who are now engaged in this city. At an advanced age, Mr. Cobb was thus occupied, although he had anticipated the close of the clock, he has conveyed the complete enjoyment of the ripened years of a life well-spent. His mission has been busy and successful, and from his advent into Chicago until the present time, his career has been one of honorable business enterprise, of strict personal integrity, and practical usefulness to the community of which he is a valued and esteemed member.

Commissioners.—As an important addendum to the railroad history, is presented a sketch of one of the commissioners whose labors in behalf of the corporations have made them important factors of railroad interests:

LODIONDURANT RICHARDSON, commissioner of the Chicago and Ohio River Pool, was born in Swanzey, N. H., on April 21, 1827. He attended the schools of his native town, and after finishing his studies, he entered into railroad work on April 1, 1845. Mr. Richardson is among the longest-in-service men of the country, having been connected with railroads for the past forty years, and has drawn a salary from some corporation every thirty days, with the exception of a very short period. He first went to work on the railroad track of the Boston & Maine railroad as repairer, and afterward engaged with the New York & New Haven line in the construction department. He then took the position of general agent on that road. In 1866, he was sent to work on the Cheshire Railroad, remaining there only a short time, when he was appointed general agent at Boston for the Fitchburg, Nashua & Peterborough and Bennington & Rutland railroads. Mr. Richardson was their representative up to April 1, 1867, having served them for fourteen years. In 1867, he decided to come West, and having been offered the position of traveling agent for the Chicago, Milwaukee & St. Paul Railway, accepted, and located in Milwaukee.

He remained there but a short time, however, coming to Chicago on March 1, 1868, when he took the office of general agent for the Green Line. This place he held up to 1874, and was then made traffic manager of the Kankakee and Green River, general utility, November, 1883. Mr. Richardson’s abilities were so highly appreciated by the various lines which he now represents, that they elected him to the commissionership of the Chicago and Ohio River Pool, which comprises the following subsidiaries: Jeffersonville, Madison & Indianapolis Railroad, Indiana, Bloomington & Western Railroad, Lykensville, New Albany & Chicago Ry., Cincinnati, Indianapolis, St. Cloud & Chicago Ry., Cincinnati, Hamilton & Dayton R. R., Chicago & Eastern Illinois R. R., Chicago & Alton R. & R., and the Illinois Central R. R. During and prior to his term as general agent for the Kankakee and Green lines, Mr. Richardson was for eighteen years general agent of the famous Diamond Jo Line of Mississippi steamboat property, that has been married three times: first in October, 1847, at Keene, N. H., to Miss Martha Herrick, who died September 19, 1849. Mr. Richardson married a second time to Miss Sarah Keene, on September 5, 1851, at Worcester, Mass., who died December 14, 1853. On September 12, 1856, Mr. Richardson was married to Miss Charlotte Straton, at Swanzey, N. H.; they have one son
Railroad History.

233

Living. He has been a member of the Masonic fraternity since 1856, and is a Past Eminent Commander of Chicago Commandery, No. 19, K.T., and a member of the Order of the Consistory, S.R.N., 32d degree, in Chicago.

The Chicago Freight Bureau was organized at a meeting held on August 29, 1883, at which time a constitution and by-laws were adopted and the following officers and executive committee were elected:

A. C. Bartlett, president; Edson Keith, vice-president; Simon Reid, treasurer; and Frank M. Ellsworth, secretary. M. Selz, J. V. Farwell, Jr., J. J. Parkhurst, John Tyrrell, W. H. Kellogg, J. H. Broadhead, and W. H. Sardi, formed the executive committee.

The work of this association is defined by the constitution as follows:

"The object of the Bureau shall be to give the Railroad and Transportation Companies such information regarding the various lines of goods it represents as shall insure their proper classification; to secure freight rates to all shipping points that shall be just and fair; and to assist in adjusting claims for losses, damages or overcharges; and to render its services to members individually and collectively in all matters pertaining to the transportation of merchandise and the extension of the trade of Chicago."

It was originally intended to embrace a membership of about fifteen merchants and manufacturers, but at the first meeting over one hundred firms were represented, and a subsequent meeting, and the result of a short canvass, was to enroll a membership of about two hundred and fifty leading Chicago merchants and manufacturers. The company's executive commission, consisting of the president, Mr. C. M. Wicker, who represents the members and their various interests before the Railway and Transportation Lines, and from his intelligent action the members of the Association have derived great benefit.

The policy of the Bureau has always been to work with, and has never yet found it necessary to antagonize, the railways. Necessarily, the actions of the Bureau, to a great extent, remain unpublicized, and the members interested in the various changes being privately advised. The management believe, and have acted upon the principle, that the railways desire to be advised of the wants of their patrons, and the Association undertakes to lay before the roads the unanimous desires of the manufacturers and merchants, and experience shows that such information is very acceptable to the Railways and Transportation Lines throughout the country.

C. M. WICKER, the commissioner, has been connected with the Bureau since its establishment. He was born in Addison County, Vt., in 1844, the son of Cyrus Washburn and Maria (Delight) Wicker, and received his education at Williston Academy and Middlebury College. When he attained his majority, he left his native State and settled in St. Louis, Mo., where he became an employe in a wholesale and retail grocery. He remained there a little less than a year, and left to take charge of the Star Union Line's business at East St. Louis, where he remained for that company, and later in charge of the St. Louis Transfer Company's teams, for two years. He then took charge of the interests of the People's Despatch Fast Freight Line, an offshoot of the then-existing Merchants' Union Express Company, at St. Louis. He was there for a year, after which he entered the service of the old North Missouri, now a part of the Wabash Railroad, as Chinese Emigrant Agent. Being largely controlled with his headquarters at St. J. P. S. N. in his capacity of Emigrant Agent, Mr. Wicker was, for once in his lifetime, connected with an unsuccessful enterprise. This was an effort to supply Coolie labor to the South after the War; but the unsupervised condition of that section of country precluded success attending any project where the employment of a large amount of capital was requisite. Seeing no hope for the Coolie trade, he was made assistant freight agent of the North Missouri Railroad Company, and occupied that position for one and a half years.

During the summer of 1871, Mr. Wicker was offered the position of assistant general freight agent of the Chicago & North-Western Railroad Company, and occupied the duties of that office on August 16 of that year. During the five years that he was with that company, among other things, he settled the fire-claims of the company, resulting from the fire of October 9, 1871. In December, 1876, he accepted the position of general agent of the Baltimore & Ohio Railroad in this city, remaining in that position, as general agent or assistant general agent, for fourteen years, and, having reached the head of the Ohio River, until January 1, 1880. At that time all the offices of the Trans-Ohio Divisions, except the operating department, were removed to Cincinnati and the company's works at Cleveland, Ohio, Consolidated, and the Ohio, road, at Baltimore. In January, 1880, Mr. Wicker took charge, as manager, of two iron mines in Northern Michigan, and retained that position, working the property until the depression in the iron interests of 1883, when the iron mines in the district were nearly all others in that section. Mr. Wicker then took charge, as general manager, of several coal mines located at Springfield, Bridgwood and Tracy, Illinois, the same parties being interested in the coal, in the iron interests of which the iron mines, whose management had been intrusted to Mr. Wicker, the corporation being known as the Central Illinois Coal Company. In the fall of 1883, the Chicago Freight Bureau was organized, and Mr. Wicker was elected to the executive committee, which conference resulted in the provider of, and acceptance, by him, of the office of commissioner, a position he has filled thoroughly to the satisfaction of the Bureau since that time. He still retains his stock, and the position of director, in the Central Illinois Coal Company. Mr. Wicker was married on June 5, 1872, at Lebanon, Ill., to Miss Augusta C. French, the eldest daughter of the late Corrence Augustus C. French, and has five children.—Henry Halladay, Lucy Southworth and Cyrus French.

Ticket Brokers.—This class of business men has become one of great importance to the travelling community, and, although their relations to various railroads are sometimes a little tinged with hostility, the benefit the public derive is very often financially appreciable. As representatives of this branch of business some sketches of leading firms are subjoined.

J. J. WALSER & CO., at No. 93 South Clark Street, is one of the three responsible firms in the railroad ticket brokerage business in Chicago, the other two being members of the American Ticket Brokers' Association, and guarantee all their transactions with the public.

The business was begun in this city about 1850, and increased in a haphazard way till 1879, when the Association was formed. The brokers as well as the railroads from fraudulent tickets, passes and spurious paper. Mr. Walser began, in 1875, at No. 75 South Clark Street, and did a business of about $20,000 a year. He was then his own clerk, cashier and errand boy, now he has a partner, ten employes and a trade that, in 1884, equaled $600,000. In 1878, to get more room and less rent, No. 93 South Clark Street was chosen as an office and the change to the present location was made. The business is yet in its infancy, but experience amply demonstrates the fact that it can be legally carried on with profit to the brokers and the public and accommodation to the railroads. The business acts as a middleman between the railroad company and the traveler, who deals principally on regular coupon tickets, bought in blocks to sell at some specified future time, and usually working with an understanding with the railroad company.

J. J. WALSER was born in Germany, in 1848, in Baden, and is the only child of Joseph and Emma Walser. His father was a stone and brick mason, a contractor and builder, and removed to New Orleans in 1853, and afterward to Chicago, in 1854. Mr. Walser is a member of Harlem Lodge, No. 540, A.F. & A.M., of Cincinatti, South, R.A.M., and of Solomson Commandery, No. 34, K.T. In 1873, at Marengo, Ill., Mr. Walser married Miss Sarah Vail, daughter of Eldris J. Vail, a prominent farmer of that section.

L. SALOMON & CO., railroad ticket brokers and members of the American Ticket Brokers' Association, conduct their business at No. 99 South Clark Street, in the Recaper Building. Here, in 1876, L. Salomon, the present senior partner, opened an office, selling tickets on one side and cigars on the other. The brokers' ticket business takes the emphasize of all other railroad business, and the commission paid by the companies, the largest profit being on excursion tickets. So rapidly did Mr. Salomon's business increase that, in 1883, assistance being needed, Alfred Blum, an ex-cashier of a railroad company, was taken into the firm, and the commission paid by the companies, the largest profit being on excursion tickets. So rapidly did Mr. Salomon's business increase that, in 1883, assistance being needed, Alfred Blum, an ex-

L. Salomon was born in 1848, in North Hesse, Germany, of Schleswig, Schleswig-Holstein, Germany, on August 16, 1850, and is one of the twelve children of S. M. and Caroline Salomon. His father was a dry-goods merchant. Mr. Salomon, after acquiring a liberal education, became a lawyer's clerk in his native city, where he remained until 1862, when he went to London, England, and had the care of exhibits for several continental manufacturers in the International Exposition of that year. In the winter of 1862-63, Mr. Salomon
With the public buildings of the city, the fire of 1871 destroyed the records and papers of the State and Federal courts. Here and there a few documents were saved, but the loss was practically total. The bar of the city had not only been deprived of offices, courts, and valuable papers—containing the evidence upon which depended the adjustment of the most important pending interests—but also of the law books and reports so necessary to every practicing lawyer. Little, indeed, remained of the courts but their organizations. This, with the changes which have since taken place, are given in the pages following.

UNITED STATES COURTS.

These courts at the time of the fire were organized as follows:

Since then several changes have occurred, which can readily be seen from the following table:

Mark Bangs was born at Hawley, Franklin Co., Mass., on January 9, 1822, his father being Zenas Bangs, who brought up his large family on a barren farm. In 1825, his mother died, leaving him an orphan child, and, in 1828, was left an orphan, his father having died during the previous year. Zenas Bangs was a man of marked character, taking an active part in the affairs of his county, and for several years was the representative of his town in the State Legislature. He was an elder brother to Western New York, and at the age of seven was put out to live with a farmer of Monroe County, near Rochester. From the age of fourteen years, he worked in the manufacture of cigars, and, after embracing the law, he entered upon a successful legal practice, and, after leaving his law firm, he returned to his home, remained here two or three months, became acquainted with its general appearance, and left for the new central portion of the State, where he spent two years in running a threshing machine, farming, and teaching a singing and district school. In the spring of 1847, he went to Massachusetts, and taught a few classes in the English and Classical school of his brother in Springfield, while he read law in the office of Judge Henry Morris. In the autumn of 1849, he settled at Lacon, Marshall Co., Ill., and spent one year as clerk and bookkeeper in a dry goods store, meantime pursuing his legal studies. He then entered the law office of Ira J. Fenno, of Lacon, was soon admitted to practice, and, about 1851, became a partner of Mr. Fenno, under the firm name of Fenno & Bangs. On January 1, 1852, Mr. Bangs was married to Miss Harriet Cornelia Pomeroy, second daughter of Deacon Samuel Pomeroy, of the First Presbyterian Church of Lacon. From the time he was admitted to the bar, he took an active part in local and State politics, and was one of the first to move in the organization of the Republican party. In 1854 he was elected a Delegate to a State Convention held at Springfield, to consider measures for the organization of a new party that should unite the entire anti-slavery element of the country. Owen Lovejoy was a member of that Convention. Many persons of distinction in the State, who have since done active service as Republicans, stood aloof from that Convention, fearing its strong views on the slavery question. Mr. Bangs became an active, radical republican, engaging earnestly in every political campaign, either local or general, from 1855 to 1875. In March, 1859, he was elected judge of the Twenty-third Circuit of Illinois. In August, 1862, he was elected at the Republican convention, held in Galesburg, at which Owen Lovejoy received his last nomination for Congress, and that fall made with him the campaign, the severity of which doubtless cost Mr. Lovejoy his life. In the fall of 1862, Mr. Bangs formed a partnership with Thomas M. Shaw, since State senator from that district; he was now a judge on the bench of the Circuit Court of Illinois; and for fifteen years, the firm of Bangs & Shaw, and later Bangs, Shaw & Edwards, held a leading position at the bar of Central Illinois. In June, 1862, Mr. Bangs, with four others, originated and set in operation the celebrated Union League of America, of which he was chosen president, and he spent much of the year following in organizing branches and granting charters, among which was the charter for the organization of the National League, at Washington, D. C. In 1869, he was elected to the State Senate, which had its share in the work of adapting our State legislation to the new Constitution. In February, 1873, he was appointed, by Governor Beveridge, judge of the Circuit Court of Putnam, Marshall, Woodford and Tazewell counties, to fill the vacancy occasioned by the death of Judge Richmond. In December,
Richard S. Tuthill was born at Vergennes, Jackson Co., Ill., on November 10, 1841, the youngest of nine children, and the son of Daniel B. Tuthill, a native of Vermont. His father was educated for an Episcopal clergyman, but decided not to enter the ministry on account of delicate health. His mother was Miss Sally Strong, daughter of Luke Strong, a prominent lawyer of Vergennes, Vt. His parents immigrated to Illinois in 1829, and settled on the prairie which afterward bore their name. The town of Vergennes was founded by them, and named by Mrs. Tuthill after her native place. Mr. Tuthill was postmaster of Vergennes under different administrations. He was a whig, and afterward a republican. Such men as President Lincoln, Judge Breese, Bishop Chase, John A. Logan and D. L. Phillips made visits to his hospitable mansion. Richard S. received his education in a private school established by his father, also in the St. Louis High School and in Jacksonville College, finally graduating from Middlebury College, Vermont, in August, 1867. He joined the Union Army before Vicksburg, soon after his graduation, and served with a company of volunteer scouts through Mississippi to Meridian. He was then commissioned by Governor Blair, of Michigan, second lieutenant of Battery "H," 1st Michigan Light Artillery, and was attached to General Logan's old division of the 17th Army Corps, Army of the Tennessee. He served with this battery during the War, taking active part in the campaign which ended in the fall of Atlanta, and in the battles of Resaca, Kennesaw Mountain, Allatoona, and in the numerous severe engagements in front of Atlanta.

He served with this battery during the War, taking active part in the campaign which ended in the fall of Atlanta, and in the battles of Resaca, Kennesaw Mountain, Allatoona, and in the numerous severe engagements in front of Atlanta.

Richard S. Tuthill
He was afterward in General George H. Thomas's campaign against Hood in Tennessee, and in the battle of Nashville. Believing the war at an end, he resigned his commission on May 29, 1865. He resumed his study of the law in the office of the Hon. H. H. Harrison, at Nashville, and, in 1866, was admitted to the bar and entered the practice of his profession in that city. He was elected attorney-general of the Nashville circuit in 1867, serving until 1870, when a change in Southern politics threw all republicans out of office. He ran for presidential elector, on the republican ticket, in 1872, and made a vigorous campaign, sweeping the district, which was largely democratic, and lacking only a few votes of election. Mr. Tuthill came to Chicago in the early part of 1874, devoting himself to his profession with great diligence. In 1875, Mr. Tuthill was the republican candidate for city attorney, and was elected (with what was known as the "Reform Council") by a majority of over 5,000; and, in 1877, was re-elected by a largely increased majority. He established so high a reputation as a corporation lawyer, that he has since been employed by the city to conduct highly important suits in the Supreme Court of the United States, involving the right of the city to impose a license fee upon the cars of the street railway companies. At the close of his term as city attorney, Mr. Tuthill formed a partnership with Colonel David Quigg. Mr. Tuthill is an earnest and active republican. In 1880, he was a member of the State Convention at Springfield; and was a delegate to the National Convention held that year in Chicago, being one of the "300" who voted for the nomination of General Grant. He is richly endowed with the finest qualities of mind and heart, and is high-minded and honorable in all things. Mr. Tuthill is a member of the Grand Army of the Republic, the Veteran Club and Military Order of the Loyal Legion. He is also a member of the Illinois and Union League Clubs. In February, 1884, he was appointed United States district attorney for the Northern District of Illinois. He was married, in 1868, to Miss Jennie Smith, of Vermilion, Vt., who died at Nashville, Tenn., December 22, 1872, leaving one child, Eliza Strong. He was married, on January 2, 1877, to Miss Harriet McKey, the daughter of the late Edward McKey, a noted dry goods merchant of Janesville, Wis. They have had three children.—Ira Gertrude, Mary Elizabeth and Lillian McKey.

John Ira Bennett was born in Osage County, N. Y., on November 27, 1851. His parents, Joseph and Lydia (Birdsall) Bennett, were Quakers. They removed in 1843 to Knox County, Ill., where they lived two years, when they settled at Davenport, Delaware Co., N. Y. In 1847, through the influence of Rev. Sanford L. Ferguson, Mr. Bennett was sent to Charlotte Academy, where he studied and taught until September, 1852, at which time he entered Union College as a sophomore, graduating in June, 1854. While a college student, he became a member of the Phi Beta Kappa fraternity. From August, 1854, to July, 1857, he was principal of Liberty Academy, at Springfield, Ill., meanwhile studying law. In June, 1857, he was admitted to the Tennessee bar. He removed to Galva, Henry Co., Ill., the following July, and commenced practice. In 1865, he was admitted to practice in the United States Supreme Court. In 1864, he was appointed on the staff of Governor Yates, with the rank of colonel, and performed efficient service in the recruiting departments. In 1864, Mr. Bennett was the republican elector for the Fifth Congressional District of Illinois. He was the founder of the Galva Union, and its editor and proprietor for two years; and engaged in coal mining as proprietor and operator, still continuing the practice of his profession. He was for many years a member of the Board of Education of Galva. In June, 1872, he removed to Chicago, taking up his residence in Hyde Park. In 1875-79, he was president of the Hyde Park board of trustees, and has also been a member of the Board of Education. In 1875, he was admitted to the bar of the masters in chancery of the United States Circuit and District Courts for the Northern District of Illinois, which position he still holds. In the summer of 1854, Mr. Bennett married, at Henderson, Ky., Maria E. Reynolds, a native of Delaware County, N. Y. They have seven children—Fannie (now Mrs. W. C. Nelson, of Hyde Park), Frank Ira (admitted to the Illinois bar in 1850, now practicing in Chicago); Fred Keller (a promising journalist), Allen Lewis, George, John and William.

Elijah B. Sherman, LL.D., is the son of Elias H. and Clarissa (Wilmarth) Sherman, was born at Fairfield, Vt., on June 18, 1832. Until twenty-one years of age he remained upon his father's farm, during the winter months acquiring an elementary education or engaging in teaching. In 1854, he removed to Brandon, and was for a year employed as clerk in a drug store. In 1855, he began a course of study preparatory for college, and entered Middlebury College in 1856, from which he was graduated in 1860, and where, in 1854, he returned to deliver the annual address before the alumni of the college. After teaching in South Woodstock and Branchville, Vt., Mr. Sherman enlisted as a private in the 9th Vermont Infantry, was elected lieutenant of Co. "C," and served until January, 1863, when he resigned while his regiment was at Camp Douglas, and entered the law department of the University of Chicago, graduating in 1864. Since that time he has been engaged in the successful practice of his profession in Chicago. From 1857 he has been attorney, in Chicago, for the Auditor of Illinois, and as such he instituted proceedings for closing the affairs of the Republic Life Insurance Company, the Chicago Life Insurance Company, and the Protection Life Insurance Company. In the Republic Life and Chicago Life cases, Mr. Sherman was opposed by some of the ablest attorneys at the Chicago bar, such as Judge Beckwith, Mr. Kales and Mr. Bonney, who attacked the constitutionality of the insurance laws of Illinois, and especially the statute for the dissolution of insurance companies. In the litigation which has grown out of these matters, Mr. Sherman's interpretation of the insurance laws has been sustained by the Supreme Courts, both of Illinois and of the United States. In 1876, he was
elected to the General Assembly from the then Fourth Senatorial district, and was re-elected in 1878. His name is identified with all the important legislation of that time. He was one of the most effective opponents of "third-termism." A tribute to his ability and to his marked success in this latter conflict was thus offered by the Chicago Times, during the judicial election of 1880, which placed Judge Hawes upon the bench of the Superior Courts. "To Mr. Hawes, more than to any other man in Illinois, was due the success of the struggle which ended in the admission of the unpledged delegates from this State to the National Convention. A name which may be held to have proved the nomination of General Grant." His fight for the Farwell Hall delegates at Springfield enabled his associates to go before the superior tribunal (National Convention) at Chicago with a record that compelled attention. But for his foresight in forcing that record, the contestants would have come up to this city without a case, and the whole

Kirk Hawes

history of the National campaign, possibly of this Nation, might have been changed by their failure. His plea before the State Convention was a model of clear, forcible, terse and elegant reasoning." Under the Act of 1875, providing that for every county having a population of 100,000 inhabitants or over, the Superior Court should be added, to the number of nine, Mr. Hawes was, in November, 1880, called to his present position, and no man has made more friends and fewer enemies than he by his justice and courtesy. He is a member of the future of the Illinois Constitution, and has been prominently identified with various important organizations of public and philanthropic character. In private and social life he is one of the most agreeable of gentlemen, — well read, a close and accurate thinker, and a brilliant conversationalist. In 1855, Middlebury College conferred upon Mr. Sherman the degree of LL.D., a recognition highly prized by him, since this conservative college has conferred that honor upon only three of those graduating from it during the last forty years. In 1866, he was married to Hattie G. Lovering, daughter of S. M. Lovering, of Iowa Falls, Iowa, a most estimable and accomplished lady.

SUPERIOR COURT OF COOK COUNTY.

This court was first established in 1849, in place of the Court of Common Pleas, and was continued by the Constitution of 1870, which went into effect on August 8 of that year. At the time of the fire it was constituted as follows: Judges, John A. Jameson, Joseph E. Gary, and William A. Porter; Clerk, Augustus Jacobson. Terms: First Monday in each month. The changes which have taken place on the Bench since that time are as follows:

Kirk Hawes, associate justice of the Superior Court, is one of those rare men who combine eloquence with a sound, judicial mind — consequently he has never been a partisan, although his principles have generally inclined him to identify with the Republicans. His views upon all national questions evince the fact that his mind is moulded more after the dimensions of a statesman than a politi-
HISTORY OF CHICAGO.

K. Porter, as stated, being admitted to the Bar in Albany at the age of twenty-one. Originally a republican, Judge Shepard joined the democratic party in 1876. He was a member of the Legislature in 1866-67, the only political office ever held by him. In 1868, he was married to Frances W. Stuart (daughter of the late General Charles B. Stuart), of Geneva, N. Y., and has three children—two sons and a daughter.

Hemstead Washburne was born on November 14, 1852, at Galena, Jo Daviess Co., Ill., and is the son of Honorable Elihu B. Washburne, the noted statesman and constitutional lawyer. Hemstead Washburne's mother was, before marriage, Miss Adele Grafiot. He received his preliminary training at Kent's Hill, Readfield, Me., after which he went abroad and pursued the study of metaphysics at the celebrated University of Bonn. In the winter of 1872, he returned to America, and settled in Madison, Wis., there systematically pursuing his law studies in the office of Gregory & Pinney, and at the law school in Madison, for two years, after which he was admitted to the Bar. In May, 1875, he came to Chicago and entered the office of Barber & Lackner; also entered the Union College of Law, from which he graduated in the summer of 1876; and formed a partnership in the fall of that year with Henry S. Robbins. In October, 1875, the partnership name was changed to that of Trumbull, Washburne & Robbins—I. H. Lyman Trumbull having at that time become a member of the firm. This firm has been continued to the present time. In 1880, Mr. Washburne was appointed master in chancery of the Superior Court, which office he still holds. In 1885, he was elected city attorney for Chicago, and, though a lawyer young in years he has made an uncertain mark in his profession. His careful preparation prior to entering court, his clear and concise statement of his own case and his aptitude to describe the fallible points of his adversary's, have caused him to be held as an able trial lawyer. The same comprehensive and systematic study which he inaugurated upon his determination to enter the legal profession, and which he has maintained since, will, if pursued in the future, render him a worthy successor to his father. Mr. Washburne was married in June, 1883, to Miss Annie Clarke, daughter of J. V. Clarke, president of the Hibienian Bank of this city.

The incumbents of the office of clerk of the Superior Court since the fire have been: Augustus Jacobson, from November, 1868, to December 1, 1872; Alexander Frandison, from November, 1869, to December 1, 1875; John J. Healy, from November, 1875, to December, 1884; Patrick McGrath, from November, 1884, to term expires December, 1888.

John J. Healy, now clerk of the Appellate Court, was born in County Kerry, Ireland, near the Lakes of Killarney, July 3, 1842. In 1848, the family emigrated to America, and in the following spring settled in Chicago. Receiving his early education in the public schools and the Academy of Notre Dame, Indiana, when about fifteen years of age he entered the employ of Philip Conley, the dry goods merchant, with whom he remained until the breaking out of the war. Enlisting as a private in Colonel Mulligan's regiment, he soon rose to the position of first lieutenant, with a commission as captain. Upon the very day that Colonel Mulligan was killed, Major Healy was severely wounded, and when he recovered was appointed assistant adjutant general, with headquarters at Springfield. There he remained, in charge of the draft rendezvous, until the close of the War, when he returned to Chicago, and for two years was agent of James Dalton & Bros., of White Lake, Mich., extensive lumber dealers. He afterward went to Milwaukee, where, for one year, he ably managed the lumber business of M. W. O'Brien, his uncle. Returning to Chicago, he was elected supervisor of the Sixteenth Ward. The following year he was elected clerk of the Town of North Chicago, holding the position four years, during a portion of which time he acted as clerk of the North Side Circuit Court. Resigning in 1872, he became a deputy under Recorder Stewart. In the fall of 1876, he was elected clerk of the Superior Court. For nine years he held this position, which he was, in the fall of 1884, advanced to his present office. Major Healy still maintains an active interest in military matters. He retained captain of the Mulligan Zouaves, which he organized soon after the War, until it was merged into the 2nd Regiment, L. I. N. G., of which he was chosen major. He has acted as commander of Phi. Sherman Post, G.A.R., and at one time, an aide on the staff of Governor Hartranft, of Pennsylvania, commander-in-chief of that Order. He is also a prominent member of the Veteran Club and the Veteran Union League. He is also a member of the Board of Trade. It will thus be seen that he is actively identified with many of the important interests of Chicago. Major Healy's father, who was an early employe of the Chicago, Rock Island & Pacific Road, died at St. Louis, Mo., in 1879. On February 8, 1863, Mr. Healy married Nellie M. Lane, daughter of James Lane, who settled in Chicago, as one of its pioneer merchants, in the spring of 1836. They have three children,—two girls and a boy.

CIRCUIT COURT.

By the Constitution of 1870, Cook County was made to consist of one circuit, with five judges, including the judge of the Recorder's Court and the judge of the Circuit Court. Three new judges having been elected in July, 1870, the Court at the time of the fire was composed of the following judges: Erastus S. Williams (former circuit judge, elected in 1867), W. K. McLallis ter (former judge of the Recorder's Court), and the three new judges, W. W. Farwell, John G. Rogers and Henry D. Booth; Clerk, Norman T. Gassette. Terms: Third Monday in each month. The changes occurring since that time have been:

MICHAEL W. RYAN, the present county clerk, was born in the county of Limerick, Ireland, in 1847, being the youngest of ten children, the family consisting of eight brothers and two sisters. He received his early education at one of the public schools in the parish of Cappamore. His mental qualifications having proved him worthy of abstruser studies, he was sent to the Jesuit College, at Limerick, where he studied the higher branches of mathematics and the classics, graduating at the head of a class of thirty-two students. A few years thereafter he sailed for America, and came to Chicago in 1866. He at once went into the contract business with his brother, D. W. Ryan, a man of prominence, who died soon afterward. Mr. Ryan next embarked in a dry goods venture, but as his tastes were for public service, in 1875 he entered the recorder's office, under James Stewart. Later he served in the county clerk's office and in the office of the clerk of the Probate Court. While holding the latter position, he was nominated by the democrats for the West Town collectorship, which was unseized by him, and was the only person of his party who was elected. The bond which he gave was for $50,000; and his administration showed an honesty and ability which gained him the confidence and esteem of all citizens. In the fall of 1882, he unanimously nominated by his party for the office of county clerk; and though the contest was a spirited one, he carried the county by a decided majority and materially aided the balance of the ticket. In the spring of 1884 he was married to Manie, only daughter of John Cochran, an honored and early resident of Chicago. Mrs. Ryan is an accomplished and highly educated lady, being a graduate of St. Mary's Institute, South Bend, Ind. Mr. Ryan is a man of fine presence and easy and social manners, and his popularity among all classes is as unquestioned as his integrity and ability are undisputed. He is a member of Division No. 11, A.O.H., and was county delegate of the County Board of that order in 1881.

WILLIAM H. GLEASON, chief clerk and deputy sheriff, also a member of the wholesale jewelry house of Charles H. Knights & Co., was born at Wardshill, Wimham Co., England, November 15, 1843. His father, Josiah Gleason was a farmer, and his mother's maiden name was Susan R. Morse. He received his education in the district schools, and worked upon his father's farm until twenty years of age, attending school at the Springfield Wesleyan Seminary for one term only. In 1866, Mr. Gleason removed to Baltimore, Md., where he was engaged in the baking business until the fall of 1868. In the fall of 1869, he at once found employment as a clerk in office of Galpin & Hanchett, deputy sheriffs and auctioneers, with whom he continued until the great fire. Mr. Gleason then accepted a position with the Fullman Car
Company, which he retained until December, 1852, when he was appointed bailiff of the County Court by Sheriff T. M. Bradley. Here he remained until December, 1856, when he formed a partnership with B. H. Hancheet, then operating a communication agency in connection with their probate business. In the fall of 1857, Mr. Gleason was appointed chief deputy in the office of the clerk of the county court, and conducted so to act until 1862, when Mr. Hancheet was elected to his present office, when he appointed Mr. Gleason to the position he now holds. Since February, 1879, he has been also connected with the private business mentioned above. On April 7, 1854, Mr. Gleason was elected by the Town Council by a majority of nearly twelve hundred, leading his ticket by several hundred votes, and is the first republican who has been elected. Mr. Gleason is a member of the Masonic fraternity, being connected with Orpheus lodge, No. 33. He was married in June, 1853, to Jennie M. Grow.

EMIL DIETZCH [recognized in German circles as a littérateur of rare merit, a poet, a dramatist, an essayist, and a historian], is connected with the sheriff's office, and is also spoken of by many as "Cook County's best coroner." Three of his annual reports, published in 1875, were translated into German, circulated quite generally in the Fatherland, and were spoken of by the English press as models of their kind. The one of 1876, in particular, was noticed by the Chicago Tribune in a long editorial of eulogy, saying of it: "It is not only the best report made by a Cook County coroner but by any other official of the county. It goes so far as to say that "it is such a report as might be expected from a genial and versatile gentleman, and his humor, satiré and learning, as well as its terseness, make it a fact of facts and pertinent comments," perhaps be more appreciated when his author's various accomplishments should be recited. It then speaks of him, in the highest terms of praise as a poet, whose writer, a humorist, a scholar, a dramatist, a comedian, a musician, a politician, and a politician, may not be drawn upon by the facts that Mr. Dietzch is a contributor to Puck, Staats Zeitung, and Die Welt, and that he has published in book form a lyric poem on the history of the German nation, which has received favorable notice by critics of high repute. He is also the author of the "History of the Germans of Chicago," published by Max Stern. The artistic talent for which his family have been noted for generations, has been descended to him, and when president of the German Mannerchor, that organization was wonderfully prosperous. Mr. Dietzch is a descendant of an old protestant, patrician family, residing since the beginning of the seventeenth century in the city of Nuremberg, Bavaria. A good many members of this family have been famous as great artists, among others the celebrated painter, Johann Israel Dietzch, born in 1801, and the founder of the well-known art cabinet in that city. His two sons, Johannes Christopher and George Friedrich Dietzch, like his daughter Margarethe Barbara Dietzch, have all been famous painters of landscapes and fruit-pieces and of sea and land battle scenes, be daughter made her mark in flowers, birds and fruit-pieces. Their oil paintings can be found to-day in the galleries of Nuremberg, Munich, and in the possession of collectors in Frankfort-on-Main and other centers. In the year 1777, Johann Gottlieb Dietzch, a grandson of Johann Christoph Dietzch, arrived as a young merchant in the city of Frankfort. Soon after his arrival there, he became acquainted with a young lady, Regina Mack, daughter of Conrads Leo- pold Mack, and after a few years took her as his wife. Afterward he settled in Frankfort as a manufacturer of oil cloths. They had two daughters and one son. This son was Emil Gottlieb Dietzch, born in Frankfurt on May 10, 1802, and was the father of the subject of this sketch. In the year 1828, when Emil Gottlieb Dietzch was a clerk in the celebrated banking house of Bethman & Son, in Frankfort, he was appointed, upon the recommendation of the house, as financial administrator of the great iron-melting works, foundries, rolling-mills and hammerers of Baron August von Gienan. This position he held for over thirty years, and it is now occupied by one of his sons, Philipp Dietzch, of Kasberg, Bavaria. Emil Gottlieb Dietzch married, in the year 1828, Louis Graf, a daughter of Friedrich Wilhelm Graf, dean of the Trinity Church, in Worms, where he preached over forty years in the same place where Dr. Martin Luther stood in the year 1521, during the diet elected at the Diet of Worms, under the Emperor Charles V. Emil Dietzch was born in Frankfurt, April 7, 1802, and was educated until his fourteenth year in the famous public school of Louis Stellwag, in Frankfort, where the sons of the first families of Frankfort and other cities were also educated. He next attended the Gymnasium in Worms, and left this institute in 1824, to learn the apothecary business in Kaiserslautern. He also attended the University of Munich, and graduated from Heidelberg. Mr. Dietzch was caught in the revolutionary maelstrom which swept over Germany, was one of the "Radicals" with such characters as Carl Schurz and Madame Anneck. He was imprisoned in 1848, and then spent two years as a druggist in Switzerland. Coming to Chicago on August 16, 1854, he went into the drug business with Louis Warlich, at the corner of Kinzie and Clark streets. The establishment was burned in the great fire, and Mr. Dietzch went into the wholesale importing wine trade. He inherited the firm of F. H. Hanchett, and re-elected in 1876, running seven thousand ahead of his ticket the last time. In 1878, he was appointed deputy sheriff, which position he has held up to date. Emil Dietzch was married on February 26, 1857, to Ida Garthe, by whom he had four children. His first wife dying in May, 1874, he was married, four years later, to Eliza Schmidt; they have had two children.

HOMER B. GALPIN, deputy sheriff and bailiff of the Probate Court, is an example of the self-made man who has obtained the respect of his fellows and a fair share of this world's goods through his own endeavors; one of those who, in Chicago, has paid heavy price since he was nine years of age. He was born at Williams-town, Mass., on February 2, 1831, his parents being Abel and Susan (Matthesen) Galpin. All his schooling was obtained previous to his ninth year, at the district school. When he was eight and a half years of age he commenced work in a woolen factory at North Hooische, N.Y., where he remained until he was fifteen. The next three years he spent in learning the blacksmith trade in the reaper manufacture of Walter A. Woods, at Hooische Falls, Young Galpin then started for the West, reaching Chicago on July 3, 1849, and passing into Warren, Lake County, where he engaged in farming. In 1852, he returned to Chicago, engaging in various business, occupations and putting his hand to any "honest job. He then went to farming again in the Town of Palatine, being appointed constable in 1854. He commenced his twenty years' service as deputy sheriff under Antony C. Hesing, in 1860, being also appointed bailiff of the County Court, which then had probate jurisdiction. He continued in this position for ten years, acting as a deputy for eight years longer. In 1875, he entered into a partnership with Henry McCrane, and managed a collection and detective agency for two years. In 1880, he was appointed United States government store-keeper, serving two years in this capacity. When Sheriff Hanchett came into office, in 1882, he received the appointment of deputy sheriff and bailiff of the Probate Court. Mr. Galpin was married in August, 1858, to Mary J. Calvi, of Palatine. She died in 1863, leaving one daughter, Nellie, now the wife of William Gager, who is connected with Jansen, McCrane & Co. His second wife was W. J. Pimpton, of Wardboro, Vt., whose father was a prominent democratic politician of that State. Of the two boys of this marriage, E. F. is connected with the Chicago Times, and Homer Nekkerbacker is attending school.

CRIMINAL COURT.

This court was created by the Constitution of 1870, which provided that the Recorder's Court of Cook County should be continued as the Criminal Court of Cook County, and was to have the jurisdiction of a Circuit Court in all things relating to civil and quasi-criminal nature in said county. In its institute it was also stipulated that the terms of said court should be held by one or more of the judges of the Circuit or Superior Court.

Its officers, since 1871, have been—
was educated in the public schools and at the Michigan State University. He inaugurated the study of law in 1865, entering the office of Homer N. Hibbard. Commencing the practice of his profession soon after, he, in 1875, became senior partner in the firm of Mills, Weber & Ingham. In 1876, Mr. Mills was elected State's attorney, receiving four thousand votes more than his fellow candidates; and, in 1880, was re-elected for a further term. In 1884, he was a Royal Arch Mason, a Knight Templar in Apollo Commandery, and a member of the Psi Upsilon Fraternity. On November 15, 1876, he was married to Ella J. Boies, of Somerset, Vt., a refined, accomplished and amiable lady. This union has been blessed with five interesting children,—Matthew, Electa, Mari, Caroline, and Agnes. The personality and career of Mr. Mills are deserving of more prominence than can be given to a mere biography. His talents and accomplishments place him in bold relief against the background of mediocrity and commonplace. As a man, he has learning without pedantry, energy without loss of grace, amiability without detriment to his force of character, ambition without envy, talent without egotism, religion and morality without cant or Pharisaism. In his profession Mr. Mills is both orator and lawyer. His peculiar excellence in the first has given a one-sided aspect to his professional career, not conducive to completeness of view. All things considered, he is probably the most eloquent advocate in the State. A man who "feels deeply and conceives vividly," in language, he paints rather than describes. With him, ideas are personified and facts breathe and move. Through the alchemy of his passion, the abstractions of reason are transmuted into the pictures of imagination, "causing the distant to become near, and the absent or invisible to start up before us with a living power." But Mr. Mills is more than an orator; he is a lawyer. Intellectually, the law is his mistress. Devotion to his profession is a marked characteristic. Thoroughly grounded in legal principles, and acute and subtle in their application, his use of cases is but to illustrate and discriminate. His judgments are cogitate, and not those of an empiric. These traits were not so manifest in his able conduct of the office lately occupied by him. As OMighty, his talents as an advocate were made conspicuous; now, that he has returned to the general practice of the law, the versatility and breadth of his legal knowledge will be recognized.

JULIUS S. GRINNELL, State's attorney for Cook County, was born at Massena, St. Lawrence Co., N. Y., in 1842. His ancestors, remotely, were both French and Welsh. Both of his parents, Dr. J. H. and Alvin (Williamson) Grinnell, were natives of Vermont. Mr. Grinnell traces his ancestry back to Grinnelle, now a considerable manufacturing village just east of Paris, and within the fortifications. His ancestors emigrated first to Wales and subsequently to this country, one branch of the family tree spreading from New York, another from Connecticut, and the third from Vermont. Of the latter, Mr. Grinnell is a member. He was educated in the schools of his native town, and fitted for college at Potsdam Academy, St. Lawrence Co., N. Y., taking a full course in the Middlebury (Vt.) College; graduating in the summer of 1866. He entered the office of Hon. William C. Brown, in Ogdensburg, as a law student, and was admitted to practice before the State Supreme Court in 1868. Previous to coming to Chicago, in December, 1870, he practiced his profession, and taught school in the Ogdensburg Academy. When he reached this city, he commenced the study of law, almost a complete stranger among its people. In 1879, he was the democratic candidate for city attorney; and, although the party was not then in power, he was elected by a large majority. In 1881, and in 1885, his majorities were increased, indicating the public approval of his official actions. In November, 1884, he was called by the popular voice to his present post. Mr. Grinnell was married, on October 5, 1869, to Augusta Hitchcock, of Shrewsbury, Addison Co., Vt. They have two children,—a boy and a girl.

FRANCIS W. WALKER, a member of the firm of Ennis & Walker, and now first assistant prosecuting attorney, was born on October 12, 1846, in this city. His parents, Lucas B. and Lu- cinda (LeSear) Walker, were natives of New York. His father was a commission merchant here for many years. Mr. Walker's education was obtained in the grammar and high schools of Chicago and at Dr. Dyrenfoot's college. He commenced the study of law in the office of Luther Laffin Mills, and, taking a course in the Union College of Law, graduated therefrom in June, 1875. In November, 1880, he formed a partnership with L. W. Ennis, Mr. Walker is a leading member of the Iroquois Club, and took a prominent part in the political campaigns of 1880 and 1884. He, early showed literary talents, and had won a reputation as a fine debater before entering the broad arena of the law. Upon the election of the democratic candidate for prosecuting attorney, Julius S. Grinnell, in the fall of 1884, Mr. Walker was appointed his assistant, he having shown a remarkable aptitude in the conduct of trial cases.

JOHN STEPHENS, clerk of the Criminal Court, was born at Albany, N. Y., on September 16, 1830. His parents removed to Chicago in April, 1844. His education was obtained in the public schools and in one of the commercial colleges of this city. Afterward he entered the employ of Thomas Manahan, furniture dealer, and, being of a lively and uneasy disposition, after a time he joined J. H. McVicker as property-man, his previous experience being of great benefit to him. In common with all the enterprising and active young men of Chicago, during the early days, Mr. Stephens was a leading member of the Fire Department, and, in March, 1857, organized Empire Hook and Ladder Company No. 3. At the breaking out of the Rebellion, he joined the 19th Illinois Infantry, on April 19, 1861. He made a record during the War of which any man might well be proud. At the battle of Chickamauga he had his left foot carried away by two grape-shots, was captured by the enemy, and remained a prisoner fifteen days. While sergeant of Co. "K," he received other wounds. Mr. Stephens commanded his company at Stone River and for some time subsequently. Soon after the conclusion of the War he was appointed to a position in the registry department of the post-office. In the fall of 1870, he was elected coroner of Cook County, and re-elected on the republican ticket in the fall of 1873. Upon both occasions he received the largest majorities on the ticket. In 1874, he was succeeded by Emil Dietzsch. For three years he acted as deputy in the recorder's office, under James Stewart, and, in 1877, was elected clerk of the Criminal Court, being re-elected in 1881, for a term of four years. Mr. Stephens is Past-Commander of G.A.R. Post, No. 25; Senior Past Commander of the order in the State; a member of the Union Veteran Club, Veteran League, and of the 19th Illinois Veteran Club. He was also the first commander of Ransom Post, No. 1. He was married, in 1874, to Miss Emma Morton, who died on June 12, 1883, leaving one child, Maude.

HENRY SVERIN, alderman of the Sixteenth Ward and chief bailiff of the Criminal Court, was born in Marlow, Germany, on February 14, 1847, and is the son of William and Caroline (Wag-
HISTORY OF CHICAGO.

There is no history of the courts of Chicago, but only a brief account of the Bar and public authorities. The members of the Bar and public authorities were not all that had been in the city in their efforts to repair the losses and ravages occasioned by the fire. In a few days, a portion of the late Court House was hastily repaired, and made habitable for the Criminal and County courts. The United States courts found an abiding place on Congress Street, between Michigan and Wabash avenues; while the State courts occupied, for about a year, the High-school Building on the West Side. Some of these locations were three miles apart, and the inconvenience and difficulty of practice in the different courts by the same lawyer may well be imagined. It was a welcome day when the "Old Rookery," on the corner of LaSalle and Adams streets, was completed, and occupied by the State courts in January, 1872. The Republic Life Insurance Building, now known as the National Life Insurance Building, on LaSalle Street between Monroe and Madison, about the same time afforded somewhat better quarters for the United States courts. The new Criminal Court Building, on the North Side, was completed and occupied by the Criminal and County courts in 1873. Thus the several courts, within a year, were brought conveniently together, but nine years passed before the Bench and Bar of the city saw their desires realized in the occupancy of suitable and adequate rooms and offices, the necessity for which the fire only anticipated by a few years. The United States Government Building was occupied by the courts in May, 1886, and the new Court House in 1888.

The number of lawyers in the city in October, 1871, was six hundred and twenty-five. To this number an average of eighty have been added each year since that time; the greatest number having been one hundred and fifty in 1879, and the least thirty-five in 1873. At the present time the roll numbers one thousand six hundred and sixty-five. Of these a large quantity are simply ornamental, many of them having never practiced at all; others have retired; the larger number have only occasionally a case; so that, in fact, the bulk of business is in the hands of less than four hundred firms or individuals.

Interspersed with the various matters treated in the following pages, are individual sketches of members of the Bar in this city, many of whom were prominent actors in the cases cited as examples of peculiar litigation, and all having attained distinction in the profession.

The following table exhibits the number of suits commenced in the several courts during each year, since 1871:

</table>

From the foregoing table, it would appear that the law business has not kept pace with the other interests of Chicago. The greatest number of cases commenced in all the courts of this city (excluding the Criminal) in any one year since the fire, was 12,690 in 1874. From that period there was a gradual falling off in the number of suits brought, up to 1886, there being but 7,151 in 1879; and even now, although the number of lawyers has more than doubled, there are not as many cases commenced in the different courts in this city as there were ten years ago.

This decrease may be accounted for in various ways. The large number of suits brought in 1873 to 1876, inclusive, grew in part out of the re-building of the city,—the enforcement of mechanics' liens, etc. A number of causes which would have been litigated were settled in the bankruptcy court. Then came the shrinkage in values after the collapse of 1877, followed by such dullness in business as not to encourage those risks which result in the creation of litigation. To this may unquestionably be added, as additional reason for this decrease, the delays in court proceedings, as well as their expense and uncertainty. There appears also to be a growing disposition on the part of those having controversies, to settle their disputes individually, or to arbitrate without recourse to law.

There have been added to the courts of this city, since the adoption of the new Constitution in 1870, eight additional judges,—three to the Circuit Court in 1870, one Probate judge in 1877, and four Superior-court judges in 1885. Notwithstanding the number of judges have been more than doubled since 1875, they are not called upon to dispose of a much greater number of cases than at that time; and thus the delays, formerly unavoidable, do not now occur. Many old cases, especially in chancery, which were carried on the docket year after year, are now fast disappearing. New causes, it is said, may now be heard in the Superior Court, within six weeks after their commencement, and in the Circuit Court in three months.

While, as before stated, the principal portion of the business before the courts in this city is confined to less than four hundred individuals and firms, the amount of income of those whose business pays is likely to vary considerably from year to year. For instance, the income of one lawyer of this city, one year, was $67,000, while the next year it was only $1,000. Perhaps the
best average practitioner, doing a general business, does not receive, one year with another, over $10,000. Litigated cases, in which lawyers have an opportunity of exhibiting their powers to the public, as a rule pay the least; while lawyers who are employed by large corporations are paid the best, receiving salaries ranging from $4,500 up to $15,000, besides fees from outside business.

CRIMINAL COURT CASES.

The causes tried in the Criminal Court each year since the fire, ending with September 1st, are shown in the appended table. The "Quasi-Criminal" column includes cases of appeal, quo warranto, bastardy, etc., of which no results are given.

</tbody>
</table>

From the foregoing table it will be seen that the greatest number of indictments found in any one year was 1,439, in 1882. In 1878 and 1879, more bills were ignored by the grand jury than indicted. The greatest number of convictions in proportion to the number of indictments was in 1881,—fifty-seven per cent.; and the least number in 1879,—thirty-seven per cent. In 1874, more criminals were sent to the county jail than to the penitentiary; in every other year since, the greater number have been sentenced to the penitentiary—the greatest difference occurring in 1884, when three hundred and twenty-four were sent to the penitentiary and eighty-eight to the jail. The greatest number sent to the House of Correction and Reform School in any one year was two hundred and fifty-seven, in 1881; the least number one hundred and eleven, in 1879. In 1876, a greater number (three hundred and seven) of persons charged with crime were acquitted by the jury than were sentenced to the penitentiary (two hundred and two). In 1876, there were twenty-four instances in which the jury failed to agree—the greatest number; and in 1880, only five—the least.

CHANGE OF JURISDICTION.—In view of the situation after the fire, the Superior and Circuit Courts made the following order in regard to pending litigation:

"On the first Monday of November, 1871, the clerk of this court will commence a docket of all cases pending and undetermined in the civil side of the said court shall be commenced and disposed of in accordance with the laws of the State; and in suits which have been tried and judgment entered, all motions shall be overruled and judgment entered upon the verdict of finding."

F. W. TOUROTTELLOTE, the well-known lawyer of Chicago, a member of the firm of Eldridge & Tourotelle, which, for years, held so enviable a reputation among the legal firms of this city, comes of a noted Huguenot family which fled to the United States as a result of the edict of Nantes in 1687. The head of the family, Gabriel Tourotelle, is said to have been the son of a count, being affiliated to his subsequent wife in France. They were married in this country, and had three children, two sons and a daughter. He resided at Newport, and, with his eldest son, was lost at sea near that port. The remaining son, Abram, settled in Gloucester, where he owned many acres of land. His mother resided with him until the close of her life, and both are buried in Gloucester. From him have descended all the Tourotellos in this country. Jesse G. Tourotelle, the great grandson of Gabriel Berson, and father of Captain Daniel Tourotelle, of West Sutton, was a public man and a gentleman of a warm heart and benevolent disposition, which qualities were united with an iron will and unfaltering perseverance. These qualities have always marked the lives of the Tourotellos as a family. Captain Daniel Tourotelle married with a descendant of Thomas Angel, who emigrated from England with William, and was one of the pioneer and most prominent settlers of Providence. Probably the most conspicuous among the French settlers in Massachusetts and Rhode Island was Gabriel Berson, born in 1644 of an ancient family of Rochelle. Among the refugees, he landed in Boston in 1688, where he engaged in various mercantile pursuits with Peter Fannell, his brother-in-law, and of blessed Fannell Hall memory. The maternal relatives of the family branch, to which the Chicago Tourotellos belong, are descended from the union of Gabriel Berson's sister with Peter Fannell; the paternal relatives are descended from the marriage of Captain Daniel Tou-
HISTORY OF CHICAGO

tellotte with the descendant of Thomas Angell. Mr. Tourtellotte, a worthy descendant of such noted families, was born on January 10, 1837, in Thompson, Windham Co., Conn. His education was gained from the institutions of the country, his preparatory studies being in the schools of Providence. After leaving Brown University, he commenced to lay the foundation of his profession in the Albany district, graduating from that institution and being admitted to the bar at the early age of twenty-one years. Being ambitious, however, and full of energy and determination, the West had the usual attractions for such a young man, and he, therefore, removed to the young city of Chicago the next year after graduating. Previous to his arrival here, and while still a student in the law school, he had virtually formed a partnership with his old friend, Hamilton N. Eldridge, who was several years his senior. This partnership continued until the death of General Eldridge on November 27, 1852, and the firm of Eldridge & Tourtellotte stood during this period for all that was honorable, solid and safe in the domain of legal practice. Since the death of the senior member, Colonel Tourtellotte has continued to maintain and increase his standing as a lawyer, numbering himself among the foremost and most successful of his profession, especially in technical cases. Although opportunities have not been wanting, he has steadfastly refrained from mixing with politics. As an officer in the War, Colonel Tourtellotte acquired himself with credit, he with his partner being entitled to the honor of raising the 12th Illinois Infantry. General Eldridge having been himself early in the service of the Army, Mr. Tourtellotte was obliged to return to the care of their extensive and important practice. Colonel Tourtellotte was born February 9, 1846, to Miss Julia Isabella Tourtellotte, daughter of Dr. Edward Judson, a wealthy and prominent citizen of Chicago. They have one child—Frederick Judson.

George W. Brandt, of the firm of Brandt & Hoffman, was born in the county seat of Windham Co., September 14, 1837, the son of Daniel R. and Eliza (Wilson) Brandt. In 1852, he came with his father's family to Chicago, received his literary education in the State University, studied law with Richard T. Merrick, was admitted to the bar in 1857, and immediately commenced the practice of his profession. In 1857, he associated with himself Francis A. Hoffman, Jr., and the firm has since continued, gaining by straightforward and well directed ability a well merited practice. Mr. Brandt has also gained a reputation as a legal writer—his work on "Suretyship and Guaranty" being an admired authority among the members of his profession.

Francis A. Hoffman, Jr., son of Hon. Francis A. Hoffman, was born at Addison, DuPage Co., Ill., on December 26, 1845. When six years of age, he came to Chicago with his parents, and, after receiving a thorough private education, entered Wheaton College at the age of thirteen, graduating from Knox College, Galesburg, when seventeen years old. He next took the master's degree at the University of Michigan, after which he studied law under the guidance of J. M. Cottrell & Jackson, and graduated from Harvard University in 1866. During the same year he was admitted to the Bar of the State of Michigan and Illinois, and, since April, 1867, has been connected with his profession in Chicago. His first partnership was with Judge McAllister, which was dissolved when the latter was elected judge of the Recorder's Court. He afterward became a partner in the firm of Harris, Hall & Hoffman, and since 1875 he has been the senior member of the firm of Brandt & Hoffman.

Michael M. Miller was born at New Castle, County Limrick, Ireland, and came to this country with his father and mother, who died soon afterward, leaving him an orphan when seven years of age. In September, 1863, he arrived in Chicago, and after engaging in various occupations, he commenced the study of law. In 1866, he was admitted to practice; and, in 1871, had become so popular in the republican party, that he was elected town clerk of West Chicago, on the "fire-proof" ticket, of which Joseph Monsey was the head. In 1872, Mr. Miller formed a partnership with John Mason, one of the most noted criminal lawyers of Chicago, whose connection continued until the spring of 1874, when, he retired temporarily, from practice, in consequence of impaired health. In the fall of this year, Mr. Miller was elected to the Legislature on the republican ticket, having two years previously declined a nomination. In 1875, he became a convert to the principles of reform democracy, and during the Tilden campaign vigorously upheld his cause. Two years later, he decided to abandon politics, and devote himself to his profession. His practice is of a general nature, although he stands most prominent as a criminal lawyer. In early times Mr. Miller was an uncompromising abolitionist, and afterward a staunch republican, therefore, when his first daughter was born in 1871, upon the announcement of the adoption of the fifteenth amendment, he named her "Africa," despite the protests of his friends and relatives. He married, in 1870, Kate Scanlan, a daughter of Judge Scanlan, a prominent republican politician. The firm of Tourtellotte & Hoffman, and that of Brandt & Hoffman, have been in existence longer than any other law firms of Chicago. They are both of the old families of the city, and can always be depended upon in any case, however large, and however important.

Franklin P. Simons was born in New York City on September 15, 1833. His father, Nelson P. Simons, was at one time cashier in the Merchants' Bank of New York, and, coming to Chicago at an early day, managed the first amphitheatre in the city, which was then located near the site of the present Court House. Mr. Simons was born in the year 1845, and, after receiving a liberal education at the University of Michigan, commenced the study of law under the guidance of his uncle, the late Judge Scates. He was admitted to the bar in the year 1867, and, from that time has practiced alone, doing a general law business.

William J. Hynes was born at Kilkee, County Clare, Ireland, on March 31, 1845, and is the son of Thomas Hynes, formerly architecht, builder and superintendent of public works in that locality. His father died in 1848, and a few years later, his mother, Catherine (O'Shea) Hynes, emigrated with her family to America, arriving in New York on November 15, 1853. They settled at Spring- field, Mass., where William J. attended school until, in 1855, by reason of his mother becoming an invalid and his desire to assist in her support, he entered the office of the Springfield Republican, where he served as an apprentice to a printer. He became a student of the evening schools of the city and of private instruction, and, during his time being employed with his schoolmates, he studied Latin and Greek in private. In 1870, his mother died, and he soon after commenced the practice of law. Since that time he has practiced alone, doing a general law business.
From 1860 to 1866, he held the office of county attorney, was mayor of the town in 1867, and in 1869 removed with his family to St. Joseph, Mo., where he was appointed county attorney for Buchanan County, remaining in that office two years, when he was repeatedly urged to run for Congress, and was tendered the appointment of United States attorney for the Western District of Missouri, but declined all these honors. He next devoted himself to practicing at his profession, having established his character, which had been continually broadening since, in 1860 and 1864, he labored with all the energy of his nature for Abraham Lincoln and the Union cause, and the capture of the county-seat of the Western Missouri counties.

He was a native of Abass, settling in Massachusetts previous to the Revolutionary War. His father, Charles Kettle, was born at Boson, Mass., and married Lucinda Dickinson, of Hadley, Mass. In 1835, he settled at Peoria, Ill., where, on December 18, 1838, George H. Kettle was born. After completing his preparatory course and reaching the age of 18, he was admitted to the Bar, and at once formed a partnership with him under the firm name of Everett & Everett.

George H. Kettle is of French descent, his great-grandfather being a native of Abass, settling in Massachusetts previous to the Revolutionary War. His father, Charles Kettle, was born at Boston, Mass., and married Lucinda Dickinson, of Hadley, Mass. In 1835, he settled at Peoria, Ill., where, on December 18, 1838, George H. Kettle was born. After completing his preparatory course and reaching the age of 18, he was admitted to the Bar, and at once formed a partnership with him under the firm name of Everett & Everett.

John C. Everett, the son of William S., was born in Chambersburg, Penn., on March 6, 1802. He removed with his parents to St. Joseph, Mo., in 1817, and attended the University of Chicago, and graduated from the University College of Law in 1854, taking the prize for his essay on "The Punishment of Crime." After reading law with his father, in June of that year he was admitted to the Bar, and at once formed a partnership with him under the firm name of Everett & Everett.

The Appellate Courts have appellate jurisdiction only; and this on all matters of appeal or writs of error from the final judgments, orders or decrees of the Circuit Courts or the Superior Court of Cook County, in any suit or proceeding at law or in chancery, other than criminal cases and cases involving a franchise or freethold or the validity of a statute. Appeals and writs of error lie from the final orders, judgments or decrees of the Circuit or City Courts and from the Superior Court of Cook County directly to the Supreme Court in all criminal cases, and in cases involving a franchise or freethold or the validity of a statute. In all cases determined in the Appellate Courts, on actions ex contractu, wherein the amount involved is less than $1,000, and in all cases sounding in damages, wherein the judgment below is less than $1,000 (exclusive of costs in both instances), and the judgment is affirmed or otherwise finally disposed of in the Appellate Court, the judgment, order or decree of this court shall be final. In all other cases, appeals shall lie and writs of error may be prosecuted from the final judgments of the Appellate Court to the Supreme Court. A majority of the judges, may, however, if they be of opinion that any case is decided by them, involving a less sum than $1,000, also involves a question of law of such importance that it should be passed upon by the Supreme Court, grant appeals and writs of error to the Supreme Court, on petition, in which case they shall certify to the Supreme Court the grounds upon which the appeal is granted.

The first assignment of appellate judges was made by the Supreme Court at the September term, 1877. Those appointed for the First District (Cook County) were W. W. Heaton, George W. Pleasant, and Theodore D. Murphy. Judge Heaton died in 1878, and was succeeded by Joseph M. Bailey. By a second assignment, made in June, 1879, Joseph M. Bailey, Isaac G. Wilson, and William K. McAllister became appellate judges for Cook County. Subsequent assignments have not disturbed the personnel of this court.

There being no building for the Appellate Court, rooms were at first rented and the courts held in the
HISTORY OF CHICAGO.

Grand Pacific Hotel. Rooms are now rented by the State, for court-room, library and clerk's office, on the fourth floor of the Chicago Opera House, corner of Clark and Washington streets.

PROBATE COURT.

This court, in pursuance of the provisions of section twenty of article six of the Constitution of 1870, was established by Act of the Legislature of 1877. Hon. Joshua C. Knickerbocker was elected judge at the November election of 1877. His time having been extended by law one year, he was re-elected in November, 1882. S. F. Hanchett was elected clerk in 1877; and he was succeeded by Thomas W. Sennott in 1882.

The status of this court was early brought in question, and several decisions of the Supreme Court have been required to settle the controversy. The circuitous and halting manner in which results have been arrived at by the Supreme Court regarding this court is remarkable, not only for divided opinions but for their mode of enunciation.

The first question raised, was the constitutionality of the Act providing for the establishment of Probate Courts in counties of seventy thousand inhabitants and over. On one side it was contended that the Legislature ought to have provided for Probate Courts in each of the counties having a population of fifty thousand and over, or in none of them; while, on the other hand, it was asserted that the authority to establish could be exercised in any county having the requisite population. To bring this matter to an issue, an information, in the nature of a writ of quo warranto against the judge, was filed in the Criminal Court in February, 1882, upon which a judgment of ouster was rendered. From this decision an appeal was taken to the Supreme Court, which, at the March term, 1882, reversed the judgment of the Criminal Court, sustaining the constitutionality of the Act, and directed that the information be quashed. Justices Scott and Walker dissented from this opinion.

The next question requiring to be adjusted arose out of a conflict of jurisdiction between this and the County Court. Judge Knickerbocker assumed the position that, under the Constitution, when the Probate Court was established, the County Court in such county was deprived of its jurisdiction in matters of probate and in all other matters over which Probate Courts are given jurisdiction, and that there could not be concurrent jurisdiction between the two courts in the same county, that of the Probate Court being exclusive. This opinion was confirmed by the Supreme Court in Knickle vs. Dodge. The opinion in this case was delivered by Justice Scott. The question to be decided was, whether or not the Act of July 1, 1881, extending the jurisdiction of County Courts in counties in which Probate Courts are established, was constitutional. A majority of the court decided that it was not. In giving his opinion, the judge argued, as the ground of it, that in counties having Probate Courts, County Courts had concurrent jurisdiction with those courts in probate matters. In these views only two other members of the court acquiesced. Thereupon Judge Mulkey filed a separate opinion, taking the ground that, "upon the establishment of a Probate Court in a particular county, the County Court of such county is at once, by operation of law, deprived of its jurisdiction in matters of probate and in all other matters over which Probate Courts are given jurisdiction; that there could not be concurrent jurisdiction between the two courts in the same county, that of the Probate Court being exclusive. In my opinion, justices Craig, Dickey, and Sheldon concurred, which being a majority of the Court made it the decision thereof."

This same question was again brought more directly before the Court in the case of Messrs. Craig, Dickey, et al. vs. Delaney, when the Court again decided that the jurisdiction of the Probate Court, as conferred by statute, to order the real-estate of minors to be sold at a guardian's sale, be upheld," on the ground that it is a "probate matter."

In the case of Rosenthal vs. Prussing, in which Judge Knickerbocker decided that a public administrator is not, by virtue of his office, entitled in all cases to administer on estates of non-residents, and that a creditor of such estate has preference over him, his opinion was sustained by the Supreme Court, the case having been appealed to the Circuit, Appellate and Supreme courts.

The only case thus far in which the decision of this court has been reversed was the somewhat noted one against J. Charles Haines for contempt. As questions of great interest are involved, the facts in that case are presented. The plaintiff in error (Haines) being in arrest, as administrator with the heirs of J. H. Schulten-berg, in the sum of $651.20, entered into the following stipulation:

"It is hereby stipulated that the account on file and approved in said estate, on August 8, 1879, showing a balance of $651.20, in the hands of said administrator of said estate, stands for and in lieu of a final account, and that an order be entered directing said administrator to pay said balance so found in his hands, less the costs of final settlement, to the several parties entitled thereto, within the time provided by statute, thirty days from entry of order, and that no further demand be required by said administrator."

Upon the filing of this paper, the Court made an order approving the same, and directing the administrator to pay the amount to the heirs within thirty days; and that upon his filing their receipts for their respective shares he should be discharged. On the 13th of January following, the Court, after reciting the foregoing facts, entered an order directing that an attachment be issued against the said administrator, requiring him to be brought before the Court, and to answer for a contempt in failing and refusing to comply with the requirements of said order. Haines was arrested, and appeared in Court. The case was continued until the following day, when it was ordered "that the said J. Charles Haines be committed to the common jail of Cook County, Ill., until he shall comply with the requirements of an order made and entered of record December 8, 1879, or until the further order of the Court." The case was taken to the Supreme Court on a writ of error. The following is the opinion of that Court:

'A writ of error lies in this State from either this or the Appellate courts to all inferior courts of record, for the purpose of reviewing their final determination in all cases involving property rights or personal liberty, when no appeal is given from such inferior courts of record to some other intermediate Court or to this Court by force of the common law. * * * Before the Probate Court is warranted in making a commitment in any case under section 144, chapter 3, Revised Statutes, it must appear, among other things, that the administrator has failed or refused to pay over the moneys in his hands to the person or persons entitled thereto, in pursuance of the order of the court, within thirty days after demand made for such money. The demand is one of the necessary elements that enters into the offense, and it
can not be dispelled with, or even waived by the administrator."

Mr. Harter, therefore, won his case.

JOSHUA C. KNICKERBOCKER, judge of the Probate Court, has been a resident of Chicago for over a quarter of a century. His father, David, was one of the pioneers of McHenry County, Ill., from which locality the family removed to this city when Judge Knickerbocker was only two years of age. Here he attended school and law, and was admitted to practice before the Supreme Court, in March, 1862. In 1867, J. J. Knickerbocker joined him as a partner, and previous to the fire, they had obtained a good general practice, their fire destruction the library of volumes which had "burned them out" completely—but they renewed their professional labors with unabated vigor. Judge Knickerbocker served as a member of the Board of Education, 1857; was alderman from the First Ward to 1859, and his long official service has given him a high general satisfaction. In 1868, he was elected to the XXVth General Assembly. Here he acquitted himself so creditably that, in 1869, the Republican Convention, nominating him, by acclamation, for probate judge, but the entire ticket was defeated. In 1875, he was appointed as a member of the State Board of Education, to fill the vacancy caused by the death of John M. Foster, being re-appointed in 1877, for a term of six years. In October, 1877, he was chosen Prostate Judge, and at that time his law partnership was dissolved. Judge Knickerbocker organized the present Probate Court in December of that year, under the provisions of an Act of the General Assembly, their sheriff, John H. Shaw, being the previous April, in the office of Probate Judge, was re-elected, and has, at present, jurisdiction over some of the most important and intricate questions which come up for settlement in the county—the estates of minors, lunatics, spendthrifts and drunkards. Judge Knickerbocker was born in Genesee County, N. Y., on September 26, 1837. His ancestors, for several generations, had been natives of Columbia and Dutchess counties, N. Y. In 1844, he removed to McHenry Co., Ill., where he lived as a farmer, and died there in February, 1874. In August, of the same year, his wife followed him. Judge Knickerbocker was educated in the common schools and academy at Green, where he also taught school for a time previous to coming to Chicago.

THOMAS W. SENNERT was born at Cincinnati, Ohio, on June 3, 1837, and early in his education in the schools of that city, and also attended St. Xavier College, from which institution he graduated in 1857. He deemed it expedient to add to his knowledge a practical trade, and therefore commenced to learn the business of carriage-making, during the period of his residence, in which he came to Chicago, on July 9, 1869. He was then employed three years as a carriage-builder in the factory of John V. Kilne, and for some time afterward was with the Northwestern Horse-Nail Manufacturing Company. He is now a remarkable political worker, being prominent as one of the most indefatigable and zealous republicans of that district. He was chief bailiff of the city courts of Chicago and General O. L. Mann. In 1880, he was nominated on the republican ticket for city recorder, but was defeated, although he ran five thousand ahead of his ticket. In 1882, he was nominated on the same party ticket for the presidency of the Board of Education; for a term of four years. His un-protesting acquiesce and the genial cheerfulness of his disposition, together with his prominent ability, admirably fitted him for the position he occupies. He was married on July 10, 1853, to Miss Margaret Powell, daughter of Edward Powell, one of the oldest settlers of this city.

FRANK B. LANE, son of James Lane, one of Chicago's oldest and most respected citizens, and chief deputy in the office of the clerk of the Probate Court, was born in this city on February 4, 1850. He attended school at the University of St. Mary's of the Lake, from whence he graduated in 1866. During the war he enlisted as company clerk in the 23d Illinois Volunteer Infantry, Colonel James A. Mulligan commanding. He was discharged in September, 1865, and returning home entered the employ of the Chicago and Northwestern Railway Company as special agent. Having a fondness for activity and excitement, he joined, however, the Chicago Fire Department in 1868, as a member of "A. D. Truesworth Engine Company No. 13," whose foreman was then Maurice W. Shab, now a prominent fire-marshal. For five years, Mr. Lane followed his profession over the city, and during the memorable October 8-9, 1871. Two years later he resigned to engage in mercantile occupations, entering the service of John W. Colburn, dealers in dry goods and hardware, which position he still occupies. He remained until 1875, when he began to work in the capacity of a bookkeeper in the Chicago Hardware Company, and has continued to the present time in the same capacity. In the fall of 1884, Mr. Lane was made a member of the Board of Directors, at the recent election, and was re-elected by a large majority. He has always been a zealous supporter of the Republican party, and has taken an active part in the political affairs of the city. He was married, on December 1, 1883, to Miss Mattie Ford, daughter of Mr. and Mrs. A. F. Ford, residents of that city. Mr. Lane is a member of the St. Julian Lodge, Knights of Pythias; Apollo Lodge, No. 139, A. O. U. W.; Stephen A. Douglas Council, No. 642, Royal Arcanum; and the Knights of Labor. He was married in October, 1875, to Annie M. Riew, of Chicago. They have four children—one girl and three boys.

WILEY S. SCRIBNER, the present record-keeper of deeds of Cook County, was born at Jacksonville, Ill., on September 6, 1840. Although he had scarcely reached his majority, he joined the 10th Wisconsin Infantry, having removed to Fair Play, Grant Co., after serving three years as a private, he was appointed aide-de-camp on General Ewing's staff, and subsequently served as brigade quartermaster, with the rank of first lieutenant. He participated in the battles of Shiloh, Corinth, Iuka, Holly Springs, siege of Vicksburg, Kenesaw Mountain, Atlanta, and the march to the sea. In 1866, he was elected to the Wisconsin Legislature. Declining a renomination, he was appointed postmaster at Fair Play, conducting also a general mercantile establishment. This retired life, however, was not suited to the energy and ambition of his character. The next year he started for Helena, Montana, where he soon became connected with the Daily Herald, first as business manager and then as city editor. In the spring of 1869, and within a year from his arrival in the Territory he was appointed its secretary, and upon the outbreak of the Civil war, in 1861, was appointed colonel on the staff of Governor Smith, being assigned to command the district of Helena. Coming to Chicago in 1873, he entered the law office of Isham & Lincoln, remaining there one year, and in 1874 served as a delegate to the National Assembly, where he was president of the Illinois Delegation. In 1875, he was a member of the Chicago Union League Club, and was its president for one year. He is also the president of the Chicago Veteran League and a member of Post No. 28, G.A.R. He takes an active part in all movements that aid the republican party both on the stump and as an effective worker. Mr. Scribner was married at Madison, Wis., on May 16, 1879, to Miss Mary L. Keenoh, a daughter of General Thomas Reynolds of that city. They have an adopted daughter, Annie Marie Nyhan, eight years of age.

JUSTICES OF THE PEACE.

By the Constitution of 1870, it was provided that all justices of the peace in the City of Chicago

shall be appointed by the Governor, by and with the advice and consent of the Senate (but only upon the recommendation of a majority of the judges of the Circuit, Superior and County Courts): and for such districts as are now, or shall hereafter be, established, by law, they shall hold their offices for four years and until their successors shall be commissioned and qualified: and their vacancies shall be filled by appointment of the Governor, and removed by summary proceedings in the Circuit or Superior Court for extortion or other malfeasance."

GEORGE KERSTEN, police justice of the North Side, was born in Chicago on March 21, 1853. In 1850, his father, Joseph Kersten, came from Mecklenburg, Germany, to this country, and for four years conducted a successful tailoring establishment. He died in 1859, and for the next ten years engaged in various commercial pursuits. His first public office was the clerkship of the Police Court, to which he was appointed in 1880. In the spring of 1883 he became justice of the peace, and in October of the same year Mayor Harrison appointed him police justice. Justice Kersten is a member of the Masonic fraternity, of the Independent Order of Foresters and of the Knights of Pythias. He is one of the most prominent marksmen of the Northwest, having been the first master of the Northwestern Shooting Bund, and for fifteen years has been a member of the Chicago Sharpshooters' Association, of which he also has been master. He was one of the founders of the Swan Lake Gun Club, whose grounds are in Marshall County. Mr. Kersten was one of the originators of the Cook County Democratic Club, of which he has been secretary since its organization. A portion of the time he has also served as its president. In 1884, the German-American Cook County Club came into being, largely through his efforts. He is also connected with the Policemen's Benevolent Association. He was married, on September 14, 1875, to Julia, daughter of Adam Bailer, one of Chicago's early settlers. They have one child,—Walter George.

LOUIS KISTLER was born on June 25, 1835, in Strassburg, Germany, the son of Adam and Mary Kistler. His father was a brave soldier in the Napoleonic wars, and died in 1845 from the effects of wounds and exposure. At ten years of age, therefore, Louis was left virtually alone, his mother being in no position to
assist him. The next year he came to this country, and settled in Rochester. He immediately set to work to earn his living, mastered the French language, and was engaged to pursue a chemical study at the University of Paris; from which he graduated in 1854. He then became a member of the French Academy at Paris, and in 1861, was appointed Professor of Greek and Latin, and, afterward, as a member of the House of Representatives, senator, and member of the French and Smithsonian Institutes, and as the highest official of a great national event that has rendered the name and fame of our country a household word among the great and learned nations of the civilized world, commands most truly our confidence and respect.

During his long and honorable public service given to the country, he has not been destroyed by fire and water he has repaired his fortune. His stanch character and abilities have made him a recognized leader among the German-American race in Chicago. He is president of the Chicago University; and his extemporaneous speech of welcome to James G. Blaine, at the Grand Pacific Hotel, on September 25, 1853, is among the political "gems" of the campaign. It is here given, as a model of its kind:

"Mr. Blaine—We are pleased to meet you. As men coming from the various walks of life, and representing the German-American republicans of Chicago, the metropolis of the Northwest, we extend to you a most cordial greeting. We are acquainted with your career, and in it are the marks of your personal and public life. Being zealous of our own personal liberty in the country of our choice and adoption, and being fully identified with its great and varied interests, we hail you as the great leader and champion of our aspirations. Your earnest and persistent advocacy of protection to the great industries of our own loved land, far dearer to us than the land of our fathers; your broad statesmanship; your love of personal liberty, and all these inspire as in the belief that your administration of the National Government will be the beginning of a new era in our national growth and prosperity. You, sir, and our gallant General John A. Logan, are the chosen leaders in this grand march of our national prosperity. You have our heartfelt support. Please accept our presence as an indorsement of your life, character, and public services. In the name of the German-American republicans of Chicago we bid you a most hearty welcome to the queen among the lakes.

In May, 1853, Mr. Kistler was appointed justice of the peace for the Town of North Chicago, which he still holds, and still retains most of his previous practice, and is in continual demand as a counsel-at-law. He is connected with the Masonic and fraternal orders, Royal Council, Knights of Honor and Royal League. In 1861, Mr. Kistler was married to Miss Frances Dow, of Boston. Of their five children but one is living, — Theodora, who, although but fifteen years of age, is said to be a fair child. HAWKINS, of the principles of law.

Peter I. Hawkinson, justice of the peace of North Chicago, has held this office for eighteen years. Born at Christianstad, Sweden, on June 19, 1826, he worked on his father's farm until he was twenty-six years of age. He was educated in the common schools of his native town, and during the latter years of his residence there did considerable business in administering estates. In 1852, he came to Chicago, where he was employed as a carpenter in the Galesburg, Ill., where, at the occupation of a carpenter, and there he became a public officer, that of street commissioner. In February, 1863, he came to Chicago, having obtained a position with the Illinois Central Railroad as an examiner in the land department; and in the spring of 1864, he was appointed assistant justice of the peace. In the fall of 1864, he became a justice of the peace. He relinquished his business connection with the land department, and, in 1871, under the provisions of the new Constitution, resigned his office in order that he might continue his duties as justice of the peace. Mr. Hawkinson has given general satisfaction in this position, being among the most popular judicial officials in the country. He was married at Galesburg, Ill., to Corinna Lawrence, who died six years thereafter. He has one adopted daughter.

Charles Arnd, justice of the peace of North Chicago, was born at Bernhard's Bay, Oswego Co., N. Y., on June 26, 1855. His father, Frederick, was, when a young man, in the German army, and, during the War of the Rebellion, served in the 1st New York Cavalry, and subsequently as lieutenant in the 22nd Regiment. Lieutenant Arnd was captured during Wilson's raid in the Shenandoah Valley, and suffered in most of the Southern prisons, being one of the few survivors of the forty-two prisoners taken at that time. After being educated at the public schools, Charles Arnd graduated in 1871, from Haverling Free Academy, at Bath, N. Y., and from Ambrose College in 1875. During the next two years he studied in the universities of Berlin and Heidelberg, Germany, and the University of Paris. He became a fine German and French scholar, traveling over Europe and obtaining a useful fund of cosmopolitan information. In 1877, he returned to Bath, and commenced the study of law, being admitted to the Bar at the first Appellate Court at Chicago, in April, 1878. He at once began practice, which he continued until appointed justice of the peace, in December, 1880. Justice Arnd, as secretary of the Auxiliary Club, organized in 1878 to purify local politics, obtained something more than local reputation. He was the only justice re-appointed for North Chicago in 1883, and his youthful appearance, as well as his acknowledged ability, have drawn much attention.

Charles J. White, police justice of the Third District, was born at Dublin, Ireland, on August 12, 1854. On June 11, 1854, he arrived in Chicago with his parents. Owing to a serious accident in early boyhood, he was able to attend school but two years, and his subsequent education was attained by his studies at home. When sixteen years of age he engaged in the stationery and printing business with his father, W. J. White, one of Chicago's pioneer engravers. In December, 1879, Justice White entered the city collector's office as an assistant. In the spring of 1879, Mayor Harrison appointed him the first assistant, or deputy collector, which he held until the first of August, 1882, when he was made assistant city treasurer under Rudolph Brand. At the expiration of Mr. Brand's term, he obtained a position in the county treasurer's office; but being appointed by Governor Hamilton of the peace for the town of West Chicago, he resigned the former. Mayor Harrison appointed him police justice of the Third District, with headquarters at the Desplaines-street Station. Since filling this position the records of the Police Court show that the number of cases disposed of by him exceeds ten thousand a year. Justice White is a member of many organizations of a political, social and charitable nature.

He was one of the original committee to organize the Cook County Democratic Club, and was its chairman for several years. He is also a member of the Irish-American Club of the Union Catholic Library Association. Mr. White was married, on September 22, 1886, to Miss Emma L. Blum. They have two children: Anna Louise and Charlotte Frances.

PROMINENT CASES.

THE BURNED-RECORD LAWS.—At a joint session of the judges of the courts of record of the city, on October 31, 1871, the draft of a bill to make provision for lost or destroyed records was discussed and submitted. Before action by our State legislature, however, Congress, in March, 1872, passed an Act "to restore the records of the United States courts in the Northern District of Illinois." On March 19, 1872, our State legislature passed a law providing "for the restoration of court records which have been lost or destroyed," and on April 6, 1872, passed an Act "to remedy the evils consequent upon the destruction of any public record by fire or otherwise," which was subsequently amended by Act of March 4, 1874. This latter Act came up for construction by the Supreme Court in the case of Smith v. Stevens et al., in which the Court remarks:

"We do not think the objections taken to this abstract are well founded. The abstract was offered under the Act to remedy the evils consequent upon the destruction of any public record by
THE CONDITION of property-owners in Chicago, after the great fire of October, 1871, was appalling, demanding legislative interference. A great evil had befallen them, which this Act was designed to remedy. It is emphatically a remedial Act, and, in accordance with a well-established canon, it must receive a liberal construction, and be made to apply to all cases which, by a fair construction of its terms, it can reasonably be made to reach."

A suit in chancery was brought under this Act, in 1874, praying for the confirmation of title to the western half of the northwest quarter of Section 30, in Township 40, North of Range 14 east, valued at $120,000, by Robert W. Robinson against John Ferguson. The Supreme Court, to which it was appealed from the Superior Court, decided "that where a petition is filed under the statute known as the Burned-Record Act to establish and confirm the title to land, the court is authorized to decree in favor of the better title, in a case of dispute as to the ownership."

A noted suit, involving this law and the practice under it, was that of John I. Beveridge (formerly sherif of Cook County) against A. L. Chetlain, administrator of Martin O. Walker, in the Circuit Court before Judge Rogers. The facts in the case were as follows: In October, 1868, one Oliver Smith, being about to commence an action against George Aylsworth for false imprisonment, filed his affidavit as required by statute, and served a writ of capias ad respondendum, upon which Aylsworth was arrested and held to bail. He thereupon executed to the sheriff (Beveridge) a bail-bond in the penal sum of $3,000, with Martin O. Walker as his surety. While this suit was pending and undetermined, the files and records in the case were destroyed by the fire of October, 1871. Afterward the plaintiff filed a petition under the Burned-Record Act, to have a certain portion of the records in said suit restored; and upon notice to Aylsworth, an order was entered restoring the affidavit, declaration and pleadings. A trial was afterward had, resulting in a judgment in favor of plaintiff for $6,000 and costs. Upon the judgment an execution was issued, and returned unsatisfied. Subsequently, a capias was issued against Aylsworth, and returned non est inventus. Pending these proceedings, Walker, the surety on the bail-bond, died, and, after the return of the last-mentioned writ, a claim against his estate was filed in the County Court, to charge him with the liability on said bond. On the hearing of this case the County Court found the issues for the administrator. From this decision the claimant appealed to the Circuit Court, in which, also, the case went against him. He then took the case to the Appellate Court. This court, among other things, decided that "The relief afforded to parties under the Burned-Record Act is not exclusive, but cumulative, upon the rights and remedies existing independently of its provisions. Where a judicial record is shown to be lost or destroyed, resort may be had to secondary evidence to prove its contents. Notwithstanding some portions of the record were restored under the provisions of the Burned-Record Act, secondary evidence of other portions not so restored may still be given."

The judgment of the Circuit Court was reversed, and the cause remanded.

Prior to the Burned-Record Act, the courts held that an application to restore lost files in a case is addressed to the discretion of the court (59 Ill., 259). Neither would equity entertain a bill to restore a lost record (62 Ill. 351). "The whole record should be substantially restored. Cause should be shown for the omission of part" (Kehoe vs. Rounds, 69 Ill. 351.)

In the District Court of the United States, under a petition for the restoration of a lost record, Judge Blodgett held that proceedings to restore records in that court must conform to the Act of Congress, and that the State statute did not control.

JOHN W. WAUGHOP was born on April 25, 1823, at Portsmouth, Va. His father (James F. Waughop) served in the war of 1812, and contracted to build the first railroad in Virginia, from Portsmouth to Roulkoke, and was made the second postmaster of that issue in the United States. The family settled in Tazewell County, Ill., in 1835. The subject of this sketch came to Chicago in 1834, with his parents. He attended the city school, working thereby supporting himself and paying for his education. He entered the law office of Spring & Goodrich in 1846, where he remained two years and was then admitted to the bar. In the fall of 1848, he married Ellen, a daughter of Bigelow, a celebrated lawyer. After this event he commenced the practice of his profession, and has been in active and successful practice ever since. He was elected superintendent of schools of Cook County in 1854, and re-elected to that office in 1856. He has always taken an active part in the affairs of the Methodist Church in Chicago. Mr. Waughop is an active republican, was president of the Third Ward Republican Club during the Garfield campaign, and zealously supported Blaine and Logan in the campaign of 1884. He served with marked ability as bank commissioner under Governor Yates. He was in the State Convention that nominated Mr. Illsley for governor. He is a able lawyer and an excellent citizen; has been prominently connected with public improvements; and is a friend of education. He has a family of five children living,—James F., Arthur B., Caroline H. (now Mrs. R. M. Ware), Nellie and Winnie B. Waughop.

Blodgett was in the law office of Howland and Thompson, attorney and congressman, and is the son of Luther and Grace (Howland) Thompson, and was born at Heath, Franklin Co., Mass., on September 8, 1827. He is of New England descent, his ancestors being among the early settlers of Massachusetts, and one of them, John Howland, came over in the Mayflower, and was one of the assistant governors of the Plymouth Colony. Mr. Thompson prepared for college at Williston Seminary, and graduated at Amherst College in 1850. He worked in Monson Academy and principal of Deerfield Academy. He studied law in Springfield, Mass., and was admitted to the Massachusetts bar in 1853, and was for a time assistant editor of the Springfield Republican. He came to Chicago in 1854, and has since been engaged in the practice of the law. In 1856, he was associated with Henry W. Bishop, and the firm of Thompson & Bishop was for some time the oldest law firm in Chicago. Mr. Thompson has been engaged in many important cases. He was the attorney of the contractors in the case of McAleey vs. Carter (22 Ill. 53), in which was established the binding effect of the superintendent's certificate in building contracts. He was the attorney for the importers in several important suits involving the construction of the United States Revenue Laws; and in Smith, U. S. Collector, vs. Field et al. (105 U. S. 52), he succeeded in a closely contested case in regard to the duties on tar in several cases. He was appointed by the court in 1871, against stockholders of insurance companies, and in one of them (Barkett vs. Plankington et al., 103 Ill. 373), one of the most important decisions was made as to the liability of stockholders. In the summer of 1856, Mr. Thompson was the historical address at a centennial celebration of his native town, which has been published and has received high eonimmunities. Mr. Thompson married, on December 15, 1850, Dolly A. Benjamin Carver, a prominent citizen of Chicago, and has three sons.

IRA WARREN BUELL was born at Lebanon, Madison Co., N. Y., on December 9, 1839, and is the son of Elijah and Polly (Higgins) Buehl. He received his early education at Hamilton Academy, and taught school from his sixteenth to his nineteenth year, when he entered Madison University, at Hamilton, N. Y. After completing a full classical course in that institution, he studied law in the office of Charles H. Mason, then judge of the Supreme Court of New York; afterward pursued his studies with Judge Humphrey, at Rochester, N. Y., and was admitted to the bar at that place in September, 1859. There he engaged in practice, and removed to Chicago in April, 1856. In 1860, Mr. Buehl was elected supervisor of North Chicago, and during the next year became city attorney. The nomination of judge of the Circuit Court of Cook County was made him in 1861, and he was elected both by a committee of republicans and democrats, but he declined the honor. He was also president of the republican convention which nominated Mayor John B. Rice the first time, and of the congressional convention in which Chicago and Wallack were nominated as congressman. It will thus be seen that Mr. Buehl's influence extends far outside of his profession, although in chancery practice, in insurance and in the law, he is held in high rank. He is one of the oldest members of the Law Institute. He also stands high in the Masonic fraternity, having been a past-master of Blaney Lodge, No. 271, A. F. & A. M. He was married on December 25, 1858, to Mary A. Gilbert, born December 19, 1845, and to Anna M. Averill, daughter of Captain James Averill, an
old and respected citizen of Chicago. They have one daughter—Bessie A.

Henry C. Ballard was born at Smyrna, Chenango Co., N. Y., on April 8, 1830, removing to Castile, Genesee Co., N. Y., with his parents, when he was quite young. In 1844, his parents, Luther W. and Rachel (Randall) Ballard, started West with their family of

five children, of which Henry was the second. They traveled in the usual canvas-topped wagon, and settled about one mile from Des Plaines, in the Town of Maine, Cook Co., Ill. In 1850, he returned to Cortland County, N. Y., where his mother's relatives resided, and attended Central College, at McGrawville, for about three years, when he entered the Albany Law School, graduating in 1855. He was admitted to the Bar in the same year, came to Chicago, and commenced practice, his first partner being Louis M. Andrick. He afterward associated himself with Usher F. Linder, also with George G. Bellows and O. P. Abercombie, but for the

past ten years has practiced alone. During a portion of the time, Mr. Ballard has been manager and attorney for the United States Mercantile Reporting Company, of New York. He was married, in 1862, to Fannie C. Tallmadge, who was born in Chicago. He has one son, Arthur T.

William Cutting Grant, of the firm of Grant & Brady, attorneys and counselors at law, is the son of Peter and Dolly (Ware) Grant, and was born at Lyme, N. H., on October 8, 1829. His grandfather, John Grant, with William W. Cutting, and others of Lyme, Conn., went up the Connecticut River in 1767, where they founded and settled the town of Lyme, naming it after the old Lyme in Connecticut. Here, Peter Grant was born, in 1796, and in 1825 married Dolly Ware, daughter of Joseph and Sarah Ware, of Thetford, Vt., nearly opposite Lyme, N. H. When he was two years of age the family removed to a farm in Troy, Orleans Co., Vt., where he remained until twelve years of age, his father dying during that time, in 1839. Upon the marriage of his mother to Raymond Hale, they removed to Chelsea, Vt., where young Grant worked on the farm and attended school in the winter. At sixteen years of age he secured a license as teacher, which vocation he followed until 1847, when he entered Dartmouth College, graduating in the class of 1851. During the following year, he filled the position of principal of the Amherst Academy, N. H., for two terms and during the next four years was principal of the Howe School, Billerica, Mass., devoting all his leisure to the study of law. In 1854, he began reading law in the office of Hon. William B. Hebard, of Chelsea, and was admitted to the Bar the following year, and subsequently entered the law school of Harvard College, where he remained until the spring of 1857, when he located in Chicago, and shortly afterward became a member of the firm of Williams, Woodbridge & Grant. In 1863, Mr. Williams retired from the firm upon his election to the bench of the Circuit Court, and Mr. Grant was associated with Mr. John Woodbridge until 1865. From 1867 to 1880, he was connected with William H. Swift when Matthew P. Brady was admitted as a partner in the firm of Grant, Swift & Brady. This firm continued until May, 1885, when Mr. Grant, since which time he has been associated with Mr. Brady. Mr. Grant has always been engaged in general practice, the chief feature of which has been real-estate and chancery, business, together with commercial and corporation law. He is recognized as one of the ablest lawyers of the Chicago Bar, and is held in high esteem by both Bar and Bar as a thoroughly educated lawyer, a successful advocate and a most reliable counselor. Mr. Grant was married, in 1861, to Jennie A. McCullum, daughter of Alex. McCullum, and for many years a resident of Chicago. They have two children, both sons.

The Rafferty Murder Case.—Among the noted causes which have been tried in the Criminal Court since 1871, the first to merit attention is that of Christopher Rafferty for the murder of Patrick O'Meara, a police officer, which occurred on the night of August 5, 1872. The circumstances of the killing, as gathered from the statements of the Supreme Court, were: A little after midnight of the 4th, Rafferty was sitting quietly and peacefully by a table in a saloon, in Chicago, when O'Meara and another policeman, named Scanlan, came in.

O'Meara immediately drew attention to Rafferty; when the latter, addressing O'Meara in a friendly manner, asked him to take something to drink, or a cigar, which was declined. Scanlan then went directly up to Rafferty, tapped him on the shoulder, and told him he had a warrant for him. The former demanded that it be read, which was done, and he apparently submitted to the arrest, but immediately threatened to shoot the first

man who should lay a hand upon him. O'Meara, who had his club hung to his wrist, stationed himself at the outer door to prevent Rafferty's escape, while Scanlan kept himself in a position to guard a back door. All this occurred in a brief space of time; and while O'Meara was guarding the entrance, which led into the street, Rafferty shot him with a pistol, inflicting a mortal wound. There was no pretense that Rafferty had been accused or suspected of having committed any felony, or was at the time in the act of committing a misdemeanor; nor did the State's attorney, on the trial, attempt to show that such was the case; or that either of the policemen had at the time in their possession any lawful warrant authorizing the prisoner's arrest. There were three trials of the case, and three appeals to the Supreme Court. The first trial, resulting in a conviction and sentence of execution, was had at the September term, 1872. The case being taken to the Supreme Court on a writ of error, that court reversed the judgment below, on the ground that the court had erred in refusing a change of venue as prayed, and also in refusing to admit testimony showing that the prisoner was intoxicated at the time of committing the alleged offense.

The venue having been changed to the county of Lake, another trial also resulted in a conviction and a sentence of death. The case was again taken to the Supreme Court on a writ of error, and was again reversed and remanded—the court holding that the court below had erred in refusing to admit testimony showing the invalidity of the warrant in the hands of the person making the pretended arrest. If it was true that the process was void, the homicide would be reduced from murder to manslaughter, unless express malice toward the deceased was shown by the proof.

The third trial of this remarkable case occurred in Lake County, in October, 1873, and for the third time the prisoner was found guilty and sentenced to be hung. For the third time, also, the cause was taken to the Supreme Court on a writ of error, but not with the same favorable result. The judgment of the court below was affirmed. It had been established by proof that, three days previous to the killing, the prisoner had declared that no Bridgeport policeman (as they were who made the arrest) should arrest him while he had a pistol; and when he had shot O'Meara through the breast, without offering to go out of the door, he had instantly turned around and fired two shots at Scanlan, the court held that this was sufficient evidence of express malice to justify the finding of murder, notwithstanding the attempted arrest was illegal. He was executed at Waukegan in 1874.

William A. Montgomery, senior member of the firm of Montgomery & Smith, is a son of John R. Montgomery, and a grandson of William Montgomery, both lawyers of Lancaster, Penn., where he was born on June 21, 1838. He received his higher education at Washington College, Penn., and at Beloit College, Wis. After graduating from the latter, in 1857, he attended the law-school at University of Wisconsin and completed his legal course in the office of Judge Hopkins, of Madison, who afterward was elevated to the Bench of the United States District Court. After his admission to the Bar at Madison, in 1860, he removed to Chicago and had been in practice in that city ever since. He has been a member of the firm of Wilson, Martin & Montgomery, and later of Montgomery & Waterman. For several years after the dissolution of the latter partnership he practiced alone, forming, on January 1, 1885, a partnership with Jasper Sem. Smith. Montgomery has a son,—John R.

Lewis L. Coburn was born at East Montpelier, Vt., on November 14, 1831. His father, David Coburn, was a successful and wealthy farmer, his landed estate being one of the largest and most valuable in Central Vermont; he was a member of the State Legislature several times. Lewis L. Coburn was the youngest of five children of his father, who died in winter and the academy in fall and spring, and between times worked on the farm. At sixteen, he began to teach the district school, and soon acquired a reputation as an instructor and assistant examiner of the district school at Burlington, Vt., and entered the University of Vermont in 1855, graduating in 1859 with the degree of A.B. He spent a good part of his youth in vacations in reading law, with Robert D. Lewis, a lawyer at Burlington, Vt., and was quite advanced in his legal studies when he left the University. After a short time in the office of Hon. T. P. Redfield, of Montpelier, he entered the Harvard Law School, from which he graduated in 1862. He practiced in Boston, and immediately after his graduation from Harvard started for Chicago. Mr. Coburn determined to make patent law a specialty. Invention had been stimulated to unusual activity by the war, and very soon he had all his cases offered to him in this line of work. In 1861, he took into partnership an old schoolmate and personal friend, William E. Mars; and in a few years the firm had a very extensive legal business. Mr. Coburn was diverted from the law for a time, visiting his parents in Vermont, he arrived when a brigade of nine months' men had just been raised for the Army. He was unanimously chosen captain of one of the companies, and went out into active service. In the front rank at Gettysburg, Captain Coburn and his command served two days, and he distinguished himself for his efficiency and bravery. He was offered honorable preference, which he declined, not wishing to remain away from the work for a longer time. At the end of his service he returned to Chicago to resume his law practice, which had been carried on by his partner under the firm name. The business increased rapidly, the pressure of work causing the firm to move to a larger office on the west side of the street. Mr. Coburn, who died in 1868, Mr. Coburn carried on the business, with the assistance of a large corps of clerks, until 1873, when Hon. John H. Thacher, an old friend and classmate, became his partner. Mr. Thacher, for ten years previously, had been in the patent office, occupying various positions from assistant examiner to commissioner of patents, and the latter position he resigned to become a partner with Mr. Coburn. This change of partners Mr. Coburn is quick to recognize any new principle or combination, and equally quick to see where a claimed invention may be an infringement on something already patented. He has been attorney in many of the most important patent suits tried in this country and is always on the successful side. Among these cases are the barb-wire suits, the beef-canning suits, the Irwin tubular lantern, and other equally important cases. Mr. Coburn is a large property holder. He was the leader of the movement which brought about the radical change in the South Town and city governments. He was one of the originators and founders of the Chicago Athenaeum. He was the first president of the Chicago University League, and frequently been mentioned as candidate for the State Senate and for representative in Congress, but such positions he has always declined. Mr. Coburn is a tall, courtly and dignified gentleman, in the full possession of the years of his long life, and stands in the highest estimation of the citizens and his acquaintances.

Samuel Emmet Dale, attorney and counselor at law, is the son of Samuel and Jane Dale, and was born at Dublin, Ireland, on September 10, 1831. His grandfather, Sir Robert Emmet, was cousins. When he was six years old, his parents came to this country, and settled in Milwaukee, where he received his early education. At the age of seventeen, he entered the law office of Finches, Lynde & Miller, of that city, with whom he remained six years. He was admitted to the Milwaukee Bar in 1852, and a year afterward located in Chicago. In 1859, he became a member of the firm of Carter, Becker & Dale. Mr. Carter died, and Mr. Dale was buried in 1874, and the firm of Becker & Dale continued until January, 1880, since which time Mr. Dale has been actively engaged in general practice. He is highly esteemed by Bench and Bar as an able lawyer, and by a large newspaper as a most business-like and prudent counselor. Mr. Dale was married, on September 13, 1871, to Miss H. Harriet Beckwith, of Exeter, England. They have five children,—Gertrude, Walter B., Frederick S., Harriet, and Stephen M.

George G. Bellows was born at Boston, Mass., on October 14, 1831. His father, John Bellows, was an old bank president in New York, and a merchant of that city, conducting business with Homer Backus, he became a member of the firm of Wilson, Martin & Montgomery, and later of Montgomery & Waterman. For several years after the dissolution of the latter partnership he practiced alone, forming, on January 1, 1885, a partnership with Jasper Sem. Smith. Montgomery has a son,—John R.

Lewis L. Coburn was born at East Montpelier, Vt., on November 14, 1831. His ancestors were among the oldest settlers of the counties in which they lived. His father, David Coburn, was a successful and wealthy farmer, his landed estate being one of
officers. As quartermaster, he spent eighteen months at the front, and returned only after he had been stricken with fever contracted in the Chickahominy Swamps. While he was well enough about again, he went to Kentucky and Tennessee. He next lectured through Wisconsin for the United States Sanitary Commission, and on the invitation of Dr. Henry W. Ballard, his brother-in-law, he came to Cincinnati, where he was invited to lecture before the New England Anti-Slavery Society. For many years he was in partnership with Mr. Ballard. Mr. Holbrook is a cousin of Henry Bellows, deceased, formerly chief-justice of the Supreme Court of New Hampshire.

Edmund S. Holbrook is a son of Stephen and Sally (Gould) Holbrook, being the youngest of the family. He was born at Grafton, Mass., received a preparatory course at Phillips Academy, Andover, and graduated from Amherst College in 1839. While in school he had acquired a reputation for oratory and as a poet and deep thinker, so that, upon his graduation, he was at once invited by the New England Anti-Slavery Society to become one of their lecturers. He accepted the offer, but the next year located in Essex County, N.Y., as a professor of languages, belles-lettres and vocal music. He followed this pursuit for three years, studying law besides, and coming quite prominently before his people as an orator and debater. In 1843, he was admitted to the Richmond Bar, and he practiced law for ten years. In 1853, he removed to Chicago, and opened an office in the LaSalle Building, and there he practiced law until the first of June, 1874, when he was killed in the fire in the statue room of that building. He was 45 years of age, and was in the prime of life. He was married to Miss Anna E. Whiting, of New Bedford, Mass., and was the father of four children.

The Great Contempt Case. Growing out of the Rafferty case was the celebrated cause of The People vs. Charles L. Wilson, proprietor, and Andrew Shuman, editor, of the Chicago Evening Journal. Rafferty had recently been tried and convicted of murder. A writ of error, staying the execution, had been granted, and was pending and undetermined at the date of the publication. The following is an extract from the article upon which the information was based:

"At the time the writ was granted in the case of the murder Rafferty, the public was blindly assured that the matter would be examined into by the Supreme Court and decided at once; that possi- ble injustice to this notorious butcher would be laid away for a single day. Time sped away, however, and we hear of nothing definite being done. * * * The ruff-ruff who contributed hundred dollars to demonstrate that "hanging is played out" may congratulate themselves on the success of their game. Their money is operating splendidly. We have no hesi- tancy in prophesying clear through to the end just what will be done with Rafferty. He will be granted a new trial. He will be tried somewhere within a year or two. He will be sentenced to imprisonment for life. He will eventually be pardoned out. And why? Because fourteen hundred dollars is enough to enable a man to purchase from the Supreme Court the most unfavorable view that can be taken is that it is a constructive contempt, and as such it could not directly or indirectly affect the administration of justice in an appellate court. I should be very unwilling to admit that it would have any such effect."

The London Law Times, in commenting upon the case, approves the action of the court, and cites English authorities to maintain that view. It says:

"There assuredly can be no more serious reflection upon a court of law than to say that it is susceptible to corrupt influence; and it seems to us that the American judiciary have only to tolerate attacks of this kind upon their honesty to bring upon themselves well merited contempt."

On the other hand, the United States Jurist, a quarterly law magazine published in Washington, said:

"This seems to us an extraordinary proceeding on the part of the court; the despotical exercise of very doubtful constitutional authority. It was not pretended that this newspaper paragraph, published in a distant city, "impested, embarrassed or obstructed the court in the administration of justice," but that it was calculated to do no more than cause the newspapers and their readers, not to injure the parties ample means of redress without any such ex parte proceedings as these."

The action of Judge Lawrence in the case undoubtedly contributed to his defeat as a candidate for re-election to the Supreme Bench the following year, whereas Mr. Shuman was elected lieutenant-governor of the State in 1876."
CHESTER KINNEY is a son of Ethel P. Kinney, a prominent ship-builder of New York and Canada, and Lavinia (Porter) Kinney. He was born in Cook County, Illinois, on July 15, 1852. He was educated in the Clinton Liberal Institute, Oneida County, and Folly Seminary, Oswego County, N. Y., preparatory to taking a collegiate course. Entering Hamilton College in the second year, he was dismissed in 1853, and then resided several years in Collegesville, New York, studying law with Noxon, Leavenworth & Comstock, of Syracuse. On January 2, 1854, he was admitted to the Bar of New York, and in 1857, came to Middleport (now known as Watseka), Iroquois County, Illinois. He opened an office in 1856, and continued to practice law until 1865, and in 1865, and continued to practice law until 1865, and in 1882, was appointed a Judge of the Circuit Court of Cook County, Ill., which he has held ever since. After research, Mr. Packard was married to Louisa L. Spencer, daughter of Colonel J. C. Spencer and niece of Judge John G. Spencer. They have one son and a daughter, the latter being the wife of Albert D. Fenske.

SAMUEL WARD Packard is a lineal descendant of Samuel Packard, of Windham, England, who immigrated to Hingham, Plymouth Colony (Massachusetts), in 1636. His grandfather was Reverend Theophilus Packard, D.D., and his father, who was also of the same name, were Congregational ministers, and preached to one church, in Shelburne, Franklin Co., Mass., for over fifty years, the son succeeding the father in the same pulpit. His grandfather, Rev. Mr. Packard, was one of the founders of Amherst College, and a trustee of Williams College for fifteen years. Mr. Packard's mother, Elizabeth Parsons Ware, was the daughter of Rev. Samuel Ware, a Congregational minister of Ware, Mass. Mr. Packard himself is a Partisan of the Deacon Packard family, not by blood, but in all his beliefs and observances. Born at Shelburne, Mass., on November 20, 1847, he came to Chicago at an early day, his family having broken up. At sixteen years of age he was thus left to shift for himself. While making a thorough, but unsuccessful canvass of the city for employment, he met his old family physician, and was told, to his astonishment, that he was intended for a lawyer, and that an opening might be found for him in the office of Joseph N. Barker, the brother-in-law of his medical friend. Thus it was, that in the spring of 1864, he commenced business with Mr. Barker & Tuley, and remained there until the fall of 1865, having, in the meantime, assiduously cultivated his profession and worked up quite a practice on account of his mature appearance and manners. When seventeen years of age he tried his first case before the Supreme Court, of Illinois, and retained four years in Chicago, in the spring of 1866, he formed a partnership with Colonel J. S. Cooper, which continued for upwards of ten years, Gwynn Gornett and W. W. Gore joining, during a portion of the time, members of the firm. In 1874, but twenty years after, he argued his first case in the Supreme Court of the United States. It may be stated that, since 1850, he has practiced alone, satisfying himself with the following points of the practice, and his forceful arguments of cases rather than striving after a large and miscellaneous business. For example, from 1877 to 1882, he acted in connection with other notable litigations—as attorney for the creditors of the Chicago & St. Paul Railroad in a very considerable case during that period, and which he carried to a successful issue. Mr. Packard obtained $100,000 for his clients, who, during the preliminary stages of the litigation, had vainly attempted to effect a compromise of $100,000. Another important case, well illustrating the pertinacity and aggressiveness of his character as a lawyer, is that known as the "Yankton County (Dak.) bond case." He was retained as the attorney for the bondholders of that county, after the Supreme Court of the Territory had declared the bonds, which amounted to some $300,000, invalid. He took the case to the Supreme Court of the United States, and there obtained a reversal of this decision—Mais, Mr. Packard being the opposing counsel of the Court, to procure the admission of Southern Dakota as a State. He thereupon prepared a protest, which was presented to Congress, against the admission of the Territory, on the ground that its Legislature aided and abetted Yankton County in its refusal to the redemption, and until it purged its records of this disgrace it ought not to be admitted into the Union. He also Flooded the country with circulars, pamphlets, and the like, so strong a sentiment of his favor, that it was found impossible to obtain a vote for the admission of Southern Dakota into the Union while the Territory stood in this attitude. Thereupon, the delegate of the Territory, upon the adjournment of Congress, informed his constituents that the Dakota admission bill could not be passed until the Yankton bond matter was settled; he therefore advised them that a Legislative committee was not to discuss it until the matter was disposed of. Mr. Packard also procured the passage of a refunding Act, the matter being thus settled to the satisfaction of the bondholders. Speaking in general terms, the success of Mr. Packard's practice is attributable to those qualities which a certain justiciable case in the Bench, of high standing, attributed to him in a pre-eminent degree, viz., "thoroughness of research, logic, and clearness of thought;" Mr. Packard has always been a very strong temperance man, both in his belief and practice. He was married, on June 23, 1874, to Clara A. Fish, of Lombard, Ill. They have three children—Stella, Laura and Walter Eugene. At this time he formed a partnership with Mr. Packard in the practice of law, and continued to be successful. He was a member of the firm of Lockwood & Bacon, which continued until Mr. Hawley was appointed United States District Judge for the Territory of Utah. Mr. Bacon subsequently associated himself with James S. Norton, as Bacon & Norton. In 1885, the whole firm was dissolved, but Mr. Bacon continued to practice law. At the same time, became a special partner with John V. LeMoynne, which continued while that gentleman was serving his term in Congress. He has since practiced alone, his business being principally a real-estate and chancery lawyer.

EDWARD ROBY was born at Brockport, Monroe Co., N. Y., on August 31, 1840. He received his education in that State. At the breaking out of the War he offered himself for service, but was rejected on account of his age. He was elected to the Bar in June, 1861, at Athens, N. Y., and commenced regular practice in Chicago, upon his arrival here in April, 1862. His legal career in this city has marked him a lawyer of broad, constructive mind, and he has argued a great number of cases before the State Supreme Court, especially in the line of upholding the provisions of the State Constitution of 1870 relating to the collecting of municipal taxes, the city government attempted to collect its taxes, in the old way, as if the Constitution had never existed. The Superior Court sustained its action, but test cases being taken to the Supreme Court by Mr. Roby, the provisions of the State Constitution were upheld, and Mr. Roby was victorious on each occasion; notwithstanding which, the city still believed that special legislation was required to give effect to the general law, and to the city's statute of 1872 to keep up the special city officers for assessment and collection of the taxes. The city central and municipal charter was adopted by popular vote, instead of allowing the general city incorporation law of the State to go into effect. Mr. Roby argued the constitutionality of the city charter in both the Illinois Supreme Court and the Illinois Supreme Court, and gained his point. The city appealed. Mr. Roby again took the matter in hand before the Supreme Court, which sustained the lower tribunal. Thus the special law and the special charter fell together. The issuance of the scrip of 1875, in violation of the State Constitution limiting municipal indebtedness, was followed, two years thereafter, by a suit brought by Mr. Roby, in behalf of Judge Henry Fuller, praying for an injunction against its payment. This action had the effect of forcing the city officers into more economical measures, but before the Supreme Court decided in favor of the injunction, the scrip was paid, and all was well. It is too true that perhaps no man has done more, through the machinery of the courts, to bring about this city's laws for taxation and freedom from indebtedness than Mr. Roby. He is an acknowledged authority, also, on real-estate and commercial law, and on the subjects of the early and prominent colleges on these topics. Mr. Roby was married, in 1876, to Mrs. Leila P. Magoun, a Boston lady. They have two children.

THE HANFORD MURDER CASE. — The trial of no cause in Cook County was ever attended with greater interest and excitement than this. The homicide occurred on August 7, 1876. The deceased was principal of the North Division High School. In a communication to the City Council, in regard to the confirmation
of certain appointees of the Board of Education, he used the following language in regard to Mrs. Sullivan, wife of Alexander Sullivan, who was then secretary of the Board of Public Works:

"The instigator and engineer-in-chief of all delvity connected with the legislation of the Board, is Mrs. Sullivan, wife of the Secretary of the Board of Public Works. Her influence with Colvin (the mayor) was proven by her getting Bailey dismissed, and her husband appointed in his stead."

Mr. Sullivan was present when the communication was made. He immediately returned home, informed his wife what had occurred, and having ascertained that Mr. Hanford was the author of the communication, he procured a carriage and, with his wife and brother, proceeded to Hanford's residence, where he was found, with his wife and son, sitting on the steps of his house. The parties were not acquainted; but, having ascertained the presence of each other, Mr. Sullivan demanded a retraction of the offensive language above quoted. This was refused. Some angry words followed, with a blow from Mr. Sullivan, which knocked Mr. Hanford down. Mr. McMullen thereupon seized Mr. Sullivan, his wife and brother in the meantime getting out of the carriage. A general mêlée ensued, in which, as was alleged, Mr. Hanford struck Mrs. Sullivan. Her husband then drew a revolver, and fired at Mr. Hanford, inflicting a wound, of which he died in thirty minutes. Sullivan was defended by Leonard Swett, W. W. O'Brien and Thomas Moran. The people were represented by Charles H. Reed, State's attorney. The trial began October 18, 1876, and lasted until the 27th, when the jury, failing to agree (standing eleven for acquittal to one for conviction), was discharged. A second trial was had in March, 1877. At this time the prosecution was conducted by Luther Laffin Mills and Colonel Van Arman, and the defense by Messrs. Swett, Moran, Storrs and Hynes. The trial lasted a week. The jury was out but a few minutes, returning with a verdict of "not guilty."

John S. Cooper, attorney and counsel for law, son of Isaac and Eliza Cooper, was born at Mt. Gilead, Morrow Co., O., on July 23, 1841. He received his early education in the school of Erasmus G. Phillips, and from his thirteenth to his fifteenth year he attended the Mt. Gilead High School, and two years later entered Oberlin College. Before he could graduate, he enlisted in the Federal Army, in 1861, and saw active service in Virginia and participated in the engagements of Cross Lanes, Winchester, Slaughter Mountain, Port Republic, Fredericksburg, Chancellorsville, Gettysburg, the siege of Petersburg, and other historic battles, receiving a severe wound at Aiken's Farm, on September 29, 1864. He was promoted to the rank of lieutenant-colonel of the 175th Ohio Volunteer Infantry, which he commanded until discharged on July 25, 1865, at Cleveland, O. In August, 1865, he came to Chicago and devoted his entire attention to law, and was admitted to the bar in 1867. During the following year, he associated himself with Mr. Packard, the firm subsequently becoming Cooper, Garnett & Packard. Mr. Cooper is recognized by the legal fraternity and a numerous clientele as a thorough lawyer, a successful advocate and a reliable counselor. His specialty is commercial and railroad corporation law.

John T. Dale was born at Sandbach, Cheshire, England, on April 25, 1841. His father, Thomas Dale, was a master machinist, endowed by nature with great mechanical genius, and possessed of fine musical talents. Although holding a lucrative and responsible position in a large manufacturing establishment, he immigrated to America, and settled as a farmer in Salem, Ill. Mr. Dale's mother was Jane Burgess, of an old Cheshire family. During the years of his minority he worked on the farm, and by improving his opportunities at an excellent public school and neighboring academy during the month, he laid a good practical education. He was intensely fond of literature, and his general reading was very extensive. He taught school two winters, and in the spring of 1863 came to Chicago. In the fall of 1863, he entered the law office of D. C. & J. J. Nicholas as a student and clerk, where he remained two years, and was admitted to the bar in the spring of 1865. He afterward attended lectures on real-estate law, in the Union College of Law, by Hon. Henry M. B. H. He entered a partnership, in 1867, with Judge E. S. Holbrook. Their practice was principally in real-estate matters, besides which they conducted several important patent cases. Losing their papers and files in the fire of 1871, Mr. Dale subsequently formed a partnership with Sidney Thomas, which lasted about one year. Since then he has been in practice by himself. In 1879, he removed to Winnetka, where he identified himself with the interests of the village. He was elected four years and is now president of the board of trustees, and is a member of the Council, as trustee, for four years. In 1884 he became a member of the I.O.O.F., a Mason, and a gentleman of literary tastes. He has been fortunate in his investments and is in good circumstances. He married, in September, 1858, Miss Leila L. Graves, of Chicago, a lady of musical accomplishments.

DAVID BRAXTON LYMAN is the son of the late Rev. David B. Lyman, formerly of Hartford, Conn., a graduate of Williams College and student at Andover Theological Seminary, who, in 1829, migrated to the Sandwich Islands, through which he procured means to obtain a university education. In 1829, he left Honolulu, sailed around Cape Horn, and arrived at New Bedford, Mass., in May 1830. The following September he entered Yale College, and graduated in 1834; then attended Harvard Law School, and graduated in 1846. In 1844-45, he was connected with the Sanitary Commission as hospital visitor, being then in charge of the Fifth Corps hospital of the Army of the Potomac; and also the Point of Rocks hospital, in Virginia, and for the last few weeks of his service was in charge of the station established by the Sanitary Commission for the forces concentrated around Washington while the Army was being disembarked. Mr. Lyman was admitted to the Boston Bar in 1866, when he came to Chicago and entered the office of Walke & Clark as clerk, remaining with them two years. He formed a partnership on July 1, 1869, with Hon. John H. Kinnard, under the firm name of Lyman & Jackson, which continues. Mr. Lyman is a colleague scholar and possesses fine literary attainments. He is very learned in real-estate law, and a thorough practitioner in every branch of his profession because his arguments have great weight with both court and jury. He never advises unnecessary or groundless suits. In politics Mr. Lyman is a consistent Republican, but not a radical partisan. He married, on October 5, 1858, Miss Sarah C. Costis, daughter of Franklin D. Costis, of Chicago. They have three children living. He resides at Lake Grove.

SHERRY AND CONNELLY.—Of all the murders which have ever been committed in Chicago, that of Hugh McConville by Patrick Sherry and Jeremiah Connelly, on the night of January 19, 1878, was the most cowardly, brutal, and unpardonable. On January 19, 1878, the two men started out together, and by dark they were dangerously drunk. At eight o'clock, at No. 1594 State Street, they met James Donegan, and attacked him. Sherry struck him on the head with a slug-shot, Connelly calling out to kill him. Sherry is trying to get away, Sherry struck him again, when he ran into Peter Smith's market, where the two followed him, threatening to kill, but he made his escape through the back door. They then threatened to kill Peter Smith, and attacked him with a Remington. On the seventh street they attacked Jacob Rapke, and shortly after, meeting another man, they made a lunge at him with a knife. In running away one of them called out to the other, "Catch him, and I will make mince- meat of him." Soon after this they made an assault
upon two women in the street, and then upon others. Finally they met Hugh McConville, walking with his niece. Sherry immediately seized the young lady, slapped her in the face, using most outrageous and indecent language. She ran. Her uncle rushed to her defense, when one of the scoundrels plunged the butcher's knife they had secured at Peter Smith's into his heart. The righteous verdict of the jury was guilty, and the sentence of death. Sherry and Connelly were hanged on June 21.

EDWARD L. BARBER was born at Hopkinton, R. I., on May 20, 1843, and is the grandson of Colonel Edward N. Barber, well known in political and military circles in that State. His parents moved to Wisconsin when he was in his tenth year. His early education he received in the common schools, and later entered Milton College, in that State, from which he graduated in July, 1865. He commenced the study of law in the office of Carter, Pitkin & Davis, at Milwaukee. In June, 1866, he was admitted to the Bar. Spending a year in travel, he found himself settling the affairs of a friend at Janesville, Wis., in 1868 he came to Chicago, and entered the office of Bates & Tousley. At the time of the fire he was with Garrison, Anderson & Eastman. The fire swept away Mr. Barber's library and valuable papers, involving a loss of over $10,000. For eleven days after the fire he was chairman of the vigilance committee that had charge of the important district south of Twenty-ninth Street and east of Halsted. After the fire he opened an office on Twenty-ninth Street, near State, and embarked in business for himself, connecting with his law practice a real-estate and loan and rental agency, which is still conducted under the style of E. L. Barber & Co., Mr. Barber's father, who came to Chicago in 1858, and for a greater portion of the time has been engaged in the real-estate business, constituting the company. Mr. Barber has a large and lucrative practice, which is principally real-estate and chancery, combined with corporation law. He has travelled extensively in every State of the Union, during which tours he has indulged his literary aspirations, as many biographical sketches and descriptive and narrative articles will testify. He was married in this city, in 1873, to Miss Annie F. Shaw, of Bangor, Me.

CHARLES L. EASTON was born at Lowellville, Lewis Co., N. Y., and is the son of William L. and Emeline (Henry) Easton. His father was a native of the Berkshire Hills of Massachusetts. In early life he emigrated to Mohawk, Herkimer Co., N. Y., where he learned the printing trade in the same office with General Francis E. S. Spink, ex-United States treasurer, and other notable New Yorkers. He founded the Black River Gazette (now Journal and Republican), at Lowellville; later he became president of the old Bank of Lowellville. He was an old-time whig in politics, an intimate friend of William H. Seward and Thurlow Weed, and a presidential elector-at-large on the Scott-Graham ticket of 1864. In 1853 or 1854, the father became a liberal investor in Iowa and Minnesota lands, and established the banking house of Easton, Coakley & Co. (subsequently William L. Easton & Son), at Decatur, Iowa. The latter firm was succeeded, shortly after the passage of the National Bank Act, by the First National Bank of Decatur, of which James L. Easton, (the "son") is the president. Charles L. was educated at Union College, Schenectady, N. Y., and was graduated from that institution in 1863. He then entered the law office of Charles D. Adams, a prominent lawyer of his native town, but now of Utica, N. Y., where he pursued a very thorough course of study, and was admitted to the Bar in 1866. In the fall of that year he came to Chicago, and entered upon a successful professional career. He is a thorough lawyer, of excellent qualifications. In 1876, Mr. Eastman was elected, as a republican, to the Illinois Legislature, where he was distinguished for his sound judgment and care of his duties as a legislator and the interests of his constituency. He is a Master Mason and an excellent citizen.

THE MURDER OF ALBERT RACE.—On the night of October 4, 1878, the store of E. S. Jaffray & Co., in Chicago, was entered by burglars, and a large quantity of goods, consisting principally of silks and silk handkerchiefs, was stolen. The goods were taken in a wagon, by the burglars, to the store of Lesser Friedberg, a pawnbroker on State Street. While the burglars were removing the goods from the wagon, between ten and eleven o'clock at night, they were discovered by a police officer, who, on attempting to investigate their proceedings, was shot and killed by one of the burglars. Before the officer came up, a large quantity of the goods had been carried into Friedberg's store, he being present.

The State was represented on the trial by Mr. Mills, State's attorney, Emery A. Storrs conducting the defense. It was supposed by the defendant, Friedberg, that the only evidence against him was that of one Freeman, who assisted in the burglary and had turned State's evidence. He testified to the facts of the robbery, and also that the goods were taken and delivered to Friedberg, in pursuance of a prior arrangement made with him. As it turned out, the evidence of the accomplice, upon which it is generally so difficult to convict, was supported by others. Two witnesses, who resided two blocks from the defendant's pawnshop, testified that one or two nights previously they had been in his place, looking at some silks, and remarked that they did not wish to pay more than $1.50 a yard. Friedberg replied, "Come to-morrow or next day night, and I will have some more." It was also shown that, immediately after the occurrence in front of the store, the defendant's door was locked, the lights in the store nearly extinguished, and that he could not be found. He subsequently denied being in the store when the officer was shot, although that fact was fully established.

Upon the evidence, the jury found the prisoner guilty, and he was sentenced to the penitentiary for four years. A supersedeas was granted by the Supreme Court, when the case was extensively reviewed at the March term, 1882, and the judgment of the court below affirmed. Judge Dickey, however, dissented, stating that the evidence to his mind was not sufficient to justify a conviction.

Albert Race was the name of the murdered policeman referred to in the above account. John Lamb and George Freeman were indicted for his murder, and tried at the March term, 1879, of the Criminal Court, before Hon. E. S. Williams. Lamb alone was put on trial, Freeman having turned State's evidence, as in the burglary case. The prosecution was conducted by State's Attorney Mills and his assistant, E. P. Webber, and the defense by John Van Arman, Mr. Gordon and William S. Forrest.

W. S. Forrest. After an exciting trial, the jury found the defendant guilty, and directed, by their verdict, the infliction of the death penalty. The case being taken to the Supreme Court on a writ of error, which was made a supersedeas, the judgment of the court below was reversed, and the cause remanded for a new trial. The principal error, as found by the court, was in the refusal to instruct the jury, that even if they believed that the homicide was committed by one of several burglars while engaged in secreting or disposing of property which they had previously stolen, and that the killing was done to prevent the discovery and seizure of the property by the person killed, then, unless the jury believed from the evidence, beyond all reasonable doubt, that the defendant was present at the homicide, or sufficiently near to render aid to the perpetrator, and actually did aid the person who committed the homicide; or unless the jury should find that the defendant, before the homicide, counseled or advised the persons in charge of the goods to oppose and resist whosoever should attempt to seize them or interrupt them in their secretion or disposal, and that the killing of the de-
ceased occurred in the course of such resistance, then they ought to acquit the defendant. In this opinion the court was divided; four being in favor and three opposed.

The case lingered until April 6, 1882, when the defendant was again put upon trial, which lasted until February 16. The evidence not being considered sufficient by the jury, their verdict was "not guilty."

FRANCIS A. RIDDELE—Of the many public men whose lives are sketched in these volumes, either because of their representative character or the part they have furnished something in the history of the country, it is noticeable that few of them are Iowans by birth. Francis A. Riddle is one of this limited number. He was born near the city of Springfield, in Sangamon County, on March 19, 1843. His father, John Riddle, was a prosperous farmer, and Francis, up to the age of seventeen years, had the common experience of country boys, his time being fairly divided between the labors of farm life in the summer and the district school in winter. In 1860, having progressed beyond the privileges the rural school-house afforded, he was entered as a student in the school then known as the Illinois State University, at Springfield, where he remained seven years. When the stirring events of 1861 and 1862 showed that impetuous patriotism which carried so many of the young men of that day to the field, drew him away from books and preceptors and into the ranks of the Union army. In June, 1862, he enlisted in Company A of the 90th Regiment of Illinois Volunteers. His regiment, which had been recruited at Camp Atterbury, was presently sent to Memphis, whence it was transferred to Milliken's Bend and became a part in the famous campaign which led up to the investment and capture of Vicksburg. Hardships his youth held not well withstand revealed in severe sickness, and he was sent home to regain his health. Returning to the front, he rejoined his regiment at Carrollton, La., and in the early fall of 1863, was made a second lieutenant in the 93d United States Colored Infantry, an organization he had helped to form in pursuance of orders issued by the Secretary of War. He was soon thereafter promoted first lieutenant, on recommendation of a general of the army, and in the winter of 1864 was made judge-advocate of a military commission at Chalmette, La., of which Colonel George K. Davis, then of the 3d Rhode Island Cavalry, and subsequently, for six years member of Congress from the City of Chicago, was president. At the close of this duty, he was appointed post-quartermaster at Carrollton. He was mustered out on August 1, 1865, having reached his majority during the period of his military service. Having thus honorably closed his experience as a soldier, he anxious turned again to the studies from which he had been separated for some three years, and in September was admitted to the junior class of the Illinois College of Jacksonville. During the first year of that institution he made rapid and satisfactory progress, and on leaving it he began the study of law, first at Springfield, and later in the law school of the University of Chicago, by which he was graduated in 1867. He was admitted to the bar in the same year. During the eighteen years that have intervened between that time and the date of this writing, Mr. Riddle has been engaged in the general practice of his profession at Chicago, and has won for himself a substantial success. Especially is this true in that large and important field known as commercial and corporation law. In this class of litigation he has a large clientele and has merited distinction as a lawyer. In 1876, he was elected to the State Senate as a Republican, serving as a member of that body through the XXIXth and XXXIIIrd General Assemblies. He brought to the duties of that position the same practical experience, activity and earnestness that characterized him in all his work, and was recognized as a leading and influential legislator. Mr. Riddle was married, in 1870, to a daughter of the late Rev. William G. Gallagher, of Jacksonville, Ill. He is a member of Post 22, G.A.R., and of the Military Order of the Loyal Legion.

WILLIAM R. PLUM was born at Massillon, Ohio, on March 23, 1824. His parents, Henry and Nancy (North) Plum, removed from Middletown, Conn., to the Ideal Reserve in Wisconsin, while he was an infant, moved to Cuyahoga Falls, Summit Co., Ohio, where they have since resided. His grandfather, Colonel Samuel Plum, was an inveterate pioneer and, from the administration of Washington to that of Pierce, was repeatedly commissioned by the Government as a manufacturer of fire-arms, and his last and largest armament was built at Middletown, Conn. He originated the manufacture of pistols so that these weapons should be interchangeable. One of his sons was offered the sole charge of the Harper's Ferry Arsenal, and a grandson has taken out a very large number of most useful patents. In the year 1840, Mr. Plum learned telegraphy, and in February, 1862, offered himself for army service. He was refused on account of his age, but finally obtained charge of the first office opened in Columbus, Ky. He was soon given the management of a repeating office through which were sent dispatches to or from the forces operating against the border, and Colonel Morgan threatened Frankfort, Mr. Plum was sent there to take charge of the telegraphing; and thence to the Nashville office. He was now one of the most expert operators, especially in taking charge of a service. With the last conflict, Mr. Plum started out to take charge of General Gordon Granger's office in the field. When Granger moved off the line of the telegraph, Mr. Plum went to General Rosser's headquarters at Murfreesboro', and shortly thereafter, started for Vicksburg, where he was employed, but then the emergency ceased while en route, he was temporarily sent to Columbus, Ky., and then given command of all lines and men from Paducah, Ky., to Mississippi. He divided his staff with headquarters at the latter. In the performance of his duties he had several narrow escapes from guerrillas, who had sent word they would kill him, and who did kill two of his repairers. After many months of manual service in keeping open the second time graphic route of communication with the North, Mr. Plum, at his earnest request, was sent to the front. Joining General Thomas near Atlanta, he remained in charge of his telegraphic and cipher service until the close of the war, having with him at the battle of Jonesboro', Ga., and Nashville, Tenn. By the General's orders, he remained with him until the fighting was over, signing all cipher messages sent from him, and being one of the select committees of the War Department, which were frequently suggested as to the main plans of commanding officers as any other man in the Military Division of the Mississippi. Such a trust is rarely reposed in one yet in his teens. In April, 1865, Mr. Plum returned to attend to the business of his office, Mr. Riddle subsequently entered Yale College, and graduated from its law department in 1867. During the two years he was studying law he was also night-manager of the New Haven city telegraph office. In 1869, he began the practice of law in Chicago, with Mr. DeSoto, Bates & Towslee. Three months later he entered the office of Joel S. Page, with whom he remained until Mr. Page's death, in August, 1883. His practice has been general and includes many important cases. In 1877, he began his history of the "United States Military Telegraph Corps of the War of the Rebellion," which, five years later, was published by Jansen, McClurg & Co., of Chicago, in two large octavo volumes, Mr. Riddle being the highest comrade from the press of this country and Europe, but the burden imposed upon him impaired his health, which a trip of four months in New Mexico and Colorado restored. Mr. Plum was largely instrumental in organizing the Society of the Military Telegraphers of the United States, in 1881, and he has since been its president. In 1882, he was elected president of the Old Timers' Association, a similar organization, composed in part of the most eminent telegraphers of this country. He drafted a bill for the proper recognition of the service and status of army telegraphers, which was introduced in the United States Senate by General John M. Palmer, and favorably acted upon by the same body. He served on Military Affairs, but, owing to pressure of other matters, it has not yet come up for action. Mr. Plum was married, in 1867, to Helen M. Williams.

J. HERBERT GARY was born in 1846, in DuPage County, Ill., and is the son of Erastus Gary, who came to Illinois from Pomfret, Conn., in 1831, and, after pursuing various vocations, became a wealthy land-owner. The ancestors of the present Gary family were settlers at Rosabury, Mass., in 1631. Mr. Gary utilized to the best advantage the liberal education bestowed upon him at the common schools and at college, and laid the foundation for the reputation he now enjoys as a scholar and a distinguished lawyer. He studied law in the office of Vaille & Codette, of Naperville, Ill., two years, after which he entered the Union College of Law at Chicago, graduating in June, 1867, and in October of the same year being admitted to the bar. During the following three years, he was chief deputy clerk of the Superior Court of Cook County, and, in 1870, commenced the practice of the law, continuing it two years on his own account. In October, 1872, he formed a partnership with his brother, N. E. Gary, under the name of Gary & Gary. In 1879, Judge H. H. Cody became a member of the firm, and its style was changed to Gary, Cody & Gary, which firm occupied a leading position among the Chicago practitioners. Judge Gary is the general solicitor and counsel for many of the insurance companies represented in this city, and also has charge of the legal interests of a number of prominent manufacturers. He was born at Wheaton, where he was brought up, under the principal proprietor of that place; is the president of the Agricultural and Mechanical Association of the county; and is a large real-estate owner in DuPage County and in Chicago. From 1872 to 1876, he was president of the Town Council of Wheaton; and was made judge of the County Court of DuPage County in the fall of 1882, which office he continues to hold, ably performing the duties of his position.
The following case will remind the reader of Jarnycz vs. Jarnycz. The names of the parties originally, fifteen years ago, were S. W. Hardin vs. Andrew Forsyth, in ejectment. It involved the title to six hundred and forty acres of land, near Joliet, worth $50,000. The plaintiff claimed the title under a judgment of a previous suit by Eagan, the former owner; the defendant, by virtue of a deed directly from Eagan. The case was first tried in Joliet, in 1871, and resulted in favor of the plaintiff. It was thereupon appealed to the Supreme Court and the judgment reversed. Then the venue was changed to Cook County. Here, three years after, it was again tried before Judge McAllister in 1878, but this time the verdict was in favor of the defendant; which, as in case of the preceding trial, was set aside by the court. The next time it appeared, was before Judge Rogers again, and the defendant was once more successful. For the second time it was carried to the Supreme Court. But a change of tribunals did not change the result, the judgment of the court below being affirmed. In almost any other case, this would have ended the litigation; but under our statute the plaintiff had a right to a new trial, which he took. The case was not reached until 1884, when it again resulted in favor of the defendant. This judgment the Supreme Court was again asked to reverse; and it did as requested, leaving the plaintiff once more in a position for another trial. Thus far there had been five hearings of the case in the Circuit Court and three in the Supreme Court. In the meantime, although the defendant had died, the case was still alive. The plaintiff, becoming doubtful somewhat weary of the protracted and uncertain litigation, had sold out his interest to his attorney, E. S. Holbrook, who was now the plaintiff de facto. At last, as it seemed impossible to settle the dispute in the courts, a compromise was effected between the plaintiff and John Forsyth, son of the original defendant; but before the final judgment was entered up in the court, in September last, in accordance with the terms of the compromise, John Forsyth died. And so the case is finally disposed of.

George L. Padlock was born on October 8, 1832, at Augusta, Ga. His parents, George Hussey and Rebecca M. Padlock, were born in Hudson, N. Y., where they long since gave up residence. After the War by colonists from Nantucket, Mass., among whom were Stephen Padlock, the great grandfather, and Laban Padlock, the grandfather of the subject of this article. Mr. Padlock's father was for some time a banker in Augusta, Ga., having charge of a branch of a house. His parents subsequently returned to New York City, where they remained until 1836, when they moved to Princeton, Boren Co., Ill., and settled upon a farm in that locality. When of age, he commenced the study of law, while serving as deputy circuit clerk under E. M. Fisher and deputy county clerk under Stephen G. Padlock, his brother. He was admitted to the bar in 1856, and graduated at the Harvard Law School in 1859. Returning to Princeton, he was the partner of Joseph I. Taylor, a leading attorney, for two years. In April, 1861, he entered the 12th Illinois Volunteers, Infantry as first lieutenant of Co. "I," A. A. Ferris; entered the reorganized regiment in the same position at the end of three months' service, and afterward filled different positions on the staff, serving much of the time as brigade quarter-master. He returned in active service, in the operations of General Grant in 1862 and 1863, in Kentucky, Missouri, Tennessee and Mississippi. Resigning his commission, he re-entered the United States service as major of the 5th U. S. Heavy Artillery (Colored), and was in command of the 11th U. S. Colored Infantry. He was finally assigned to the post of duty as assistant inspector-general on the staff of Major-General Dana, headquarters of the Department of the Mississippi, and was mustered out for the above cause in 1865. He became a member of the Society of the Army of the Tennessee and of the Loyed Legion of the United States, having been elected a companion in the latter by the Illinois Commandery on January 13, 1882. Returning to Princeton, in 1866, he resumed the practice of his profession with Harvey M. Trimmell, since county judge. He was appointed by Judge Edwin S. Leland as master in chancery of the Circuit Court of Bureau County, and acted as such for several years. Coming to Chicago in 1870, he entered the office of Gallop & Peabody, and was placed in charge of their general court business. In 1877, he formed a partnership with George O. Ide. The firm of Padlock & Ide continued in business twelve years, and became one of the most active law firms in the city. On May 1, 1884, he became associated with Owen F. Aldis under the name of Padlock & Aldis. Mr. Padlock was married on October 1, 1862, to Miss Caroline M. Bolles, daughter of Gen. John A. Bolles, deceased. Judge Bolles was at one time Secretary of State of Massachusetts and was judge-advocate on the staff of Major-General John A. Dix, during the War; after the War he was Solicitor of the United States, and died in Washington. Mr. and Mrs. Padlock have five children.

Charles Murray Harris is a native of Munfordville, Hart Co., Ky. His parents, John and Jane (Murray) Harris remained with their family from Kentucky to Illinois. Charles was born in 1825, and settled in Oquawka, Ill. Charles returned to Munfordville soon after, and attended school at Greensburg, acquiring a good education. On returning to Oquawka, he was employed in his father's store and also commenced the study of law. In the course of two years he had mastered the elementary principles, and, in 1845, after a thorough examination, was admitted to the bar. For complicated land cases in the district were intrusted to him, and conducted to a successful issue. Civil practice was his specialty and preference, but in criminal suits his success was good. In 1846, he was the democratic nominee for Congress, his district being republican by two thousand majority. A vigorous canvass resulted in his election over Hon. Charles B. Lawrence by nearly three thousand majority. At the expiration of his term, he resumed his practice, and, in 1860, moved to Chicago, where he has since practiced successfully in both State and Federal courts.

Huntington Wolcott Jackson was born on January 25, 1836, in Newark, N. J., the son of Hamilton and Mary J. Jackson. He is a member of the Bar Association, Law Institute, and the Irving Literary Club of Chicago. He is also a member of the Union Park Congregational Church, of which he has been one of the deacons for several years. He is superintendent of the Sunday School, and connected with that church. He was among those actively engaged in promoting the organization of the City Missionary Society, and is one of the Chicago Congregational Church, under whose auspices he has always been an active Republican. He has been repeatedly urged to become a candidate for the people for important offices, but has always declined. Mr. Jenkins married, in 1864, Mary Jane Goodrich. They have three children, George Raymond, Helen Mary, and Edith Daisy.
pointed aide-de-camp on the staff of Major-General John Newton, who commanded the First Army Corps, participating in the battles of Freehold, Chantilly, Gettysburg, and other engagements of the Army of the Potomac. He married then an event which cannot be held liable personally, even under the law as it now stands, unless it be made to appear that the debt contracted was for her personal benefit, and about her personal interests, or for the purpose of profiting her personal estate, or that she became surety for her husband.

ABNER SMITH, of the firm of Smith & Burgett, was born at Orange, Mass., on August 4, 1843. His parents were Humphrey and Sophronia A. Smith. After graduating from Middlebury College, in 1865, he taught in the town of Shoreham, Vt., where he removed to Chicago, and entered the law office of J. L. Stark, and commenced the study of his profession. He was admitted to the Bar in 1868, and formed a partnership with Mr. Stark under the firm name of Stark & Smith, which continued until terminated by the death of Mr. Stark in 1873. In April, 1877, he formed the partnership with John H. Burgett, which still exists. Mr. Smith has never been a politician, except to express himself freely and independently on all questions of the day and vote accordingly. He was married, on October 5, 1869, to Miss Ada C. Smith, daughter of Sereno Smith, of Shoreham, Vt.

FRANCIS W. S. BRAWLEY, of the law firm of Brawley & Dunne, was born at North East, Erie Co., Penn., on February 12, 1825. John Brawley, his father, was for many years an assistant judge of the Court of Common Pleas of that county. Mr. Brawley commenced the study of his profession with John Gollbricht. During this year he removed to Chicago, and, in 1847, to Freeport, Ill., where he was admitted to the Bar and began practice. For the first three years he was in partnership with Martin P. Sweet, and after his marriage associated with J. M. Bailey and Thomas J. Turner. In early life he was a staunch democrat and a friend of Stephen A. Douglas, and for about a year edited the Freeport Herald. He twice served as superintendent of schools for Stephenson County, and for a long time was a member of the Board of Education of Freeport, and prepared the special charter under which the public schools were conducted. He was postmaster from 1852 to 1856, and city attorney between 1860 and 1869. Mr. Brawley is a Mason of high degree and a member of the Protestant Episcopal Church. He married, in 1856, Mary Keitzell, daughter of Phillip Keitzell, of Stephenson County.

LOTHROP SMITH Hodges, of the firm of Hodges & Shippen, attorneys and counselors at law, was born in Durham County, Canada, on August 18, 1832. He remained at home, attending school until seventeen years old, at which time he entered Victoria College, at Cobourg, where he continued four years. After leaving college, he read law for three years at Osgood Hall, subsequently resuming his study at Pontiac, Oakland Co., Mich., where he was admitted to the Bar in March, 1861. Located at Jacksonville, Ill., he engaged in active practice in that city eight years, and in 1869 settled at Chicago. Until the time, in 1871, he was associated with George W. Smiley, the firm being Hodges & Smiley; but in 1874 he associated with J. McClean for three years. After practicing alone for several years, he formed his present connection with Joseph Shippen, in 1876, and enjoys a lucrative clientele, and is known to both Bench and Bar as a scholarly lawyer, and a zealous counsel and advocate. Mr. Hodges was married on September 22, 1858, to Miss Helen C. Williamson, of Brooklyn, N. V. They had two children,—George H., who died in Nevada in 1882, at the age of twenty-one years, and Fanny, now the wife of Dr. H. P. Newman, of Chicago.

FARLIN QUIGLEY Ball, attorney and counselor at law, is the son of James M. and Keturah F. Ball, and was born near Shivelyville, Ohio, on March 28, 1856. His parents were descendants from a prominent Scotch family that came to this country over two hundred years ago and settled in Virginia. His grandfather, Farlin Ball, in 1812, located in the old Quitter settlement of Richmond, Ohio, marrying a Miss More, of Virginia. His mother was a member of the family of Thomas Ford, formerly Governor of Virginia. When young Farlin was eleven years old, his parents went West and settled at Monroe, Ind., where he was born. He was, at the age of eighteen, a student at the University of Madison, Wis., from which he graduated in the class of 1861. During the late War he enlisted in the 2d Wisconsin Volunteers, and was in active service on the Mississippi until after the battle of Chattanooga, Tenn., November, 1863, he was promoted to a first lieutenant, and in the following year received a captain's commission while at Nashville, Tenn. His command was a part of Sherman's famous "march to the sea," during which he was advanced to the rank of major. At the close of the War he returned to Madison, Wis., and in the fall of 1865 was admitted to the Bar. In the fall of 1866, he was elected State's Attorney of his county, an office he held until 1869, when he came to Chicago. He was associated with George A. Shufeldt from 1871 to 1875, and afterward was
with Monroe & Bibbee for some time. Mr. Ball disented from the opinions of leading lawyers in the matter of the right of the West Park Board to take Washington Street as a boulevard. Upon the submission of the question to the Supreme Court he was sustained in his views, and thereafter acted as attorney for the commissioners in that improvement until the boulevard was completed. His standing in Chicago is of the best, and he ranks among the foremost lawyers of Chicago. His specialties are real-estate, banking, insurance and chancery law. Mr. Ball was married on June 23, 1868, to Miss Elizabeth Hall, of Chicago, daughter of Thomas W. Hall, the wool merchant. They have two children. — Farlina H. and Sydnie H.

Board of Trade Contracts.—In the Revised Statutes of Illinois, chapter 38, section 130, it is provided:

"Whoever contracts to have or give to himself or another the option to sell or buy, at a future time, any grain or other commodity, stock of any railroad or other company, or gold, or forestalls the market by spreading false rumors to influence the price of commodities therein, or corners the market, or attempts to do so, in relation to any such commodities, shall be fined not less than ten dollars nor more than one thousand dollars, or confined in the county jail not exceeding one year, or both; and all contracts made in violation of this section shall be considered gambling contracts and shall be void."

In the case of Pickering et al. vs. Cease, appealed from the Superior Court of Cook County, the Supreme Court says (79 Illinois, 329):

"So far as anything is proven in this case, the alleged purchases are purely fictitious. The grain, plaintiffs bought of H. H., was in the hands of seller back to him. It was not paid for, as was expected by the parties it would be called for or delivered. The parties were merely speculating in differences as to the market values of grain on the Chicago market. Such contracts are void at common law, as being prohibited by a sound public policy."

"Agreements for the future delivery of grain, or any other commodity, are not prohibited by the common law or by any statute of this State. Whether a law to prohibit, and what is deemed detrimental to the general welfare, is speculating in differences in market values. * * * What were they but 'optional contracts' in the most objectionable sense? That is, the seller had the privilege of delivering or not delivering, and the buyer the privilege of calling or not calling for the grain. On the maturity of the contracts they were to be settled by adjusting the differences in the market values. Being in the nature of gambling transactions, the law will tolerate no such contracts."

In the case of P'lsey et al. vs. Boynton et al. (same volume of Illinois Reports), appealed from the Circuit Court of Cook County, the court decides:

"A purchase of grain at a certain price per bushel, made in good faith, to be delivered in the next month, giving the seller until the last day of the month, at his option, in which to deliver, is an illegal or gambling contract, and the purchaser will be entitled to its benefit, no matter what may have been the secret intention of the seller."

A later case is that of J. B. Lyon & Co. vs. Culbertson, Blair & Co., appealed from the Superior Court of Cook County (83 Ill. 34). The appellees brought suit against appellants, to recover damages for an alleged failure to perform contracts for the purchase of a quantity of wheat. One of these contracts was as follows:

"We have this day bought of Culbertson, Blair & Co. 10,000 bushels of No. 2 spring wheat, opened at from $1.55 to $1.57, and declined during the day, closing, after exchange hours, at from $1.44 to $1.38. On the 20th of the month the market opened at from $1.27 to $1.34, and fell rapidly during business hours. Between 11 and 1 o'clock it was as low as $1.10 2/3 a bushel. It is alleged that on the morning of the 20th, the appellees became entitled to further deposits, and thereupon, by written notice sent to the office of the buyers, demand was made of Lyon & Co. for further margins; but failing to respond to the demand within the next banking hour, Culbertson, Blair & Co. elected, under the rules, to consider the contracts filled, and charged to account of Lyon & Co. the difference between the purchase-price and $1.1½, and notified appellants thereof. This difference was the matter in dispute between the parties. On the trial in the court below, the jury found for the plaintiffs the difference as claimed. The Supreme Court (Judge Walker) decided:

"The fact that no wheat was offered or demanded shows that neither party expected the delivery of any wheat, but in case of default in keeping margins good, or even at the time for delivery, they only expected to settle the contract on the basis of differences, without either performing or offering to perform his part of the agreement; and if this was the agreement, it was only general on the price of wheat, and if such gambling transactions shall be permitted, it must eventually lead to what is called corners, which entitle hundreds of swindlers and unscrupulous persons injuriously on the fair and legitimate trader in grain, as well as the producer, and are pernicious and highly demoralizing to the trade. A contract to be thus settled is no more than a bet on the price of grain during, or at the end of a limited period. If the one party is not to deliver, or the other to receive, the grain, it is, in all but name, a gambling on the price of the commodity."

The judgment of the court below was thereupon reversed and the cause remanded, Judge Dickey dissenting.

A later case is that of Jackson vs. Foote, in the United States District Court, before Judge Blodgett, in 1882. The defendant gave orders from time to time to Hooker & Co., commission merchants and members of the Board of Trade, to buy or sell commodities on the Board for his account, which orders they executed in the usual forms of such transactions, where the seller had the option to deliver within a certain time. These dealings continued until 1876. When they were closed, the defendant was indebted to Hooker & Co., some $22,000, in payment of which he transferred four notes of $5,000 each, held by him against the Couch estate, the payment of which he guaranteed, two of which notes were transferred by Hooker & Co., to the Third National Bank, upon which the suit was brought. The court held:"

"The testimony in the case fully satisfies me that Mr. Hooker, when he assumed for his firm to act as the defendant's broker, did not contemplate nor intend to make any different transaction from the defendant than for his other customers. He undoubtedly intended to make purchases or sales when the seller had an option as to the time within which to make delivery, and he intended to so perform the defendant's transaction as to avoid taking and paying for any article bought; and he seems to have explained to the defendant how, by reason of his many customers, some of whom were sellers and others buyers on the market, he could so manage the defendant's deals that he need not take any commodity bought, and could settle simply the difference between the purchase-price and the market-price when the seller had the right of delivery. Hooker did not, I am satisfied from the proof, intend to engage in time contracts or to buy sell at a future time."

An action decided directly contrary to the above, was the case of Foote vs. Pearce, brought in the Cook
County Circuit Court, appealed to the Appellate Court, and thence to the Supreme Court, by the defendant. It was an action of trover to recover the value of one of these same Couch notes for $5,000, which had been assigned to Hooker & Co., and by them to defendant Pearce. Judge Scott, in his opinion, remarks:

"It is plain that under the contract between Foote and Hooker & Co., it is not within the contemplation of the parties that any actual purchases or sales of grain or other commodities, should be made for plaintiff, or on his behalf. All the speculating that was to be done was in differences in options, or, as the parties intended it, "buying and selling in the market." * * Such a contract is obviously fictitious, having none of the elements of good faith, as in a contract where both parties are bound, and is defined by statute as a gambling contract."

"When a person met with losses under an optional contract, and, in adjusting such losses, transferred to his brother, through whom and in whose name the deal was made, certain promissory notes which he held, with his guaranty thereon, the assignment and guaranty of the notes were void, not only in the hands of the immediate assignee, but also in the hands of another to whom the latter might transfer the notes without value, as in the case of an assignee for the benefit of creditors, as in this case."

The plaintiff's judgment of $7,265 was accordingly affirmed in the Appellate and Supreme Courts. (113 Ill.)

WALTER MORTON HOWLAND, attorney and counselor at law, the son of William Avery and Hannah (Morton) Howland, was born at Conway, Franklin Co., Mass., on July 22, 1840. He is lineally descended from John Howland, one of the passengers in the ship America in the Mayflower, and his family have since been highly connected throughout the New England States. He remained at home during his boyhood, and after graduating from the Williston Seminary in 1853, entered Amherst College, taking the regular course, and graduated among the first in 1856. After leaving college, he determined to take up law as a profession, became a student in the office of his brother, Jos. W. Howland, one of the leading lawyers of Lynn, Mass., since deceased, and later continued his studies in Chicago. He was admitted to the Bar by the Supreme Court of this State in 1869, and by the Supreme Court of the United States in 1876. He is recognized by both Bench and Bar as a most scholarly lawyer. As an able advocate and a sound counselor, he has been successful in securing a lucrative clientele, to which he devotes his unceasing attention and energy.

Mr. Howland was married, on July 2, 1873, to Miss Florence C. Reynolds, daughter of Hon. John Reynolds, of Terre Coupie, Ind.; she died on January 2, 1874. His marriage to Miss Mildred Warner, of Chicago, occurred on July 13, 1881. They have one child, Florence Elizabeth, born on May 28, 1883.

JAMES FRANK, attorney-at-law, was born in the town of Loughborough, Leicestershire, England, on March 29, 1841. George Frank, his father, immigrated to America in 1833, and with his family settled at Wheeling, Cook Co., Ill. The senior Frank died upon his farm, in March, 1846. The mother of James Frank subsequently married John Henley, a farmer of Northfield, with whom he and his brother lived and worked on the farm until they were eighteen years old. He then decided to obtain an education, and, with no other resources than his own energy and determination, he started out to prepare the way for his future life. He entered the preparatory school connected with the Northwestern University, at Evanston, and during his academic career supported himself, and so ambitious and determined was he to succeed in his purpose that he reduced his expenses to the lowest possible figure by keeping bachelor's hall. He passed through college successfully and with honors, being at the head of his class when he graduated, in July, 1866. During almost the whole period while at the school his health at times was very poor, and his physical condition did not improve for several years after entering into the practice of law. From the Northwestern University he received the degree of A.B., and, after leaving the college, he became principal of the Bloom Academy, where he remained one year. He then went abroad. Upon his return, he attended the Chicago Law School, from which he graduated in 1869. In May of that year, he was admitted to the Illinois Bar, and in the Supreme Court, by the State Board of Law, being called upon to fill out the unexpired term of Joseph S. Dennis, resigned. Mr. Frank was first married, in 1869, to Melinda Doty, of Fort Wayne, Ill., and in October, 1870, he married, in Wheeling, Mrs. Mary E. McKeen, daughter of John Allen, Sr. They have two children, a boy and a girl. Mr. Frank is a member of the Century M. E. Church.

WALTER J. ELY, one of the most reliable and successful members of the Chicago Bar, is the son of Andrew and Johanna Ely, and was born in Bergen, Norway, on April 13, 1841. He remained at home until seventeen years of age, during which time he attended the Wesleyan Grammar School and the public schools of his native country. At Boston, he went to sea in the coasting trade, continuing in that vocation until 1860, when he secured a position upon the school-ship, "Massachusetts," which he filled until the Rev.

Mr. Frank retired in 1869. He was called upon to fill out the unexpired term of Joseph S. Dennis, resigned. Mr. Frank was first married, in 1869, to Melinda Doty, of Fort Wayne, Ill., and in October, 1870, he married, in Wheeling, Mrs. Mary E. McKeen, daughter of John Allen, Sr. They have two children, a boy and a girl. Mr. Frank is a member of the Century M. E. Church.
their property, and that all other property-owners on LaSalle Street, and other streets in the vicinity of the Chamber of Commerce Building, would also be damaged to a great extent. The bill prayed for an injunction restraining the City of Chicago from proceeding to execute its orders for the vacation of that part of LaSalle Street between Jackson and Van Buren streets.

FRANK J. SMITH was born at Centre Lisle, N. Y., on January 26, 1835. When he was fourteen, the family removed to Ashtabula County, Ohio. He there entered Kingsville Academy, with a view fitting himself for college; but circumstances over which he was powerless thwarted his intentions. On leaving the academy, he taught school one winter and worked for a railroad company about three months. In the spring of 1866, he came to Chicago, and, obtaining a place in the office of Melville-W. Fuller and Company, commenced his study of the law, finishing his course in two years, and being admitted to the Bar in the fall of 1868. He began practice in company with Justice D. Harry Hammer, with whom he was identified until after the great fire. In 1872, he was associated with S. K. Dow, and they continued together until 1875, when the firm dissolved and Mr. Smith joined William C. Ives, now of Omaha, Neb. At the end of two years they separated. In 1883, Mr. Smith admitted Frank A. Helner into partnership, and the firm is now Smith & Helner. Mr. Smith applies himself to a miscellaneous civil practice, and among the prominent cases in which he has appeared was the special assessment against the State Insurance Company. The creditors of that corporation employed Mr. Smith to look into its affairs, and by his efforts he succeeded in adding about $80,000 to the assets of the bankrupt concern. Single-handed he fought against a number of the most prominent attorneys of the City and State, and he fairly earned the victory. For five years Mr. Smith was secretary of the Chicago Law Institute. He is a member of Garfield Lodge, No. 686, A. F. & A. M., and for several years has been an elder of the Chicago First Presbyterian Church. He is also secretary of the John Morris Company, and is a stockholder and director of the Chicago Trust and Savings Bank. Mr. Smith was married on July 2, 1871, to Miss Myra C. Gilbert, a daughter of F. P. Gilbert, of Creston, Ill. They have two children,—Lottie and Foster.

GEORGE MANIERE, the eldest son of Judge George and Ann H. (Reid) Manierre, was born at Chicago on February 5, 1845. He was graduated from the University of Michigan in 1867, and entered the law school, and after graduating returned to Chicago. He was married in 1876, to Arnie E. Edgerton, daughter of Hon. Alfred P. Edgerton, of Fort Wayne, Ind. They have had six children,—Juliette, Alfred, Louis, Arthur, Samuel and Frances; Juliette and Samuel are deceased.

WILLIAM J. ENGLISH is the son of John and Elizabeth (Hill) English, and was born at Kenosha, Wis., on May 16, 1845. His father, now deceased, was a merchant of Chicago, was formerly a prominent business man and treasurer of Kenosha County, and afterward engaged in the wholesale millinery business in this city. William J., after acquiring a preparatory education at the Kenosha High School, entered the Michigan University at Ann Arbor, in 1863, graduating in 1867, with the degree of A. B. He began the institution as Greek tutor, assistant librarian and curator, pursuing also a two years' course in the Law School, from which he graduated in 1869, and was admitted to the Michigan Bar. In July, 1866, Mr. English came to Chicago and entered the law office of Walker & Dexter as assistant to J. M. Walker, counsel for the Chicago, Burlington & Quincy, the Michigan Central, and the Joy railroad companies. In 1871, he formed a copartnership with Thomas A. Moran, under the firm name of Moran & English, this association lasting until Mr. Moran, in the fall of 1879, was elected circuit judge of Cook County. In 1880, with W. J. Hynes and Edward F. Dunne, he formed the great partnership of Hynes, English & Dunne, Mr. English making corporation law his specialty. Among the important corporations retaining his services may be mentioned the Catholic Bishop of Chicago, Hibernian Bank, Hibernian Banking Association, Chicago City Railway Company, Gas-Light and Coke Company, and the Fortune Brewing Company. In addition, he has the management of a great number of estates and a large common-law docket. He has been a member of the Chicago Board of Education, on which he served from 1874 to 1881, a large portion of the time as chairman both of the committee on school lands and property, amounting to $3,000,000, and of the committee on high schools. Although a thorough classical scholar, and fully appreciating the value of the higher branches of study taught in the city high school, he favored giving every possible advantage to the primary schools, when the condition of the city finances made retention of a necessity. Mr. English served for many years attorney for the Board of Education. He has not lost his fondness for his early studies and pursuits, and his opinion

BENCH AND BAR.
is regarded as of great value on any question relating to comparative etymology, on which subject he has constantly lectured and written with the best authorities in the country; and he is also deemed an authority on philology.

Mr. Leonard, a lawyer of high standing in Chicago, and closely identified with the best interests of Hyde Park, was born on June 19, 1847, in Stafford, Genesee Co., N. Y. Educated at Columbiana College, Washington, D.C., he graduated at the law school of that institution in June, 1869, and immediately became a resident of Hyde Park. In 1881, he was elected a member of its Board of Education, on which he still serves, and has been influential in maintaining the high reputation for efficiency which the schools of the village have ever possessed. Mr. Leonard was elected a trustee of the village in April, 1882, and one year later president of the Board. While holding this position his reports to the Board were considered models of their kind, recommending, in an honest, common-sense manner, the policy of economy and the trimming away of all governmental excesses. As a lawyer, he evinces the same characteristics. Mr. Leonard was married in September, 1876, to Laura R. Bultin, daughter of Thomas G. Bultin, of Hyde Park.

MEMBERSHIP IN BOARD OF TRADE NOT PROPERTY.

In the case of Barclay vs. Smith (107 Ill.), our Supreme Court decided:

"A certificate of membership in the Board of Trade of the City of Chicago is not property, in any such sense as to render it liable to be subject to the payment of the debts of the holder by legal proceedings.

"The Board of Trade of the City of Chicago is a corporation. Under its charter and by-laws, no one can become a member except upon the vote of not less than two of the board of directors; nor is a certificate of membership transferable to any person except he be approved of by the directory after due notice. The right of membership is not a right which the holder can dispose of as he pleases; nor can he be condemned in favor of a purchaser or assignee by the courts. It has none of the elements of property to render it liable to a judicial sale."

In 6 Bissell, Judge Blodgett decided:

"I am of opinion that the bankrupt's membership in this Board [of Trade] being in the nature of a franchise, title or privilege, does not vest in or pass to his assignee, and can not be treated as a portion of his assets."

In the case of Weaver vs. Fisher (110 Ill.) it was held:

"A person engaged in the milling business in Chicago employed an agent to manage the financial part thereof, and furnished him with a certificate of membership on the Board of Trade, to enable him to conduct that part of the business advantageously; and such agent, on leaving his employment, refused to transfer such certificate to the successor under the same to his employer. Held, That a court of equity would compel him to assign the same in blank, and deliver the same to his employer."

"It is a misapprehension to suppose that this court held in Eareck vs. Dawson (107 Ill.) that there are property rights of any kind in a certificate of membership in the Board of Trade of the City of Chicago. It was simply held in that case that such a certificate is not property which is liable to be subjected to the payment of debts of the holder by legal proceedings, under the law as it now exists."

MYRON A. DECKER was born in Livingston County, N. Y., on February 21, 1837. His father, Henry Decker, sprang from an ancient Dutch family, while his mother, Martha (Mather) Decker, was descended from the famous New England family of that name. When he was fourteen years of age, his mother died; and, in order to give his boy good educational advantages, Mr. Decker removed to Livingston, where Myron studied in Genesee College and Genesee Wesleyan Seminary. In the spring of 1850, at twenty-three years of age, he was admitted to practice at the Bar of the Supreme Court of the State of New York. He at once established himself at Livonia, N. Y., and practised law for two years, when he accepted a position in the United States Treasury Department, at Washington, which he retained until the close of the War. In February, 1865, upon motion of Senator Timothy O. Howe, he was admitted to practice before the Supreme Court of the United States, and during the succeeding three years he spent most of his time in Washington or Wisconsin, engaged in suits for setting aside fraudulent government sales that took place in the northern part of that State. In 1870, Mr. Decker located at Chicago, and practised law for seven years. His office and library were completely burned out in the great fire, but he continued his practice alone until 1873, when he associated with himself Henry Decker, of Des Moines, and thereafter, until 1879, they practised together. In 1879, he returned to Chicago, and since then has given himself to the care of his large real-estate interests and to the management of large companies. Mr. Decker was married on April 29, 1869, to Miss Kittle L. Knox, of Milwaukee, daughter of Thomas M. Knox, deceased, formerly a judge of the city of Madison, Wis., and the son of Cyrus and Susan Allen, and was born in Erie County, N. Y., on May 16, 1837. When he was six years of age, his parents removed from Mears County, Mich., to the village of Genesee, N. Y., where he attended the public schools until prepared to enter the college at Genesee, from which he graduated, with honors, in 1853, and shortly afterward went to Watervill, Cal., pursuing natural legal ability, he became interested in law, and began his study in the office of Jabez Chadbourn, a prominent lawyer of the Trinity County Bar. He was admitted to practice on April 20, 1863, and succeeded to a partnership interest with Mr. Chadbourn. He continued there in active practice until August, 1870, when he came to Chicago. From 1875 to 1880, he was associated with his brother Charles Allen, but since has been alone. Mr. Allen is recognized by the Chicago Bar as a reliable and brilliant advocate, who leaves no stone unturned in the interest of his clients, withal a gentleman of sterling principles and integrity. Mr. Allen was married on March 23, 1854, to Miss Diantha Joy, of Cass County, Mich. They have one child.—Susie J."

WILLIAM J. MANNING, whose ability and energy called forth a petition from many business and professional men of Chicago requesting the use of his name with that of his leading city attorney, was admitted to the bar in 1884, first came to this city twenty years before. The early period of his residence was spent in various commercial pursuits, but having persisted in his legal studies he took a course in the Union College of Law, graduating in January, 1884, being admitted to the Bar during the latter part of that year. For three years after the fire, besides attending to a large commercial business, he established himself as an insurance lawyer in the adjustment of losses, and subsequently made his mark as an attorney in bankruptcy cases. He brought to punishment, under the old bankrupt law, Henry Fenestein and Charles Plucher, for defrauding their creditors. The former was sent to the penitentiary for one year and the latter to the county jail for six months. Since 1874, his practice has been general. He has been the attorney for many years of leading manufactories and wholesale houses of New York and Boston, and a collection of large debts. He practiced alone until November 1, 1884, when he formed a partnership with Percy V. Castle, under the firm name of Manning & Castle. Mr. Manning was born at Waterloo, Seneca Co., N. Y., on April 15, 1835. In 1849, his parents removed to Warrenville, DuPage Co., Ill., where his father was for many years a leading merchant. Graduating from the seminary in 1856, he worked in a store and afterward went into business for himself at Aurora, meanwhile pursuing his legal studies. While in Warrenville and in Aurora, he was one of the leading members of the republican party, and was for several years a member of the central committee of DuPage County. Mr. Manning was married on May 10, 1858, to Ellen P. Curtis, daughter of N. B. Curtis, formerly a banker of Peoria. They have two children,—both boys."

THE CITY VS. EX.-TREASURER GAGE ET AL.—This was a case involving over half a million of dollars, and the facts were as follows: On November 7, 1871, David A. Gage was duly elected his own successor as treasurer of the City of Chicago. The records in his office were destroyed by the fire of October 9. Subsequently he reported that there was in the city treasury $645,749 on October 9; and that at the date of the expiration of his second term, in December, 1873, there was in his hands the sum of $965,780, of which sum he paid over to his successor $458,077, leaving a deficit of $507,703. This action was brought in the Circuit Court against Gage and his sureties on his official bond, to recover this amount.

The circumstances of giving the bond were as follows: In November, 1871, Robert Clark, Gage’s son-in-law, at Gage’s instance, took the bond in blank, except the treasurer’s signature, and proceeded to secure the names of W. F. Tucker and John B. Sherman. Mr. Tucker inquired what was to be the amount of the bond, to which Clark replied that the amount had not then been fixed, but that he (Tucker) could find out that when he obtained the bond from Sherman and Tucker signed under these circumstances, and procured Sherman to do so. The lat-
ter made the same inquiry as to the penalty of the bond, and stated that he would not sign it if it was to be over $250,000, and not then unless the co-sureties were satisfactory to him, which contingencies he would reserve until he went to acknowledge the bond. Sherman never did acknowledge it, and never saw it again until on the trial of the case; he never authorized anyone to fill up the bond, and never ratified or approved it after it was filled up. On November 27, Gage lodged with the city clerk the same paper without signatures of the parties whose names were subscribed thereto, but with all the blanks still unfilled. The paper so remained with the city clerk until December 11, at which date Gage went to said officer, and requested him to fill up the blanks, stating that the required amount of the penalty was to be $1,000,000. This clerk declined to do. The two then went to Mr. Clyde, an attorney then in the employ of the city, and at the request of Gage he filled up the blanks in the bond. It was subsequently, on January 8, 1872, approved by the Common Council.

The trial in the Circuit Court resulted in a verdict against the defendants for the penalty of the bond and $507,703 damages. The defendants took the case to the Appellate Court, where the judgment was reversed, from which decision the city appealed to the Supreme Court. There it was decided:

"A party executing a bond, knowing that there are blanks in it to be filled by inserting particular names or things necessary to make it a perfect instrument, must be considered as agreeing that the blanks may be filled after he has executed the bond. If the party signing the paper shall insert in the appropriate places the amount of the penalty, or the names of the sureties, or any other thing he knows to be of importance as affecting his interest, he may in that way protect himself against being bound otherwise than he shall thus specify; but if, relying upon the good faith of the principal, the surety shall permit him to have possession of a bond and signed in blank, the surety will have clothed the principal with an apparent authority to fill the blanks at his discretion, in any appropriate manner consistent with the nature of the obligation proposed to be given, so that, as against the obligee receiving the bond without notice, or negligence, and in good faith, the surety will be stopped to allege that he executed the paper with a reservation or upon a condition in respect of the filling of such blanks, and this without the knowledge that there were such blanks in the instrument, or that there had been filled subsequent to the signing by the sureties, and in their absence, will not operate to affect the obligee with notice of any secret conditions upon which the sureties may have signed the bond."

There was a question whether the deficit occurred under the first or second term of the treasurer. On this point the court said:

"In an action on such bond, the sureties will be precluded from showing that the amount so appearing as treasury balances in the hands of their principal was not actually in the treasury at the time. Nor would it be competent for the sureties to prove that a part of the balance shown to have been on hand to a certain time, was actually loaned out for the benefit of the city."

The judgment of the Appellate Court was, therefore, reversed, and the cause remanded, with directions to enter a judgment of affirmance of the judgment of the Circuit Court.

Offield & Towle, comprising Charles K. Offield and Henry S. Towle, devote their whole time to practice in the U. S. Courts; and in that branch of practice consists almost entirely of patent, trademark and copyright cases. Their clientele is probably as exclusive as that of any firm in the city, and in their practice they are associated in several prominent cases with the finest legal talent in the United States. One of the most prominent cases involved the practice of Charles K. Offield and Benjamin F. Thurston. In their professional ethics, they disdain to do a dishonest act, and give disinterested advice to actual or prospective clients, discouraging unjust or groundless litigation. They have been prominently identified with many of the most important patent causes in the country,—e.g., the Washburn-Moen Manufacturing Company and Isaac L. Ellwood hollow-suit wires, the "horse-nail" litigations, the beef-canning suits, and the oil-throwing combination suits; general attorneys for the large Manufacturers Park Car Company and had charge of the suits against the Wagner Sleeping Car Company; in matters in the West, for the Singer Sewing Machine Company; general attorneys for the Company Manufacturing Company, New York; general attorneys for the Meigs Patent Manufacturing of Olean, and managed the extensive suits on that behalf in the United States Court of this city; attorneys for James S. Kine, of Chicago; and held in personal elevations, represented principally by W. E. Hale & Co.; for R. J. & Co., New York; for Jones & Laughlin's large iron interests; for the tobacco trade-marks of S. W. Venable & Co., of Petersburg, Va., and for the Chelms Electric Company; attorneys for the car-lamp combination, and for the large packing firm of Libby, McNeil & Libby; in addition to many of the wealthiest corporations and firms in the United States.

Charles K. Offield was born at Lebanon, Fulton Co., Ill., and is a son of Franklin Pike Offield, a prominent business man, who was honored by numerous offices of trust in that county. He was one of the incorporators of the town of Canton, Ill., and erected the "Henry S. Temple" buildings of Fulton County. Haled when Charles K. was a child, leaving him to care for his mother, who is now Mrs. E. O. Thompson, of New Haven, Conn. Mr. Offield began his professional education at the University of Illinois, and as early as 1867, was engaged as a lawyer for the firm, and his place was filled by Mr. Offield, the firm name being changed to Goodwin, Offield & Towle, which continued until the death of Mr. Goodwin in 1875, when the business offices and firm were continued by Mr. Offield. He is an expert in mechanics, but also in chemistry and natural philosophy, and likewise erudite in the law in all its details, and thoroughly conversant with all the decisions of the courts of Europe and America bearing upon patents. He is brilliant and comprehensive in his presentation of cases, and possesses pre-eminent ability as a forensic orator. Mr. Offield is a public man in politics, but, in consequence of the demands of his profession, gives no more consideration to that subject than becomes a good citizen. In 1875, he was married to Miss May K. Munson, of New Haven, Conn. They have had three children,—Charles K. Jr., Franklin Pike (deceased), and James Rogers.

Mr. Towle was born at Mishawaka, Ind., on October 10, 1842, the son of Gilman Towle, who is still a leading citizen of Mishawaka. He received a thorough education at Mishawaka and Valparaiso, Ind. In 1862, he was appointed by Governor Morton to fill in the vacancy caused by the death of Mr. Offield, as an assistant examiner of patents and trade-marks, and was charged with the duties of the office. In 1864, he was appointed a member of the Board of Incorporated Navigators of the United States; and in 1866, he was appointed and served as a member of the United States Board of Trade-Marks and Patents. Mr. Offield & Towle, subsequently Goodwin, Offield & Towle, and Offield & Towle. Mr. Towle has a high standing in his profession, and has played a very important part in building up the extensive practice of this firm. For some years he has not taken an active part in politics, but his sympathies are with the republican party. He has been a trustee of the Northwestern University, at Evanston, for ten years, which position he still fills, and is prominently identified with the interests of that institution. He is also one of the board of management of the Union College of Law. He is greatly interested in all educational matters, and is an earnest advocate of raising the standard of educational excellence. In 1868, he was elected to the Board of Trustees of the University of Michigan, at Ann Arbor, in 1867, graduating in 1869. Coming to Chicago, he was admitted to the Bar of Illinois, and began practice in the office of Arrington & Dent. He afterward became a member of the firm of Goodwin, Larned & Towle, and Offield & Towle. Mr. Towle is a Methodist, having been identified with that church many years.

Mr. Dunlap Adair was born at Carlisle, Penn., on November 24, 1843. His father, D. Dunlap Adair, one of the most distinguished lawyers of Eastern Pennsylvania, was an earnest whig, and included among his many progressive and patriotic traits, the fact that after the war the young Dunlap Adair was commissioned to serve in the Potomac Regiment of Maryland. Young Adair received his higher education at Dickinson College, Carlisle, but, before graduating, enlisted in Co. "A," 7th Regiment Pennsylvania Reserves, 3d Division, 1st Corps. Army of the Potomac. He was soon promoted to the rank of lieutenant of Co. "G," and after the battle of Antietam became captain and commissary of subsistence, serving on the staff of General Meade, then commanding the Division to which he was attached. In 1865, he was transferred to the staff of S. Wylie Craw-
ford, and then to that of General Abner Doubleday. In the latter position he was present throughout the Gettysburg campaign, and was subsequently appointed inspector of the subsistence department for the Army of the Potomac. Richmond, being stationed at General Grant’s headquarters, where he remained until the movement against Richmond in 1865. He was then assigned to the staff of Brigadier-General Randall S. McKenzie, commanding the cavalry brigade of the Army of the James, and Captain Adair remained on duty at Richmond until mustered out in November, 1865. He was brevetted major and lieutenant-colonel for gallantry in the field, but, higher than any title, he prides a letter from General Meade, speaking in high terms of his services. He returned to Carlisle in the winter of 1865-66, and commenced the study of law with A. Brady Sharp, being admitted to the bar in 1867. He removed to Chicago in 1870, and was admitted to the bar in 1872, and thenceforward a resident of John V. Hollin, Wisconsin, where he remained five years. In 1883, he formed a partnership with Lorin C. Collins, Jr., which was dissolved upon Mr. Collins’ elevation to the bench.

SLEEPING-CAR COMPANIES NOT LIABLE AS INNKEEPERS OR CARRIERS.—In the case of C. M. Smith vs. Pullman Palace Car Company (73 Ill.), it appeared that the plaintiff bought a sleeping-car ticket from Chicago to East St. Louis, for which he paid $2, and took a berth in a Pullman car at nine o’clock p.m. His money ($1,180) was in an inside vest-pocket, and when he retired for the night the vest was placed under his pillow. In the morning he found the vest as he left it, but the money was gone. On trial in the Superior Court, the plaintiff obtained a verdict and judgment for $277. On appeal to the Supreme Court, the judgment was reversed and the cause remanded.

The court said:

"The owners of sleeping-cars, who receive pay from lodgers merely for the sleeping accommodation afforded by their cars, are not liable as innkeepers for money that may be stolen from the person of such lodgers on the cars. The proprietors of sleeping-cars, and can not be held responsible for ordinary thefts by or from persons on board the cars."
an effort to save her child, which she was carrying in her arms, she fell backward, sustaining a severe injury of the spine, from which she suffered intense pain. It was not until after six months that she could be carried, even on pillows. She recovered a judgment against the city for $7,500. On appeal by the city, the Supreme Court decided:

Where a city suffers a sidewalk on a frequented street, built some four feet above the grade, to become dilapidated and out of repair, and in such a condition as to become dangerous, and after notice of its unsafe condition did not repair the same, the right of the plaintiff to recover, no want of prudence being attributable to her for the injury so received, was clear.

HOWARD I. HENDERSON, attorney-at-law, is a native of Chicago, and a son of one of its most respected and useful citizens, the Rev. Abner W. Henderson, well known in the Presbyterian church and as one of the early settlers of the city. The son was naturally afforded every opportunity to acquire a thorough education, preparing for college at a select school in Clinton, N. Y., and then going to Heidelberg, Germany, to pursue a course of study in its famed university. While there he gave particular attention to the study of civil law, and afterward attended the University of Edinburgh. Upon his return to this country, Mr. Henderson entered the Albany Law School, from which he graduated in 1878. After being admitted to the Bar of New York State, he returned to Chicago, where he commenced practice as a member of the Illinois Bar. At first he went into the office of Miller, Van Arman & Lewis, but soon afterward established his own office, and has built up a successful practice. He is a standing and valued member of the bar, and is favorably known as an attorney representing banking and other large interests.

CHARLES A. DIBBLE, a prominent member of the Chicago Bar, and president of the Chicago Union Veteran Club, has been a resident of this city for over fourteen years, and since the great fire of 1871 has been identified with the most advanced progressive interests of the metropolis. Mr. Dibble was born in Herkimer County, N. Y., the son of William L. and Sarah Dibble, on January 31, 1832. His mother was descended from the McQueen family of Scotland, and his father was a well-known resident of Herkimer, Salisbury and Stratford, where for many years he was engaged in the lumber business. In 1849, the family came West and located at Randolph, Columbia Co., Wis. Here the elder Dibble engaged in farming, and the son began the acquirement of the rudiments of a thorough practical education, attending the schools of Randolph and Fox Lake, and finally became a teacher in the academy where he had made his early studies. When the War of the Rebellion broke out, the young schoolmaster had not very extensive opportunities, but with all the ardor of honest patriotism he set to work to help organize the noted Fox Lake company, which recruited mainly professional men, merchants and students. On August 13, 1862, Mr. Dibble was formally enrolled in the Union service, in Co. "E," 29th Wisconsin Infantry. The regiment went into quarters at Camp Randall, near Madison, Wis., and soon afterward was sent South, first to Helena, Ark., then to Prior's Point, Miss., and to Miliken's Bend, La., where it was assigned to the 13th Army Corps, under General McClernand. The regiment was present at the running of the battles on the night of April 22, 1863, at Vicksburg, and, following the Grant campaign, was present at the Grand Gulf gunboat attack of April 29. On May 1, 1863, at the battle of Port Gibson, Miss., Co. "E" came out of a terrible sortie on the enemy with over twenty-five men killed and wounded, among the latter Surgeon Sergeant Dibble. He was carried back to his regiment by Dr. James H. Plecker, now of this city, and at that time a stranger to him, and was conveyed to the hospital, where his wounds necessitated the amputation of a leg. Later, he was taken North with others by boat to near Young's Point, from he sailed up hard, curvy roads across Young's Point, then by boat to Memphis, Tenn., and then to the Jefferson barracks at St. Louis, Mo., where he was discharged on September 2, 1863, after over a year of active service. Mr. Dibble then returned to the old domicile, Wis., and resumed his tutelage of the public schools at that place and at Fox Lake, Dodge Co., and, in the summer of 1866, went to Milwaukee, where he attended the Milwaukee Law School and studied the course of law lectures, preparatory to adopting the profession of the law. Returning again to Columbia County he was made clerk of the Circuit Court at Portage City, a position he filled for six consecutive years, being re-elected twice to the office. In 1871, he
was admitted to the Wisconsin Bar in Dodge County, and at that time was one of the best-known professional men in the southern portion of the State. In October, 1871, Mr. Dibble resigned his position as clerk of the court and came to Chicago, arriving in this city about the time Mr. Blair had left the practice of law, and soon became a representative member of the city bar, for some time having Congressman Hiram Barber as a law partner. In addition to this, he became identified with veteran societies, formed for the promotion of the interests of veterans of the Civil War, and it was on the recommendation of General Blair, a member of the Illinois delegation to the first session of the Thirty-seventh Congress, that Mr. Dibble was elected to the Republican national convention of 1872. Mr. Dibble was married, in 1875, to Miss Sarah P. Winter, eldest daughter of P. Winter, of Horton, Wis., formerly solicitor of the 19th Wisconsin Infantry, and connected by ties of relationship with the family of John I. Blair, of New Jersey. They have two charming and interesting children,—a daughter, aged fourteen years, named Sarah Peck Dibble, and a three years' her junior, the eldest daughter, Little Blair Dibble. Mr. Dibble's parents died some years since, in Wisconsin. Of the members of the family still living are two brothers, Mr. Dibble, farmers in Minnesota, one brother engaged in mercantile business at St. Louis, another in the abstract business at Minneapolis, and another, a clergyman, in Dakota.

WILLIAM LATHROP MOSS, one of the ablest and most successful members of the Chicago Bar, is the son of William L. and Minerva C. Moss, of Granville, Mass., and was born on October 25, 1835. During his infancy the family came West and settled in Peoria County, this State, where young William attended school and was later married. He entered Peoria College, under Bishop Chase, where he finished his education. Some years later he determined upon law as a profession and began reading in the office of Jonathan K. Cooper, a leading lawyer of Peoria County, and was admitted to the Bar in 1859. He continued active practice, as an associate of Mr. Cooper, until 1871, when he came to Chicago and settled down to practice just after the fire. Mr. Moss is well known to both the Bench and Bar as an able lawyer and to a numerous clientele as aforcible advocate and sagacious counselor. He was married June 14, 1865, to Miss Hattie L. Leavitt, of New Hartford, New York, an estimable lady of many accomplishments. They have three children,—Amicie Tilden, Edith Helen and Charles McLean.

FRANK J. CRAWFORD was born on July 12, 1832, in Huntingdon county, Pennsylvania, is the son of a family of that name, of Scotch extraction, that settled in Pennsylvania during early history. His youth was spent on a farm in Central Pennsylvania. In the fall of 1855, when he was fourteen years of age, his family removed to Western Maryland. He subsequently became a student in Alleghany College, at Meadville, Penn., from which he received the degree of Master of Arts. He taught school in Maryland, Pennsylvania and Illinois. In 1859, he came to Illinois, and resided in LaSalle County, engaging in mercantile pursuits and teaching school. Later, he read law in Ottawa, Ill., in the office of Leland & Leland. Mr. Crawford was admitted to the Bar in 1859, after examination by Judges Beckwith and Peck and Hon. N. B. Judd. He practiced until the opening of the War, in 1861, when he enlisted in the 53d Illinois Volunteer Infantry, passing through all gradations from private to captain. He was afterward brevetted major of volunteers, for meritorious services in the field. He participated in the Tennessee and Vicksburg campaigns; was promoted to a second lieutenant "for meritorious services at the battle of Pittsburg Landing," or Shiloh; and was soon after appointed aid-de-camp on the staff of the brigadier commander, General J. G. Lauman, of the 7th Iowa Infantry, remaining with him until he was transferred to the subsistence department. On the latter, he, in his official report of the battle of Hatch's River, fought in October, 1862, says: "To Captain Secret, assistant adjutant-general, and Lieutenant Frank J. Crawford, my aide, I owe the most sincere thanks for the valuable assistance they rendered me. I can truly say of them that they were the right men in the right place." He was appointed by President Lincoln as commissioner of subsistence, with the rank of captain, November 10, 1862, on the recommendation of General Hawkins, chief of the subsistence department of the staff of Major-General Grant. With the exception of one year that Major Crawford was stationed at Port Hudson, La., he was in active field-service during his entire term of three years and eight months. He was on the staff of Major-General Alvin P. Hovey, of Indiana, during the Vicksburg campaign, and was aide-de-camp upon the staff of Major-General George L. Andrews, in Louisiana. Major Crawford, at the close of the War, returned to Illinois, and resumed the practice of his profession. In 1871, he came to Chicago, and has been connected with interesting cases, involving important litigation, since that time. Major Crawford is an able lawyer. He is diligent and persevering in business and leaves no part of his duty unperformed. In politics he is a Republican, having cast his first ballot for General Fremont, in 1846. Ever since that time he has uniformly supported the republican party. In 1865, he married Miss Mais Fayette, daughter of the late General E. P. Fayette of Ohio, and the eldest sister of Captain Joseph Fayette, U. S. N.

LIABILITY OF STREET-CAR COMPANIES FOR ACCIDENTS.—On May 13, 1875, the plaintiff, Mrs. Phebe R. Mills, in company with Mrs. Camp, took passage on the West Division Railway open-cars, at a point on the southern part of its line, intending to go to a point a short distance south of the northern terminus of its line; but this intention was abandoned on the coming up of a slight shower of rain, and they remained in the car (intending to return home by it) until it had been run to its northern terminus and returned by train as far as the corner of State and Randolph streets, where, the car stopping, the plaintiff and her friend again changed their minds, and concluded to leave the car at that point. Mrs. Camp left the car without difficulty, but the plaintiff, while attempting to leave it, was, in consequence of the car being suddenly started forward, thrown with great violence to the ground. She received a severe and painful injury, and was put to serious expense for attendance of physician and care in nursing. The plaintiff then recovered a judgment against the company, before Judge Rogers, from which an appeal was taken to the Supreme Court. Here the judgment was reversed and the case remanded.

At the January Term, 1882, of the Circuit Court, another trial was had, which resulted, as the first, in a judgment for the plaintiff. The case was then appealed, first to the Appellate Court, which affirmed the judgment below, and then to the Supreme Court, which also affirmed the judgment. The law is laid down as follows:

In an action to recover for personal injuries, when the plaintiff was injured while being assisted by the negligent starting of the car while the plaintiff was in the act of going to or from the car, it is of no consequence whether the car was stopped at the instance of the plaintiff or not, or whether the plaintiff asked and obtained permission to alight.

"If a street-car is stopped for any cause where passengers are in the habit of getting off, a passenger will have the right to alight without making any request or obtaining any permission; and if the driver of the car knew, or by the exercise of due care would have known it, will be negligence to start the car before a passenger in the act of leaving the car has had a reasonable time in which to alight."
Northern Vermont; entering St. John's College, near Montreal, Canada, where he graduated at twenty-two years of age.

The course of study there being conducted in French, he mastered that language so as to write and speak it fluently. Reading law with J. L. Edwards, a prominent lawyer of Derby, and paying his way by teaching French, he was admitted to the Bar of Vermont in 1862. The same month, he enlisted in Co. "E," 8th Vermont Infantry, and afterward became captain of Co. "I" of the same regiment, serving with credit in the campaign through which that division passed to the Potomac. At Harper's Ferry he was captured, released on parole, and sent to Camp Douglas, Chicago, where he remained until exchanged, when he rejoined his regiment, resigning, on account of disability, in 1865. He then returned to New York and soon built up an extensive law practice. In 1866, he was elected State's attorney of Orleans County and was re-elected in 1867; but soon resigned and became deputy collector of customs, which office he held until 1869, when he was elected to the legislature, and re-elected in 1870. He was placed on the most important committees, and was among the acknowledged leaders of his party. Some of his arguments were pronounced the best ever made in that house. From 1865 to 1870, he was United States commissioner for Vermont under the extradition treaty. He removed to Chicago just before the fire of 1871. He had great faith in the future of Chicago, and his success, both financially and professionally, indicate that his judgment was sound. Mr. Bisbee has had several partners, and is at present with John P. Ahrens and Henry Deckert, under the firm name of Bisbee, Ahrens & Deckert. In 1871, he removed to the Illinois legislature, receiving the most unanimous vote of his district. He at once took rank as one of the most formidable debaters in that body. His speeches in nomination of Senator Logan have often been referred to as a model of eloquence, and his powerful effect in securing his election. In 1874, he was married to Miss Jane E. Hinman, of Vermont. They have two children.—Hattie and Benjamin H. Mr. Bisbee is a member of the firm of B. K. and H. & C. Law Institute. Masonic connection is with Garfield Lodge, No. 680, A.F. & A.M.; York Chapter, No. 148, R.A.M.; and St. Bernard Commandery, No. 35, K.T.

John E. Dalton was born at Detroit, Mich., on June 26, 1847, his father, Michael Dalton, being a pioneer of the State. A few years after his father's death (1852), his mother Margaret (Goschody) Dalton, also passed away, leaving the boy to the care of his uncle, Francis A. Dalton, of Lake County, Ill. Mr. Dalton obtained some schooling at Lake Forest, and later continued his studies at Detroit College. In 1868, he commenced the study of law in the office of Ruman, Avery, Loomis & Comstock, in this city, graduated at the Law University, in 1871, was admitted to the Chicago Bar. He has given his attention chiefly to real estate and chancery law. Since the spring of 1878, Mr. Dalton has been Counsel, Fourth Ward, in the City Council, having been, during all this period, chairman of the Committee on Judiciary; and what is quite remarkable, although a pronounced democrat, he has been twice re-elected as a Republican without any opposition. He is interested in such organizations as the Catholic Library Association, the Illinois and the Irish-American clubs, and various charitable and benevolent institutions. He is an army man, whose mind is devoted to the study of his profession and its practice in the interest of the clients he so efficiently protects.

Thomas C. Whiteside was born on February 28, 1827, in Marion, Grant Co., Ind. He began a collegiate course at Farmers' College, College Hill, Ohio, and subsequently entered Union College, Schenectady, N. Y., in the fall of 1845, from which he graduated in 1848. He became a law student in the office of Daniel D. Pratt (afterward a United States Senator), of Logansport, Ind. He was admitted to the Bar in 1850, and commenced practice at Peru, Ill., where, in company with Leslie Robinson, he continued practice for a short time. In 1854, he settled at Wabash, Ind., where his father resided. In the fall of that year, he was appointed State's attorney for the eleventh district, and held the office, by election, until the autumn of 1864. In 1864-5, he represented Kosciusko and Steuben counties in the House of Representatives, during the session introduced the joint resolution ratifying the amendment to the Federal Constitution which abolished slavery. In June, 1866, he was appointed judge of the Twenty-first Judicial Circuit of Indiana. In 1870, he was an unsuccessful candidate for Congress, but withdrew in favor of his law preceptor, Daniel D. Pratt. In 1872, he ran for Congress as a Liberal republican, sharing in the general defeat, although his votes were largely cast in behalf of the ticket. In 1868, he was a candidate for the State Senate, and in 1871, for the State House of Representatives, for the 1872 election, and in 1873, for the United States Congress, where he held his seat, and to which he was re-elected in 1875. He has been a resident of the city of Logansport, Ind., since 1868.

George B. Walker, of Logansport, Ind. They have one son, Walker, aged fifteen years, who is already distinguished in literature, and destined to make the country as a talented youthful tragedian. He is called "The Young Rosclus," and has played an engagement as a star in the leading companies of Hamlet and King Lear. Mr. Walker was born in Danville, Ill. He is acknowledged by the press and public to be the greatest actor of his age, in Shakesperian characters, now in America.

Kerr vs. the South Park Commissioners.—This was a case involving the title to about one hundred and ninety-six acres of land in the South Park. It presented several important and interesting questions under the provisions of homestead and statutes of the State. One Charles B. Phillips was the owner in fee of the land in 1849, and all parties to the suit claimed under him. The case was tried in the Circuit Court of the United States, and the opinion was given by Mr. Justice Harlan. The facts of the case are exceedingly complicated. The final result of the case was that the complainant, Kerr, recovered one hundred and sixteen acres of the land, while eighty acres declared subject to the right of homestead. Both sides appealed to the Supreme Court of the United States, which, at the October Term, 1881, affirmed the decree below, the court being divided.

The points decided by Judge Harlan were as follows:

"In Illinois, the sale of property, while occupied as a homestead, by virtue of an execution and levy is void; and it makes no difference whether the premises are worth more or less than the $150. It is fixed by the terms of the statute as the limit of the price, the same as if the sale had been made in the manner prescribed by law.

"In determining whether there has been an abandonment of the homestead, regard must be had as well to the purposes and declarations of the wife as of the husband; and where there is an intention or desire on the part of the wife to return, the right of homestead may not be lost, even though the husband did not intend to return."

Robert Stevenson Carroll was born at New Bedford, Mass., on November 20, 1845, the son of Robert and Meribah B. Carroll, and was educated in the public schools of his native place. His father died when he was twelve years old; and when sixteen years of age he enlisted in one of the companies of the Merchants Guards, 17th Regiment Massachusetts Volunteer Infantry. He served in all the battles of the Wilderness, General Grant's campaign and was at Petersburg and at the battle of the Crater, on July 30, 1864. At the explosion of the mine he was taken prisoner and carried to Danville, Va., where he was confined over six months. Being released February 22, 1865, Mr. Dalton went to Annapolis, Md., where he participated with his regiment in the grand review at Washington, and was mustered out in Massachusetts, as a first sergeant. Afterward he went to Boston and was appointed inspector in the custom house. He was also appointed judge of the City of Boston. Mr. Dalton married Miss Mary S. Governor Washburn. He was admitted to the Massachusetts Bar and practiced in Boston. Returning to Chicago, he established himself in the practice of mercantile law and the collection of accounts. He is a member of Corinthian Chapter, No. 69, R.A.M., and of Chicago Council, No. 4, R. & S. M. He is also a member of Post No. 28, G.A.R. In November, 1879, Mr. Carroll married Helen M. Erickson.

Lewis Ellsworth (deceased), although not a resident of Chicago, had hosts of friends in this city. He was prominently identified with the public affairs of DuPage County and the agricultural interests of Northern Illinois. In 1836, Mr. Ellsworth married Miss Sarah Jane Perry, of Port Hope, Ontario. This union, in 1836, was somewhat uncertain, as to whether Naperville or Chicago would eventually lead in the commercial race. Judge Ellsworth cast his lot with the former, where for nearly half a century he resided, but had property interests in Chicago, and was always coming to this city to meet his many friends. Judge Ellsworth was born at Walpole, N. H., July 22, 1805, and in 1823, removed to Rutland County, Vt., where he resided four years. In 1827, he went to Appleton, Wis., where for nine years he engaged in various mercantile pursuits. In the spring of 1836, induced by a favorable business offer and desire to see the Great West, he left New York for Naperville, and in the fall of that year purchased a farm, and now resides upon the farm that bears the name of the family homestead. The next year he erected his dwelling-house, to which, in October, 1837, he removed his family, and immediately commenced his career as a successful country lawyer. In June, 1839, he was elected the first judge of DuPage County, and subsequently was internal revenue collector for his district, and repeatedly served upon the county board of supervisors. Judge Ells-
HISTORY OF CHICAGO.

The statute of Illinois, on this subject, passed in 1874, which prohibits common carriers from limiting their liability by any stipulation expressed in the receipt given for the property transported, was construed by the court as follows:

"I do not think that the statute of Illinois intended that a common carrier should be prevented from limiting its liability when it asked for the value of the commodity of which it undertook the transportation, and the information requested is withheld."

Judgment was given for plaintiff, and his damages assessed at $50.

EDWARD OSGOOD BROWN, of the firm of Peckham & Brown, attorneys and counselors at law, is the only son of Edward and Eliza (Dalton) Brown, and was born at Salem, Essex Co., Mass., on August 5, 1847. His parents were natives of England, with the exception of Edward, who was born in New Hampshire. The Brown family have been connected with the law in America for many generations. Mr. Brown was educated at the schools of his native town, and at the close of the war a member of the First National Bank, at which time he was engaged in active practice, at Providence, with Charles E. Gorman, and later with Mr. Brown, and was admitted to the bar of the Rhode Island Supreme Court for some time, he finished his studies in the office of Mr. Brown and subsequently in the office of Mr. K. I., and, in April, 1870, was admitted to the bar. He was elected a member of the Senate of which he has served for many years.

In 1879, he was appointed by the United States Court receiver of the Denver & Rio Grande Railway Company, pending the litigation between that company and the Atchison, Topeka & Santa Fe Railroad. On September 1, 1885, he was married to Carrie J. Hazen, of Boston, Mass., who died on March 17, 1881.

MILTON R. FELLOWS was born in Brooke County, Va., on August 8, 1844, his father, George Freshwater, being a member of one of the oldest families in the State. Both of his parents, and his grandfather, are still living on the old homestead, which has remained in possession of the family for many generations. He obtained his primary education at the Hopedale (Ohio) Seminary, and then entered Alleghany College, at Meadville, Penn., completing his course, however, beyond the full sophomore year and the junior year in mathematics. He entered Houghton College in 1864, graduating in two years, and having the pleasure and profit of an acquaintance with James A. Garfield, for so many years its trustee and afterward twenty years, he commenced the study of law in the office of Joseph Pendleton, at Wheeling, W. Va., and during the succeeding year was elected county superintendent of education. He was offered a re-nomination but refused it, and was admitted to the bar and at once began practice. Nathanial E. Jones, a prominent criminal lawyer of Wheeling, was his partner for about six months, but Mr. Freshwater being elected State's attorney of his county was obliged to sever the connection. He served as a lieutenant of the Union army for two years, and, in 1862, went to Chicago, where he has since that time has had a good practice, especially in real-estate, chancery, and probate matters. Since coming to this city he has joined the Mu-sonian order of the Red Cross of Rome and Constantinople, which is under the jurisdiction of the grand lodge in England. No Mason who has not taken at least the "third" degree is admitted to membership.

LIABILITY OF EXPRESS COMPANIES.—This was an act of assumpsit, tried before Judge Blodgett, without a jury, the facts being that a package containing two gold watches and five gold chains, worth about $500, was delivered to the agent of the Southern Express Company at Bethany, Ga., directed to the plaintiff, James M. Decker, of Chicago. The Company forwarded the package to Cairo, where it was delivered to the American Express Company, which undertook to transport it to Chicago. No value was marked upon the package. The receipt given to the consignor stated, "Value asked, but not given." The package was lost after arriving in this city, by theft, by reason of its not having been treated as a valuable package and deposited in the safe, where it would have been placed if its true value had been marked upon it.

Conflict of Jurisdiction.—The Tice Meter Case.—The Commissioner of Internal Revenue having
adopted the patent meter of Isaac P. Tice, to be used by distillers under the act of Congress, the plaintiffs, A. Nashbaum et al., distillers, at Peoria, received these meters from Enoch Emery, the collector, and paid to him the purchase price of Emery. On the death of the meters, the plaintiffs were dissatisfied with their operation, and abandoned their use, bringing suits in the Peoria Circuit Court to recover the purchase money. They also filed bills in chancery against Emery and Tice, in the same court, alleging that the meters were worthless and the law requiring their use unconstitutional, and praying that Emery be inquired from paying the money over to Tice. All these cases were removed to the District Court of the United States, at Chicago, where they were pending at the time of the fire. After the fire, the record was restored in the common-law cases but not in the chancery cases. To the restored declaration, the defendant pleaded the general issue, and filed special pleas, to which the plaintiffs demurred. The court overruled the demurrers, and allowed the plaintiffs twenty days—their attorneys not being present—to elect whether they would stand by their demurrer or plead.

The record stood in this manner until July, when the defendant appeared and asked for judgment on the demurrer. Notice was forwarded to the plaintiffs' attorney, whereupon he came into court and dismissed the common-law case.

A few days after this dismissal it was ascertained by the court that, after the decision upon the demurrer, one of the plaintiffs had brought suit in chancery in the Peoria Circuit Court, alleging that the money for the meters was wrongfully withheld from him, and praying for the enforcement of the contract. A decree was entered on the 25th of July against him, and on the 25th of July, the day before these cases were dismissed, he paid over to complainant the amount of money in his hands. Thereupon counsel called the attention of the United States Court to these facts, and asked that these cases be re-instated, claiming that he was entitled to a judgment on the demurrer and to an order that the money be paid to Tice. The motion was sustained on the ground that the cases had been "improperly dismissed." Defendants' attorney then asked for a rule against Mr. Emery, to show cause why he should not pay this money into court, which was granted. Mr. Emery appeared, and moved to set aside the order re-instating the cases, and to re-dismiss them. Judge Blodgett said, that he could see no reason for changing the order of reinstatement.

"I think in the present status of the record, and in view of what has transpired elsewhere, it is the duty of this court to retain these cases within its own control and within its jurisdiction, for the purpose of protecting the rights of the real parties in interest.*

* I can not look upon the proceedings at Peoria, whereby an attempt, at least, was made to obtain the adjudication of the Peoria Circuit Court upon the matters in controversy between the parties, as anything less than a fraud upon the jurisdiction of this court and the real parties interested in the suits here. It seems to me that this is as mild a term as the court should, in justice to itself and to the parties, apply to the transaction."

After going on to show that there must have been a connivance between the plaintiffs and defendants, and a collusion between them in bringing to a successful termination the Peoria suit, the court finally made an order that Mr. Emery—who had in the meantime ceased to be collector—should pay the money into the District Court within twenty days. Thereupon, Judge Cochran, of the Peoria Circuit Court, issued an attachment against Judge Doolittle, of this city (of counsel in the case), and Isaac P. Tice, for contempt of court, in having ignored and disobeyed the injunction issued by that court. They were arrested and taken to Peoria. A motion was made to quash the writ of attachment, and upon argument, the respondents were discharged.

A few days later the suit was filed in favor of the distillers paying to Mr. Tice some $13,000. The distillers, however, eventually succeeded in having the order of the Commissioner, requiring them to use this particular meter, revoked.

James M. Flower, of the law firm of Flower, Remy & Gregory, comes of an old Massachusetts family, and was born at Han- nibal, Oswego Co., N. Y., on March 10, 1835. Calvin and Han- niah (Phillips) Flower, his grandparents, were natives of New Hampshire, that State, and, in 1814, came to Wisconsin on the Prairie. There his father still lives, his mother having died in 1881. Mr. Flower was graduated from the University of Wisconsin, in 1856, and immediately commenced to read law at Madison. For about a year after graduating he was deputy clerk of the Supreme Court, and, in 1857, was appointed clerk of the Commissioners to revise the Statutes of the State. From Harvard, Conn., whither he had gone to supervise the publication of the statutes, where he went on to the Albany Law School, graduating in May, 1859. He opened an office at Madison, and, in the spring of 1860, became a member of the firm of Abbott, Gregory, Pinney & Flower, with which he remained two years. During the summer of 1868 he associated himself with leading attorneys, also holding the offices of police justice and deputy collector of internal revenue. In Janu- ary, 1868, Mr. Flower removed to Chicago, and, in the spring, Daniel K. Tenney and Otto P. Abercrombie, formed the firm of Tenneys, Flower & Abercrombie, which partnership continued until January, 1879. From that date until October, 1880, the firm was Flower & Cratty, at which time the latter partnership was dissolved and the present one formed. The several firms with which Mr. Flower has been connected have made a specialty of commercial law. For some years, he was engaged in winding up the business of the German National Bank, of which he was receiver and attorney, and which was successfully closed up, and its creditors fully paid by him, in the summer of 1884. In September, 1884, he married to Lucy J. Cours. They have three children.

John P. Ahrens, of the firm of Bisbee, Ahrens & Decker, is a native of Germany, and the son of Edward A. and Elizabeth M. (Paulsen) Ahrens. Mr. Ahrens' grandfather was a noted physician of large practice in Germany, and his maternal grandfather was the Rev. W. Paulsen, an able Lutheran clergyman. When but four years of age, he came to this country with his parents, who located at Davenport, Iowa, and here he received a good education, and commenced the study of law with General J. B. Leake, then practicing at Davenport. Removing from Chicago in May, 1872, Mr. Ahrens was appointed a deputy clerk of the Superior Court of Cook County, and held that office for several years, being admitted to the Bar on June 7, 1873, and commenced practice in January, 1875. He obtained his full share of legal business previous to the formation of his partnership with G. H. Hamblin in 1879. This association placed him in connection with one of the ablest and most successful lawyers. Mr. Ahrens himself is a good trial-lawyer, makes a judicious, logical argument, and excels as a special pleader. In 1882, he was admitted to practice in the Supreme Court of the United States. Mr. Ahrens is widely known in social and business circles. For several years he has been prominently identified with the Royal Arcanum; he is Fast Regent of Fort Dearborn Council, and was elected Grand Regent of the State of Illinois, on April 14, 1885. He was married, on October 24, 1877, to Miss Fannie Hamblin, a lady of rare accomplishments and a fine musician. They have three children,—Edith Louise, Leila M. and Edward.

Frank Baker was born at Melmore, Ohio, where his father, a successful and prosperous farmer, still resides. His paternal grandfather, Samuel Baker, was a Revolutionary soldier and first judge of Steuben County, N. Y. His maternal grandfather was a member of Congress from New York, and the only son of Captain Silas Wheeler, a soldier and officer of the Rhode Island Line of the Revolutionary War. Mr. Baker was born at Ohio Wesleyan University, where he graduated in 1861, and at Albany Law School. He served as a private in the 54th Ohio Volunteer Infantry in the War of the Rebellion, and began the practice of law at Tiffin, Ohio. He became collector of Tiffin in 1867, and prosecuting attorney of Seneca County in 1869, and held both offices until his removal to Chicago in 1877. At Chicago, he has attained a high position, and is careful and thorough in the preparation of his cases for trial; in a trial always cool, self-possessed, and self-reliant; and is an earnest and forcible speaker. In politics he has always been a Democrat.
In 1852, he was the candidate of his party for probate judge, and after a close contest was defeated by Judge Knickerbocker.

Henry M. Matthews, of the firm of Matthews & Fowler, was born in Canton, Wyoming Co., N. Y., on April 16, 1835, the son of Isaac V. Matthews, a farmer and prominent man in that locality. During the Rebellion he enlisted in the 19th New York Infantry, and was stationed in the neighborhood of Resaca. He was wounded at Resaca. After being mustered out of the service, he entered Union College, at Schenectady, where he remained three years. He then joined the senior class of Amherst College, and graduated in 1858, in the first rank. He read law with Samuel Fulsom & Willett, of Buffalo, and was admitted to the New York Bar in 1872. Previous to coming to Chicago, he acted for about a year as managing clerk in the firm of Dorschel & Lawson. Since then he has been pursuing a general practice in this city, having, in December, 1882, formed a partnership with Edward A. Decker.

Mr. W. P. Brady, of the firm of Grant & Brady, attorneys and counselors at law, is the son of Owen and Mary A. Brady, and was born at Liverpool, England, on June 5, 1839. After attending the Academy of New York, Rev. M. A. Deluca, he was a pupil of the noted classical academy of Rev. T. Kelley, at Fertton, near Liverpool, and subsequently spent two years in the University of St. Philip. In 1864, he came to Chicago, and, after taking a course of law in the law schools of the state, was admitted to the bar in 1873. For some time afterward he continued in the office of Grant & Swift, and was engaged in general practice until 1880, when he became the junior member of the firm of Grant, Brady & Stuart. In May, 1883, Mr. Swift retired from the firm, since which time he has been associated with Mr. Grant, the style of the firm being Grant & Brady. He is known to the Bench and Bar as a thoroughly educated lawyer, and enjoys an enviable reputation as a successful advocate and prudent counselor. Mr. Brady is a Roman Catholic, of Irish origin, and since early manhood has been a republican in politics from conviction. Up to a recent date, the vast majority of the Irish in Chicago were democrats in politics. Mr. Brady, in answer to the question, often put to him: "Why are you, an Irish-Catholic, a republican in politics?" has invariably replied, "Because I am an Irish-Catholic. The race and Church to which I belong have always earnestly contended for liberty and the equality of all men before God, and, therefore, in conscience and by principle, I am bound to be a republican, since that party is opposed to slavery and battles for the rights of man in the true sense of liberty." In May, 1885, Mr. Brady, with other gentlemen of his race, organized the Irish-American Central Republican Club of Cook County, of which he is president, and which is largely composed of the Irish and blood, and the first organization of its kind in the nation. Mr. Brady was married, on May 25, 1852, to Miss Lizzie Johnson, of Helena, a native of New York. They have two children,—Rose Mary and Helena.

"Mark Twain" in Court.—This was a bill in chancery by Samuel L. Clemens against Belford, Clark & Co., filed in 1882 in the District Court. The complaint stated in his bill that he had been an author and writer by profession for twenty years, and that during that time he had been in the habit of publishing books and sketches composed by him for publication as "Mark Twain," the name assumed by him to designate himself as such author. That the said designation of "Mark Twain" had been used by him as his nom de plume; that the said writings, under said name, had acquired great popularity, and had met with a ready and continuous sale; and that no other person has been licensed by him to use said designation. That the exclusive right of selecting and publishing, in any form, the sketches and other writings written and published by him, by right ought to belong exclusively to him; and is of great value to his reputation; that the said defendants have published and sold, in great quantities, a certain book, called upon its title-page, "Sketches by Mark Twain, now first published in complete form," Belford, Clark & Co., 1886," containing three hundred and sixty-nine pages, many or most of which, in one form or another, are substantially like sketches published prior to 1880 by complainant; and that the said defendants had no authority from complainant to make publication of said book or any part of it. That complainant, by such wrongful act, has been greatly injured; and that his property in the said trade-mark of "Mark Twain" has been greatly deteriorated in value, wherefore he prays the Court to restrain the publication of a literary product without copyright is a dedication to the people, after which any one may republish it, and in connection with the author's name. An author who is known to the public under a nom de plume has the right to prevent the publication of matter which he did not write in connection with his nom de plume, and purporting to be written by him. Any person can publish any uncopyrighted production, and give the author's name on the title-page or elsewhere as he chooses. The nom de plume "Mark Twain" is not a trade-mark. The demurrer was therefore sustained.

Nathaniel Mauger Jones, a member of the Chicago Bar, and son of Benjamin and Rachel Cass, was born in Jackson, La., on August 8, 1850. When he was six years of age the family moved to Fort Gibson, Miss., where he received his early education. In 1865, he entered the Southern University, and was graduated in 1867, as a member of the Class of 1869. Shortly after his graduation he accepted a position as instructor in the Collegiate Institute at Baton Rouge, La., which he held two years, subsequently reading law with Trusen Polk, a leading lawyer of the St. Louis Bar. In 1873, he came to this city, and, during the same year was admitted to practice, and, until May, 1885, was associated with B. D. Mauger, now on the Supreme Bench. Mr. Jones has been known to the legal fraternity as a thoroughly posted and careful lawyer, of exceptional ability as an advocate and counselor. He was married, on October 4, 1881, to Mary E. Merrill, daughter of H. T. Merrill, of Chicago. They have one child, Helen M.

George Willis Cass, son of Abner L. Cass, a physician of Coshocton, Ohio, was born on February 11, 1831. He is a nephew of General George W. Cass, formerly president of the Pittsburgh, Fort Wayne & Chicago Railroad Company, and of General Lewis Cass, of Michigan, and a grandson of Jonathan Cass, a revolutionary patriot; his maternal ancestors being of an old Scottish family. Mr. Cass attended Kenyon College, at Gambier, Ohio, from which he graduated and entered the University of Michigan at Ann Arbor, completing his course in 1853, when he came to Chicago, and became a member of the firm of Elliott & Cass. This connection continued, this connection continued, and under the firm name of Cass & Cass has practiced alone, his specialty being real-estate and corporation law. He is a member of the Law Institute and Bar Association, and stands well with the profession and the public. Mr. Cass was married, in this city, to Kebercel. He was born in Ohio and is a graduate of the University of Michigan at Ann Arbor.

George Washington Kretzinger owes his German name to his paternal grandfather, who came from Frankfort to Virginia. His father, Rev. Isaac Kretzinger, is a clergyman of the United Brethren denomination. The poverty of a minister's family obliged George W. to support himself by manual labor during his college course, so that in this he followed the tradition of many other American boys who have won their way to high places. In his first college year, the War of the Rebellion broke out, and, though far under age, he dropped his books and went to the front as a member of the famous Black Hawk Cavalry. After being captured and paroled, he went back to college; being exchanged, when he returned to the service and remained until the close of the War. Then he again went back to college, and, still under age, graduated with high honors. Having obtained a position in a classical school, he taught with marked success, though working hard at the same time at the study of his chosen profession, that of the law. His legal studies were continued under the direction of the Hon. George W. McCrory, who was Secretary of War under President Hayes, and after serving as district judge of the United States Circuit Court, in Iowa. Mr. Kretzinger subsequently entered the office of Henry Strong for a short time, and, in March, 1867, was admitted to the bar. In September, 1867, he formed a partnership with Judge R. L. Hannaman, of Knoxville, Ill., which lasted until 1873, when the rising young lawyer accepted an offer of partnership with John I. Bennett, of Chicago, now master in chancery of the United States Circuit Court. Some time later this partnership was dissolved, and Mr. Kretzinger has since been associated with his younger brother, J.
The "FUND W." Case.—This was an indictment in the United States District Court against Frank L. Loring and John Fleming, on a charge of using the mails for fraudulent purposes. The case was tried before Judge Rindge in November, 1883, and created a great deal of interest, both in the city and in the country generally, among those who had been the victims of the alleged fraud.

General Leake, United States district attorney, was the principal prosecutor for the United States, and Messrs. Storrs and Goudy for the defendants. The trial occupied eleven days, and was attended by large crowds of spectators.

The facts in the case appeared to be, that the firm of Fleming & Merriam were the ostensible authors of a scheme, on the principle of a "mutual co-operative fund" for speculating in grain, provisions, and stocks; buying and selling on the Chicago Board of Trade and the New York Stock Exchange. Circulars were sent all over the country, and advertisements put in the newspapers, showing immense profits, and by this means a large number of persons were induced to send money for shares.

The dividends were not "profits," but a part of the investment, and were paid to encourage investors to send on more money, as was charged, until the scheme was ripe, when the entire capital disappeared. A warehouse was rented on Market Street, and it was proposed to let shareholders have the profits derived from the business done there. This it was alleged was only a part of the plan to get people excited and induce them to pour in the cash for shares more liberally. Merriam did not appear in the case—was a myth, so far as the trial was concerned, if not so in fact. Frank L. Loring, it was charged, was the principal of the firm, who, with defendant Fleming, were its chief manipulators.

One witness testified that he invested in the scheme $30 of his own money and $175 due him for getting subscribers. He received back $100 in dividends, but none of the principal. A large number of witnesses testified to transactions of a similar kind, some losing more and some less; the losses, in some instances, ran up into the thousands of dollars. It was proven that when their bank account was closed, on January 31, 1883, they had a balance of $600,000 in one bank, which was all drawn out in two or three days thereafter. The postmaster had excluded them from the use of the mails on January 30, 1883. Fleming left the city. The inspector's report shows that the firm received, during the first twenty days of January, through the Chicago Post-Office, seven hundred and seventy-five registered letters. None of these letters, he states, contained less than ten dollars, and many of them contained amounts varying from one hundred to five hundred dollars. They had, at the same time, received about eight hundred and twenty money orders, aggregating $20,416. They also received, during said period, large sums by express, estimated at not less than $30,000. Their customers were found not only in this, but in nearly all the other States and Canada, and even in France and Germany. The stoppage of their mails, brought this magnificent scheme to a sudden and disastrous termination. For some days, large crowds visited the city, and called at the late place of business of the enterprise firm, endeavoring to ascertain its whereabouts and its status. There were loud threats of mob violence, but there was nobody found to mob. The more the matter was investigated, the greater the swindle was developed to be. Then followed the indictment and trial.

T. Kretzinger. It will be observed by the foregoing, that the subject of this sketch pursued his studies with gentlemen who are prominent in railroad law. Mr. Kretzinger paid particular attention to these branches of the law, and his identification with many of the prominent railroad legal controversies of the last ten years has established himself as a cornmissioner lawyer in the West. In 1877, he accepted the general solicitorship of the Chicago & Iowa Railway, which was, at that time, involved in difficulties which were considered beyond legal redress. Mr. Kretzinger's genius, however, is well known to be fully aroused only in emergencies, and in these famous contests he gained for himself an eminent position and won for his client the right to redeem itself from hopeless bankruptcy to a condition from which it could realize its full value. Since the close of these cases he has been engaged in many important controversies, and is acknowledged to be a lawyer of almost inexhaustible resource and energy. The qualifications of Kretzinger are supplemented by analytical powers of remarkable clearness and a wonderful memory which has become a proverb among brother lawyers and judges who know him.

As an orator, he is possessed of an extraordinary and condescending power, and a contemptuous rejecter of every flavor of rhetoric, his speeches all bear the stamp of an illuminating imagination which brings every outline of the subject into distinctness under its lightning flash, and lays all the weapons of logic or ridicule or biting sarcasm, at his own disposal. He is a lover of the study of law, attending lectures at the Harvard Law School and enjoying for two years the advantage of a course of law study under Professor Kent of Cambridge; he also received instruction at the Boston Law School. In the spring of 1875, he came to Chicago, and, after studying until the fall in the offices of Lyman & Jackson and Isham & Lincoln, was admitted to practice before the Supreme Court of Illinois in 1876. During his twelve years' practice Mr. Thornton has conducted many suits involving large real estate interests, and has been called upon so frequently to adjust the rights of owners of land, that he has become recognized by the bar and real-estate profession as an authority upon real estate litigation and matters relating to that branch of the profession. He has taken an active part in the conduct of public affairs in the Town of Lake, where he has been especially prominent in educational matters.

Henry McCloy was born at Belfast, Ireland, on August 1, 1832, where his father, who bore the same name, was a prominent business man and contractor. In 1848, the son emigrated to America. He entered Harvard College, graduating from which he graduated. In 1859, he entered the Harvard Law School, but his father died, and he was compelled to return home. He was graduated in 1862, and was ordained a deacon, in the Protestant Episcopal Church. Shortly afterward he married a daughter of Mr. Perse, of Perse & Brooks, a paper manufacturer. His father-in-law assisted the elder Bennett when he was establishing the Herald on a few hundred dollars' capital, and through life the warmest friendship existed between them. It thus happens that the same feeling has descended to James Gordon Bennett and to Henry McCloy. Mr. McCloy spent the first five years of his service in the Church as rector of a parish in Boston. He subsequently removed to Plattsburg, N. Y., where, in 1850, he lost his wife. It was a severe blow to him and seemed to dishearten him for future work in the Church. Soon after his wife's death, he commenced the study of law, and in 1851, was admitted to the Michigan bar, settling in Three Rivers to practice his profession. In 1854, he removed to Chicago, and subsequently married Matilda Perse, a sister of his first wife.

Elbridge Nance, a prominent member of the Chicago bar, was born at Trenton, Wis. During his childhood, the family removed to Milwaukee, where he attended the public schools and finished his studies in the Milwaukee Academy, graduating, with honors, in 1875. At the commencement of the following year, he entered the law office of Mr. Motion, and began reading law in the office of Hervey, Anthony & Gilg. In September, 1874, he was admitted to the bar, and, until 1877, was indirectly associated with Mr. Hervey, but has since been a member of the bar.

Mr. Haney was married in March 1, 1876, to Miss Sarah Burton, of Chicago; they have four children.
own use the money which other persons should send them for investment in "Fund W." The jury arrived at a conclusion in about one hour, and their verdict was "guilty." After the usual delays on motions for a new trial and rehearing, which were overruled, the defendants were sentenced to one year imprisonment, and to pay a fine of $500 each. After serving a few months of their sentence, they were pardoned by President Arthur.

GEORGE F. WESTOVER, a prominent member of the Chicago Bar, and long known as the associate professor of George A. Shufeldt at Waukesha High School, was born in Manlius, N. Y., where he was born on August 18, 1836. When he was nine years of age he came West, accompanying Professor Bailey, of Manlius, making the voyage from Buffalo to Milwaukee on the steamboat New Orleans. At that time there were no railroads, and the great Northwest was but sparsely inhabited. Upon his arrival at Milwaukee, he sought the keeper of the light-house, Eli Bates, a family friend, to whom he had a letter of introduction, and through his directions made his way to the residence of a married sister. Mr. Bates was then keeping the light-house at $55 a month, but subsequently became a resident of Chicago, and died a millionaire. Mr. Westover was graduated from the Michigan Military Institute in 1852, when he entered Oberlin College. In the following year he returned to Milwaukee, his parents having settled there, and became a student in the Milwaukee Seminary, where he graduated, and later, was appointed instructor of Latin, Greek and mathematics in that institution. He read law with Hon. Jason Downer, also with Leander Wyman, both prominent lawyers of the "Cream City," and was admitted to the Bar in 1860. In 1861, he located in Waukesha County, and two years later received an appointment in the paymaster's department of the Army, then lying before Vicksburg. After recuperating his health after the War, in 1866, he associated himself with D. W. Small, at Oconomowoc, Wis., with whom he continued until Mr. Small was elected circuit judge, in 1879. During this time he edited and published, for a brief period, the newspaper "La Belle Aline," and in 1874, he became a member of the Chicago Bar and formed a partnership with George A. Shufeldt, a brother of Admiral Shufeldt, of the United States Navy, and continued to be associated with him until the spring of 1885, when Mr. Shufeldt retired from the firm. Mr. Westover is one of the leading members of the Bar, and has figured conspicuously as a corporation lawyer. He is known to both Bench and Bar as an able and scholarly lawyer, a sagacious counselor and an eloquent advocate. Mr. Westover was married on April 11, 1858, to Miss Elizabeth Miller, of Brooklyn, N. Y. They have one child, Nestor M.

M. S. ROBINSON was born at Comersville, Fayette Co., Ind., in 1823, and when a boy he removed with his parents to McLean County, Ill., where he remained until 1860. At the breaking out of the War he joined Co. "D," 20th Illinois Infantry, and served throughout the War. In 1869, he removed to Pontiac, Livingston Co., and studied law with L. E. Payson, now member of Congress from that district, and other attorneys. During this year he was admitted to the Bar, coming to Chicago in 1874, and engaging in a general practice. He has lately published a book on "The Law of Partnership and Divorce," containing a compilation of the laws on this subject, which has already run through three editions. Mr. Robinson is a member of Post No. 28, G. A. V., and of Fort Dearborn Lodge, Royal Archm. He is also connected with the National Association of ex-Union Prisoners of War, being a member of the executive committee. HENRY F. MECKY, member of the law firm of Doolittle & Mecky, was born in the County of Mayo, Ireland, on December 18, 1840. He came with his parents, Edward and Mary A. (Toole) Mecky, in 1842, to America. They first located in New York State, but in 1845 removed to their present home in Juabne Co., and when his degree of A. M., his father, Edward and Michael F. Mecky, were prominently identified with the business interests of Janeville, and both accumulated large property in Chicago and in Wisconsin up to the time of their deaths. The uncle, John, died in 1858, and his father in 1875, and to Mr. Mecky intrusted the settling up of the estates. Upon graduating at Racine College, Mr. Mecky took a course of study in the law department of the Michigan University, and graduated in 1869. Soon after graduating he took a trip to Europe with his father's family, and in the summer of 1871, owing to ill health, caused by close study, he took another trip, and on returning attended to the re-building of the deceased property owned by his father. In this he managed the practice of law, and associated himself with Hon. James D. Doolittle and James R. Doolittle, Jr. His attention was directed to real-estate law, for which branch he is well qualified. He has been employed in settling several large estates. Mr. Mecky married, on October 25, 1876, Miss Adella S. Parkinson, daughter of William S. Parkinson, a prominent lawyer, late of Rome, N. Y. They have three children—Henry Parkhurst, Edward Bennett and John William. Mr. Mecky is a non-affiliated member of the Pythian Order, a Land belongs to the Iroquois, Calumet and Ken-wood Club. His residence is in Hyde Park.

AZEL F. HATCH, partner of Thomas H. Bryan, was born on September 6, 1848, at Lisle, DuPage Co., Ill., where he received his early education. When it was necessary to complete his education, he entered Oberlin College, Ohio, where he remained for three years, when he joined the senior class of Yale College. Graduating in 1871, he removed to Cheboygan, Wis., where, for one year, he acted as an attorney. He returned to Chicago in 1872, and, entering the office of Storey & Norton, began the study of law. In September, 1874, he was admitted to the Bar, and in December commenced the active practice of his profession, first associating himself with Norton & Hulker. In 1880, he formed a partnership with O. F. Aldis, under the firm name of Hatch & Aldis, and December 1, 1883, was associated with Mr. Bryan. A late case, which has attracted much attention, was the suit brought by Mr. Boston against Grisell for an alleged infringement of patent by the latter in the manufacture of his electrical or mechanical pen. Mr. Grisell, through his attorney, Mr. Hatch, showed the existence of another patent, which was said to anticipate the patent in question made by the defendant. Mr. Hatch also conducted the reorganization of the Chicago Herald Company, of which he was the president for two years and is now vice-president and active. Mr. Hatch was married February 5, 1880, to Grace L. Greene, of Lisle, Ill. They have three children.

THE LIABILITY AND DUTY OF TELEGRAPH COMPANIES. — The law on this subject was settled by our Supreme Court, in the case of Tyler, Ullman & Co. vs. Western Union Telegraph Company (66 Ill. 423).

This was an action of assumpsit, to recover damages for alleged carelessness in transmitting a dispatch for apprentices, by apprentices, from Chicago to the City of New York. The manner in which the written and delivered to the operator, was as follows: "To J. H. Wrenn or A. T. Brown. "Sell one hundred (100) Western Union. Answer price. "T. U. & Co." As delivered to Wren, in New York, the message read as follows: "To J. H. Wrenn, care Gilman, Son & Co. "Sell one thousand (1,000) Western Union. Answer price. "T. U. & Co."

The message was written on one of the blanks prepared by the company, which contained the following stipulation: "In order to guard against and correct, as much as possible, some of the errors arising from atmospheric and other causes attendant to telegraphy, such incorrect message shall be repeated by being sent back, from the station at which it is to be received, to the station from which it is originally sent. Half the usual price will be charged for repeating the message, and the companies will not hold themselves responsible for errors or delays in the transmission or delivery, nor for the non-delivery of repeated messages, beyond two hundred times the sum paid for sending the message, unless a special agreement for insurance be made in writing and the amount of risk specified on this agreement, and paid at the time of sending the message. Nor will these companies be responsible for any error or delay in the transmission or delivery, or for the non-delivery or non-receipt of any message, unless the amount paid for sending the same, unless, in like manner, specially insured, and amount of risk stated herein, and paid for at the time. No liability is assumed for error in cipher or obscured messages, nor for any error or neglect by any other company over whose lines this message may be sent to reach its destination; and these companies are hereby made the agents of the sender of this message, to forward it over the lines extending beyond those of these companies. No agent or employer is authorized to vary these terms, or make any other verbal agreement, nor any promise as to the time of performance; and no one but a superintendent is authorized to make a special agreement for insurance. These terms apply through the whole length of this message, on all lines by which it may be transmitted." On receipt of this message, Wrenn sold one thousand shares of this stock, and to do so was obliged to
go into the market and purchase nine hundred shares; to re-place which, he had to buy on a rising market the same number of shares; so that the difference in the selling and buying price amounted to $729.77, which amount was wholly lost to the plaintiffs.

It was admitted that the message in question was not repeated.

The case was tried before Judge Gary, in the Superior Court. The jury found for the plaintiffs, and assessed the damages at two dollars and sixty cents, being the cost of the message with interest. A motion for a new trial was overruled, and judgment rendered on the verdict, to reverse which the plaintiffs appealed. The Supreme Court (opinion by Breese) decides:

"A telegraph company is a servant of the public, and bound to act whenever called upon, their charges being paid or tendered. They are like common carriers, the law imposing upon them a duty which they are bound to discharge. The extent of their liability is, to transmit correctly a message as delivered.

"When a party, desiring to send a telegraphic dispatch, is required by the company to write his message upon a paper containing a condition exonerating the company from liability for an incorrect transmission of the message unless it shall be repeated, and at an additional cost therefor to the sender, such a restriction, even if it be regarded as a contract, is unjust, without consideration, and void.

"Nor is such a restriction relieved of its objectionable character by stipulation in the contract that the company will make sure the correct transmission of the message by a special agreement, to be made with the superintendent of the company, the amount of risk to be specified in the contract and paid at the time of sending the message.

"It is against public policy for telegraph companies to secure exemption from the consequences of their own gross negligence by contract. So, notwithstanding any special conditions which may be contained in a contract nullifying the liability of the former, in case of an inaccurate transmission of the message, the company will still be liable for mistakes happening by their own fault, such as defective instruments, or carelessness or unskilfulness of the operators, but not for mistakes by uncontrollable causes.

"The receiver of a telegraphic message is not required to telegraph back, to ascertain the correctness of the message. The company is bound to send the message correctly in the first instance.

"If the sender of the message in this instance was compelled to, and did, purchase nine hundred shares of the stock to re-place that so sold by reason of the carelessness of the company in transmitting the message, and that of the interval between the selling of one thousand shares, and the re-purchase of the nine hundred shares to re-place the extra number of shares sold, that stock had advanced in price, this advance, in an action against the company, would be the measure of damages." The judgment was accordingly reversed.

The cause having been remanded, a new trial was had in the court below, which, applying the principles above recognized as correct, resulted in a verdict and judgment for plaintiffs, in an amount sufficient to cover the damages they had sustained by the negligence of the defendants in transmitting their message. From this judgment the telegraph company appealed. Mr. Justice Breese, in giving the opinion of the court (74 Ill.), says:

"Great efforts have been made to induce this court to depart from the ground it occupied on the first appeal, by questioning the correctness of the principles which governed our ruling. These have caused us to examine that case and those principles,—to explore anew the whole ground; and we desire to say, and that most emphatically, there is nothing in the opinion then delivered we desire to retract or modify, fully believing it is sanctioned by reason, by law, and by justice,—alike demanded by public policy and public
necessity." The judgment of the Superior Court was accordingly confirmed.

James H. Raymond, was born at Wilbraham, Hampden Co., Mass., on June 6, 1850. His father, Rev. Nathan Raymond, died in 1884. Mr. Raymond was educated in the Wesleyan Academy in that town, the oldest educational institution under the auspices of the Methodist Church in this country. In 1864, Dr. Raymond settled at Evansville, Ill., where he now resides, being professor of systematic theology at Garrett Biblical Institute. There he was educated, graduating from the Northwestern University in June, 1871. In July, 1871, he was appointed secretary of the first Board of Warehouse Commissioners of Illinois; remaining in that position until December, 1873. In April, 1874, Mr. Raymond was elected secretary and treasurer of the Western Railroad Association. After graduating from the Union College Law School, Chicago, he began practice before the State and United States courts, and, in 1877, before the Supreme Court of the United States. Having, in November, 1883, severed his relation with the railroad association, he commenced the practice of corporation and patent law. In January, 1885, he formed a partnership with W. G. Rainey, under the firm name of Raymond & Rainey. Mr. Raymond was married, in October, 1873, to Mary Jane, daughter of Judge Benjamin S. Edwards, of Springfield, Ill. They have five children.

Frederick Silas Baird, attorney and counselor at law, is the son of Silas and Martha W. Baird, and was born in Erasmus County, Ill., on February 17, 1852. He remained at home until his seventeenth year, going to school and assisting on the farm, subsequently removing to Warren, Jo Daviess County, where he continued his studies. Becoming interested in law, he began his legal training, in 1872, in the law office of Jones ("Long Jones") & Hayes. In the fall of the same year, he came to Chicago, and entered the law office of Kuyun, Avery, Loomis & Comstock; at the same time was a student in the law department of the Chicago University, from which he graduated in 1875. Upon the organization of the Union College of Law, he attended one year, received his diploma as an attorney and counselor in June, 1874, and was admitted to the Bar during the same month. He continued with Kuyun, Avery, Loomis & Comstock until 1875, when he began active practice. From 1880 to 1882, he was associated with F. E. Lansing, but since has been alone. Mr. Baird's parents are Vermont people, his father coming West, about 1850, from Chitteniden, Vt., and settling in McHenry County, where he married Elizabeth Witt, of Woodstock, Vt. The Sterling principles and traits fostered by the descendants of the old Puritan stock find a notable exhibition in the character of Mr. Baird. Besides his prominence as a lawyer, he has been honored by being chosen to represent the Ninth District in the XXXIVth General Assembly, in 1884. He was one of the "103" who elected General John A. Logan to the United States Senate, and he took an active part in passing the new election law, which has proven so effective in securing the purity of elections. Mr. Baird was married on November 9, 1882, to Hattie E. Rogers, of Warren, Ill., daughter of James H. Rogers. They have four children: Blaine C., Manley F., Hattie S. and Frederick R.

Simon Straus was born at Milwaukee, Wis., on November 21, 1855. His father was Samuel Straus, a well-known Chicago lawyer and one of its earliest settlers. Simon commenced his education in the public schools of Chicago; entered Valparaiso College at the age of 13, when only sixteen years of age, and was graduated from that institution with a complete record as a bright student with excellent prospects. At nineteen years of age he was admitted to the Bar at New Haven, Conn. He was associated with his father in the practice of law until May, 1875. He was then employed as attorney exclusively for the Greenbaum banks, consisting of the German National Bank, the German Savings Bank and the banking house of Henry Greenbaum & Co.; and was so retained up to the time of their withdrawal from business, in December, 1877. Probably no member of the Chicago Bar, of the age of Mr. Straus, has had intrusted to his care and management, as many large and important cases as have fallen to him since he began the practice of the law. He has been eminently successful, and his business is steadily increasing. He is diligent in his professional career, and has written many articles on legal subjects. His judgment is well balanced, and he manages his legal business with care and discrimination. Mr. Straus was married on February 14, 1888, to Miss Alice Eisenroth, an intelligent and accomplished young lady of Chicago. They have three children.—Samuel, David and Ira E.

Charles A. Folson was born at Skowhegan, Somerset Co., Me., on February 20, 1836. He is a direct descendent of General Nathaniel Folson, a delegate to the first Congress of the United States. He commanded a brigade of New Hampshire troops during the Revolution, and distinguished himself as a captain in the battles of Fort Edwards and Crown Point during the French and Indian War, in 1755. Mr. Folson fitted himself for college at Lowell, Mass., where for a number of years he was a surveyor. Then, up to the breaking out of the War of 1861, he was employed by Naylor & Co., steel manufacturers. He first enlisted in the 4th Battalion Massachusetts Infantry, and re-entered the service, with the rank of lieutenant, and subsequently became captain, for his meritorious service during the Battle of Gaines's Mill; and joined the 24th Regiment Volunteer Infantry; was in the battles of Raccoon Island, Newbern, Rowles Mills and Trantor's Creek; built the fort at Washington, D.C.; was in the three months' siege of Petersburg, Va.; and was mustered out in front of Petersburg, Va., in May, 1865. Having served in the assault on the rebel rifle-pits while the latter stronghold was being invested. Captain Folson also erected the earthworks on Seabrook Island, made for protecting the navy while occupying the approaches to Charleston, engaged in the campaign of Florida; assisted in superintending the erection of the fortifications at Bermuda Hundred, Va.; was active in the operations before Petersburg, Va., and was mustered out in front of Petersburg, Va., in May, 1865. The suit was brought upon a contract entered into between the parties, for the sailing of the vessel "Scotia," during the season of 1850, it being claimed that the plaintiff prevented the defendant from performing his contract.

On the trial in the Superior Court, the evidence tended to prove that the agreement was entered into on Sunday. The defendant asked the court to hold that the contract was prohibited by our statute, and was void, and that was the principal question involved in the case.

The provision of our statute which, it is claimed, renders this contract void, is section 261 of our Criminal Code, and is as follows:

"Whoever disturbs the peace and good order of society by labor (works of necessity and charity excepted), or by amusements or diversion, on Sunday, shall be fined not exceeding $25."

The court, by Mr. Justice Walker, said:

"The common law did not prohibit the making of such contracts. The law of nature and the civil law permitted contracts to be made even upon Sunday. The law of commerce does not depend upon statutes or public enactments; and in the various States of the Union the statutes vary, in language or substance, and the decision of the different courts have been on the phrasing of their several statutes. * * *

Is the making of such a contract as that under consideration embraced in our statute as labor? Could the parties to this contract have been criminally prosecuted, convicted and fined? If they could, then the contract is void, as no principle is more firmly established or better recognized than that a contract made which violates a statute is void. If the term "labor" necessarily embraces business of all kinds, why were the terms "labor" and "business" used in the various statutes to which we have referred? It was for the obvious reason that those who framed and adopted the statutes supposed that the word "labor" did not necessarily embrace "business"; nor does the word "labor" include, as a definition, mere "business" and this being the ordinary meaning of the word, we must accept it as the sense in which it was used by the Legislature.

Is this contract to be held to be illegal, then every contract not shown to have been absolutely necessary or performed for charitable purposes, would be void, and render parties to it liable to the penalty. The marriage contract is held to be a civil contract, and yet vast numbers of such contracts have entered into on Sunday. It would be difficult to show such contracts necessary, in the sense of the statute; and shall it be held that such contracts are void, and the parties to them guilty of living in an open state of adultery or fornication, and liable to criminally
punished; and must their children be held to be bastards? Must a person be criminally punished for writing a letter to a friend on Sunday? Must a person be arrested for defending a pass? in 1875, was admitted to another bar, or purchasing and reading a newspaper on Sunday, and for almost innumerable like acts? * * * When the Legislature shall prohibit labor, whether in the fields, in busi- ness, or the making of contracts, on Sunday, we will unhesitatingly carry out the legislative will; but we can neither add to nor detract from the statutes as they are enacted. Judgment affirmed.

John M. Thacher, member of the firm of Coburn & Thacher, attornies and counselors at law, is the son of Rev. Joseph and Nancy A. Thacher, and was born in Barre, Vt., on July 1, 1836. Both parents were from Woodstock, Vt., and on the paternal side he is descended of a long line of clergymen who were chiefly interested in their religious work and talents. He was fitted for college at Barre, and entered the University of Vermont in 1855, graduating with honors in the class of 1859. After his graduation, he was engaged as instructor in the academies of Lyndon, Vt., and Andover, Mass., until 1861, when he enlisted in Co. "F", 1st Vermont Volunteer Infantry, with the rank of captain, and served three years in the War of the Rebellion. In 1864, he entered the Patent Department, Washington, D. C., as clerk, where he continued until 1874, during which time he was advanced, by successive appointments, until he occupied the position of Commissioner of the Depart- ment, when he disengaged much of his time to pursue his studies of law, and in April, 1870, was admitted to the Bar at Alex- andria, Va. He took an active part in the political construction of the State of Virginia, and was a delegate to the National Republic- can Convention in 1868, which nominated Grant and Colfax. In 1870, was a member of the State Central Committee of Virginia. In 1873, he represented the government in the international patent congress at Vienna, Austria. Two years later he located in Chi- cago, associating himself with L. L. Colburn, and has since been actively engaged in practice, making a specialty of patent law.

George A. Gibbs is the son of Aaron Gibbs, an early resident of Chicago, and Catherine Gulliver. He was born in this city, and educated in both the University of Chicago and the University of Michigan. Mr. Gibbs pursued both a collegiate and a law course, and after- ward studied law with Waite & Clark, of Chicago. He was ad- mitted to the Bar of New York State, and has been a practicing attorney in this city for the past ten years. Mr. Gibbs was married in June, 1881, to a daughter of James P. Smith, an old resident and merchant of Chicago.

Newton Calvin Wheeler is a member of the Chicago Bar, and is a native of Illinois, but of New England parentage. His father (Dr. Calvin Wheeler), was a native of the old Granite State, and his mother (whose maiden name was Sarah J. Hoyt) was born in Connecticut. They afterward resided in the State of New York, where they were married in 1833, and then removed to Kendall County, III., where the former was a prominent physician, and the latter a distinguished lady. He was a member of New York University and of Ohio State University. His son, Mr. Gibbs, is still residing in his old homestead at Bristol, III., where he was born on August 21, 1839. He enjoyed the benefits of the public schools of his native village, and at the age of sixteen entered Clark's Seminary, at Aurora, Ill., and graduated from the University of Chicago, in 1857, where he completed his preliminary course. The fall and winter of 1856-57, he spent in teaching near his home, and, notwithstanding his youthfulness, was very successful and evinced a peculiar talent in that profession. He intended to return to Beloit and pursue his collegiate course, but, yielding to the solicitation of friends, he changed his purpose, and joined the freshman class of the University of Chicago in the fall of 1859, where he continued his studies unimpairedly until after the great fire. He then dis- continued them for a brief period, to take a position as tutor in Washington University, at St. Louis, Mo. He achieved a decided success in this capacity, but declined an invitation to return to Beloit College, where he completed his preliminary course in 1873—a class noted in the annals of the University for scholarship and oratorical ability. As a writer and speaker, Mr. Wheeler was considered one of the first of his class; his graduating oration re- ceived the pronounced commendations of the board of examiners. Mr. Wheeler was a bright scholar, and a diligent, earnest stu- dent; and, although a leader in college sports, he did not subor- dinate himself to his physical improvement. He was an enthusiastic member of the Psi Upsilon fraternity, and in his junior year was elected president of his class. He spent the year follow- ing his graduation at the Union College of Law, and subsequently continued his legal studies in the office of Lyman & Jackson, and, upon examination before the Supreme Court, at Ottawa, in Sep- tember, 1876, was admitted to the Bar. In 1875, was admitted to another bar, or purchasing and reading a newspaper on Sunday, and for almost innumerable like acts? * * * When the Legislature shall prohibit labor, whether in the fields, in busi- ness, or the making of contracts, on Sunday, we will unhesitatingly carry out the legislative will; but we can neither add to nor detract from the statutes as they are enacted. Judgment affirmed.

The Douglas Monument.—The Legislature of 1877 made an appropriation of $50,000 for the completion of the Douglas Monument at Chicago, to be paid out of the treasury as the work progressed. In December, 1878, there remained undrawn of this appropriation $8,648, and the commissioners appointed to superintend the work reported that fact, and that it would require a further appropriation of $9,000 to complete the Monument. In May, 1879, the Legis- lature appropriated the additional sum asked, and on September 30, 1879, all the first appropriation was drawn except $4,798, and nothing from the second. After September 30, 1879, and up to July 1, 1880, the commissions had drawn $8,450, when they checked for $1,200, but for which the Auditor refused to draw his warrant.

The Supreme Court (p6 Ill.), on an application for a mandamus against the Auditor, held, that under section 18, article 4, of the Constitution, the $4,798 balance of the first appropriation had lapsed, and could not be taken from the State treasury, by reason of the expiration of the first fiscal quarter after the adjournment of the regular session of the General Assembly succeeding that at which the application was made; and that said provision of the Constitution is not confined to appropriations for the ordinary and contingent expenses of the government, but applies to all appropriations of public money.

Luman Allen, attorney and counsellor of law, was born on "Greenwood Plantation," in the Shenandoah Valley, Virginia, November 6, 1845. His parents, both now deceased, were Dr. Luman and Alvernon (Greene) Allen. His father was a graduate of Ohio University; his mother was an accomplished, finely educated, and talented daughter of Dr. John Greene, of Virginia. The subject of our sketch received an elaborate classical and practical education in private and public schools in Cincinnati, Ohio, and in the Shenandoah Valley of Virginia. He entered the Union College, where his father, abandoned everything and came North, locating at Cincinnati. There he took up the study of law, under the guidance of Judge Carter; but delicate health and too close application to his studies forced him to suspend them for the time being. A very strong predilection, however, for a military life, led him to enlist, in 1862, in the Army. He joined the 2d Ohio Volunteer Infantry, and immediately left for active service, intending to go through the War. Camp fever and a chronic stomach disorder soon compelled him to abandon this cherished purpose; and he resumed his legal studies at Cincin- nati, where he was graduated in 1867. In 1868, he married Miss Julia Ellis, the beautiful and accomplished daughter of Charles W. Ellis, a banker of Cincinnati, and shortly afterward moved to Columbus, Ohio, when he was admitted to the Bar by the Supreme Court of Ohio. From 1871 to October, 1875, he was engaged in private practice, in Cleveland, as a corporation lawyer, and then removed to Chicago, where he continued in the same capacity until January, 1883. In the last named date he was in general practice, having a valuable clientele among a number of resident and foreign corporations. Mr. Allen has been an extensive traveller, and is familiar with nearly every "nook and corner" of his country. He is a hard student, an indefatigable laborer, a patient and skilled scholar and writer. He has long been a valuable contributor to the press, under the nom de plume of "Tee Green," and has written several books. He is the author of the "Sage of Mentor," a remarkable epic poem, which has been extensively reviewed by leading journals, and pronounced by them a proof of splendid genius. One of its verses aptly expresses his philosophic creed:
"All human laws, all mortal plans, but aid
That Will which moves the Universe,
Which force may not resist, nor art evade.
So, though presumptuous man may oft refuse
Such gifts; yet high Heaven—his will is vain.
The plan of Nature's first: its laws remain.

John R. Parker, attorney and preacher at law, was born on August 27, in Grand View, Spencer Co., Ind., his parents being Henry Nelson and Mary (Stillwell) Parker. In September, 1853, his father removed to DeKalb County, Ill., where, until John was fifteen years of age, he spent his time as a farmer. He was working and attending school at the same time. After attending the Sycamore High School for a time, he taught a district school and finished his education at Clark's Seminary and Hillsdale College. In 1872, he took the full course of four years at the latter institution, graduating in 1871, and in the fall of the same year became principal of public schools, holding, also, the same position at Fulton during 1872. In August, 1873, he came to Chicago, pursued his law studies in the office of Wheaton, Canfield & Smith, and in June, 1875, was admitted to the Bar, at Mount Vernon, Ill. He associated himself with Mr. Canfield for about a year, and then opened an office alone, and has since practiced without a partner, giving much of his attention to real-estate matters. Mr. Parker was married, on September 29, 1875, to Mary J. Daniels, of Kendallville, Ind. They have two children. —Irving and Rosida.

John M. H. Burgett, member of the law firm of Smith & Burgett, was born at Hartland, Vt., on April 28, 1850. His parents, Daniel A. and Adeline Burgett, came to Illinois in 1854, locating near Lewistown, where they have since resided. Here John received his education, graduating from the high school in 1868, and from the University of Michigan, at Ann Arbor, in 1872, with the degree of B.B. After studying law with K. B. Stevenson, of Ann Arbor, he was admitted to the bar in 1872, and engaged in practice before the Supreme Court, at Mount Vernon, Ill., in June, 1875. Mr. Burgett came to Chicago during the following September, and, in April, 1877, formed his partnership with Abner Smith. He was admitted as an attorney and counselor at law in the United States Supreme Court in 1883, at which time he was engaged in the case of Drury v. Hayden, on appeal taken from the United States Circuit Court for the Northern District of Illinois, and was also attorney for defendant Drury before the appeal, and had the gratification of seeing the decision of the Circuit Court reversed by the higher tribunal. Justice Gray delivered the opinion, with directions to dismiss complainant's bill for want of equity. The case, which obtained considerable notice, is reported in 11 Ill. Rep.

Frederick William Packard is one of the most prominent and promising of the younger members of the Chicago Bar. No lawyer of his years enjoys a better reputation. He is very popular with his professional brethren as well as with all who know him. He has taken a very high position for the length of time he has been in the Bar. He is always courteous and gentlemanly, is endowed with the faculty of legal analysis, has an excellent education, and is well read in general literature as well as in the law. When he appears in court it is apparent that he is carefully prepared on all subjects connected with points of his case and his style of pleading is clear, forcible, and entertaining. He was born at Orange, Franklin Co., Mass., on November 5, 1850; prepared for college at Williams, Mass., attended, in 1867, one of the famous schools of New England, and graduated at Amherst College in 1872; entered the law office of King, Scott & Payson, as a student in the fall of 1872, and was admitted to the Illinois Bar in January, 1875; and has ever since been actively engaged in law practice in the State and Federal Courts. Several years since, after the dissolution of the firm of King, Scott & Payson, Mr. Packard became a partner with Mr. King, under the firm name of King & Packard, which firm still continues. He was married, on July 28, 1877, at Amherst, Mass., to Stella C. Williams, a most worthy lady. They have one daughter,—Fanny.

Masses for the Soul.—The following opinion of Judge Tuley of the Circuit Court, in the case of Kehoe vs. Kelso, attracted wide attention, and was extensively copied in legal and other newspapers. On account of its novelty and the interest taken in the subj ect-matter, its main points are here given.

John W. Kehoe, a few weeks prior to his decease, made a deed to complainant of certain personal property, upon oral directions or trusts, which were in substance that the funds should be devoted to the purpose of procuring masses to be said for the soul of the said John W. and for the soul of his mother, also deceased. The defendants, his legal representatives, contended that the trust was void because it was not wholly in writing; and because the funds were given for a superstitious purpose or use. After ruling against the first objection, and reviewing the English law on the subject of superstitious uses, and how far the statutes of England have been adopted in this country, the judge proceeds to say:

The question being freed from the force of precedents, must be decided upon principle. In the United States, where no discrimination is made in law between the professions of any particular religious creed, whether the same shall be as an absolute or derivative, and in all its opinions and modes of worship,—can any such thing as a superstitious use be said to exist? Who is to decide whether or not a use, as connected with the religious belief of the donor, is or is not superstitious? Must it be decided according to the se nse of the donor or the views of the chancellor? Nor is the question here whether or not the doctrine of a purgatory is well or ill founded? or whether or not masses for the souls are efficacious, or are against the religious liberty? This property was appropriated by the donor to a use according to his religious belief. That there is a purgatory, and that masses for the souls therein are efficacious, is a part of that doctrine of the Catholic religion. In the formulary of the faith of Pius IV., which is still that of the unchangeable Church, and which persons becoming members are expected to give their adhesion to, I find the following:

'I firmly hold that there is a purgatory, and that the souls therein detained are helped by the suffrages of the faithful.' This being the don or's belief, why should not his desires be carried out? It has become a maxim of the law that a man may do what he will with his own. The only limitations are that he does not violate the law of the land, nor does he commit any crime. A person may gratify any whim or caprice, religious or irreligious, that he may desire. The Legislature has not declared such a disposition of this property illegal. Neither the Legislature nor the Court has the power to declare that any religious use is a superstitious use. With us there is a legal equality of all sects, —all are equally orthodox. To discriminate, and say what shall be a pious use and what a superstitious use, would be to infringe upon the constitutional guarantee of perfect freedom and equality of all religions.

The right of a person to devote his property to any purpose which he believes to be in accordance with his religious purposes, is a right to which the religious liberty is guaranteed by the Constitution, as is the right to believe and worship according to the dictates of one's own conscience. The wish of the donor must be followed, and the funds appropriated to the spending of masses to be said in accordance with his instructions.

Thomas A. Banning was born on January 16, 1851, in McDonough County, Ill., and studied law in Brownfield, Mo., and this city. In September, 1875, he was admitted to the Bar, and, after acting as assistant counsel, was engaged in the law practice before Judge T. J. Lyle Dickey, he associated himself with his brother. The firm was first brought into prominent notice by their pro perly in a successful suit in certain cases involving the use of various agricultural machinery, and in a number of cases favorable to the brewers. Mr. Banning lives at Hyde Park, where he takes an active part in all local public affairs, being especially prominent in his position to the proposed division of the two towns. He was married, in 1875, to Sarah J. Hubbard. They have three children.

Edwin Fletcher Abbott, of the firm of Abbott & Johnson, counselors at law, is the son of Dr. Nathan W. and Sarah Y. Abbott, and was born at Janesville, Wis., on May 4, 1852. During his infancy his parents moved to Dixon, Ill., where he remained until 1869. After attending the Dixon public schools, he entered the State University at Champaign, in 1870, where he continued two years. In the fall of that year, he entered the law department of the Michigan University, at Ann Arbor, from which he graduated, with honors, in the class of 1873. In the meantime spending his va rant, he was admitted to the bar in December, 1872. Following his graduation, he spent in completing his studies in the same office, and subsequently began active practice. In 1883, he associated himself with Cratty & Johnson, as a member of the firm of Cratty, Abbott & Johnson, from which Mr. Cratty retired in 1884, since when the firm has remained Abbott & Johnson. Mr. Abbott is recognized by the profession as an energetic, painstaking and clear-headed lawyer, and, through his unvarying success, he has won a place in all of the highest courts of this State. He was married on September 30, 1885, to Miss Nellie Howe, daughter of J. L. Howe, of Chicago.

F. H. Newman was born on November 12, 1852, and removed with his father's family, in 1853, to Butler County, Ohio. At the age of ten years, he removed to Noblesville, Ind. In 1867, he went to Washington, Penn., and later in that year he came to Chicago. He graduated at the University of Chicago in 1873. He read law in
the office of Hon. James R. Doolittle, and was admitted to the Bar in 1875. He at once entered into partnership with Judge Graham, and began a successful career. Judge Graham removed, in 1877, to a western city, leaving Mr. Newman with a good clientele, which he was able to retain and increase. He practiced alone until 1881, when he entered into partnership with Adolph Moses, under the firm name of Newman, Moses & Co. Their business has steadily increased until it is one of the most profitable in the city. Mr. Newman is a Jewish faith, and is connected with several of its educational and charitable societies, and in that, as in everything to which he gives his attention, he is energetic and active, ever ready to do his part with a cheerful heart and a willing hand. In politics he is an ardent Republican.

Jesse Billing Bartoa, of the law firm of Bartoa & Hoch, was born in Demorestville, Ontario, in 1820. His father, Samuel E. Bartoa, descended from a staunch old Puritan family of Massachusetts, and his mother, Philana Billings, from the well-known family of Vermont and New Hampshire. In 1873, Jesse graduated from Albert College, Belleville, Ontario, and immediately removed to Chicago and began the study of law with Ewing & Leonhard. He was admitted to the Bar in January, 1876, and entered the office of Corporation Counsel Elliott Anthony. He afterward became assistant corporation counsel, which position he held until Carter Harrison was elected mayor, in 1879. Mr. Bartoa then commenced the practice of his profession in a private capacity, being associated for a short time with E. L. Chamberlin. In May, 1883, he formed a partnership with James J. Hoch. Mr. Bartoa's practice has been general, he having acted for a few years past as attorney of the South Park Commission. He was married in 1879, to Miss Ella Wilcox, of Jefferson County, N. Y. His wife died during the same year. In February, 1885, he married Mrs. J. F. Bonfield, under whose husband he had formerly served as assistant corporation counsel, and is a daughter of Jesse E. Thomas, at one time judge of the State Supreme Court; her grandfather on her mother's side was Theophilus Smith, also a judge on the Supreme Bench.

The Wilson Homicide.—The mysterious murder of Mr. and Mrs. James L. Wilson occurred in Winnetka, in this county, on February 13, 1884. The tragedy was notified in Chicago about ten o'clock in the morning, when a young woman named Emma Dwyer called at the residence for the purpose of keeping Mrs. Wilson company during the day, as had been her custom on Wednesdays, which day Mr. Wilson usually spent in the city. Finding the kitchen door, at which she usually entered, locked, and the blinds down, and concluding that one or both of the aged couple was sick, she opened a window and let herself in. Passing into the bedroom, she beheld through the dim light the body of Mr. Wilson lying on the floor, behind the stove. Thinking the old man had fallen, she hastily called for help. On raising the window-blind they saw that Mr. Wilson was lying in a pool of blood, dead. Two other neighbors being called in, they proceeded up-stairs in search of the wife, and found her lying half-naked on her bed, her head pounded into a jelly and the pillow and bedclothes literally soaked with blood.

The village was soon aroused, and at a meeting of the citizens the popular indignation at the enormity of the crime which had been committed in their midst was expressed in offering a reward of $1,000 for the arrest and conviction of the murderer. Mr. Wilson was an old citizen, and had been president of the village board for the past three years. He was a brother of the late Judge John M. Wilson, of Chicago, and, with his wife, had been highly respected. He came to Chicago in 1843.

The hour of the crime was not known, neither was there the slightest clue to its perpetration. The detectives and others were soon actively engaged however, in search of evidence which might lead to his discovery. Their efforts resulted in the indictment, in April, of Neil McKeague. He was put upon his trial for the murder on May 5, 1884, before Judge Anthony. The Criminal Court room was thronged daily with an audience which closely watched every development as the trial progressed. The State had to rely wholly upon circumstantial evidence; and although all the facts known were ably presented and sifted by the State's attorney, the jury was not able to find sufficient evidence to convict. Their verdict, accordingly, after a two weeks' trial, was "not guilty."

Up to the present time no new facts or circumstances have been discovered. It is one of the murders which remains enshrined in mystery.

Curts H. Remy, of the firm of Flower, Remy & Gregory, was born near Hope, Indiana, in 1829. Mr. Remy, Alexander C. Remy, is one of the commissioners of Marion County, Ind., and commenced his son's education by sending him to Nazareth Hall School, Penn., when the boy was fourteen years of age. In 1870, he graduated from Transylvania College, Lexington, Ky., and the next year from its law department. In 1872, he pursued a legal course at the law department of the Northwestern University, Indianapolis, Ind., and immediately commenced the practice with Judge Byron K. Elliott, now of the Supreme Court of Indiana, and afterward with General Thomas M. Browne, then United States District Attorney and now a member of Congress. Mr. Remy practiced law in his first firm from 1872 to 1875, when he removed to the firm of Summerson & Ruger. In the fall of 1879, associated himself with Judge J. C. Chamness. In 1882, he became a member of the present firm. Mr. Remy was married in October, 1875, to Fanny Wheeler. They have one child.

Henry S. Robbins was born at East Stoughton, Mass., on February 5, 1855, and is a lineal descendant of Colonel Oliver M. Spence, Revolutionary soldier in General Washington's army. His grandfather's brother was Chancellor Halstead, of New Jersey; and Judge A. M. Spencer, of Cincinnati, is his great-uncle—all being in the general line. Mr. Robbins, who was named after Henry Spencer, formerly mayor of Cincinnati, and a brother of Judge Spencer, is the son of John V. and Anastasia (Ford) Robbins. He was educated at a boarding school preparatory to entering Yale College, from which he left during his junior year, and attended law school at Madison, Wis., where he was admitted to the bar. He then went to New York City, and practiced law two years. In 1876, he came to Chicago, and entered into a partnership with Hempstead Washburne, doing a flourishing business. In 1877, Mr. and Mrs. Trumanell became a member of the firm, which assumed its present style, Trumbull, Washburne & Robbins. Mr. Robbins was married, on December 12, 1883, to Miss Fanny F. Johnson, daughter of H. Morris Johnson, of Chicago.

Owen F. Aldis, of the firm of Paddock & Aldis, was born at St. Albans, Vt., on June 6, 1853. He comes of a legal family, for his father and grandfather having been honored by positions on the Supreme Court Bench of this State. Mr. Aldis, in years of his life abroad, studying as he travelled, and at the age of eighteen years entered Yale College, graduating therefrom in 1874; and then studied law in the firm of Lyman Smith & Co., in Lexington, D. C.; was admitted to the Chicago Bar in 1876, and immediately entered practice. In 1880, he formed a partnership with A. F. Hatch, under the firm name of Hatch & Aldis. This connection being severed in the spring of 1883, he became associated with George L. Paddock, his present partner.

Edward Fisk Gorton, of the firm of Conger & Gorton, attorneys and counselors at law, is the son of Anson and Ellen F. Gorton, and was born at Ashtabula, Ohio, on May 6, 1854. His mother dying at that time, he was reared by his grandfather, at Rochester, N. Y., where he attended the public schools and graduated from Wilson's private school. In 1874, he went to Columbus, Ohio, where he remained until the spring of 1883, when he came to this city and entered the law office of E. A. Small as student and clerk. Subsequently, he entered the Union College of Law, and graduated, with honors, in the class of June, 1876, and was once admitted to the Bar. During the same year, he formed a partnership with W. P. Conger, his present associate, and since then has been engaged in active practice. He is recognized by the legal fraternity and among other important clients as a successful and successful advocate and counselor. Possessing natural talents, so highly requisite in the legal profession, he has, by assiduous study and diligent work, acquired the experience which constitutes a first-class practitioner, and his position at the Bar is an enviable one. Mr. Gorton was married on June 19, 1879, to Miss Fannie Louise Whitney, of Chicago.

Perry II. Smith, Jr., was born at Appleton, Wis., on May 10, 1854, and came to Chicago, with his father's family, when five years of age. Pursuing his primary studies in Racine College until his eighteenth year, he visited the Paris Exposition and travelled throughout France and Germany, returning to this country, residing for some time at the Chauille Institute, in New York City, he continued his studies, and

Bench and Bar, 277
then took a European trip of two years. Entering the sophomore class of Hamilton College in 1871, he graduated in 1874. Mr. Smith spent another year abroad, and, in 1875, entered the Columbia College Law School, from which he graduated in 1876, with the degree of LL.B. He was admitted to practice in the Supreme Court of the State of New York, when he returned to Chicago and entered the office of John N. Jewel. In 1879, he formed a partnership with Francis H. Kates, and after the latter's decease, in 1882,

became connected with Samuel P. McConnell. During the Hancock campaign in 1884, he was the democratic candidate for Congress in the Third Illinois District, and, although defeated, carried the city precincts by one thousand majority. Mr. Smith was married at Baltimore, Md., on June 18, 1878, to Emma L., the daughter of William N. McCormick. They have had three children: Perry H., who died on September 13, 1851; Ruby McCormick and Perry Herbert.

**The Election Conspiracy Case of 1884.**—This celebrated case occupied not only the public mind of Chicago, but also that of the State and Nation, from November, 1884, until March, 1885. And being as yet undetermined, in some of its legal aspects, it still holds a place of absorbing interest in political circles. No trial involving so many questions of interest and importance to the public generally, and which in its progress developed so many sensational features, ever occurred in this State.

The defendants in the case were Joseph C. Mackin, secretary of the Democratic State Central Committee, William J. Gallagher, a judge of election, and Arthur Gleason and Henry Biehl, deputy clerks of the county clerk of this county. The facts which led up to, and resulted in, the information upon which the above-named parties were put upon trial in the United States District Court were as follows:

The presidential election occurred on Tuesday, November 4, 1884. At first, it was claimed by the Republicans that they had carried the Legislature of this State by five or six majority; but it was soon discovered that the complete and corrected returns left that body a political tie—that is, the democrats had one majority in the House and the Republicans one majority in the Senate. The election, therefore, of a United States Senator, to succeed General Logan, whose term had expired, would be impossible, if each member voted according to his political complexion, unless some change should be made.

Under the law of this State, it is made the duty of the county clerk, together with two justices of the peace to be selected by him, to canvass the returns of the election for members of the Legislature and other public officers, and certify the result to the Secretary of State, as a basis for the issuing of a commission to the officer entitled thereto. The performance of this duty by County Clerk M. W. Ryan, and Justices Scully and Kersten, who had been called in to assist him, began November 11. A State senator was chosen at this election from the Sixth District, which included the second election district of the Eighteenth Ward of Chicago. Thirteen candidates were Henry W. Leman, republican; and Rudolph Brand, democrat. When the vote of this district was counted on the night of the election, it appeared that Leman had received four hundred and twenty votes, and Brand two hundred and seventy-four votes, which, with the returns from the other precincts of the district, elected Leman by two hundred and forty-four majority. The canvassing board, in the course of their labors, reached this election district on November 18. Upon opening the envelope containing the returns therefrom, it was found, to the surprise and astonishment of those who were watching the canvass, that the certificate appeared to have been changed. The word "four," in the sentence "Henry W. Leman had four hundred and twenty votes for State Senator," as it was originally written, had been erased, and the word "two" had been written in its place. And the word "two" opposite the name of Rudolph Brand, as originally written, had been erased, and the word "four" written in its place, making his vote to appear to be four hundred and seventy-four instead of two hundred and seventy-four. A forgery had evidently been committed by some one, and the question immediately arose whether or not the Board was authorized to go behind the returns as thus presented to them, and to ascertain their correctness by examining the ballots. Upon application of those interested, arguments were heard on this question, and the Board decided that they had no power to do so. The returns, as they had been changed, and as they came before the Board, elected Mr. Brand by a majority of ten. And this, as the result of the election in the Sixth Senatorial District, was certified to the Secretary of State.

If a high crime had been committed, the result to be accomplished was no less high. The giving of Mr. Brand a seat in the Senate instead of Mr. Leman gave the democratic party control of the XXXIVth General Assembly, and the election of a democratic United States Senator in the place of General Logan was assured. A change of senators from Illinois would go far towards changing the complexion of the United States Senate for the succeeding two years. To effect these momentous results,—to capture a State Legislature and the Senate of the United States, had there been a conspiracy to manipulate the returns of the election? That was the question which took full possession of the minds of good citizens of all parties.

It so happened that the United States Grand Jury was in session at that time in the Government Building. Witnesses were subpoenaed, and an examination into the alleged fraud was entered upon at once. It was determined to inspect the ballots of the second precinct, where the change had been made; but as there was some question in regard to their legal right to do so, the opinion of Judge Blodgett was invoked by the District Attorney. Upon his decision, a subpoena was issued, requiring the county clerk to produce the poll-book, tally-sheet, and ballots of said precinct, for the inspection of the grand jury. This writ was served at 2 o'clock on the 21st. The clerk doubted the right of the grand jury to demand these papers. He appeared before that body without them, and asked for time to consult an attorney. District Attorney Tuthill insisted upon the immediate production of the returns and ballots. The county clerk left the building, and had not returned when the grand jury adjourned. He and his associate canvassers were notified that they must appear with the required documents by ten o'clock on the 22d. They appeared, as requested, before the jury on the 22d, and testified, but not with the ballots or returns. An attachment was asked for, Mr. Ryan stating that he had been advised by counsel that the grand jury had no authority to compel him to produce the poll-book and ballots, and that he would not do so except upon an order of the United States District Court. It was on this day that the canvassing board unanimously decided
to return the vote to the Secretary of State as it appeared on the face of the poll-book and tally-sheet.

On the opening of the court on Monday morning, Mr. Ryan, by his attorney, Mr. Green, appeared before it to answer why he had not obeyed the subpoena of the grand jury. Authorities were cited, tending to show that the original papers called for should not be produced. The judge, however, made an order, that unless the clerk should produce the required documents within one hour, the court would hold him in contempt. The attorney departed to inform Mr. Ryan, who was not present, of the order just issued; but in a short time, A. C. Storey, of counsel, returned just as the court was about to adjourn, and entered a formal protest against the grand jury being allowed to examine the ballots cast in the precinct in question. He read authorities to substantiate his position. The judge thereupon stated that he would order the foreman of the jury not to open the ballots until the court gave him an order to do so. At two o'clock, the clerk appeared before the grand jury with the poll-book and tally-sheet. They were then examined, but Mr. Gleason, the deputy, was instructed not to leave the papers with the grand jury, as they requested, but to bring them away with him, which he did.

At 11:20 on the 24th, the court issued a further order, that Mr. Ryan appear before it within one hour with the tally-sheet and poll-book. The court was asked, by Mr. Green, if the order covered the ballots. Judge Bledgett replied, "If the jury want them, the order covers the ballots." The papers were, accordingly, again brought before the grand jury, where they remained.

On the morning of the 25th, after a further hearing of the matter, the court overruled the objections to the production of the ballots, and they were thereupon produced before the grand jury.

The fact revealed by an examination of the ballots was another surprise. It had been supposed that they would show that "pasters" had been used, making the numbers correspond with the erasures on the certificate; but instead of this, ballots, with the name of Mr. Brand printed on them, were found to the number of four hundred and ninety-eight, while only one hundred and eighty-nine tickets appeared having on them the name of Mr. Leman. But the investigation still continued. In addition to the county clerk and his deputies, John B. Jeffery, who had printed the republican ticket, was interrogated. According to his testimony, the tickets with Brand's name printed on them, to the number of over two hundred, were counterfeits of the genuine republican ticket. Many leading citizens who had voted for Leman, but who according to the tickets found in the ballot-box had voted for Brand, were examined and testified to that fact. New developments were made each succeeding day of the investigation. By Monday, December 1, sufficient evidence had been advanced to justify the belief that spurious republican tickets, with Brand's name on them in the place of Leman's, had been printed in the city on November 21. The engraver of the counterfeit head and the printer were both found.

The inquiry before the grand jury resulted, on December 11, in the finding of an indictment against the judges and clerks of the precinct in question, for malfeasance in office; and also in an indictment against Mackin, Biehl and Gleason, for a conspiracy to change the returns.

In the meantime, it was believed by the District Attorney that the man who really did the "fine work" of changing the certificate of election, and of making out the forged tally-sheet, had not yet been discovered. At length the persistence of his efforts in that direction was rewarded. A comparison by experts of the handwriting of the substituted tally-sheet with that of William J. Gallagher, seemed to show conclusively that they were the same. The grand jury had now adjourned, but such, in the opinion of the District Attorney, was the urgency of the case, that he determined to commence the prosecution at once. This he did on December 31, by bringing in the District Court of the United States an information against Joseph C. Mackin, William J. Gallagher, Arthur Gleason and Henry Biehl. The charge was for unlawfully conspiring together to break open the envelope containing the election-returns of the second district of the Eighteenth Ward, to remove therefrom the returns, to alter the certificate of election, to destroy one of the tally-sheets and substitute therefor a false and spurious one, to break open and abstract therefrom the package containing the ballots cast at said election, and to substitute therefor, in the same form, spurious printed papers.

The defendants were arrested, and the trial began before Judge Bledgett on February 5, 1885, and continued until the 21st. The court-room, having a seating capacity of only about one hundred, was filled at every session by interested spectators. Every inch of space was occupied, while hundreds stood in the corridor outside the door, vainly trying to obtain admission. Assisting Hon. Richard S. Tuthill in the prosecution were Israel N. Stiles, General Hawley and Judge James R. Doittle. The attorneys for the defense were Judge Turpie, of Indianapolis, Leonard Swett, H. W. Thompson, F. D. Turner, Peter S. Grossecup and William S. Young, Jr.

The theory of the prosecution was, that the erasures in and change of the certificate and the substitution of the forged tally-sheet were accomplished, with the connivance of the deputy clerk or clerks, by some one or more persons, prior to their being opened by the canvassing board on November 18, and that the spurious ballots were ordered and procured by defendants Mackin on November 21, and placed in the ballot-box, in lieu of the same number of genuine ballots taken therefrom on the same night.

The examination of the people's witnesses was concluded on the 13th. All the defendants testified in their own behalf, denying the charge against them.

After the examination of several witnesses for the defense, on the 14th G. B. Titman testified that he had rented his printing-press and materials, on State Street, to one J. J. Sullivan, to be used on Monday evening before the election, and that on the next morning he found on the floor of his printing-office the lower half of the republican ticket. The next witness called for the defense was J. J. Sullivan. He testified that he had engaged Titman's press to print a split-ticket, the day before the election, for a man named Gilmore. One of the Brand tickets alleged to have been spurious being shown him, he identified it as the one printed by him. On cross-examination, he stated that he did not know Gilmore, but had met him in a saloon on Clark Street occasionally, and that he received twenty dollars from him for printing the tickets.

Charles E. Gilmore then took the stand, and testified that he had been employed at the democratic headquarters during the late campaign, at a compensation of three dollars a day. A few days before the election he was told to see if he could not get an impression of the republican ticket. He was somewhat acquainted
with the office of John B. Jeffery, and bargained with a young man employed there, for twenty dollars, to obtain a stereotype of the republican ticket, with Rudolph Brand's name inserted in place of H. W. Leman's for July State Senator in the Sixth District. He received the stereotype block from the young man the next day. He had met Sullivan, and knew he was a printer. He employed him to do the printing of the tickets the day before the election, agreeing to pay him twenty dollars therefor. He got the tickets from Sullivan, at Titman's office, between three and four o'clock on the morning of the election.

Edward N. Simons then testified that he was clerk at the democratic headquarters. He had told Gilmore that he would make it all right with him if he would get a cast of the republican ticket with Brand's name on it. This was on Saturday, November 1. On Monday night, Gilmore brought the tickets to headquarters. He had made them up in packages, and delivered them in the fifth and sixth precincts of the Eighteenth Ward.

The tendency of the foregoing testimony was in the direction of giving a satisfactory explanation of the appearance of the so-called spurious tickets, an important branch of the investigation, so far as at least the defendant Mackin was concerned. Mackin then took the stand, and gave his version of the defense. But in the meanwhile there was that in the evidence, as well as in the appearance and manner, of the witnesses Sullivan and Gilmore which aroused the suspicion that they had not sworn to the truth. Their conduct was narrowly watched. Sufficient evidence was soon obtained to justify their arrest, together with that of Titman and O'Brien.

The next scene in this exciting drama was the imprisonment and confession of Sullivan. On Tuesday, the 17th, he again appeared in court, and, taking the stand, testified that he had nothing to do with the printing of the tickets, as he had previously sworn to; that he had never seen Gilmore until during the trial; that O'Brien had introduced him to Mackin at the Palmer House; that Mackin had there given him a ticket, which he, Sullivan, swore he had printed at Titman's on the night of the 3d—the same ticket which he had produced when he gave his testimony; that Mackin gave him two dollars; that, after testifying on the 14th, he again met Mackin at the Palmer House, who had told him that his evidence had been given "all right," gave him two dollars more, and assured him that he would get him a place in the Government printing-office at Washington.

O'Brien was arrested on the 17th, and admitted that he had introduced Sullivan to Mackin at the Palmer House, as he had stated.

Titman also again testified on the 17th. Being confronted with J. J. Sullivan, he said that he was not the man he had rented his office to on the night of November 3d. The ticket which he had alleged to have been printed in his office at that time was given to him by Mackin. The evidence tending to show that perjury had been committed by witnesses for the defense was complete. But the trial went on; the evidence being all in, the addresses to the jury began on the 18th. These occupied nearly three days, and were concluded on Saturday, the 21st. Then followed the charge of Judge Blodgett. The jury, at 4:30 p.m., came into court. Their verdict was that defendants Mackin, Gallagher and Gleason were guilty.

They requested for a new trial having been overruled, Mackin and Gallagher were sentenced to be imprisoned in the penitentiary for a term of two years, and each to pay a fine of five thousand dollars.

The cause was then removed to the Circuit Court, before Judge Gresham. The sentence of Gleason was suspended. On March 24, Judge Gresham decided that the defendants were entitled to have their cause reviewed by the Circuit Court. The defendants having been admitted to bail, the hearing was had before Judges Harlan and Gresham in May, when a divided opinion was certified to the Supreme Court of the United States.

TRIAL OF MACKIN FOR PERJURY.—The next event to be noticed in connection with the election frauds of 1884, is the trial of Joseph C. Mackin, for perjury, before Judge Moran, in the Criminal Court of Cook County. He was defended in this case by Emery A. Storrs. The prosecution was conducted by State's Attorney J. S. Grimnill, Israel N. Stiles and Joel M. Longenecker.

In the course of the investigations of the State grand jury, W. H. Wright—and S. B. Wright had testified (as they had previously in the conspiracy trial) that on November 21, 1884, they had been employed by Mackin to print the alleged spurious tickets, under the name of Brand upon them as a candidate for the State Senate in the place of Leman, and delivered the said tickets to Mackin, at the Palmer House, on the same night. Mackin, being called as a witness before the grand jury, denied that he had employed the Writings to print said tickets, as they had testified to. For this he was indicted.

The trial was a brief one, only lasting two days. On July 1, the jury brought in a verdict of guilty. A motion for a new trial was overruled, but sentence was stayed to give the defendant an opportunity to apply for a writ of error. This was issued, and the cause argued in the Supreme Court, at Ottawa, in September.

It was while he was engaged in this case, in attendance upon the Supreme Court at Ottawa, that the death of Emery A. Storrs occurred.

The Supreme Court filed their opinion on November 17. They reviewed the case at great length, and decided not to disturb the judgment of the court below. Mr. Mackin is, therefore, now in the penitentiary serving out his sentence in the penitentiary at Joliet.

WILLIAM ERNEST MASON, son of Lewis and Nancy (Winslow) Mason, was born at Frankville, Cattaraugus Co., N. Y., on May 7, 1850. His father, who died in Iowa, in 1865, was a merchant, a man of marked character, and a strong abolitionist. His mother also died in Iowa in 1875. Mr. Mason came West with his father's family in 1858, and settled at Bentonport, Van Buren Co., Iowa. When thirteen years old, he entered Burlington College, in Van Buren County, where he remained two years, and, during the succeeding two years taught school in the winter, and subsequently taught for two years at Des Moines, Iowa, where he began his law studies, in 1870, under Hon. Thomas F. Withrow. When that gentleman became general solicitor of the Chicago, Rock Island & Pacific Railroad, in 1871, Mr. Mason removed with him to Chicago, remaining in his office another year. For the five years following, he was in the office of John N. Jewett, where he completed his studies and perfected himself in practice. In 1877, he formed a partnership with M. K. M. Wallace, which firm continued until Judge Wallace was appointed prosecuting attorney. Mr. Mason is a republican, an active politician, and an efficient worker in the ranks of his party. He was a member of the State Legislature in 1879, and, in November, 1882, was elected a State Senator from the new Ninth Senatorial District. He was chairman of the committee on the committee on warehouses in the XXXIVth General Assembly, and was chairman of the Committee on Judiciary in the XXXVth General Assembly, serving, in addition, as a member of the committees on judicial department, corporations, insurance, military affairs, and miscellaneous. He married, in 1873, Miss Julia Edith White, daugh- ter of George White, a wholesale merchant of Des Moines, Iowa. They have five children,—Lewis F., Ethel Winslow, Ruth White, Winifred Sprague, and William Ernest, Jr.
John Foster Rhodes was born at Brownsville, Penn., on September 14, 1850. He is a son of Rev. D. Rhodes, of the Ohio Conference of the Methodist Episcopal Church. He received his education chiefly at St. Mary's Academy, Dayton, Ohio. In 1867, he went to Chicago, where he engaged with Andrews, Co., bankers. In 1873, he came to Chicago, where he was employed by the Hibernian Banking Association for several years. During the period of his bank service he occupied his spare hours in study. Later, he was systematically employed in law. Small, and, entering the law department of the University of Chicago, was graduated and admitted to the Bar in 1877. Up to early 1884, he practiced in this city. He then became interested in building in Chicago. The celebrated art-studio building which he had to do was the Commercial Bank. He was next associated with W. K. Nixon in the Northwestern Safe and Trust Company, and with the Exchange Commission Building, one of the largest office-buildings in the city. In the fall of 1884, he became interested, with others, in the Traders' Safe and Trust Company's Building, opposite the new Board of Trade. He has now completed the formation of this body, in connection with Mr. W. Rhodes, treasurer of the Globe Electric Light and Power Company. In 1881 he organized the Dearborn Savings, Loan and Building Association, and has since been its secretary and manager, making it one of the most successful institutions of its kind in the country. The position that Mr. Rhodes holds has been gained by his ever persistent industry and integrity, as since he was twelve years of age he has been by his individual energy the leading force in the enterprise. He was married, in Chicago, to Miss Margaret W. Patterson, daughter of one of the early residents. They have two children—Margaret Elizabeth and Joseph Foster. He is a member of Lakeside Lodge, No. 729, A.F. & A.M., of Corinthian Chapter, No. 60, R.A.M.; and is a charter member of Chevalier Bayard Command, No. 52, K.T.

Hiram H. Cody is a man whose office and honors have persisted with the passing of party lines, and possess constantly the united abilities, which merit confidence and admiration. He was born in Oneida County, N. Y., in 1824. His ancestors were among the pioneer settlers, and his grandfather was a soldier of the Revolution. He was early designed for the law, and educated with this object in view. In 1843, he removed with his family to Kendall County, Ill., and settled a year later, at Bloomington, DuPage Co., a four years afterward, he was chosen clerk of the Commissioners' Court of that county. He then removed to Naperville, and upon the adoption of the Constitution of 1848, was nominated by acclamation, and elected the first county clerk of that county, making his whole service as clerk six years. Meanwhile, while having been admitted to the Bar, he declined re-nomination, and devoted himself to his profession. Although a democrat in politics, he was indebted to his party vote for no other office. At the time of the Rebellion, he became an ardent Union man, and his energy and eloquent appeals contributed very largely to the brilliant war record of DuPage County. In 1861, in a convention comprising all parties, he was nominated for county judge, and elected by an enormous majority. In 1865, he was chosen a member of the Constitutional Convention by a majority of nearly two hundred, though his opponent was one of the most popular republicans in a county where the democratic majority was exceedingly small. In this body he was chairman of the important committee on revision and adjustment, making his report at the hour of final adjournment—a pronouncement which secured his committee the only unanimous vote of thanks given during the session. Judge Wilcox, of the Fourth Judicial Circuit, then composed of Kane, DuPage and Kendall counties, resigned his office in 1874, and Judge Cody was elected his successor, by the largest majority ever given any candidate for three terms in history. The nomination was all but fourteen out of ten hundred and twenty-one ballots. In 1877, three republican counties were united with the Fourth, to make the Twelfth Circuit, and in the contest which followed, Judge Cody was not elected, though he reduced his opponent's majority from twelve thousand to about two thousand votes. He then became a member of the firm of Gary, Cody & Gary, doing business in every important local line and retaining his business in supreme. Since then he has been nominated for State Senator, and twice elected, without contest, regardless of his protest and continued refusal to accept office, because of his professional engagements and the interests confided to him. He was a careful and intimate member of the firm, and over eighty per cent. of his appealed decisions have been affirmed by the higher courts. He is an effective advocate; is sincere, earnest and eloquent; and performs every duty with the singlemindedness of a true profession. He is a good lawyer, and over eighty per cent. of his appealed decisions have been affirmed by the higher courts.

John McKeen and Joseph Naper.

Harry Rubens was born at Vienna, Austria, on July 7, 1850. At the age of fifteen he entered the Vienna Polytechnic School, receiving his diploma of the Astronomical Department in 1866. When, as one of the students' Legion, he entered the army, and participated in several important battles. At the conclusion of the war, he returned to his school, from which he graduated, in 1867. He went to the United States the same year, and was employed in journalistic work, principally on German papers. In St. Louis he was employed on the Westliche Post; and subsequently, in 1871, with Joseph Keppler, the artist, he founded and started, in the summer, the pictorial Post; and the next winter in New York. During the same year he became private secretary to Hon. Carl Schurz, then United States Senator, and removed to Washington. In the winter of 1872, he was assistant secretary of the Missouri State Senate. He came to Chicago in the spring of 1874, and was local editor of the Freie Presse, subsequently being connected with the Times and the Evening Mail. After reading law with Edmund Jessen, he was admitted to the Illinois bar, at Mount Vernon, on June 8, 1877, and commenced practice with Henry Hiestand, under the firm name of Rubens & Hiestand. Mr. Hiestand withdrew in 1882, and Mr. Rubens formed a partnership with John McGaffey, which continued until the present firm of Barnum, Rubens & Ames was organized on December 1, 1884, Judge William H. Barnum resigning his seat on the Circuit Bench in November, 1884, to become a member of the firm. Mr. Rubens was appointed by the mayor, in 1879, a member of the board of directors of the Chicago Public Library, and, in 1882, he was elected president of the board. He was for several years attorney for the Liquor Dealers' State and National Associations, and has been president of the Germania Society (1883) and of the West Side Turnverein. He is now attorney for the Board of Education.

J. Blackburn Jones, a prominent and well-known lawyer, was born on September 7, 1842, and came to Northern Illinois, with his father's family, in 1840. He was a student at Rock River Seminary, and afterward attended the Northwestern University and the Chicago Law School. When Fort Sumter was fired upon, although in the senior year of the law school, he raised a company in Lake County which was credited to the First Congressional District, and on April 25, 1861, was mustered in as captain of Co. "E," 15th Illinois Infantry. The regiment was mustered into the United States service of September 4, 1861, and the regiment of Tennessee, participated in all the battles of the Southwest. He was in a number of the prominent battles of the War, was several times seriously wounded, and was promoted, through the grades of captain, major, colonel and general. At the end of his term, he was chosen to the Illinois legislature. With one exception he was the youngest general in the army. At the capture of Fort Blakey, one of the defenses of Mobile, on April 9, 1865, he was very severely wounded. After he had partially recovered, he was, in August, 1866, assigned to the Department of West Louisiana; but his wounds becoming very troublesome, he was sent North for medical treatment, and on October 19, 1865, he resigned his commission in the Army, and began the practice of law in Knox County, in Southern Illinois, subsequently removing to St. Louis, where he became a partner of ex-Governor Thomas C. Fletcher. From 1866 to 1877, General Jones was employed in almost every important trial in the county political campaigns, as in many in Missouri, Kentucky, and Tennessee, and was conspicuous in the railroad litigation of those years, being for eight years attorney of the St. Louis, Alton & Terre Haute Railroad Company. In the spring of 1877, he formed a co-partnership with Hon. Henry T. Steele, and removed to Chicago. That partnership ended in four years, but the partners still occur jointly the same concern. General Jones is a law partner of a number of companies, has a large and desirable clientele both in this country and Europe, is the Western representative of a prominent New York bank, and is an authority upon all questions affecting loans, commercial law and contracts. He is solicitor of an important railway company, and is largely interested in the development of Southern enterprises. General Jones was in Chicago before the city had a population of a thousand and before it had a single railroad. He is well informed, quick and energetic, pre-
The case was taken to the Supreme Court. The position taken by the city was that the Legislature had no power to exempt these institutions from paying their share of the cost of public improvements; that it might exempt them from taxation, as that was a burden on the property, but not from assessments which enhance the value of their property. This view has been sustained by the Supreme Court, in a decision filed in the October last, in which it is held that the charter-provision on this subject is unconstitutional and void.

The decision is a far-reaching one, affecting a large number of cases. A number of improvements, heretofore deemed impossible on account of these exemptions, were ordered to be made.

WILLIAM A. PAULSEN was born in this city on May 26, 1854, and is the son of Martin and Augusta (Edson) Paulsen. His father is one of the early settlers of this city; and his grandfather, Robert Edson, was a soldier in the War of 1812, and took part in the battle of Lundy's Lane. Mr. Paulsen received his preparatory education in Lake Forest University, and subsequently entered Racine College, Wis., from which he was graduated in 1876, receiving the prize for excellence in Greek composition. He attended the Chicago College of Law, and acquired himself so well that when he graduated in 1878, he received a prize of $50 for the best Greek examination. He was admitted to the Illinois bar. He continued his legal studies in the office of Hon. Elliott Anthony, and was for two years attorney for the National Line Steamship Company, during which period he traveled over the world, visiting in the principal ports of Europe and Asia, and many other important points and historic localities in other quarters of the globe. Upon his return to this city, he entered into partnership with Eugene Clifford and Charles E. Anthony, and their practice has since become remarkable for its extent and prosperity as well as for the distinction, social and commercial, of its clients. This success is, with justice, attributable in a great measure to Mr. Paulsen's legal ability and the comprehensiveness and deductions which he draws from the stated premises have, in a number of cases, been of convincing effect before both court and jury. He was married June 21, 1854, to Miss Carrie H. Brown, a native of Utica, N. Y., a lady as distinguished for her social qualities as is Mr. Paulsen in his profession.

WALTER MATTOCK, son of Rev. John Mattocks, of St. Paul, Minn., and Frances Helen (Haywood) Mattocks, was born in Toronto, N. Y., on June 28, 1854. He was educated in St. Paul, and, in April, 1872, removed to Chicago. He was admitted to the Bar in April, 1875, and is a member of the present law firm of John & Walter Mattocks.

CHARLES HERBERT JOHNSON, of the firm of Abbott & Johnson, attorneys and counselors at law, is a prominent member of the Chicago Bar. He is a son of Gilbert D. and Nancy Jane Johnson, and was born at Lawsonville, in North Carolina, on March 23, 1851. He remained at home until his nineteenth year, during which time he attended the public schools and graduated from the high school, when he entered the office of Edwards & Sherwood, a leading law firm of Kalamazoo, Mich. (Mr. Sherwood is now a member of the Michigan Supreme Bench), with whom he read three years, and was admitted to the Bar in September, 1875. In the latter part of the same year he came to this city, and, until March, 1881, remained in the office of E. F. Abbott, with whom he engaged the firm of Tenney, Flower & Cratty. In May, 1883, he became a member of the firm of Cratty, Abbott & Johnson, and upon the retirement of Mr. Cratty, in 1884, formed his present law firm. Mr. Abbott. Mr. Johnson is known to the profession as a man of integrity and a capable lawyer. His specialty is commercial law.

Sexton vs. The City.—A case involving a difference of $36,000 was decided at the September term of the Supreme Court, which has been in controversy since 1879. Sexton sued the city on a contract for the iron-work of the new City Hall,—the question being whether or not the city had a right to declare said contract forfeited. The Supreme Court, on the first hearing, decided that it had not, and that the city was entitled to recover for the work done by him; under which decision Sexton was entitled to recover $12,000, being $3,000 more than the original contract. A rehearing was re-
fused. When the case came up for hearing the second time, before Judge Smith, the latter, under the rulings of the Supreme Court, felt obliged to render a judgment in favor of the plaintiff for $86,000, being the amount before found due, less what the city had paid him. The city claimed that only $20,000 were due the plaintiff. The case was thereon appealed by the city to the Appellate Court, which affirmed the judgment of the Superior Court. The city then took the case to the Supreme Court. Upon the cause coming before the Supreme Court for the second time, it was decided that the city was only bound to pay the plaintiff what it admitted on the trial to be due him. By which decision there is saved to the city upwards of $66,000.

John D. Gill was born at Antwerp, Jefferson Co., N. Y., on February 23, 1851, and is the son of James and Sarah (Beaman) Gill. He was ambitious to improve himself, and early acquired proficiency in the common branches and commenced to teach. He then obtained a season of schooling at Ives Seminary, now Black River Conference Seminary, in his native town, and, in 1869, completed his course there. In 1871, he came to Illinois, entering the Illinois Industrial University, at Champaign. There he taught and engaged in manual labor, in order to pay his way. He was obliged to absent himself from the University a year, but finally graduated in 1876. He first studied law with George W. Gore, of Champaign, and then attended the Cincinnati Law School, from which he graduated in 1879. At once coming to Chicago, he commenced practice, although previous to his admission to the Bar, he had acquired considerable business at Champaign. Mr. Gill has obtained a good reputation among the younger members of the Bar for his industry, the thoroughness with which he prepares his cases, and the clearness of his arguments in court. In May, 1885, Mr. Gill was appointed attorney for Chandler & Co., the mortgage-bankers, and still continues his general practice of law.

John Gibbons was born in the County Donegal, Ireland, in March, 1848, being the youngest child of John and Cecelia (Carr) Gibbons. His father, though a farmer of limited means, took great pride in the education of his children, but as he died in 1851 and as educational advantages were few in that part of the country, John was compelled to work on the farm until he was about seventeen years of age. His brother, Hon. Patrick Gibbons, now of Keokuk, Iowa, enabled him to commence his scholastic training at a private academy in Londonderry, which was resumed, on coming to America in 1866, at Broad-street Academy, Philadelphia, and afterward pursued his studies at Notre Dame, the course there which latter institution in 1877 made him, by honorary degree, a Master of Arts. He returned to Philadelphia in 1868, and entered the law office of Mr. William H. Marzill, and continued to work for his honor, and was admitted until January, 1870. In March, 1870, he was admitted to the Bar at Keokuk, Iowa. His career in Iowa is best told by Hon. S. M. Clark, of The Gate City, in his sketches of the Keokuk Bar, published in 1879: "Every hour that he has been a lawyer he has been a student; he has been at once practitioner and pupil. The fact deserves recognition as the method of earning a livelihood. Seeing his capacity and his promise, his new legal friends at Keokuk, with that spirit de corps which makes the law the most magnanimous and admirable of professions, solicited and obtained for him, shortly after his coming to Keokuk, the appointment of assistant prosecuting attorney. He held the place until he resigned it, nearly five years later. From 1873 to 1876, he was also city attorney, kept in the place by the vote of both republicans and democrats. Some of the most noticeable and distinguishing work Mr. Gibbons ever did was in this capacity. The city was a debtor at once compromising and defense. Many nice and intricate points under the law of contract and debt, complicated by intruding elements of Federal law, were involved in or arose under these city cases, taxing alike the ingenuity of counsel and the resources of courts. Many of these points, at once practical and obscure, refined but germane, were enlightened by the originality, developed by the industry, and made cogent by the capacity of Mr. Gibbons. Elected to the Legislature in 1876, as a member of the most brilliant and probably the best delegation Lee County ever had in the General Assembly, he was put at a disadvantage at the outset by being, if not the youngest, the least known, and so at the start did not fare so well as his associates in the assignments to committee work. But the test of the work of a session showed the qualities of the man. Before the Legislature adjourned he was conceded to be the highest authority in the house upon questions of constitutional law. The nourishment then given his influence by his ability, secured for him a year later the nomination of his party for the attorney-generalship of the State. Successful as a practitioner, it would yet seem a fair presumption that Mr. Gibbons highest qualities and capabilities are judicial. That if he had opportunity he would win his highest possible distinction and do his best work as a judge."

While a member of the Legislature of Iowa, his proposed amendment to the State Constitution, shortly after General Grant delivered his famous speech at Des Moines with reference to public schools, was taken up and introduced recently before the country—being himself a Catholic. It is here given:

that no public funds, moneys, or revenues whatever, shall ever be appropriated or used in the establishment, support, or maintenance of any school, seminary, college, or institution of learning or charity, unless the same shall have been established by the laws of the State of Iowa and under its control; nor shall any institution established, supported and maintained at the public expense, be under the control of any religious denomination, nor shall sectarianism, atheism, or infidelity be ever taught therein.

It was defeated principally upon the ground that the latter portion of it might bar out the Bible from the public schools. While pursuing the practice of the law Mr. Gibbons was for some years professor of Medical Jurisprudence in the Keokuk Medical College, and was also editor and part owner of the Keokuk Times. In the field of journalism he did some effective work during the Tilden campaign. He is independent in politics and thoroughly American in sentiment. In 1879, he removed to Chicago, where he has built up a practice in which so few early advantages, his career has been somewhat remarkable.

Henry A. Foster, of the firm of Sears & Foster, was born at Winona, Minn., on January 12, 1858. He is a grandson of Henry A. Foster, of Rome, N. Y., formerly a judge of the Court of Appeals of that State. Mr. Foster received his education in the University of Toronto, leaving that institution in 1876 and coming to Chicago. He was for a time in the county treasurer's office, but was admitted to the Bar in 1879, as a result of studying law under the guidance of Gardner & Schuyler. While Mr. Foster has a general practice he gives special attention to probate matters.
validity of a Gaming Statute—This was an action on a case sued in the Superior Court, founded upon section 132 of the Criminal Code, brought for the use of Mary Larned, of Detroit, to recover the sum of $2,000, which it was alleged one E. P. Larned lost and paid to the defendant by playing cards. The defendant demurred to the plaintiff’s declaration, and, in support thereof, insisted that this section of the revised Criminal Code is unconstitutional and void, because the subject-matter thereof is not expressed in the title of the Act of which it forms a part. Judge Smith, presiding, sustained the demurrer.

The case was taken to the Supreme Court, where the ruling of the Superior Court was reversed. The court decided that said section is not in contravention of the Constitutional provision referred to, and say:

“This Constitutional provision has always received a liberal construction, and the courts hold, substantially, that there may be included in an Act any means which are reasonably adapted to secure the object indicated by the title.

For the purpose of suppressing and punishing crime, the Legislature may constitutionally provide punishments other than by indictment, a public prosecution, and fine on conviction. It may, in its discretion, provide for civil action in favor of the party injured, or give a penal action at the suit of any one who will probably for the same, in which the guilty party may be subjected to fine, penalty, forfeiture, or damages.”

Edgar A. Fellows was born, in 1847, at New Orleans, La., and the son of Thomas and Celeste (Pivina) Fellows. His father passed his early manhood in New York State but removed to New Orleans in 1825, where he spent the remainder of his years as a prominent banker until his death in 1868. At the commencement of the War, Mr. Fellows was a member of the Beaux-Arts Club, and afterward called the Home Guards. The Guards encamped at Carrollton, about six miles from the city, and upon the present site of the Exposition. He served as first sergeant of his company. When General Butler captured the city he was paroled, and exchanged in September, 1862. After the War he was in business for about seven years, being at one time a commission merchant. While a resident of New Orleans, Mr. Fellows took a deep interest and a leading part in social and literary matters, and was connected with many of its prominent societies, among others, the Shakespeare Club, the historic worth of whose members are of no mean order. In religious belief Mr. Fellows is an Episcopalian. He came to Chicago in 1874, and studied law in the office of his brother, Eugene J. Fellows, being admitted to the Bar in 1880. Mr. Fellows was entered into a co-partnership with his brother, which continued until the latter was elected to the XI.11d General Court, in 1883. Since then he has been engaged in general practice alone. Mr. Fellows has figured rather prominently in politics, coming out during the Bisnach gubernatorial campaign of 1884. He was made chairman of the Third Ward Democratic Club, which position he now holds. As a lawyer he is very pugnacious, as well as tenacious, never giving up until he finds himself thoroughly defeated, when he submits with a good grace.

William Harrie Shieland was born at Troy, N. Y., on July 4, 1831. Before reaching his majority he had acquired an academic education, travelled extensively in North and South America, and located in California, where he became connected with the United States mint, and commenced to read law with General Oscar Hugh LaGrange, of San Francisco, formerly a prominent cavalry officer of Wisconsin. After his transfer to Washington he was in government employment, and subsequently took a course in civil engineering at Rensselaer Polytechnic Institute, at Troy, N. Y. There, resuming his law studies with Martin B. Townsend, of the United States District Court, he was admitted to the bar of New York in 1854 and to the Supreme Court of the United States in 1857. Mr. Shieland removed to Chicago in 1858, and was briefly connected with Emery A. Storr, and in 1856 formed a partnership with W. C. Avery. On the dissolution of the latter firm, in December, 1853, he has been alone and engaged in a general practice of the law.

Lawrence M. Ennis, eldest son of James and Mary A. (Sexton) Ennis, was born in Chicago, on November 5, 1859. He was educated in the grammar and high schools of the city, to which was added instruction in the languages under private tutors. He then entered the office of his father as a law student, where he remained until his father’s death, on November 2, 1880, when Mr. Ennis had barely attained his majority. He immediately formed a co-partnership with F. W. Walker, but a few years his senior, under the firm name of Ennis & Walker, and the firm immediately took charge of the large practice which the father had left, much of it being
among Germans, whose language Mr. Ennis speaks with fluency. At the time of his father's death he had not yet been admitted to practice. On November 16, 1880, he made his application and was examined before the Appellate Court, where the judges, in consideration of the necessities for his immediate admission, granted him permission to practice until the convening of the Supreme Court, January 12, 1881, at which time he was formally admitted as a member of the Illinois Bar. Mr. Ennis was successful in retaining his father's faith at that time through an appeal to his knowledge of the law, and was permitted to practice.

The court held:

"The Supreme Court, having power to grant a license to practice law, has an inherent right to see that the license is not abused." A license is granted on the implied understanding that the party receiving it shall, in all things, demean himself in a proper and decent manner, and abstain from such practices as can not fail to bring discredit upon himself and the courts.

"When an attorney publishes advertisements without any signature, representing that he can procure divorces for causes not warranted by the law, and with the intention of gaining the confidence of the people, and thereby tempting some to submit to the residence of the parties, and, by such advertisements, solicits business of that character by communication through a particular post-office by its name, such conduct is a libel on the court and a disgrace to the attorney, and is calculated to bring reproach upon the profession."

The court concluded by saying:

"We are satisfied that the defendant has disgraced the profession of the law and his position as one of its ministers, and that he ought to be, and he is from this time forth, one name will be stricken from the roll of attorneys of this court."

In the case of the People, etc., vs. Samuel Appleton (105 Ill.), the court decided:

"Although the general rule is, that an attorney-at-law will not be disbarred for misconduct not in his professional capacity, but as an individual, there are cases forming an exception, where the misconduct, in his professional capacity, may be of so gross a character as to require his disbarment."

The title was discharged in this case.

John Le Taylor was born at Carbondale, Luzerne Co., Penn., on August 24, 1884. He is of Irish parentage, being a descendant of George Tann's, of Belle Plains. After his father's death, he was brought up by Mr. Henry S. Wilcox, of Union, Ill., who was admitted to the Illinois Bar in 1867. When he was about twelve years of age, he lived about the mines of Luzerne County, when he went, with Dr. II. I. Res, to Millville, Carroll Co., Ill. In the summer of 1860, he removed to Iowa, where he was admitted to the Bar. He served in the 1st Iowa Volunteer Cavalry, entering the service August 24, 1861. He was wounded and captured at Kielin, Miss., on August 26, 1862, but escaped the following night. He was also severely wounded in a cavalry charge near West Point, Miss. In April, 1864, he was detailed from the regiment to the headquarters of the Sixteenth Army Corps, General S. A. Hurlbut commanding, and stationed at Memph. Tenn.; afterward he was with General C. C. Washburn, commanding the district of West Tennessee; and was mustered out of service October 3, 1864, at Davenport, Iowa, after having served for three years and three months.

Mr. Taylor participated in nearly all the battles and skirmishes in which his regiment was engaged, numbering some twenty or thirty, among which were New Madrid, Island No. 10, the cavalry charge at Farmington, battle of Booneville (which made Sheridan his first star), and at Kielin, Miss., the battle-line of the 12th Missouri Artillery against the Missouri and the St. Louis and Recessors at the battle of Corinth, October 4, 1862, and was an eye-witness to the charge of Colonel Rogers, of Texas, on Fort Robbette. He was in the raid from Memphis, Tenn., to West Point, Miss., was wounded at Chickamauga, 1863, and at West Point. He was in Memphis when Forrest made his raid into that city in August, 1864, and fought a squad of Forrest's men at corner of Union and Main streets, and again, on the retreat, at the 7th Wisconsin Battery camp, capturing one of the enemy. He declined promotion as a commissioned officer in two different colored regiments. He ended his military career as captain of Co. A, 4th Mounted Rifles, a frontier organization. Early in the fall of 1865, he commenced the study of law, which he continued irregularly for several years. He was admitted to the Bar, in February, 1874, at Vermillion, Dak., where he had lived five years. He became prominent in politics in Dakota, being prosecuting attorney of Clay County and deputy United States marshal. He was chairman of the Republican Central Committee of Dakota two years, and a delegate to the National Union Convention at Philadelphia, in 1866, and to the National Convention which nominated Abraham Lincoln. Judge Hill was named for his patent was large in patents. Hill & Ellsworth dissolved in 1878, and Judge Hill continued until in May, 1881, when he formed a partnership with T. S. E. Dixon, of Chicago, under the firm name of Hill & Dixon. Judge Hill has held several important positions, being register in bankruptcy of the Eighth Judicial District of Virginia from 1867 to 1869, when he was appointed judge of that district, to fill an unexpired term, which office he held until 1870. He was chairman of the Republican State Central Committee of Virginia two years, and a delegate to the National Union Convention at Philadelphia, in 1866, and to the National Convention which nominated Abraham Lincoln. Judge Hill was named for his patent was large in patents. Hill & Ellsworth dissolved in 1878, and Judge Hill continued until in May, 1881, when he formed a partnership with T. S. E. Dixon, of Chicago, under the firm name of Hill & Dixon. Judge Hill has held several important positions, being register in bankruptcy of the Eighth Judicial District of Virginia from 1867 to 1869, when he was appointed judge of that district, to fill an unexpired term, which office he held until 1870. He was chairman of the Republican State Central Committee of Virginia two years, and a delegate to the National Union Convention at Philadelphia, in 1866, and to the National Convention which nominated Abraham Lincoln.

Disbarment of an Attorney.—An information was filed in the Supreme Court, by three members of the Chicago Bar, in 1875, against Alphonso Goodrich, charging that he had been guilty of improper conduct, in causing false and fraudulent advertisements to be inserted in the newspapers, inviting divorce business. The following are specimens of said advertisements. They were published anonymously, but admitted in the defendant's answer.

"Divorces legally obtained, without publicity and at small expense. Address P. O. Box 1037, The owner has obtained 577 divorces during the last seven years."

"Divorces legally obtained for incompatibility. Residence unnecessary. Fee due after decree. Address P. O. Box 1037."
Ohio and lived with his grandfather, Daniel Morse, who then resided on the Western Reserve, where he remained five years. His father having married Adaline Howell, an old school-mate of his mother, William accompanied his father's family to Quincy, Ill., in 1851, when he was ten years old. He attended the public schools of that city, and receiving a scientific and classical course at the academy of Sonle & Hyatt, famous for its educational advantages, during the War. He always stood at the head of his class, and took high rank as a debater and orator. He spent four years in the Merchants' and Farmers' National Bank, at Quincy, under President Lorenzo Bull, obtaining an excellent training in financial matters. On March 4, 1859, he came to Chicago, and engaged in the insurance business, in which he continued until June 1, 1879. He then began the study of the law in the office of Emery A. Storrs, being admitted to the Bar by the Appellate Court of the first division of that State in that year, and was one of its most successful practitioners. He immediately began practice in the office of Mr. Storrs, doing a prosperous business up to August 1, 1855, when he entered into a partnership with that gentleman. Among the cases in which Mr. Elliott's ability has shown conspicuously may be mentioned that of Matthew H. Escott, an insolvent debtor who had been imprisoned over two years under the insolvent debtor's act. It was generally held that he was hopelessly imprisoned for life; but Mr. Elliott took this case and persevered until he discovered technical defects in the proceedings by which he had been committed, which resulted in his discharge. He is a Republican, and has been intimately identified with all the campaigns of that party since the nomination of President Garfield in 1880. He was a prominent candidate for the office of State's attorney before the Cook County Republican Convention in the fall of 1884. He is a member of the Young Commercial Republican Club of Chicago, of the Young Republican Club of Chicago, of the Cook County Central Republican Club, of the Twelfth Ward Central Republican Club, and of the Seventh Precinct Republican Club. He is a member of Garfield Lodge, No. 656, A.F. & A.M.; Orator of Garden City Council, No. 202, Royal Arcanum; a member of Archon Council, No. 21, Royal High Priest; and of the Grand Lodge A. & L. No. 66, National Union. Mr. Elliott has a wonderfully retentive memory, and possesses the power of analysis in a high degree. He conducts his business in accordance with the highest standard of professional ethics. He is a logical reasoner and illustrates his discourses with similes, metaphors and antitheses in rich and varied profusion.

The Circuit and Superior Courts the Same.

The question of the identity of these courts was raised in the case of Jones vs. Albee (70 Ill.). The Supreme Court held:

"The intention of the Constitution of 1870 is, to give the several judges of the Circuit and Superior Courts of Cook County identically the same powers, and place them on the same footing of Circuit Courts, but composed of branches corresponding with the number of judges, each judge, while holding such branch, to have all the powers of the Circuit Court. It does not require a majority of the judges of either of said courts to sit together, but each may hold court by himself."

In the case of Hall vs. Hamilton (74 Ill.), it was held:

"It is error for more than one judge to preside at the same time during the trial of any case, or to participate in any decision. The record should show that but one judge presided."

In a still later case (112 Ill.), it was held:

The Superior Court of Cook County being, in law, a Circuit Court, it is not within the province of this court to infer on the Circuit Court, the Superior Court will, by the same act, though not named, acquire a like jurisdiction, and vice versa.

William C. Asay, son of Edward G. and Emma (Oliver) Asay, was born at Chicago, in 1817. After attending school at Lakeville, he went to Yale College, where he prepared for college; entering Yale College upon his return, from whence he graduated in 1850. He then attended the Law School at Chicago, and in 1851, was admitted to the Bar, undergoing his examination before the Appellate Court of this State. He commenced the practice of law in Chicago with his father. In 1859, he went to Europe and related to his son the care of his large practice during his absence. This duty was performed to the satisfaction of his father and the clients whose interests he had protected; during this period he prepared the briefs for a number of very important litigations. So thoroughly satisfied

Mr. Asay was a lawyer of marked ability, and in the capacity of counsel for a large number of eminent clients, he has been more than generally successful. His practice is extensive and successful, and has always been conducted with the highest degree of integrity and professional ethics. He is a man of marked ability, and his success in this practice is due to his great industry, energy and perseverance. His ability is of a marked character, and his success in this practice is due to his great industry, energy and perseverance. His ability is of a marked character, and his success in this practice is due to his great industry, energy and perseverance. His ability is of a marked character, and his success in this practice is due to his great industry, energy and perseverance.
HENRY J. FISHER was born on March 27, 1847, at Point Pleasant, W. Va. His father (Henry J. Fisher, deceased) was one of the oldest lawyers of that portion of the State, served in the Legislature, and was otherwise prominent in State affairs. Mr. Fisher graduated from the military school at Lexington, studied law with his father for two years, and, in 1863, was admitted to practice in the State courts. For the succeeding three years he practiced in West Virginia. After spending some time in Kansas, Texas, Arkansas and Minnesota, he removed to Cincinnati, Ohio, where he remained until 1884. During that year he came to Chicago and established himself as a lawyer whose specialty from the first has been corporation law and the management of will contests. He is a stalwart republican, and took an active part in the last presidential campaign. Mr. Fisher is a member of the Law Institute; also is a member of Ashlar Lodge, No. 308, A.F. & A.M., corporate limits, is not a tax in the Constitutional sense of that term.

RUFUS NAPOLEON RHODES, son of Rufus R. and Martha F. Rhodes, was born at Pascagoula, Miss., on June 15, 1826. When thirteen years of age he was sent to the preparatory school of Dr. J. B. Shearer, at Custer Springs, Halifax, Va.; but before his course was finished, Dr. Shearer was elected president of the Southwestern Presbyterian University at Clarksville, Tenn., where Mr. Rhodes followed him, graduating in 1843. The next year he was appointed assistant treasurer of the Mississippi levee Board, with headquarters at Greenville, Miss., where he remained nearly one year. He then began the study of law with Senator James E. Bailey, of Clarksville, Tenn., and served as his private secretary at Washington in 1876-77. In 1877, he was elected city attorney of Clarksville, to which office he was successively re-elected five times;

LaFayette Chapter No. 1, R.A.M.; and St. Bernard Commandery, No. 35, K. T. He was married on June 27, 1875, to Maria Proctor, of West Virginia.

The Constitutional Power to License.—This question was raised in the cases of Braun et al. vs. The City of Chicago (110 Ill.). The Supreme Court held:

"The Legislature is fully authorized by the Constitution to confer power, by general law, upon incorporated cities to demand and collect a license-fee or tax of all persons who shall pursue the business or calling of brokers within their limits, and to prohibit, within such limits, the business of a money-changer or broker, broker or commission merchant, including that of merchandise, produce or grain broker, real-estate broker, and insurance broker, without license therefor: and such a provision in the charter of a city, and an ordinance in pursuance thereof, are not in conflict with any Constitutional provision.

"A license-fee imposed by a city or village, in pursuance of power conferred by the Legislature for that purpose, upon certain avocations, trades, business, or occupations, carried on within the and, in 1880, was elected by the State-debt-paying democrats to the General Assembly of Tennessee. In the latter part of 1857, he moved to Chicago and resumed his legal practice, associating himself with Hon. Frederick H. Winston, now Minister to Persia, in February, 1884. Mr. Rhodes comes from a prominent Southern family. His grandfather, Thomas Rhodes, once owned nearly every vessel on the Alabama River, and his father was a lawyer of distinguished talents at the New Orleans Bar, who, prior to the War, was a member of the Court of Appeals. All of the members of his mother's family were wealthy ship-owners. Mr. Rhodes was married on June 27, 1854, to Miss Margaret Dabney Smith, a relative of the prominent Dabney family of Virginia.

WIRT DEXTER WALKER, son of James M. and Ella M. Walker, was born at Chicago, on September 1, 1860. His parents formerly resided at Ann Arbor, Mich., and removed to this city about 1852. Hon. James M. Walker was a prominent member of the Bar during the earliest history of this city, and until his death stood in the foremost rank of able lawyers. W. D. Walker received his elementary education under private tutors, and at the age of sixteen entered Yale College, whence he graduated in 1880, taking a classical diploma. Immediately after his graduation he returned to this

VIEW OF ONTARIO AND RUSH STREETS.
city and entered the law office of Witt Dexter, the prominent advocate and counselor, remaining with him as a student three years, when, after a successful examination, he was granted a certificate to practice law. Mr. Walker confines himself to civil practice.

POWER OF THE CITY TO LICENSE PACKING-HOUSES.

The location of so many packing-houses, tallow-chandlery, bone and soap factories, and tanneries, within the city limits and adjacent thereto, had become a matter of serious investigation by the Board of Health and others. That these establishments were noxious to the health and comfort of the citizen was evident from experience and observation. The question arose as to how they could be regulated and controlled. In 1874, City Attorney R. S. Tuthill drew up an ordinance to cover the case, which was adopted by the City Council.

It provided for the licensing of these establishments, fixing the sum to be paid therefor at one hundred dollars. It also empowered the Mayor to revoke any license on conviction of any one for a breach of the ordinance. Of course, such an ordinance provoked profound opposition, and many good lawyers thought it would not stand the test of examination by the Supreme Court. A case soon arose,—the Chicago Packing and Provision Company vs. The City. The facts were agreed upon, and the ordinance was sustained by the court below. On appeal to the Supreme Court, where it was urged that the city had no power to pass the ordinance, that Court decided "That the law giving cities the power to direct the location and regulate the management and construction of packing houses, etc., conferred the power to license such establishments, as one means of regulating the same." The results of this ordinance have been as important as beneficial to the health of the city.

CALVIN CATE MARSH, attorney and counselor at law, one of the most successful members of the Chicago Bar, is the son of Reed C. and Mary Marsh, and was born at Londonderry, N. H., on April 30, 1846. At the age of eighteen, he attended the public schools and assisted his father in farming. His parents, meanwhile, coming to this State, and settling at Dixon, in 1855, he became a student of the Dixon Seminary, graduating with honors, from that excellent institution in the class of 1863. Becoming interested in law, and possessing natural qualifications for that profession, he read for some time with Hon. J. K. Edsall, of Dixon, State attorney-general, and entered the law department of the Michigan University, at Ann Arbor, acquiring himself a standing in the class of 1870. Locating at Rockeillo, Ill., he engaged in active practice of his profession during the succeeding three years, then formed a partnership with M. D. Hlawsey. In 1884, he removed to this city, where he has since been engaged in general practice. Mr. Marsh is a successful advocate and a prudent counselor, and devotes his entire attention to a lucrative clientage.

Hiram Bigelow, attorney and counselor at law, is the son of Joel and Mary A. Bigelow, and was born at Whitby, Ontario, Canada, on January 28, 1865. When he was five years of age, his parents removed to Milwaukee, where they remained until 1867, and then came to Chicago. After passing through the public schools, he attended the High School, and from there entered the University of Chicago, and graduated from the College of Law in 1892, he entered the Union Law School, from which he graduated, with honors, in the class of 1874, and was admitted to practice. Mr. Bigelow's natural legal talents, together with a thorough and conscientious preparation for his profession, have already seemed him a prominent man in the Chicago Bar. Reliable as a counselor and a ready advocate, he has met with enviable success as one of the younger members of the legal fraternity, and his position as a leading lawyer is more than assured.

George Washington Northrup, Jr., attorney and counselor at law, is the son of George W. and Mary A. Northrup, and was born at Rochester, N. Y., on January 29, 1861. The father has all his life been identified with educational institutions, and now occupies the president's chair of the Morgan Park Theological Seminary. In 1867, the family came to the West, and took up residence here. Young Northrup received his early education, subsequently entering the Rochester (N. Y.) University, from which he graduated in the class of 1881, with high honors. Immediately after his graduation, he was appointed a member of the Board of Administration of the Morgan Park Military Academy, which he filled one year, and afterward turned his attention to the study of law in the office of Grant & Redford. In 1884, he was admitted to the Bar after a rigid examination before the Appellate Court here, with the highest degree in a class of thirty. Mr. Northrup, although one of the youngest members of the Bar, is a thoroughly educated lawyer, and has won conspicuous clientage through his success as an advocate and counselor.

Cuthbert Ward Laing was born at Newcastle, on the borders of Scotland, on June 23, 1845. His father, David N. Laing, was then a prominent iron manufacturer, of the firm of Laing & Gardner. Mr. Laing, sr., served his apprenticeship in the same shop and at the same bench with Robert Stephenson, son of the famous inventor of locomotives, and assisted in producing the castings for the first engine, which was completed in 1821. Cuthbert was the second son of a family of six children, four of whom are living. After the panic of 1847, the Laing family emigrated to Flatbush, Long Island, and afterward to Buffalo, N. Y., where Cathart graduated from the nearby high school and studied civil engineering with General William Sooy Smith, now of Chicago. In Detroit he also pursued a course of study, his father leaving him there, and going with his family to the Northern Michigan Lake. There, in Lapeer, in 1861, on the 4th of July, with his bride, he was married. They went to reside, having celebrated their golden wedding in September, 1882. The elder Mr. Laing started the extensive Boomer Iron Works in Chicago. He is the owner of several farms in Michigan. Cuthbert Laing was graduated at the Michigan Military Institute, in the class of 1861, and in the following October became second lieutenant. After the battle of Shiloh he was made first lieutenant, being the only officer of his command killed or captured. Of his battery of six guns; four were captured on the afternoon of the fight, on April 6, 1862, and Lieutenant Laing was ordered to another part of the field with his section, where he lost a number of horses, thus compelling him to spike one of his guns, and leave it on the field; but soon after he rallied his men, and brought it off by hand. He was afterward commissioned captain of a new battery, but not mustered. Subsequently, he became adjutant of the 14th Illinois Infantry, (Governor Palmer's own); and afterward engaged in business as an architect. He was subsequently admitted to the Bar, and has been for some time a practicing attorney in this city. In 1863-64, Colonel Laing served as adjutant of the 1st Regiment, I. N. and G., and from that time until 1884, as lieutenant-colonel and assistant adjutant-general of the 1st Brigade, I. N. G. He also holds the position of adjutant-general for the State of the Uniform Rank of the Knights of Pythias. Colonel Laing is a Mason in good standing, being a member of Detroit Lodge, No. 2, A. F. & A. M., and Lafayette Chapter, No. 2, R. A. M. In 1874, he was married to Clara Irene, daughter of the late Isaac C. Day, many years a leading wholesale merchant of Chicago. She died in August, 1876, leaving one child,—Clara Irene.

John Bliss Porter, attorney and counselor at law, is the son of John B. and Mary S. Porter, and was born at St. Augustine, Florida, on September 27, 1857. His father was a surgeon of the regular army. After having received his rudimentary education, he was fitted for college in the Williston Seminary, East Hampton, Conn. In 1875, he entered the University of Chicago, and graduated, taking his degree of B. A., with the class of 1880. His degree was conferred upon him as a profession, and, shortly after finishing his collegiate course, attended lectures in the law department of the Alma Mater, and took his degree of LL. B. in 1882, with the University of Connecticut Bar. During the following year he came West, and entered the office of E. G. Asay, and has since been engaged in general practice, giving special attention to the law relating to real estate.

LAW AND ORDER.

The Citizens' Law and Order League is a new thing in the world of reform. It originated in Chicago, and has spread throughout the country; has attained a
national organization, and has attracted attention in other parts of the world. The president of the National League is now Charles C. Bonney, who has long been known as one of the most celebrated members of the Chicago Bar, and a writer on political and legal subjects of wide reputation, and from whose published addresses and official reports of the local and national organizations has been compiled the following brief historic sketch of the Law and Order movement.

The object of this organization is the enforcement of the existing laws, particularly those enacted for the restriction of the liquor-traffic, and especially those which forbid the sale of intoxicants to children and youths. The supreme purpose of the Law and Order movement is the preservation of the rising generation from habits of dissipation and vice. Protect the young, and the State will endure. This new crusade is against those who violate the laws. It teaches respect for the constituted authorities, a reverence for the sacred principle of human government, and the duty of all who receive the protection of the laws to uphold and enforce their requirements. It leaves the propriety of the laws to the people whose representatives enact them, and insists that, while a statute intended to suppress an evil or advance a remedy is in force, it shall be obeyed. It seeks neither truce nor compromise, but demands only obedience to the laws. The only terms which Law and Order organizations offer to law-breakers are "unconditional surrender," and they "move immediately upon the enemy's works." The League is not vindictive; it seeks no revenge, but it insists upon submission to the laws.

The Law and Order movement originated in Chicago in 1877. During the railroad riots which, in that year, startled and alarmed the country, Frederick F. Elmendorf and Andrew Paxton observed that a large proportion of the rioters were half-drunk boys. Subsequent observations, carefully conducted, showed that an army of such boys, estimated to number thirty thousand, were habitual patrons of the liquor-saloons of Chicago, and were undergoing a rapid transformation into drunkards, vagrants, paupers, lunatics, and criminals. Those men gathered a handful of friends, and earnestly sought a remedy. They were led to the creation of a new agency for the repression of the worst evils of intemperance. On November 25, 1877, the "Citizens' League of Chicago for the Suppression of the Sale of Liquor to Minors" was organized. This is the parent organization of the new movement. Mr. Elmendorf was elected president, and Mr. Paxton appointed prosecuting agent. The president raised the funds; the agent prosecuted the cases.

The methods of operation were simple. Mr. Paxton, and sometimes others, visited the dram-shops in a regular order, and whenever a minor was found drinking in a saloon a complaint was made before a magistrate and a prosecution instituted. Obstacles were encountered, but they were speedily overcome; and soon the penalty of fine or imprisonment followed the complaint so swiftly, that the then three thousand liquor-saloons of Chicago practically surrendered, and have ever since acknowledged the power of the Citizens' League. It is believed that fully five-sixths of the sale of liquors to minors has been effectually suppressed. The extraordinary success of the new crusade led people to wonder if it had not been thought of before. It has had from the beginning, the warm support of the pulpit and the press. Its meetings have generally been held in churches and on Sunday evenings. The newspapers, almost without exception, have commended the work and published its progress.

Such a movement could not long remain merely local. It soon extended to other States, and attained a National organization in Tremont Temple, Boston, on February 22, 1883, through a convention of delegates from eight States, and took the name of "The Citizens' Law and Order League of the United States." The second annual meeting was held at Lake Iliff, near Chicago, on August 28-29, 1884, and the third in New York City, on February 23, 1885:

The spread of the movement has been so rapid and so spontaneous, and without direct aid from the original or the National organization, that exact statistics are not accessible; but the secretary reported at the second annual convention, that, from all the information he had been able to obtain, he felt warranted in stating that there were then probably not less than five hundred Law and Order Leagues in the United States, with a membership of at least sixty thousand persons.

Inquiries for information of the movement, which such extraordinary successes have achieved, have come from several foreign countries, including England, the Sandwich Islands, and the Cape of Good Hope. It was the belief of Mr. Elmendorf, that the Law and Order movement would finally become not only national, but also international; and the signs of the times indicate that his faith will yet be verified.

The anniversary of the birthday of Washington has been adopted as the annual Law and Order day.

In an address setting forth the nature and principles of this reform, Mr. Bowey said:

"While the present work of the Law and Order movement is concentrated on the single point of enforcing the laws for the regulation and restraint of the liquor-traffic, and especially the preservation of the youth of the country from the evils it engenders, the vital principle of the movement is as broad as the domain of government, and is essential to the endurance of constitutional liberty. That vital principle is the supremacy of the laws. Liberty must be obedient to the laws that self-government enacts, or liberty itself will degenerate into anarchy, and perish. It is generally admitted that the laws for the restriction of the liquor-traffic are the most difficult of enforcement. If they can be enforced, any others which public opinion approves can be carried into effect. The Law and Order movement is manifestly entitled to the support of all good citizens, unless it can be shown that those engaged in the liquor-traffic are entitled to a special indulgence to disobey the laws. All other classes are required to yield obedience to the requirements of the law-making power, and the last persons who should ask to be made an exception to that rule are the saloon-keepers and liquor-dealers."

The organization of the National Law and Order League, for 1885, is as follows:

The following are the officers of the Chicago Citizens' League for 1885:

THE ILLINOIS STATE BAR ASSOCIATION.

This society was organized at Springfield, January 4, 1877, and the Chicago Bar has always taken a leading part in its proceedings. It is not within the province of this work even to enumerate all the valuable contributions of Chicago lawyers to the proceedings of the State Association, but some of the more important may be named. They include addresses, essays and reports by E. B. Sherman, J. B. Bradwell, C. C. Bonney, M. W. Fuller, H. F. Vallette, F. H. Kales, T. Lyle Dickey, J. K. Edsall, Isaac N. Arnold, John A. Jameson, J. B. Leake, Thomas Dent, G. W. Cothran, and Van Buren Denslow.

On the death of Hon. O. H. Browning, in 1881, Mr. Sherman, who was then vice-president for the Seventh Judicial District, became president of the Association, and served until the close of the term. At the annual meeting in January, 1882, C. C. Bonney was elected president for the ensuing year. David Davis, whose interests and judicial services in Chicago, make him, in a certain sense, a Chicago man, was president of the Association in 1883.

Its work has been of a highly practical nature, embracing such topics as criminal-law reform, the legal education of lawyers and the people, the prevention of
needless expense and delay in litigation, bankruptcy legislation, the regulation of corporations, and other subjects of general importance.

THE AMERICAN BAR ASSOCIATION.

This organization, which embraces a large number of the most distinguished lawyers of the United States, was organized at Saratoga, New York, on August 21, 1878. It has held an annual meeting in the same month of each succeeding year.

Chicago has taken so prominent a part in the proceedings of this Association, that some mention of what it has done in that connection is due in the present history. Chicago has been represented in the vice-presidency by C. C. Bonney and E. B. Sherman; in the executive committee by C. C. Bonney; in the general council by Thomas Hoyne, E. B. Sherman, and James K. Edsall; in the State council by Lyman Trumbull, B. F. Ayer, R. Biddle Roberts, Isaac N. Arnold, and Richard S. Tuthill; and in the proceedings of the Association by Mr. Sherman’s resolution, calling for legislation discriminating between professional and non-habitual criminals, and a speech on the proposal of a National Appellate Court; and Mr. Bonney’s speeches on the same subject, and on “Judicial Supremacy,” “Defective and Slip-shod Legislation,” and “The Delay and Uncertainty of Judicial Administration.”

HARBOR AND MARINE.

HARBOR.

The Chicago harbor, since 1833, when the first appropriation was expended in opening a straight outlet from the river into the lake, has gradually been extended to its present splendid proportions. Since 1871, the work of forming an outer harbor has been carried steadily forward. Besides the north and south piers and the new light-house, the improvements include over five miles of substantial breakwater and two pier lights. The work now in progress, when completed, will afford an outer harbor for all vessels seeking the port, and the breakwater a safe protection to all craft driven to the southern end of the lake under stress of weather. The annual appropriations, and expenditures on this work, since 1871, have been—

For 1885, the liabilities exceeded the balance of former appropriations, and no appropriation having been made this year, Congress, on July 5, 1884, made the appropriation of $100,000 to cover the deficiency. The amount expended during the fiscal year ending July 1, 1885, exclusive of the outstanding liabilities of July 1, 1882, was $136,843. On July 1, 1883, the outstanding liabilities were $62,357, and the amount available at this date was $45,651 40. An item of $250,000 for the Chicago harbor was inserted in the river and harbor appropriation for 1885, but it was lost with the other items in that bill.

The engineer officers who have had charge of the harbor improvements since 1871 have been—

Lieutenant F. A. Hinman, assistant to Colonel Houston, October 4, 1872, to December 19, 1873; station, Chicago.

Major G. L. Gillespie, temporarily on duty under orders of Lieutenant-General Sheridan, April 1, 1873, to May 3, 1877; in charge of improvement of Chicago harbor from July 14, 1874, to May 3, 1877; engineer officer, Military Division of the Missouri, from July 16, 1878, to September 28, 1878; station, Chicago.

Major G. J. Lydecker, assistant to Colonel Houston, May 1, 1874, to May 3, 1877; station, Chicago, to April 29, 1875; engineer officer, Military Division of the Missouri, May 3, 1877, to July 16, 1878; in charge of construction of harbor of Chicago, May 3, 1877, to June 19, 1882; station, Chicago.

Major W. H. H. Benyaurd, in charge of construction of harbor of Chicago, June 19, 1882, up to date.

Captain J. F. Gregory, lieutenant-colonel and aide-de-camp, engineer officer, Military Division of the Missouri, from December 27, 1878, to October 29, 1883; station, Chicago.

Major T. H. Handbury, engineer officer, Division of the Missouri, December 15, 1883, to date; temporarily in charge of improvement of Chicago harbor during Major Benyaurd’s leave, on account of sickness, December 4, 1884, to date; station, Chicago.

The light-house keepers since 1871 have been Charles H. Baum, appointed April 9, 1874, resigned in 1875; Antony Aagen, present keeper, appointed June 23, 1875. The first assistant keepers for the same period have been James Peterson, Hans S. Hanson, H. S. Hagens, Charles Klingston, Samuel Hendrickson and S. P. Nelson.

MARINE.

The marine interests of Chicago, at the time of the fire of 1871, were in an extremely flourishing condition, and although the Custom-house records were destroyed, an accurate estimate of the business done that year has been made. This shows 1871 as comparing favorably with all preceding years, as also with those succeeding, there having been, down to 1885, only one year when a larger number of vessels was owned in the district, and two years in which the tonnage has been larger. Navigation opened in 1871 on April 3, the earliest date then known in the history of the port. By December, 12,330 vessels, with 3,096,101 tonnage had arrived, and 12,312, with tonnage of 3,082,235, had cleared; vessels with a sail capacity of 2,406,300 tons, and steam capacity of
In this table, a decrease is shown in the number and tonnage of vessels owned in Chicago in 1884, as compared with 1871, of 278 vessels and 34,454.39 tonnage; although, during the intervening period, there had been built in this district 126 vessels, with a tonnage of 13,025.45. Of these, there were 32 schooners, 23 propellers, 21 steam canal-boats, 27 tug-propellers, twelve tugs, one scow schooner, three steamers, and one sloop-yacht. Whatever increase in the tonnage these additions made to the marine made, was more than offset by the loss of vessels from this port by burning and sinking, of which there were 119 schooners, two propellers, one scow, two tugs, one steam canal-boat, one steamer, one sloop, five barges and five barks, a total of 137 vessels with 27,413.91 tonnage. Following is a record by years of the ships built and lost, with their tonnage:

The largest tonnage represented was in 1873, when ten large schooners were built; and the largest number constructed in one year was in 1882, when ten tug-propellers were built. In 1883, the list of marine disasters exceeded that of any year since 1872, and one steamer and more tug-propellers than had been built in 1882, were wrecked and destroyed, at a loss of $191,000, with an insurance of $129,100. Fifty persons lost their lives by the destruction of the vessels represented.

The dates of the opening of the Straits of Mackinac have been:

1871, April 3; 1872, April 28; 1873, May 1; 1874, April 29; 1875, April 28; 1876, April 25; 1877, April 20; 1878, March 14; 1879, April 23; 1880, April 5; 1881, May 4; 1882, April 5; 1883, April 25; 1884, April 21.

The records of vessels engaged in a foreign trade shows arrivals as follows:

1872, 152; 1873, 182; 1874, 140; 1875, 81; 1876, 117; 1877, 101; 1878, 115; 1879, 233; 1880, 423; 1881, 291; 1882, 154; 1883, 95; 1884, 57.

Clearances for foreign ports have been—

1872, 150; 1873, 197; 1874, 138; 1875, 72; 1876, 40; 1877, 95; 1878, 136; 1879, 228; 1880, 406; 1881, 277; 1882, 185; 1883, 106; 1884, 63.

During the same period, inclusive of 1871, the amount of annual collections from tonnage dues, clearances and enrollment fees, penalties and fines have not increased materially. For 1873 and 1874 the average was $36,005.13 as against $21,051.56 for 1884. The collections for the ten years were—

1875, $27,445.39; 1876, $24,027.36; 1877, $23,681.74; 1878, $29,504.81; 1879, $21,267.79; 1880, $23,025.38; 1881, $34,174.08; 1882, $32,102.28; 1883, $36,628.97; 1884, $21,051.56.

A detailed statement of the marine at the end of 1884 shows, in addition to the figures given in preceding statements and tables, a loss in wrecks and collisions among vessels hailing from this port, of $57,800 for the year, with $13,200 insurance, divided among the following classes: 27 screw steamers, tonnage 7,919.82; 4 paddle steamers, tonnage 137.97; 26 steam canal-boats, tonnage 2,035.60; 4 steam yachts, under five tons, tonnage 5.49; 227 schooners, tonnage 49,765.68; 5 sail yachts, tonnage 13.17. Of the 63 vessels clearing for foreign ports and 57 vessels arriving from foreign ports, during 1884, the tonnage represented was 21,552 and 19,752 respectively.

A table is following showing the arrivals and clearances of vessels at this port, with their tonnage, from 1871 to 1884:

The Chicago Dredging and Dock Company was incorporated in 1877, with a capital stock of $85,000. Charles S. Crane is president, Daniel Booth, vice-president, Frank K. Crane, secretary. William H. Woodbury, treasurer, and Fred Davis, superintendent. The company is made up of several others, Mr. Crane having bore the effects of the plant of the estate in bankruptcy of Fox & Howard, who had been in the business from fifteen to twenty years, and one or two others, combining with him, own into one company, which was incorporated. The company does a general business as contractors, in dredging, building docks, piers and bridges, in the lakes and rivers of the north and west. It owns and operates seven dredging machines, five pile-drivers and three tug boats, with all the machinery necessary for doing their work and carrying out their contracts. It has at all times two hundred men in its employ, and its business often exceeds $500,000 per annum.

Charles S. Crane, president of the Chicago Dredging and Dock Company, was born at Paterson, N. J., on March 21, 1834, and is the son of Timothy R. and Marian (Kyser) Crane. After completing his studies in the schools of his native town, he came
to Chicago, where he has resided since 1843. He engaged in business with his brother in brass manufacturing, under the firm name of R. T. Crane & Brother and the next year they added the manufacture of iron pipes to the business. In 1839, they built and operated a foundry in connection with their other work. In 1860, they moved to Chicago in the manufacture of iron pipes. The name was changed west of Pittsburgh, Pennsylvania, and the same year they erected works for the manufacture of malleable iron. About this time, they organized as a stock company and changed the name to the North-West Malleable Iron Company, which they retained until 1872, when they again changed the name to The Crane Brothers Manufacturing Company, by which title it is still known. In 1871, Mr. Crane, in the organization of the Wright & Ladd Lead Manufacturing Company, and became its vice-president.

In January, 1885, he became its president. He engaged in the dock and dredging business as a general contractor, in 1873, carrying on with his other interests until the present company was incorporated. Mr. Crane was married on September 23, 1857, to Miss Eliza Jane Bevey, of Pittsfield, N. J.; they have two children—Frank R. and Charles B. He is a member of Cleveland Lodge, No. 211, A. F. & A. M.; of Washington Chapter, No. 45, K. A. M.; of Silicon Council, No. 53, R. S. M.; of Chicago Commandery, No. 19, K. T.; and of Oriental Consistory, S. P. R. S. 92. He has taken the ninety-six degrees of the Egyptian Rite of Memphis, and is a member of the Benevolent and Protective Order of the Knights of the Red Cross, of Rome and Constantinople.

**Daniel Booth**, vice-president of the Chicago Dredging and Dock Company, was born at Stafford, York, England, on November 31, 1817. He went to work on a farm when he was twelve years old, and remained there six years, his wages for the first year being one pound and a shilling. After completing his sixth year on the farm, he entered college in the work of the firm as a clerk, and continued in that capacity for fourteen years. He then commenced taking sub-contracts. In 1841, he went to France, where he worked on a sub-contract about two years, under Mr. Brassey, one of the most noted and successful contractors in the world. In 1843, he came to Chicago, and soon afterward purchased a farm of eighty acres in Jefferson township, about nine miles from Chicago, for $2.50 per acre; which he still owns, having added to it, until he has now over four hundred acres, finely improved. He made his connection with the Illinois Central Railroad, in 1846, and is now a director of the firm. In 1853, he was elected president of the Chicago Dredging and Dock Company, which position he still holds. He took an active part in the organization of the C. O. D. Live Stock Company of Montana, in 1853, which has a capital stock of $100,000, and he is one of its directors. He was a political officer of the town of Jefferson for over forty years, holding every office, with the exception of that of collector and constable. He was supervisor of that town when Levi D. Boone was mayor of Chicago, and served for twenty-eight years as justice of the peace, his last term in 1885.

In August, 1845, he married Henrietta Chappl, of Yorkshire, England, at Le Havre, France. They have five children—Josephine, Richard, Daniel, Henrietta, Theresa, Mary, James and Charles.

**Fred Davis**, superintendent of the Chicago Dredging and Dock Company, was born at Gorham, Maine, on July 14, 1830, and is the son of Josiah and Eunice (Frost) Davis. He is a civil engineer. In 1854, he went to New York City and was employed in the shipping trade for some time, both in the interests of others and on his own account. He came to Chicago in 1867, and formed a partnership with J. T. Hayden, under the firm name of J. T. Hayden & Co. They did a general contracting and dredging business on the lakes and rivers, with offices at Chicago and Buffalo. In 1878, the firm was changed to Hayden, Carlin & Company, and continued until 1875, when they sold out the entire interest. Soon after, Mr. Davis went to Rome, where he was employed in the manufacture of iron. In 1884, he returned to Chicago and accepted the position of superintendent and manager of the Chicago Dredging and Dock Company, which position he has now occupied for several years.

**Frank R. Crane**, secretary of the Chicago Dredging and Dock Company, is the son of Charles S. and Eliza Jane (Bevey) Crane, and was born on May 26, 1862. He received his education in the public schools of Chicago, and is a member of the Board of Education of Chicago. In 1882, he commenced work for the Chicago Dredging and Dock Company, and in 1884, was elected secretary thereof.

**W. H. Ammon**, treasurer of the Chicago Dredging and Dock Company, was born at Chicago, Ill., on January 22, 1832, and is the son of Luther and Catharine M. (Harbach) Woodbury. In 1850, he went to Sutton, Mass., where he remained about four years, when he came to Chicago and engaged in the grocery trade on his own account.
JOHN EUSTICE EARLE, the general western manager of the Anchor ocean steamship line, is the single agent in Chicago who signed all of the important contracts for British ports, and has acted in that capacity since May 1, 1876. He was born while his parents, Thomas and Hennricia Earle, were en route from France to England on a pleasure tour, on February 28, 1825, at the town of Jersey in the British Channel, and he continued his early education at his ancestral home at Gloucester, later completing his studies at Worcester and Bristol. He came to New York in 1864, the ensuing year engaging with Austin, Baldwin & Co., and at the expiration of his first contract at Wash Irving Street, and more recently at No. 48 Clark Street. Mr. Earle was severely injured in the terrible railroad accident which occurred at Ashtabula, Ohio, on December 29, 1876, in which lives of many prominent Chicagoans were lost. He was the only passenger in the smoking coach who was not killed, and for a time was himself reported dead, being compelled to remain near the scene of his injuries for sixteen days in a critical condition. The line he represents, which, rendered homeless by the great fire, was selling tickets in an up-town basement in 1871, has had an extraordinary progress under his management. Mr. Earle was married on June 1, 1868, and has three children; Myra Mary, Hess Kate and Thomas Eustace.

ALFRED MORTENSON was appointed general western agent of the Thingvalla ocean steamship line, in 1851. At that time the company owned one steamer and, although a direct line between Seattle and San Francisco was its only one, a substantial competence was maintained. From that date, the success of the Thingvalla line was almost phenomenal. Five new steamers were built in four years, and the Chicago agency, in 1854, sent by that route no less than five thousand passengers, and a large number of goods. Mr. Mortensson was among the first to make a railroad excursion, sending ten parties to Europe in three years, in one instance six hundred and eleven passengers sailing in one steamer. In 1855 an express train was opened between Chicago and St. Paul, which, in 1855, was rewarded by the general agency of the Compagnie Generale Transatlantique, was characteristic of his previous busy career. He was born near Copenhagen, Denmark, in April, 1813, and is the son of Mr. and Mrs. Mortensson. Having received an education at his native place, he left home at the age of seventeen and came to America. His first employment was as a laborer under General John and Daniel Cushman, railroad contractors, then engaged in the construction of the Philadelphia and Erie line in a short time he was made foreman, and directed the building of the road from Lock haven to Corry, Penn. At its completion, he accompanied the contractor to the Far West, and superintended the construction of the Union Pacific from its inception, in 1864, to the laying of the last rail three years later. He came to Chicago in 1867, engaging in a general steamship and railroad ticket business. In 1868 he dissolved the business and purchased the Exchange Hotel, and other small hotels, near the great emigrant center in North Chicago, which, combined with his present place of business, he now owns. Mr. Mortensson is engaged exclusively in the steamship agency business, controlling the western district of the line, and has his offices at No. 120 Kinzie and No. 101 Clark Street. He was married in 1852, to Miss Anna Rothman, and has one child, a son, ten years of age. Mr. Mortensson resides at Lake View, where he recently purchased the residence of ex-Postmaster Palmer for $30,000.

ANTON BOERNER, general western agent of the Royal Netherlands Mail Line (Rotterdam Line), was born in Eastern Prussia, on April 4, 1848. His father and mother, Peter and Magdalena Boerners, were landowners in his native town, where he received an education under private tutelage for the purpose of entering the theological profession; but, after having devoted great attention to the study in that direction, changed his mind and went into the mercantile business. From 1868 to 1871, he devoted his time to the legal profession, and during the last year in that period, filed an application, as secretary, to the University of Kiel, Holstein. Two months before the great fire of 1871, Mr. Boernert arrived in Chicago, and became employed with Consul Hansen and American consulates. He was thus engaged until 1876, when he made a trip to Europe to settle private affairs and inheritances. On returning to this city, he entered into the steamship, banking and real-estate business, at No. 94 LaSalle Street. Five years later, he removed to 119 East Randolph Street, where he became city passenger agent for the Anchor, Star and American Steamship lines, which position he abandoned in 1884, when he assumed the General Western Agency of the Amsterdam Line, which position he held until two years before the last great fire, with the Royal Netherlands Mail Line (Rotterdam Line). He was also agent general of the Trieste-American Steamship Line, plying between New York and the Mediterranean ports, but this line, on account of great opposition and lack of other means, experienced but a short existence. Mr. Boernert was married in July, 1871, to Miss Augusta Hellriegel; they have two children.—Arthur and Mary. Mr. Boernert was a member of several societies, for several years of the Platt-Deutsche Verein von Chicago, and occupies a high social and business position in the community.

NILS ANDERSON, general western agent of the White Star Line, has filled that important position in Chicago since 1885, and is a resident of Chicago for sixteen years anterior to that date. Mr. Anderson is a native of Sweden and was born in the city of Lund, in 1857. He received the rudiments of a thorough practical education in his native city, and afterward went to the railroad schools of the Government, to prepare for a career as a railway official. After his graduation he was appointed bookkeeper in charge of line of service and line, traveling inspector, which position he filled for six years, and then was sent to New York, and for three years was a resident of New York City. In 1869, he came to Chicago and took up a permanent residence here. It was four years later that the White Star Line established its first agency in Chicago. The office of the company was located on Wabash Avenue, and was burned out by the fire of 1871. It was re-established on Market Street, later on Clark Street, then at 120 Randolph Street, and finally was removed to its present location, No. 48 Clark Street, in 1876. When Mr. Anderson first came to Chicago he became identified with the Swedish American, a newspaper published in this city. Soon afterward, in 1869, he went with the inspectors of the Swedish Government Railroad at Flen, near Stockholm, Sweden. Mr. Anderson was married in this city, in 1874, to Miss Emily Glock, a native of Boston, Mass. They have two children, Eva Ellen and Anna Sophia. Mr. Anderson is intimately identified with the social and professional life of the Swedish people in Chicago, and, during 1868-69, was secretary of the Svea Society.

The Dunham Towing & Wrecking Company, was born at Bulston Spa, Saratoga Co., N.Y., on January 1, 1857, and is the son of James and Rebecca (Sears) Dunham. When he was fourteen years old, he began making life as a cook on a vess on the Hudson River. The wages paid for that service in those days were three dollars a month. In 1854, Mr. Dunham, after serving in various capacities, determined to come West. He landed in Chicago, and for the succeeding three years, engaged in the towing business. In 1857, he took the tugs "G. Mosher" and "A.C. Gunnison" from Chicago to New Orleans, La., through the Illinois and Michigan Canal, and down the Mississippi River; the first craft of that description on that made the trip at that time. He ran them in that vicinity until 1861, when the close of the Rebellion began. The Confederates confiscated the "Mosher," which afterwards was instrumental in the capture of the monitors by the United States Navy. The "Gunnison" was taken by the C.S.A. and placed on the block as a "Keyt." In 1862, Dunham returned to the Western River with the "Gunnison," for Mobile, Ala., and was ordered to the coast by the Federal authorities, and, to the great benefit of the Confederacy, removed from the Federal fleet and made over to the C.S.A., and the vessel remained in Mobile until the last day of the war. In 1865, Dunham took possession of the seven tugs of the C.S.A., to which the Federal government was ready to give a million dollars to confiscate. He was sent North, and arrived in Troy, N.Y., in May, 1861. The "Gunnison" was taken over by the C.S.A. The gunboats opposed the Fort Pickens, held by Confederates, at Mobile, Ala. The Federals, after several days of siege, surrendered, and Fort Pickens ordered its stoppage; the order not being obeyed, on the next trip, the first gun fired by Fort Pickens during the Rebel-
THE BOARD OF TRADE.

1872.

This organization, whose measures are watched with interest in every market of the civilized world, is more closely identified with the growth and welfare of the City of Chicago than any other of its many fostering and progressive institutions. Having for its design the management and control of the exchanges and commerce of the city and the Great West, to advertise and disseminate valuable commercial and economic information, and to secure to its members the benefits and privileges of an enlightened and equitable co-operation, it has steadily advanced in the achievement of these objects. Neither the war of 1861, the cholera epidemic of 1866, nor the unparalleled conflagration of 1871, were sufficient to hinder its onward progress, the courage, energy and resources of its members having been equal to every emergency.

On October 11, 1872,—two days after the destruction of the Chamber of Commerce, with its library, trophies and valuable papers,—the directors met and resolved to reconstruct their building on the old site. The first work was done on October 14, while the stone and the brick were yet warm. The first stone in the foundation was laid on November 6, the first brick in the wall on December 6, and the first cut-stone on the 12th. In exactly twelve months, the new building was completed and formally opened, and the Board of Trade installed in one of the finest buildings for commercial purposes in America. At noon of October 9, 1872, the members of the Board of Trade and invited guests, formed in procession, headed by the officers of the Board, at the temporary offices, corner of Franklin and Washington streets, and marched east along Washington Street to the Chamber of Commerce. They were formally received by Daniel A. Jones, and being escorted to the main hall, the following guests, in addition to the officers of the Board of Trade, were seated upon the platform:

Having reviewed the circumstances connected with the re-building of the Chamber of Commerce and the difficulties encountered, Mr. Jones continued:

And now, Mr. President, in fulfilment of our promise made to you last October, nearly one year ago,—that at this time we would have completed for your Board of Trade a finer building and a more beautiful hall than the old one; and while, owing to the advance in the price of material and labor, which has raised the cost above that contemplated at the commencement, we have spared no pains or expense to make it a model commercial building; I, therefore, now give you formal possession of this beautiful hall, and in so doing, permit me to say that I hope that no act of the members of the Board of Trade will have a tendency to clog the great wheel of commerce which are continually rolling in this city, but that every facility will be given to accelerate the trade that naturally seeks this market."

The response of Vice-President Culver, was historical in its character, and therefore is given in full, as follows:

"Mr. President: Unexpectedly called upon as I am by the absence, on account of sickness, of Mr. Preston, the president of the Board of Trade, I shall not attempt a speech, and will say only a few words in response to your remarks.

"The charter granted by the Legislature of our State to the Chamber of Commerce allows your corporation to own real-estate to an unlimited amount, while the charter of the Board of Trade gives our association the right to own real estate of the value not to exceed $200,000—an amount less than the cost of a building such as was desirable and creditable to our city that our association should occupy. For these and other reasons, in the year 1863, an agreement was entered into between the two institutions, by the terms of which the Chamber of Commerce was to erect a building for commercial purposes, and having a hall and rooms for the special accommodation of the Board of Trade.

"For the use of such hall and rooms the Chamber of Commerce was to receive a specified annual rental for the period of ninety-nine years. In case of loss by fire of the building, it was to be restored in as good condition and shape as before damaged or thrown down. In compliance with this agreement a building was erected, and, on the 30th of August, 1863, the Chamber of Commerce gave to the Board of Trade possession of the finest hall used for commercial purposes in the country. The event was celebrated in ways thought fitting for the occasion, and the exercises of the day were participated in by representatives from the different commercial bodies of the United States. For six years or more your corporation
Medill recounted the events of the fire, its results, and the re-building of the city.

The building was handsomely finished and conveniently arranged. The building committee consisted of John L. Hancock, George C. Wright, and Daniel A. Jones. J. C. Crandall was the architect.

The last annual April meeting of the Board was held on the first day of that month, 1871. In the December previous, the rules had been changed so as to make the year of the association correspond with the calendar year. The custom of confining the presidents to one term of office was departed from this year, it being considered advisable to retain the services of the president of 1871, till the completion of the Chamber of Commerce Building. J. W. Preston was accordingly re-elected to that office, and with him Charles E. Culver and William N. Brainard, first and second vice-presidents respectively.

The directors' report exhibits the financial condition of the association for the year as follows:

**RECEIPTS.**
From initiation fees of 141 new members at $100.00 each ........................................ $14,100.00
From annual assessments, 1354 members, at $20.00 each ........................................ $27,080.00
From visitors' tickets ........................................ $2,500.00
From interest ........................................ $2,426.11
From miscellaneous sources ........................................ 3,713.78

Total ........................................ $33,346.89

**DISBURSEMENTS.**
For Chamber of Commerce stock ........................................ $33,346.25
For current expenses ........................................ 20,058.77
For new furniture ........................................ 11,755.25
For expenditure on Commercial Building ........................................ 10,544.00
For miscellaneous expenses ........................................ 5,661.64

Total ........................................ $81,665.91

**Balance on hand.** ........................................ $1,201.02

**CORNERS.**—The first gigantic attempts at wheat and pork cornering were made in 1872, but all were disastrous excepting one, that of William Wilson, who made $200,000 on his deal.

**CHANGES IN RULES.**—In September, an important change was made in the rules of the association, as a result of a conference of committees from the Chicago and Milwaukee Boards of Trade, which was designed to protect both parties to trades against any loss in the event of the failure of either to meet engagements by affording means, which, if availed of, would furnish ample margins. At a meeting of the Board, Mr. Brainard had the following substituted for section 9 of rule 1:

On time contracts, purchasers shall have the right to require of sellers, as security, ten per cent, margins, based upon the contract price, and further security, to the extent of any advance in the market above said price. Sellers shall have the right to require, as security from buyers, ten per cent, margins on the contract price of the property sold, and, in addition, any difference that may exist between the intrinsic value and the price of sale. In case of decline of the intrinsic value of any such property, sellers may from time to time require of buyers additional security to the extent of any such decline. Such security or margins to be deposited with the treasurer of the Association, unless otherwise agreed upon by the parties. In determining the intrinsic value of property
der this rule, its value for shipment to eastern or southern markets, or for manufacturing, shall alone be considered, irrespective of any fictitious price, it may, at the time, be selling for in this market; and in case of a disagreement between the parties as to such value, it shall be decided by the Secretary of the Board, and in his absence, by the President of the Board of Trade, under the control and approbation of the Board of Directors.

ELLI A. BEACH, of the firm of Mead, Beach & Co., grain commission merchants, is a native of Stratford, N. H.; but, in 1842, he went to West with his father's family in 1852, when but ten years old, he received his early schooling at Beloit, Wis.; and afterward, on the removal of the family to Burlington, Grant County, he finished his school work. A few terms at the Beloit College, after leaving school he taught a single winter term to break in a disorderly school, and out of it have grown some of the pleasantest associations of his life. In January, 1864, he came to Chicago and entered the office of David H. Lincoln, the well-known Board of Trade man and former president of the Board, and after an apprenticeship of three years he was taken into partnership, in June, 1867. This proved a profitable business arrangement, but, in 1872, the house dissolved and each of the partners continued in business alone. In May, 1879, a partnership was formed, composed of Eilli A. Beach and Sidney B. Mead, and, later, they took Henry C. Arvey into the company, and thus done a successful business. His father, Lawrence Clinton Beach, came West as early as 1836, and like some others who saw Chicago about that time, would not have stayed in the mud-hole for the world. He, however, remained and thought better things were on the way and helped to erect the first house in Beloit, Wis. His business East requiring his presence there, he started on horseback, by the way of Cairo, Ill., riding the entire distance, as he described it, "the most disagreeable and uncomfortable country under the sun." Then, he went by way of the Ohio River to Pittsburgh, then by stage, river and canal to Philadelphia, and by sea to New Haven, where he was born. There he met and married Miss Lucy A. Brockett, and took her to Stratford, N. H., to reside, where he opened the well-known Beach House, and became known to the travelling public far and wide as Captain Beach. For a number of years he maintained that hotel, and made for it same second to none in the city; it stood upon what was then the great main thoroughfare between Boston and Montreal, and hence had many competitors in the business, but everyone would strive to attract his journeys to reach the beach house. It was one of those old-fashioned inns, whose prototypes in England Dickens loved to write about; and there are numbers of people still living who dwell with delight upon their reminiscences of the Beach House. There Eilli A. Beach was born, on July 9, 1842, as were several other children, but in 1859, the father started with his family for Beloit, Wis., taking New Haven on their way. While there, Mrs. Beach died, and, in 1854, the remainder of the family came West. On both sides, Mr. Beach comes of old Connecticut families who settled in New Haven in a very early day. On October 13, 1868, he married Miss Abbie D. Stillwell, of Providence, R. I., who, dying in January, 1870, was buried with three children by Mr. Beach. Clinton S. On December 17, 1884, he was united in marriage with Miss Hattie A. Peck, also of Providence. Mr. Beach is a member of the Memorial Baptist Church, of which he is also one of the deacons. He has been a member of the bar two years has been. 

MORRIS ROSENBAUM, the head of the cattle and grain commission house of Rosenbaum Brothers, is a native of Schwabach, Bavaria. He came to America in the fall of 1850, when only thirteen years old. His father had preceded the family and settled in Dubuque, Iowa, where he received their arrival on their way. It is a good indication of the excellent character of the schools of Bavaria, as well as of the precocity of the pupil, that Morris had not only the well trained in his own tongue, but had also received a fair English education before leaving his native country. He was therefore already prepared, even at that tender age, to be of great service in shrines, especially fitted to his years. He had found immediate employment in a grocery store as a clerk, where he remained eight years. This was a good practical school and he must have been a good scholar, for his first business venture was a prohibition house. With his young partner, Joseph, he went into a general store at Cedar Falls, Iowa, having accumulated sufficient capital to do so. They remained there until 1865, about seven years, and made a deal of money. Though they began during one of the worst periods of depression this country has ever experienced. In 1865, they removed to Waverly, Ia., and began to handle live stock and grain for the Chicago market. In this they were again successful, both in business and money, and two years later, Mr. and Mrs. Rosenbaum, together with their brother, Joseph, that of Waverly. Both of these institutions were prosperous, but the field was too narrow, and, in 1874, they sold their stock in both banks at $1200 and came to Chicago. They at once opened their present business and have had an unbroken record of success since, and have never suffered any reverse of fortune or suspended their business, and have always paid one hundred cents for every dollar of indebtedness and had money left. The volume of business done has increased to $10,000,000.00 a year, and they have a reputation second to none in the city in their line. The brothers are of Jewish extraction and both members of Sinai Congregation, of which Dr. Hirsch is pastor. Mr. Rosenbaum was married on October 9, 1883, by Rev. Mr. Steele, to Miss Laura Annette Bach, and has had four children; Ibbetie, Stella, Maude, and Alma.

JOSEPH ROSENBAUM was born in Bavaria on April 1, 1858. His business history has been incorporated with that of his elder brother, because their lives have been so intimately connected that they could not be separated. They have never had any separate business interests, but have always acted as a single individual in all their affairs. Their whole lives have been a modern rendition of the beautiful narrative of David and Jonathan. Joseph Rosenbaum enlisted in June, 1862, in Co. "B" of the 31st Iowa Volunteer Infantry, and followed the fortunes of the 15th Army Corps until the end of the War. He was an active participant in all its grand achievements, from Arkansas Post, Vicksburg, Chattanooga and Atlanta to the sea, and all between them, until he was mustered out and discharged with honor at Louisville, in July, 1865. He then returned to Iowa and engaged in the pork and sausages business. In 1876, he married Miss Emma Frank, a Chicago lady. They have five children; Minnie, Edwin Stanton, Blanche and Walter. Both he and his brother are Royal Arch Masons, but have never omitted from their Iowa Chapter and affiliated in Chicago.

HENRY II. CARR is a son of Joseph Henry and Eve Eliza (Moshelle) Carr, and was born in La Salle County, Ill., on June 29, 1844; and was educated in the public schools of his native county. His ancestry dates back to the original Carrs who were granted land from the English Government, and settled the State of Rhode Island. His father was a resident of the State of New York during his early manhood, but came to Illinois some years prior to the War. During the latter event the senior Carr was apprised of his inheritance to property in New York, and the family returned thither, locating at Syracuse, where they resided nine years. They then came back to this State, taking up their residence in the vicinity of where they had first located. In 1853, when the line now known as the Chicago, Burlington & Quincy Railroad was first laid, the senior Carr had a town lot laid out between the towns of Aurora and Mendota. He opened up a general store, and he succeeded in getting people to locate there, and thus it was that he became a founder of the thriving town of Sandwich, of which he was the first mayor, and the city is yet called in his honor. After the first period of peace, the senior Carr was eighteen years old, but, obtaining the consent of his parents, he enlisted in Co. "H," 15th Illinois Infantry Volunteers, for three years service. He was mustered as a private at Dixon, Ill., and during the War his regiment was chiefly engaged in the campaigns of the Army of the Cumberland, participating in the battle of Atlanta, marching with Sherman to the sea, tramping through the swamps of the Carolinas, and engaging in many of the most prominent battles in the Southern States. His corps witnessed the surrender of General Johnston near Raleigh, N. C.; their final battle was at Bentonville, N. C. After General Johnston's surrender, his corps, with General Sheridan's whole army, marched from Raleigh to Richmond. According to a report of the Third Division, General Sheridan, had participated in that magnificent review, by the President and his generals, of the Army of the Cumberland. From there, returned to Chicago, and his regiment was mustered out in this city in June, 1865. It was then April 17, 1867. 

Mr. Carr upon coming home from the War, soon after started to make his own living, and thereby displayed his independence as well as energy and thrift. He went to Lewes, with the idea that it would be the future. It did not remain long, for, on January 1, 1866, he returned to Chicago and took a position in Martin O'Brien's art emporium. In the spring of 1867, he married, and immediately thereafter he went to Quincy, Ill., with the idea of making a home there, previously entertained of Lewes. He remained there three years, connected with the wholesale and retail goods house of Johnson & Co., filling the important position of bookkeeper and financial manager. At the time of the great fire, he found...
his opinion of Quincy's future greatness a mere fallacy, and, in December, 1860, he returned to this city. He took a position in the wholesale department of Field, Leiter & Co., where he remained a short time only. An opening occurred in the firm of I. F. Puller & Son, of Duncan, and was engaged in that commission house for the greater part of six years. The great fire of 1861 destroyed his home and all his effects (he at that time residing on 57th Avenue). In 1865, he engaged with the firm of John & Hogan, with whom he remained until March 1, 1877. Owing to the arduous duties devolving upon him as manager of their brokerage and commission business, his health became imperilled, and following a long convalescence, he moved to McLean, Illinois, in 1878.

He was a member of the firm of B. Ream & Co. from 1865 to 1895, when he became partner in B. Ream & Co. with Bravington & Ream, and was connected with the firm of N. B. Ream & Co., and continued in active business until his death.

Mr. Ream was a member of the Board of Chicago, Illinois, and was elected as vice-president of the Call Board, his numerous business interests preventing him from accepting other positions of a like nature. Since 1865, Mr. Ream has been in the stock lines on the plains and seeking stock on his many farms located in Kansas. In 1866, he was elected secretary of the Ohio Western Fire Insurance Company of Chicago, of which he was vice-president until he sold out his interest. Mr. Ream is eminently a country gentleman, and though retired from active participation in the commission trade, he continues to be interested in the business of the Board, and devotes his attention to his private enterprises. His logical mind grasps, as it by instinct, all the intricacies of a business proposition, which, coupled with his well-known energy and dispatch, enables him to bring matters to successful issue.

Mr. Ream was married to Miss Carrie T. Putnam, a descendant of General Putnam of Revolutionary fame, at Madison, N. Y., on February 17, 1876. Mr. Ream is prominently identified with the Chicago, Calumet and Washington Park clubs. He has been a member of the Odd Fellows and Masonic organizations, and has been very successful in his career that he is now numbered among the most extensive operators, and ranks, financially, among the millionaires of Chicago.

1873.

At the twenty-fifth annual meeting, held on January 6, 1873, a unanimous vote elected Charles E. Culver to the presidency, George M. How, who had been put into nomination by friends without being consulted, retiring in his favor. The first vice-president for 1872, William N. Brainard, was continued in that office for this year in order to give effect to the new rule in that respect, which provided that after 1874, the second vice-president should succeed the first by rotation. Howard Priestly became second vice-president.

The annual elections were held on the first Monday after the second day of January in each year, and the elective officers, as above indicated are, a president for a term of one year, a second vice-president for two years, and fifteen directors for three years, five of whom are elected each year. A committee of arbitration, and a committee of appeals, consisting of ten members each, and holding their offices for two years, are also elected, one-half of them each year. The secretary, assistant secretary (afterward provided for), and treasurer are appointed each year by the Board of directors. Charles Randolph was re-appointed secretary, having served in that position since 1869, and was appointed treasurer.

J. W. Preston, who had ably performed the duties of chief executive officer of the association during the critical years of the fire and the re-construction, was tendered a special vote of thanks by the Board for his services, upon his retirement. A vote of thanks was also tendered to Charles Randolph, secretary, for his unintermitting zeal in the Board's interests during this period. This was a notable demonstration of the belief in the established rule of the Board, as well as of all similar organizations, which preclude the recognition of the services of employees in this manner.

HISTORY OF CHICAGO.
The assets of the Board of Trade, in 1872, amounted to $79,672.50, and at the end of 1873 they amounted to $121,603.23.

The following is an exhibit of the receipts and expenditures for the year:

**RECEIPTS.**

Initiation fees .................................. $42,300 00
Annual assessments ................................ 41,300 00
Dividends on Chamber of Commerce stock .......... 8,524 00
Visitors tickets ................................... 2,287 00
Miscellaneous ...................................... 3,883 00

Total .............................................. $95,794 00
Balance 1872 ...................................... 1,901 62

**DISBURSEMENTS.**

Current expenses ................................ $89,999 67
Incidental expenses ................................ 5,161 73
Market and Annual Reports ......................... 6,794 18
Withdrawals and deceased members ................. 1,212 00
Payments on Commercial Building ................ 9,112 49
Purchase 400 shares of Chamber of Commerce stock 35,542 00
Miscellaneous .................................... 1,980 39

Total .............................................. $99,995 62
Cash on hand January, 1874 ......................... 103 16

At the end of 1873, the membership was one thousand six hundred and sixty-two, an increase of two hundred and ninety-eight in the year. The annual assessment was fixed at $25 per capita, an increase of $5 on the year previous.

**FINANCIAL PANIC.** The most notable event of the year was the financial panic of September. The chief effect upon the Board of Trade operations was the decline of wheat from $1.10 to $0.90, but as the decline was gradual it was not sensibly felt. When the minimum figure was reached, the bears appeared on 'change as buyers. Were it not for this it is difficult to calculate where the downward movement would have ended. The Board of Trade, unlike similar institutions in other large cities affected by the panic, continued its regular business sessions. A fact which members of the Board are even yet proud to refer to is, that not one of its members was reported to have failed by reason of the panic.

**NATIONAL BOARD.** The National Board of Trade held its sixth annual meeting in this city, in October, at the Kingsbury Music Hall. The delegates from the Chicago Board were Charles E. Culver, A. M. Wright, G. M. How, N. K. Fairbank, W. E. Daggett, E. W. Blatchford, and J. C. Dore. Charles Randolph held the office of secretary, and Mr. Culver was elected a vice-president for the year following. Mr. Culver, on behalf of the Board of Trade, tendered a formal welcome to the delegates, and availed himself of this, the first opportunity since the fire, of thanking the Boards of Trade and Chambers of Commerce throughout the United States, through their delegates present, for the assistance that had been rendered them and the sympathy they manifested for Chicago in that calamity. The matters discussed by the Convention embraced such subjects as the bankruptcy laws, shipping interests and the right of American merchants to purchase foreign tonnage and raise the American flag; the advisability of establishing a Department of Commerce and Trade, under the control of the General Government, and the creation of a Board of Commissioners of Internal Improvements; transportation matters, involving the opening of a freight line from St. Louis to New York, connecting with Chicago (a project which originated here); and the memorializing of the Secretary of the Treasury and the Commissioner of Internal Revenue, with a view to securing full scope and facilities for the manufacture for export of distilled spirits.

**STOCK YARDS.** The establishment of new stock yards at East St. Louis, and the suggestions facilities which that point afforded for reaching Southern markets, did not divert trade in provisions from Chicago as many Board of Trade men and prominent packers apprehended.

**SHORT WEIGHT.** The matter of short grain-weights was the subject of a host of complaints to the Board of Directors during the year. While companies carrying grain by the water routes furnished ample guarantee of the delivery of the full quantity received in their bills of lading, the bills of lading of the railway companies, which gave no evidence of the quantity or value of property shipped, furnished no guarantee of such delivery. As pointed out by President Culver in his annual report, these bills of lading "present a temptation to misrepresent, and sometimes offer a reward for rascality." A law was passed at the instance of members of the Board, and approved in April, 1871, requiring corporations in the State receiving grain for transportation to weigh the same, and to deliver in quantity equal to that received. This law, through its wording furnished ample protection to receivers and shippers as against carriers, was never enforced, and the Board decided to call the attention of the railroad and warehouse commissioners to it.

**NEW RULES.** In May, a special meeting of the Board was held for the purpose of making alterations in the rules of the association. The new rules in reference to the eligibility of applicants for membership and to fees read as follows:

Any person approved by the Board of Directors may become a member of the association, by signing the rules and regulations, paying the initiation fee and the annual assessment. The initiation fee until July 1, 1873, shall be $100, and thereafter $250.

"Provided, That no person shall be approved by the Board of Directors as a member of the association, who is not a resident of, or permanently doing business in, the city of Chicago."

The following important rule in reference to the non-compliance with contracts and the filing of a statement as to financial condition was also passed:

"Any member of this Association who fails to comply with and meet any business obligation or contract, may, on complaint of any member of this Association, be required to make an exhibit of his financial condition on oath to the Directory of this Board, which shall be open to the inspection of any aggrieved member; and should such member, failing as aforesaid, refuse to make such statement, he shall be expelled from this Association."

**NATHANIEL K. FAIRBANK** was born at Sodus, Wayne Co., N. Y., in 1820. He received a common school education, studying also at home, and at the age of fifteen was apprenticed to a bricklayer. The year afterward he went to Rochester and served his apprenticeship. He then entered a bearing mill as bookkeeper, where he remained several years, and, in 1855, came to Chicago, entering the employment of David Dowes & Co., of New York, as their western representative. After ten years of steady service in this position, he furnished the capital for the construction of a large and oil refinery, which was built on the south side of Eighteenth street, just west of the river. A firm was organized under the caption of Smolich,
Peck & Co., Mr. Smedley being the practical man and Mr. Peck placed there to look after the interests of Mr. Fairbank. This factory, after doing a successful business for four years, was burned out in 1866 at a loss of $50,000, and in the following year the factory, at the corner of Eighteenth and Blackwell streets, was erected at a cost $80,000. A little over two years after the building of the new factory, Mr. Smedley sold out his interest, and was followed six or seven years later by Mr. Peck, W. H. Burnett and J. Sears, who now have an interest in the business, going in. In 1875, a branch house was built at St. Louis to more conveniently supply the Southern trade; another was put up at Omaha.

The following table shows the increase in the firm's output year by year since 1870:

The output this year, it is said, will amount to nearly 125,000,000 pounds. The product of the factories—what is left of it after supplying the home market—is exported to England and the Continent, India, Australia, New Zealand and other distant countries, rendering it to-day next to impossible for a nomadic Chicagoan to sight-see any foreign city where white men dwell without encountering the resplendent lithographs symbolic of the fact that N. K. Fairbank & Co.'s lard is for sale in the neighborhood. The projects which have felt the sustaining power of Mr. Fairbank's hand are numerous and very diversified in character. When the members of the Chicago Club had been moving from place to place in search of comfortable quarters, he broached the idea of building a new and handsome club house, but met with disappointing apathy. The times were not as good as they might have been, and no one cared to invest his money in real-estate just then. Instead of being discouraged, Mr. Fairbank declared that he would build the house himself and trust to the future prosperity of the club for repayment. The result of his resolution is the handsome building immediately opposite to the ladies' entrance to the Palmer House, on Monroe Street. The club's new home cost $135,000, but while it was in course of construction a number of the members came forward, and before it was finished $85,000 of the stock had been taken off Mr. Fairbank's hands. The remaining $50,000 he kept, and holds to-day. It is now a fairly profitable investment, yielding about 6 per cent. The club moved into the new building in 1876, and in that year Mr. Fairbank was elected president of the institution, an office he has retained ever since. When the late George B. Carpenter conceived the idea of building Central Music Hall, he went to Mr. Fairbank as the man best fitted to help push the scheme through. The two figured the matter out and the plans were left with Mr. Fairbank, in whose desk they lay for two years, in waiting for a favorable opportunity to commence operations. In 1879, the year after Mapleton's first visit to what was then Haverly's Theatre, Mr. Fairbank placed the plan before the public. The city was in the throes of a grand-opera furor, and the representation that the city sorely needed a hall like that which now adorns the southeast corner of State and Randolph streets had a marked effect. Every dollar of the stock was

COUNSELMAN BUILDING,

in 1853 to do the same thing for the West; and a third at New York, last year, to meet the eastern and export demand. The Chicago house has double the capacity of any of the other three, and the quartet of factories keep a trifle over 1,000 hands busy the year round. It is only in the last two years that the firm, in its Chicago and St. Louis houses, has been engaged in the manufacture of soap, lard and lard-oil having previously occupied its entire attention.
placed by Mr. Fairbank, and the building commenced and pushed to completion with all the speed commensurate with satisfactory work. The Newsboys' Home also owes its present unincumbered condition to the efforts of Mr. Fairbank, who, in 1877 and 1878, three different times of raising funds for subscriptions for the purpose of paying off the mortgage on the property; the consequence of which is, that the institution to-day owns, without incumbrance of any kind, the site recently so largely increased in value by the trans- mission to the State of Trade to the city of New York. Brought up a Presbyterian, it was once thought Mr. Fairbank would become a preacher of that denomination. His pew in the Fourth Church was rarely empty Sabbath mornings when Professor Swing was the preacher. On March 4, 1866, he married Eliza Hamill, a lady who was being taken up to pay the balance due on the organ, Mr. Fairbank sent up a note to Professor Swing to the effect that he would meet any deficiency remaining after the note was taken up and added to the fund. The gap amounted to just $1,000, and a check bridging it over was duly received by Professor Swing the following Monday morning. When Professor Swing left the Fourth Church, Mr. Fairbank was one of fifty gentlemen to guarantee the success of the services at Central Music Hall for three years, the plaxmen agreeing to meet any deficiency that might arise in the time specified. He is now one of the Board of Trustees and a member of the Music Committee. In addition to the services, Mr. Fairbank takes a great interest, being a passionate lover of music. The fifty guarantors, it may be said, never had any deficiency to meet, the church contributing $2,500 out of its own funds, after which the Rock Church, the organ, and the rent of the building were paid, and the congregation's appreciation of their act any less marked. What among his friends is termed one of Mr. Fairbank's "right hand" is his wife's, Miss Eliza Hamill. When the project was set afoot of erecting a new and fittingly commodious structure on the site of the old frame one, Mr. Fairbank came forward with a sum estimated by different parties at all the way from $25,000 to $50,000, and set the ball rolling. He also went canvassing in aid of the project and collected a considerable amount in subscriptions. He is at the present time a frequent visitor at the hospital and probably its most interested well-wisher. Of the musical societies which Mr. Fairbank has helped to support, the Fourth Church will always remember with pride, and render the congregation's appreciation of their act any less marked. What among his friends is termed one of Mr. Fairbank's "right hand" is his wife's, Miss Eliza Hamill.
At the annual election of officers this year there were three candidates for president, and a spirited contest ensued. The first day's balloting resulted in no choice, but on the next day, George M. How, receiving 532 votes, a majority of all those cast, was declared duly elected. J. R. Bensley was at the same time elected second vice-president. The membership of the Board numbered one thousand eight hundred and fifty-one names. The annual dues were fixed at $25. The assets of the Board were found to be as follows:

Cash on hand: $8,558

Notwithstanding the disastrous panic which swept over the country in the fall of 1873, the general trade and commerce of Chicago during the year 1874 was satisfactory. While the depression in business was clearly manifest, the amount of agricultural products handled, although slightly less in volume than the year previous, was greater in value. In May of this year, the Produce Exchange was organized. Its membership is composed of dealers in the minor agricultural products, such as butter, eggs, poultry, etc. Co-operation and concert of action in dealing in this class of products, thus inaugurated, has resulted in the continued and successful operation of this Exchange.

The power of the Board, under its by-laws and regulations, to discipline its members, was confirmed this year by repeated decisions of the courts.

**TRANSPORTATION.**—The entering into the city of the Baltimore & Ohio Railroad, in November of this year, thus opening up a new line of transportation east, was a subject of much congratulation to those interested in legitimate competition in rates of freight. As a part of the history of the transportation question, it may be as well to mention that it was during this year that a bill was introduced in Congress providing for the construction of a ship canal from Hennepin, on the Illinois River, to the Mississippi River. The project has absorbed a large portion of public attention since that time.

**DAVID W. IRWIN,** of the firm of Irwin, Green & Co., commission merchants in grain and provisions, is the son of W. P. and
Meitable Irwin, and was born at Sodus, N. Y., on December 14, 1830. The members of the Irwin family are rare examples of steadiness of purpose, as found in characters of sterling integrity and grace. Mr. Irwin was a member of the Oswego, and William P., of Albany, N. Y., are men of remarkable ability and foresight, having begun at the lowest rung of the ladder, and, through their own exertions, have won their way to the most elevated posts of life, and are respected everywhere. They are both at the head of extensive business and commercial interests. David remained at home, and was engaged in several local and operating firms, but produced nothing, when he finished his studies by a collegiate course. In 1852, he left home for Newark, N. J., where he entered the grain trade in the employ of A. T. Blackman, with whom he remained two years, but afterward came in Canadian business, in the month of December, 1853, he came to Chicago, and purchased all the old corn he could procure about the city during the following winter, and extended his operations by buying large quantities in the country, principally the neighborhood of Morris and Hinsdale, for which state, for which he paid New York currency, as all Western money was at a discount. This venture proved highly remunerative. He continued in the grain business here until 1858, during which time he bought and shipped large quantities of wheat to the Oswego Mills (N. Y.) and other points. Close application to business injured his health, and he left the inclement weather of our Northern climate for the calmer and warmer Valley. He spent the winter of 1859-60 at Albany, N. Y., where he bought the greatest part of the Van Rensselaer farm, in connection with his brother William P., and erected a elegant residence, built barns, and in- planted the farm by setting out in the morning from of brothers also built, for renting, a number of residences, also a fine school-house. In 1862, Mr. Irwin returned to Chicago, and became an active member of the Board of Trade, of which he is one of the oldest. He served successively as director and as manager for erecting the new Board of Trade Building, which was completed in 1885, and has been a local director of the Canadian Wheat Board. Its organization, its agents and its methods, is one of the oldest grain merchant firms in this city, and has successively been a member of the following firms: Blackman & Irwin, D. W. Irwin & Co., Irwin, Orr & Co., and at present of Irwin, Orr & Co., Mr. Irwin, Irwin & Spruance. The latter firm is comprised of A. W. Irwin and Charles D. Irwin. Mr. Green has been associated with Mr. Irwin since 1866. Mr. Irwin has made an enviable record during his long career as a business man, and is self-made in every respect. His character is an example of benevolence and Christian heart, and are too numerous to be mentioned in detail. Mr. Irwin was married on August 28, 1866, to Miss Harriet L. Nash, grand-daughter of Judge Byron Green, of Wayne County, N. Y., one of the four men who established the Board of Foreign Missions at Williamstown, Mass., and a member of Congress during Van Buren's administration. They have two children.—Charles D. and Elizabeth H. H.

HENRY H. ALDRICH was born in Cass County, Mich., in 1840, and was educated in that State, remaining there until 1861. In that year he joined the Army as private in the 6th Michigan Infantry, and during the Civil War maintained that march with General Benjamin F. Butler, after its capitulation. In 1863, he received the appointment of hospital steward, but only wore the stripes for a short time, being appointed first lieutenant and regimental quartermaster, serving for some months as post quartermaster at Fort Madison, Iowa. In 1864, he resigned, and was then chief clerk for Captain L. W. Pence, chief quartermaster for General W. T. Sherman, during the siege of Port Hudson, here, who was the quartermaster of the Union navy, and went into the commission business, and was for eleven and a half years engaged with Wiley M. Egan. He became a member of the Board of Trade in 1874, and was for two years on each of the Committee of Grievances and Administration. Mr. Aldrich has been his own account on January 1, 1882, and during his whole career has been thoroughly identified with the energetic and honorable classes, of Chicago's business men, retaining the exactitude and probity that made him a successful paymaster's clerk, and maintaining his own qualities in all his commercial life. Mr. Aldrich was married, in 1879, to Mrs. E. J. Mackenzie, of Springfield, Ill.

WILLIAM R. LINN was born in March, 1850, in Butler County, Ohio. When quite young, his parents moved to Terre Haute, Ind., where he was educated. He came to Chicago in 1867, and was for five years employed by Linn & Reed, commission merchants, his father, M. G. Linn, being the senior member of that firm. In June, 1875, he became a member of the Board of Trade, and has since carried on a large general commission business. He is a member of the Chicago and Calumet clubs and of the Citizens' League. GEORGE W. MURISON was born at Milwaukee, Wis., on January 18, 1835, and received his education at the Manual Training School. He came to Chicago in 1879, at the age of seventeen years, and shortly thereafter entered the employ of the First National Bank, under Lyman J. Gage, with whom he remained eight years. During these relations with this house, Mr. Murison rose to a position of trust and affection; and was placed by the Board of Directors of the Citizens' League, to one of the most responsible positions. On November 10, 1879, the day that General U. S. Grant came to Chicago, after his visit around the world, Mr. Murison entered into partnership with F. P. Erskine, under the name of Murison & Co., commission merchants in grain and provisions on the Chicago Board of Trade. Mr. Erskine had been in partnership with Mr. Murison's father, the firm of Erskine & Murison having been dissolved by Mr. Murison's death in 1876. The business association of Erskine & Murison continued until May 1, 1882, when it was dissolved by mutual consent, and the firm of Murison &
& Steele formed. This firm lasted until May 1, 1854, since which time Mr. Marion has been alone. He is one of the keenest and most alert business men on the Board. Although a young man, he is widely and favorably known throughout commercial circles for his energy, foresight and thorough reliability to carry to a successful completion whatever he undertakes. An excellent physique enables him to endure an amount of exertion and fatigue that would incapacitate a less hardy man, and his business ability always turns his energy in the right direction. Mr. Marion became a member of the Board of Trade in July, 1876.

1875

The membership of the Board had increased to one thousand eight hundred and fifty-one names. Previous to the raising of the initiation fee, on March 18, from $250 to $1,000, two hundred and fifty-one members were admitted. The rule allowing the transfer of memberships subject to the approval of the Board, was adopted, under which one hundred and forty-two transfers occurred. The yearly assessment was fixed at $30. The assets remained the same.

The year 1875 was full of complaints of hard times, and there was a stagnation of business, which was the result of former extravagant expenditures, the undue pressing of credit, and speculation beyond the limits of prudence or sound financial economy. The movement of produce fell off somewhat, and although trade generally was not so active as formerly, Chicago had its full share. While the yearly exhibit shows a decrease of seventeen and one-half per cent. in the volume of the produce trade as compared with 1874, an increase of seven and one-half per cent. was gained in the wholesale trade. The continued increase in speculative trading, although noteworthy, did not lead to any disastrous corners. The adoption of the rule by the Board that no member should be disciplined because he refused to pay fictitious damages, had a marked effect upon attempts to manipulate the markets in this way.

Charles L. Hutchinson was born at Lynn, Mass., on March 7, 1851, and came West, with his parents, when only two years of age. He received his education in this city, graduating from the High School in 1873, and immediately entered upon his business career with his father, E. P. Hutchinson, a Chicago millionaire, well known as one of the leading business men and real-estate owners of this city. Charles L. is the eldest son, and will eventually succeed to his father's varied and important business enterprises. To make him competent to handle such large interests, his business training has been as follows: One year in the grain business, one year in the packing house, then he entered his father's banking house, going faithfully through every department until he became cashier. He is a very promising young man, and entirely worthy of the confidence intrusted in him, and has, in addition, the respect of the business community of this city. Mr. Hutchinson is a very strong Universalist, and is the superintendent of the Sunday-school at St. Paul's Church. In 1881, he married Miss Frances Kinsley, daughter of H. K. Kinsley.

Edward S. Washburn, of the Board of Trade, is the resident partner and manager of the Chicago branch of the extensive New York commission firm of Field, Lindsey & Co., buyers and sellers and exporters of grain, flour and provisions. The house was established in the city of New York, in 1833, by the late Mr. Washburn and the Chicago branch opened on the same day. The firm is composed as follows: General partners, Edward M. Field, Daniel A. Lindsey, Pope C. Tefft, John P. Truesdell and Edward S. Washburn; special partners, Cyrus W. Field and Frank H. Peets.

Wheeler, Gregory & Co.—The business of this firm was started in 1874, by O. H. Roach and William B. Andrews, at the same office in which the firm of Wheeler, Gregory & Co. is at present located. The firm was then known as Roach, Andrews & Co. It continued until 1889, when E. F. Wheeler and another partner, who were admitted to the firm, withdrew. They were admitted to partnership in the firm, and the character of the firm was changed that Messrs. Wheeler and Gregory became the general members of it, with Mr. Andrews as special partner, under the firm name of Wheeler, Gregory & Co. The business, which started in 1874, has not decreased, and has continually grown, until now it reaches, in commissions, $145,000 a year.

William B. Andrews, the special partner of this firm, was born in 1830, at Winsted, Litchfield Co., Conn., a manufacturing town, delightfully situated on Mad River, at the outlet of Long Lake. Here he lived during the first twenty-two years of his life, and received an excellent common-school education. In 1863, he went to California, and located at Forest City, establishing himself there in mercantile business, packing and shipping large quantities of goods to mining districts. In 1855, he returned to the East, settling in New York City, and with his father engaged in the wholesale trade. In 1857, he returned to his old home in Connecticut, and engaged there in the dry goods trade, which he continued until 1869, when he came West, settling in Quincy, Ill., and carrying on there, exclusively, a dry goods business, and, disengaging the same, he engaged in the wholesale grocery business. After the great fire of 1871, he sold out his business in Quincy, and came to Chicago, and by close attention has been more than ordinarily successful in acquiring a competence.

J. F. Wheeler, senior member of this firm, was born at Quincy, Ill. His father was John Wheeler, a native of Vermont, who moved West to Quincy in 1854. J. F. Wheeler connected business as clerk in his father's dry goods store, at Quincy, at the age of sixteen, and has been in business ever since. For some years he was with the firm of Ladd, Wheeler & Co., his father as special partner, after which he went into the dry goods business, with his brother. Then, for some years, he was in the retail, and, still later, the wholesale grocery business, with William B. Andrews, special partner of the present firm of Wheeler, Gregory & Co. In 1873, he came to Chicago, and, in 1881, became a member of this firm. He has been a member of the Board of Trade for about nine years.

Walter D. Gregory, junior member of this firm, is a native of Buffalo, N. Y. His father, Daniel Gregory, left Buffalo and went to St. Louis, moving to Chicago in 1865. Walter D. Gregory then attended the city public schools and high school, and, later, the University of Buffalo, and New York University. While at New York University, he was clerk for J. W. Jones, then bookkeeper for Duggar, Chase & Spears, from 1872 to 1877. He then attended the University of Buffalo, and, later, was with Crosby & Co., as stockbroker in 1875. In 1877, he became partner of the Board of Trade, and, in 1881, became a member of the Board of Trade in 1875, and of the Committee of Arbitration in 1882. During 1883, he was second vice-president of the provision, grain and stock call-board.

John G. Beazley, junior member of the firm of George Stewart & Co., was born at Belfast, Ireland, on June 28, 1843. His father was a custom-house officer at Belfast during the whole of his active life, and still survives, at the advanced age of eighty-three, supported by a liberal pension from the British government. His mother's maiden name was Ann Meade. She was the mother of seven children: whom the elder, the Rev. William Meade, the Episcopal faith. John G. was the second child, and received a common-school education, supplemented by the occasional advantages of private tutors. He left school at the age of sixteen, and spent a few months in the country, before entering the Commercial College at Belfast, intending to study law, but at the end of two years, when about eighteen years old, chose commercial life in preference, and entered a business office. In 1865, when twenty-six years old, he came to this city, entered an office in New York, where he remained until 1874, when he then came on to Chicago. Here, he entered the employ of George Stewart, his present partner, as his bookkeeper. This was in 1870, and, after four years' service, a partnership was formed, under the style of George Stewart & Co., which still continues. John G. Beazley has been a member of the Board of Trade, and was a director for three years. Aside from his membership in the Trotwood Club, he belongs to no public or private club or institution.
whatever. On June 23, 1874, he was married to Miss Jane A. Fenimore, a Chicago lady, by whom he has had four children, three of whom still survive,—two daughters and a son.

**Edward de Corts Loud** was born at Philadelphia, Penn., on December 18, 1849, and is a son of Joseph E. and Rachel (Plaghty) Loud. His father, who is still living, was of the well-known firm of Loud & Brother, piano-forte manufacturers of Philadelphia. His grandfather, Thomas Loud, while in the army, was taken prisoner, and became of age while confined in the Trenton Jail, during the war of 1812. His mother was a descendant of Caleb Pusey, a partner of William Penn, some of her ancestors being refugees to this country from the country of the United States.

In 1861, he was mustered into the Pennsylvania Artillery, and was afterward promoted first lieutenant, and subsequently to the command of the battery, and detailed as instructor of artillery of regiments at the defenses of Philadelphia. D. C. Later, being on sick leave, he was detailed as an assistant (in charge of deserters, convalescents and stragglers) to the provost-marshal of Philadelphia. Regaining his health, he went to the front in command of his battery, participating in the battle of Cold Harbor, and the battle of the siege of Petersburg. On June 27, 1864, he was taken prisoner in front of Petersburg, and confined under guard at that place; then removed to Libby Prison, thence to Lynchburg, Va., thence to Danville, Va., thence to Charlotte, N.C., thence to Columbus, Ohio, thence to Macon, Ga., thence to Savannah, Ga., thence (under a fire of Union guns in the yard of a hospital) to Philadelphia, S. C. to the yellow fever hospital on Ashland avenue, and Camp Sorghum at Columbia, S. C., and thence to the north on parole on December 9, 1864, on the steam transport "Crescent," arriving at Annapolis, Md., about December 16. On June 3, 1864, his term of service having expired, he was discharged, and the following year was appointed captain and aide-de-camp of the Fourth Brigade, First Division of the National Guards of Pennsylvania. He subsequently received the appointment of major and brigade inspector, and, later, major and assistant adjutant-general of the same brigade, which position he resigned in December, 1866. His service in the State forces commenced at the beginning of the year 1876, when he was appointed major and inspector of the First Brigade, resigning in June of the same year. In the December following, he was commissioned brigadier general of the Second Brigade, First Division of the National Guards of Pennsylvania, and, in July, 1877, was ordered to Pittsburg, to participate in the railroad riots and the anti-Government feeling prevailing a part in all troubles there and in the coal region. (See report of Committee of Investigation of the Legislature of Pennsylvania.) He resigned his commission in August, 1877, and is at present aide-de-camp to the commander-in-chief of the Grand Army of the Republic, a member of the Military Order of the Loyal Legion of the United States, and ex-president of the Prisoners-of-War Association of Chicago. Mr. Loud is a member of business houses that have always been of a respectable nature, he having turned his attention to the grain markets early in life. In July, 1865, he engaged as a clerk with L. G. Graff & Co., of Philadelphia, and, in 1867, was admitted to a partnership in the concern, and, subsequently, Mr. Graff retiring, the firm was made Dickson, Loud & Co. In 1872, Mr. Dickson retiring, Mr. Loud associated with Mr. Moore, the firm being Loud & Moore, and so continued for one year. On the dissolution of this partnership, he associated himself with Hancock, Griever & Co., of Philadelphia, New York and Peoria, remaining with them until March, 1883, when he opened their branch house in Chicago. In January, 1884, he went into, and still continues, business alone, making a specialty of buying car and cargo lots of grain, for Eastern account, in which particular branch he is one of the wealthiest dealers in Chicago. He is a member of Union Lodge, No. 124, A. F. & A. M., of Philadelphia, T. G. A. R. of the same city; also of the same city; also of the Illinois Commandery, Military Order of the Loyal Legion of the United States. Mr. Loud was married, on April 8, 1869, to Miss S. Annie Warden, of Philadelphia, who died in November, 1876. Mr. Loud has one child,—Mary W., eleven years of age.

1876.

The number of members reported this year was one thousand eight hundred and forty-two, and the yearly assessment was $80. No new members were initiated, but there were one hundred and sixty new members admitted by approved transfers. The assets of the association amounted to $167,841.16.

The year's business was more or less affected by the fact that it was not only the Centennial year, which was generally observed by making patriotic pilgrimages to the great expositions at Philadelphia, but that it was the year for the Presidential election, which invariably has a disturbing effect upon the finances and business of the country. Besides this, the embarrassments resulting from the long depression which had existed in commercial and industrial pursuits, were not yet recovered from, or the reasons therefor removed. The year's business, however, was not without its encouragements and favorable aspects. There was a falling off in the receipts of wheat of nearly seven million bushels, but a surprising increase in corn receipts of eighteen million bushels. The aggregate receipts of grain and live stock, however, were greater than in 1875. The wholesale trade was not equal to that of the last year by four per cent. The manufacturing interests, outside of the packing business, also shows a material decline, notwithstanding the shrinkage in the price of the raw material, and of labor—wages having fallen off eleven per cent. The year is noticeable for the fact that the rates of transportation for the greater portion of the time were lower than ever before. The combination, which existed among the leading railway lines at the beginning of the year, came to an untimely end at the opening of lake navigation, when a war of rates commenced which was continued with unabated vigor throughout the year. The nominal rate to New York and other eastern ports, was 20 cents per 100 pounds on grain and fourth-class freights, and forty cents per barrel on flour, but even these unprecedented low rates were further reduced at times to as low as 14 cents per 100 pounds on grain. West-bound freights were still lower. These extremely low railway rates so interfered with freights by water that there was no profit in the lake-carrying interest. Medium sized vessels were practically forced to abandon the trade, many of them having remained at their docks the whole year.

**Court Decisions.**—An important question was adjudicated by the Circuit Court in regard to the right to demand relief from suspension, by a member of the Board, who had been suspended for failure to fulfill commercial contracts, but who had subsequently applied for and obtained a discharge in bankruptcy. The court held that such discharge was not a satisfactory adjustment and settlement of the obligations of the bankrupt as contemplated by the rules of the Board.
The question also of the liability of a member's stock to be levied on for his debts, or to garnishment, was also decided this year, the courts holding that it was not liable. The United States District Court had previously held that these memberships were not properly liable to be scheduled by a bankrupt, but a personal franchise.

James M. Bryant was born on January 1, 1823, near Lancaster, Gerrard Co., Ky. His grandfather, John Bryant, was a Virginian, and a civil engineer by occupation. John went to Kentucky in 1824, when that State was a portion of the territory of Virginia. He there surveyed and entered two tracts of land, of one thousand acres each, near Lancaster, taking patents in the name of his father, James, who then resided in Culpepper County, Va. John Bryant several years afterward made Kentucky his home, and married Mary, daughter of Thomas Owseley; he settled on the lands he had previously entered, and lived there until his death in 1833, from an unlucky fall, he retired from business on to his farm, where he died in July, 1868. In the beginning of 1850, Mr. Bailey bought out the grocery business of D. Taft & Co., and, taking in a Mr. Park as a partner, they ran the business under the name of D. Taft & Co. for the following year, when he bought a feedmill and elevator, and the firm added grain and the feed business. In the fall of 1857, Mr. Bailey sold out the grocery business to his partner, and bought out D. Taft & Co.'s grain interests, adding to it his own. By this operation he controlled the grain trade and milling of Montpelier, and did a very prosperous trade, putting him in control of the eastern branch of the business which he still controlled, being L. L. Taft, the son of D. Taft whom he bought out, as his bookkeeper, and on January 1, 1850, took him in as partner. In June, 1859, Mr. Bailey came to Chicago, and opened a grain commission house with W. W. Brown & Co., the name of Bailey, Bullock & Co. On July 1, 1882, Bailey, Bullock & Co. dissolved partnership, and since then the firm is known as E. W. Bailey & Co. Mr. Bailey became a member of the Board of Trade in 1859. In May, 1866, Mr. Bailey was married to Miss Jennie Carter of Montpelier, Vt. They have two children.

George C. and Mary B.

Dwight & Gillette.—This firm, consisting of J. H. Dwight and J. F. Gillette, was formed in 1874. Previous to that year, Mr. Dwight had been a member of the firm of D. L. Quirk & Co., joining the firm in 1859, and remaining a member of it, most of the time, until severing his connection with Mr. Gillette. Mr. Gillette became a member of the firm of A. E. Kent & Co., in 1859, and was continuously with it until 1872. Dwight & Gillette at first located in the Board of Trade Building, where they remained about two years, then they removed to their present office in the Merchants' Building. They deal in grain and provisions, and their business has so increased that they are now one of the largest commission firms on the Board of Trade.

John H. Dwight was born in April, 1835, at Jackson, Mich., where his father carried on a general store. He came to Chicago in January, 1856, and was for some time employed in the Chicago Bank of J. H. Birch & Co. In 1858, he was employed by D. L. Quirk & Co., for six months, when he was admitted to partnership. In 1860, Asa Dow became a member, and the style of the firm was changed to Dow, Quirk & Co. In 1866, Mr. Dwight severed his connection with this house, and joined Charles G. Cooley, under the name of Cooley & Dwight. In 1872, the firm name was changed to Cooley, Dwight & Gillette. Mr. Gillette being admitted in 1874, Mr. Cooley retired and the firm then became Dwight & Gillette. Mr. Dwight has been a member of the Board of Trade since 1858. He has served on various committees, has been second and first vice-president, and was president in 1880. J. F. Gillette was born at Suffield, Conn., in 1832. As a business man, he was engaged in mercantile pursuits until he came to Chicago in 1856. Here, he was employed for some time as bookkeeper by a dry goods house, and in 1859 joined A. E. Kent & Co. In this he also became a member of the Board of Trade, and has since held various offices on committees. In 1874, he associated himself with J. H. Dwight, as junior member of the firm of Dwight & Gillette.

Antony Browne, commission merchant, was born at Liverpool, England, on June 6, 1825. During his youth he studied at Stonyhurst College, in Lancashire, and entered the wholesale grain commission house at Liverpool, where he served his time in a clerical capacity. In 1809, he came to Chicago, and secured a position with a commission house, which he retained until launching out into business on his own account. In 1831, the firm of Stuart & Browne began business as general commission merchants in grain and provisions, and they continued in partnership relations until October, 1844, when Mr. Stuart withdrew. Mr. Browne continued under the style and title of Anthony Browne & Co. Having devoted his entire life to the business with which he is connected, Mr. Browne is thoroughly acquainted with the modern operations of the Board of Trade, of which he has always been a member and a leader in this city. Mr. Browne does a general commission and option business, and, from the first, has carried a large list of customers on his books. He is a resident of Kenwood, and is a member of the Union League, Washington Park and Kenwood clubs.

1877.

At the annual meeting of 1877, the number of members reported was one thousand eight hundred and thirty-one. A few memberships were forfeited for non-payment of assessments. The annual assessment was continued at $25. There were two hundred and six transfers of memberships, but no initiations. The
assets of the Board, not including furniture and fixtures, were $176,903.59.

The year, as affecting trade and commerce, was distinguished by many remarkable events. Among these were the Turco-Russian war, the unprecedented fall of rain and spell of bad weather during the fall months, and the great railroad strike in July. This latter event paralyzed for a time the industries of the country, clogged the wheels of transportation, besides involving the destruction of large amounts of property. It was in fact a year of hesitation, timidity, distrust and failures, especially of banking institutions; and the restoration of business activity and commercial prosperity, which so many had hoped for, was far from being realized. The shrinkage in values (incident to the appreciation of the currency), in nearly all descriptions of property, rendered investments uninviting, while labor was far in excess of the demand for its employment. The agricultural products of the country, however, were fair and of better quality than those of the previous year. In these the trade was large, and prices reasonably satisfactory. There was a falling off in the receipts of wheat of over two million bushels, and of corn of nearly one million bushels. The aggregate receipts of live stock, also, were less than in 1876.

**TRANSPORTATION.** — Railway freights east were more uniform, but higher, than in 1876. The lowest rate on grain from Chicago to New York was 30 cents, and the highest 40 cents per 100 pounds. Rates on wheat by lake to Buffalo, and thence by rail to New York, averaged four cents per bushel higher than in 1876. Lake freights were also higher, and the movements of grain by water routes were very much larger.

**Leonard Brauns**, the senior member of the commission firm of Brauns & Rinehart, was born in Hanover, Germany, on March 16, 1831. He is the son of Ferdinand Brauns, a Lutheran minister, and received a good education in his native country before coming to America. In 1853, he landed in New York, and soon after obtained a situation as clerk and bookkeeper in a large importing house, which he retained for three years. He came to Chicago in 1856, and kept books a year for Gerstenberg & Westerman, dealers in fancy goods and toys. Having command of a fair capital, he formed a co-partnership with his brother, G. Brauns, and opened a general store at Crete, Will Co., Ill., doing business as L. & G. Brauns until 1860. In this venture, both brothers lost everything they had, and came back to Chicago without a dollar. A friend loaned Leonard $80, to be returned if he succeeded, to be his own if he failed; and he went into the grain commission business on West Randolph Street. Despite his misfortunes he had made many country friends; they gave him their patronage, and he prospered. In 1862, he took Nelson W. Hewes into partnership, under the name of Hewes & Brauns, and moved over the river, to the old Wigwam building. They did a profitable business up to 1875, when George F. Rinehart, a prosperous grain-buyer at Blackberry, Ill., entered the firm and added the "Co." to the firm name. In 1877, Mr. Hewes withdrew and the firm has since done business as Brauns & Rinehart. They are doing a general produce commission business of about $500,000 a year. The fire of 1871 was a severe blow to the house, then Hewes & Brauns, at No. 133 South Water Street, and they came out several thousand dollars in debt. Their loss on goods held on consignment alone was over $22,000.

Twenty-two thousand pounds of butter, in their cellars, added to the violence of the fire. Nevertheless, they resumed business before the embers were fairly cold, and paid dollar for dollar on all their losses. Such incidents show the material men are made of, and when one has been "tried by fire," he may be justly regarded thereafter as "pure gold." Mr. Brauns has been a member of the Board of Trade since 1861. In 1869, he took his whole family back to the old home in Hanover, and spent five months among the scenes of their youth. Mr. Brauns is not a politician, nor ambitious of worldly distinction, and, except in a few instances,
has never accepted office at the hands of his fellow-citizens. He resides at 140 North LaSalle, and is president of the Commerce and Exchange Company. He is a member of the Lutheran Church. He was married on April 8, 1858, to Miss Emma Schilling, of Kaetzlinger, near the city of Celle, Hanover. Six children have been born to this枕合, Emma, Herman, Charles, Philip, and Mr. Kessler has resided in his native country. His studies at Peru, he entered one of the commercial colleges of Chicago, from which he graduated in 1861. After graduating, Mr. Peironeut engaged in the lumber business at Peru, continuing for two years, when he again came to Chicago and began business under the firm title of J. S. Peironeut & Co. Mr. Peironeut was married on February 15, 1873, to Miss Fannie S. Baker, of Chicago. They have two sons, Clarence, George, Fred and Jane. Since 1875, Mr. Peironeut has resided in Wheaton, Ill.

CHRISTOPH BUNGE, a heavy dealer in grains, provisions, coal and wood, and an old and prominent member of the Board of Trade. He was born in the village of Eizen, province of Hanover, Prussia, on July 27, 1836. His father's surname was Henry, and his mother's maiden name was Catherine Lupau; eight sons and three daughters were the result of their union. Christoph received his education in the religious schools of his native country, in Chicago, age of fifteen he left home to battle with the world for himself, and engaged his services to a farmer as a common hand, which vocation he followed until 1850, when he took passage for America, and came directly to Chicago. His first work in this country, for Philip Hohlauer, a prominent and well-known pioneer of Cook County, who, at that time, was engaged in farming near the city. His farming industry and economy he continued, in the spring of 1856, to start a small flour and feed store at No. 608 West Lake Street, in which business he is engaged at the present time, having added a coal and wood yard in connection therewith. In the spring of 1857, he purchased a hundred feet front at No. 616 West Lake Street, his present location, so that he might have better facilities for his fast increasing business. He erected a large and commodious warehouse as well as coal-sheds and other necessary outbuildings to accelerate his enterprises. In 1859, he became a member of the Board of Trade, with which he has retained his connection ever since. He is a strictly cash operator and never deals in options. He is a member of Union Park Lodge, No. 610, A.F. & A.M.; York Chapter, No. 145, R.A.M.; and of St. Bernard Commandery, No. 35, K.T. He is also a member, of ten years' standing, of the Chicago Congregational Church; has been a member of the family of trustees of the church for seven years, serving as chairman. Mr. Bunge was married, in this city, in April, 1863, to Miss Dora Darger. They have three children,—Emma, who acts as bookkeeper and manager of her father's business; Albert J., who attends to all the business in connection therewith, and Gustav, who is at the present time at West Division High School, continuing his education.

WARNER, of the firm of H. J. Warner & Co., was born at Montrose, Penn., in July, 1857, at the age of twenty-five years, to a family of traders for two years. In 1856, he entered the employ of Jones & Cubertson, and afterwards in his business, he was president, with whom he remained until 1876. In the latter year, he opened business on his own account in room No. 3, Chamber of Commerce, where he remained until 1882, when he formed a partnership with W. H. Sterling, under the firm name of H. J. Warner & Co., and removed to No. 125 LaSalle Street. In 1883, F. R. Warner was admitted to partnership, the firm name remaining unchanged. In the spring of 1884, an office was taken in the Cabinet Building. With the exception of fluctuations in prices, the business throughout the country, the operations of this firm have steadily increased until they will bear a favorable comparison with other houses in the same line.

Peter Kessler was born in France, on February 25, 1820, where he spent his childhood and received his education. When seventeen years old he left home to learn the miller's trade. In 1842 he came to America, landing at New York City in July of that year. He worked at his trade, for a time, at Lockport, N.Y., and then went to Dutchess County, and, in connection with a partner, engaged in the milling business, but at the end of eight months, financial trouble compelled them to give up the enterprise. In 1849, he came to Chicago. Immediately on his arrival he was employed by E. H. Hadduck & Co., who, at that time, owned and operated the old Marine Mills, located at the foot of Wabash Avenue, which were swept away by the fire of 1871. He remained with that firm for three years, and then managed the old Washington Hotel on Randolph Street. At the end of one year, becoming tired of the honors of "mine host," and being in the good graces of Mayor Gray, he went on the police force for one year. In 1856, he moved to St. Charles, on the Fox River, and engaged in milling with Robert Haines, under the firm name of Haines & Kessler. At the end of twelve years, the business was dissolved, Robert Haines retaining the business and Mr. Kessler returning to Chicago. In the fall of 1858, he started in his present line of trade, which he has successfully carried on ever since. He became a member of the Board of Trade in 1859, being one of the oldest business in the city. He relates many amusing and interesting incidents of operations on the same. Mr. Kessler was married, in 1855, to Miss Mary K. Cohoon of St. Charles. They have three children,—John, George and Madeline.

1878.

This year, the assets of the association remained nearly the same. The membership at the close of 1877, had been reduced by death (seventeen), and by losses for non-payment of the annual assessment, to one thousand seven hundred and ninety-nine. The receipts of the Board for 1878, were $10,000 less than for the preceding year, arising mostly from decreased payments for admission tickets, while the current expenses were increased about $2,500, as will be seen by the following table:

With the year 1878, came the revival of business, and the cry of hard times, which had prevailed for so many years, was heard no longer. Unparalleled activity in the movement of farm products, especially, was a conspicuous feature of the year's business, the receipts of nearly every leading item being largely in excess of any previous one in the city's history. In grain (four reduced to wheat) the receipts aggregated 134,886,595 bushels, being nearly 20,000,000 bushels in excess of those of 1877, and over thirty-five per cent, larger than those of 1873, in which year they were greater than any other. The trade in corn also assumed a magnitude so
far beyond any previous year that the proportion was somewhat startling. The receipts aggregated 63,651,518 bushels, nearly 15,000,000 bushels in excess of any former year. In hogs, also, there was a marked increase, the receipts for the year having amounted to the enormous number of 6,442,166, an increase of fifty per cent. over 1877, and forty per cent. larger than any previous year. Prices, however, ruled extremely low, yet as nearly everything the farmer required to purchase had also declined in price, the exchangeable value was nearly maintained. There was also a large increase in the volume of the mercantile business of the city. The wholesale trade was extremely active, and a general feeling of encouragement was apparent in all commercial circles.

The condition of our foreign trade was also decided in our favor. The balance sheet for 1873, was $65,000,000 against us, while that of 1878, was over $262,000,000 in our favor. The direct export trade was 602,018 tons as against 309,185 tons in 1877, the increase being marked in flour, wheat, corn, hog products, butter and cheese, and seeds.

**Transportation.**—Freight rates eastward during the year ruled low with small fluctuations. All rail rates to New York ranged between twenty and forty cents per 100 pounds on grain. Lake freight averaged lower than in 1877. The water-route is undoubtedly what gives Chicago the great advantage in handling the produce of the Northwest. By this line its dealers were enabled this year to transport wheat to New York City at a cost of six and three-quarters cents per bushel. While railways are invaluable auxiliaries to water lines, the latter will continue to regulate the rates of freight.

**Inspection.**—A reorganization of the inspection of provisions was effected this year, by consolidating under one head the whole official inspection in this market. A system of the registration of all warehouse receipts for provisions delivered on contract by members of the association, was also established. A system of inspecting flour by grade was likewise founded.

Frank Drake, assessor of the Town of South Chicago for the past seven years, was born at Elba, Genesee Co., N.Y., on July 12, 1827. He was educated at the Cary Collogiate Institute, in the vicinity of his birthplace, and then remained at home, farming and teaching school, until October 17, 1848, when he went to Unadilla, Mich., and took charge of a school. In the spring of 1849, he established a nursery at Stockbridge, Mich. After traveling for C. H. McCormick and others, he settled at Racine, Wis., in 1852; and there kept a nursery for ten years. While living at Racine, he was elected town clerk and treasurer of the Racine County Agricultural Society during three successive years, and was the republican nominee for the Wisconsin Legislature, but was defeated by only a few votes. In 1852, he came to Chicago, but did not bring his family here until two years later. He became a member of the Board of Trade, and was engaged in the grain and produce business until 1859, when he was elected assessor of the Town of South Chicago; and the voters of that town have continued to reward his ability and integrity, by re-electing him to that important and responsible position for the six successive years. In July, 1883, he was appointed chief State grain inspector by Governor J. M. Hamilton; he served one term of two years, giving entire satisfaction and receiving the hearty approbation of all the business interests connected with the department. In 1885, Mr. Drake married Rebecca C. Stone, of Rochester, N.Y. Mrs. Drake died on September 5, 1885, leaving two children,—Lula M. Raymond and Frank S. Drake.

Charles H. G. Mixter came to Chicago in February, 1859, and went into the grain and commission trade, and at the same time became a member of the Board of Trade. He has since remained constantly in that business and in his membership and in long relations, has conscientiously earned, and enjoys, a reputation for probity and scrupulous fidelity to commercial transactions second to none. He is conservative in his operations, but in the commencement of any enterprise, he may be relied upon to fulfill every iota of his agreement. The stability and energy of the men from Maine flows in his veins, he having been born in Saco, Me., in 1833. He was taken by his parents to his birthplace, in four years old, where he remained, and received his business education and early mercantile experience until 1859. In 1859, he was married to Miss Annie Edgerly. They have two children,—Mary A. and Charles T.

Z. K. Carter & Co., wholesale grain and hay, is composed of two brothers, Zina R. and James R. Carter. Zina R. Carter, the founder of the business, was born in Jefferson County, N.Y., on October 23, 1846, and was the eldest of a family composed of three sons and one daughter. His father, Benajah Carter, who was married in early life to Miss Isabelle Cole, was a lover of the water, and followed the lakes for years as captain of a vessel in which he owned a one-half interest, and which floated under the firm name of E. J. Merrick & Co. While lying in this port, in 1855, he was taken suddenly ill with the yellow fever, from which, after several weeks of suffering, he died. He was a distinguished Mason, and was buried with the honors of that order. The widow, accompanied by Zina and the rest of the family, removed to this State in the spring of 1864, and settled on a farm near Wolverine, Green Lake County, Wis. In his twentieth year he commenced farming for himself, which business he followed until the fall of 1871, when he came to Chicago and started a grocery store, connecting with the same a small flour and feed business, and nowadays owns three stores on the streets. He remained there for six years, during which he associated with himself his brother James, as a partner. The grocery was finally disposed of, the firm retaining the grain and hay business, which has rapidly grown under their efficient management from a small retail house to one of the leading wholesale establishments in the city. During 1884, they did a business of over $300,000. Zina R. Carter married a Miss McCutcheon in 1872. His operations on Change are conducted on strictly cash principles, and he never deals in options. He was married in this city, on December 9, 1868, to Miss Mary L. Wheaton, by whom he had one child, Helen. On was married again, in 1878, to Emma A. Dennis, by whom he has had two children,—Mildred and Roscoe.

James R. Carter, the junior member of the firm, came West with the rest of the family. He remained on the homestead, at Wheaton, until 1868, when he came to this city and entered into partnership with his brother. He was born on October 16, 1849, and received nothing but a common school education, as is also the case with Zina R. By honorable and upright dealings in his early business, these brothers have risen from poor farmer boys to an enviable place in the business circles of this great city and have amassed a handsome fortune. Mr. Carter was married, on December 26, 1887, to Emma Chambers; they have three children,—Edith, Anna and Nettie.

Gilbert Montague, of the firm of G. Montague & Co., receivers and exporters of flour and grain, is a son of Simeon and Sybil Montague, and was born at Montague, Berkshire Co., Mass., on November 24, 1835. His advantages for an education, during his earlier years, were meagre, but he found many opportunities for improvement in after years, and managed to secure more than ordinary cultivation before he reached his majority. At ten years of age, he began business life, as an office boy, in the wholesale shoe manufactory of E. A. Forbush, Ashland, Mass., with whom he remained for two years, spending his vacations in study. Going to Boston, he worked one year in the retail grocer house of Andrew Hutchinson, and then entered the employ of Stratton & Ayers, wholesale grocers, and from the duties of office boy was advanced to the position of salesman and buyer during the next two years, associated with that firm. After conducting a retail grocery business on Pleasant Street for one year, on his own account, he sold out, and went to New York, and engaged with the wholesale boot and shoe house of A. B. Meeker & Co., on the west corner of B way, with the charge of the stock within three months from the date of his engagement. This firm failed during the fall of that year, and he was employed by Thayer & Thorp, receivers of provisions, etc., and shortly afterward was sent as their agent to other markets as they were established there, in their behalf, for a number of months. On his return to New York, he was appointed receiver for the firm, and in 1865, formed a partnership with George F. Baker, under the name of Baker & Montague, and conducted the same line of business. In the spring of 1871, he came to this city in the interest of his firm, and upon heavy loss, incident with the great fire, the
firm was dissolved. With the revival of business in Chicago after the fire, he formed a connection with Charles A. Gump & Co., and controlled the purchasing department of the firm three years, when he retired and associated himself with John Merton, in the commission business, under the firm name of Montague & Merton, at Nos. 86-88 LaSalle Street. At the end of three years Mr. Merton retired, and was succeeded by D. H. Tolman. The firm of Montague & Tolman conducted business four years at No. 164 Randolph Street, when he purchased Mr. Tolman's interest and continued that interest under the name of G. Montague & Co., and in May, 1884, removed to his present location, Nos. 5 and 7 Sherman Street. This house does the largest exclusive commission flour and grain trade in the West, and does an immense exporting and receiving business. Mr. Montague was the first Master Mason raised in Lakeside Lodge, No. 759, A.F. & A.M., of this city, after it received its dispensation, and was the fourth master of that lodge; he is also a member of Chicago Chapter, No. 127, R.A.M., and was the first to receive the orders of Knighted in Chevalier Bayard Commandery, No. 52, K.T. He is also a member of the Indiana Club. Mr. Montague was married, on April 6, 1859, to Miss Lydia A. Thayer, of Connectic., Mass.; she died on July 15, 1879, leaving one daughter, Lydia S. He married his present wife, Miss Eldora A. McGee, daughter of G. A. W. McGee, of Waukegan, on July 21, 1882.

H. G. Fisher is the son of John and Mary (Iyon) Fisher, and was born in Brooklyn, Jackson Co., Mich., in 1850. He attended the public schools in Jackson until he was seventeen years of age, and then entered the employ of Bennett, Knickerbocker & Co., of Jackson, and with them learned the milling business. He remained there four years, when, in 1871, their mills at that place having been destroyed by fire, he removed to Albion, Mich., and became resident manager of the firm's extensive flouring-mills there. This position he held for nine years, when he came to Chicago, and associating himself with H. P. Aldrich and H. Milne, under the firm name of Aldrich, Milne & Co., commenced the grain business at No. 176 Washington Street. The following year, Mr. Milne retired, and, in 1884, Mr. Aldrich withdrew, and Mr. J. W. Hobson became a special partner, the firm name being changed to H. G. Fisher & Co. Upon the completion of the new Board of Trade Building, the firm moved to their present quarters in the Counsellor Building. Mr. Fisher has been a member of the Board of Trade since 1858, and has the credit of having made the first trade in wheat upon the floor of its new building. He was married to Carrie, only daughter of S. V. Irwin, president of the First National Bank of Albion, Mich., on May 20, 1875, and has a daughter, Genevieve, aged six years.

1879.

The election for president this year was an exciting one, and the vote, 11,117, was the largest ever polled. The regular ticket was defeated by a "reform" ticket, headed by Asa Dow; he receiving 673 votes, was elected president. Henry W. Rogers, Jr., was elected vice-president, Mr. Randolph was continued in the secretaryship, and C. J. Blair was appointed treasurer.

The roll of members numbered one thousand seven hundred and ninety-seven. There were two hundred and sixty-seven memberships transferred, and ten deaths. The assets of the Board, although some of the items increased, remained about the same: $172,502.31.

The authority conferred on the directory to issue clerks' tickets to the exchange-room having been withdrawn, there was a falling off of the year's revenue on this account of $8,660. The receipts and disbursements for the year were as follows:

Encouraging as was the commercial exhibit of Chicago in 1878, that for 1879 was still more gratifying. A feeling of confidence was manifested, which imparted activity and strength to every department of business. The resumption of specie payment, as provided by law, on January 1, had been watched by many with distrustful forebodings. The uncertainty regarding its success as a financial measure had the effect of withholding capital from investment and unsettling business enterprises in a marked degree. Many able financiers doubted the practicability of the policy, and referred to the example of Great Britain in 1818, in its prolonged effort to achieve a similar result, as a warning to the United States. The great banking interests of the country, however, stood firmly in favor of resumption, and did the friends of "honest money" everywhere. The day came, and to the surprise of even the warmest supporters of the policy, there was scarcely a ripple on the surface to distinguish it from an ordinary day of bank transactions. From that time capital began to seek for profitable investment. New industries were established, and improvements in every direction were inaugurated. Indeed, there was very soon a tendency developed to run into the other extreme of undue trading and speculation, the disastrous effects of which, in many instances, were felt in after years.

The agricultural products of the year afforded an average yield, and in some localities were exceptionally large. The increased demand, in consequence of the revival of business, and of the partial failure of crops in some portions of Europe, created an active market all through the year. The grain receipts, large as they were in 1878, were greatly exceeded by those of 1879. The receipts of corn also were in excess of 1878, the crop for that year having been the largest ever produced in the country. The product in Illinois, was estimated by the State agricultural department to be 365,913,377 bushels, against 251,149,230 in 1878. In lumber, also, the receipts were largely in excess of any other year. The shipments of produce from Chicago to Europe on through bills of lading, increased twenty-seven per cent. over 1878, reaching the large amount of 768,153 tons, valued at $45,000,000.

**INSPECTION.—**The rules governing the inspection of flour were amended by the establishment of two grades of super and two grades of extra flour. The fees for inspecting and branding were fixed at two cents a barrel and one cent a sack.

The State Board of Railroad and Warehouse Commissioners also revised their rules for the inspection of
grain, to go into effect on December 31. Among others, the following rules were adopted:

"All persons inspecting grain under the direction of the chief inspector shall in no case make the grade of grain above that of the poorest quality found in any lot of grain, when it has evidently been mixed or doctored for the purpose of deception.

"All persons employed in the inspection of grain shall report all attempts to fraudulently alter the system of grain inspection as established by law. They shall also report to the chief inspector, in writing, all instances in which they discover a sample of grain of a lower grade than that called for by the warehouse receipt. They shall also report all attempts of receivers or shippers of grain to instruct or in any way influence the action or opinion of the inspector, and the chief inspector shall report all such cases to the commissioners."

JOHN J. BRYANT was born at Elizabeth, N. J. After leaving school, he went to the City of New York, where, for about a year, he was in the employ of H. B. Claffin & Co., wholesale dry goods merchants. Leaving them in 1864, served until the close of the War in the 9th New Jersey Volunteers. In May, 1871, he came to Chicago, and for two years represented the Elliptic Sewing Machine Company, as their general agent. In January, 1873, he entered the employ of G. P. Constock & Co., commission merchants, with whom he remained until early in 1875, when he established the firm of J. J. Bryant & Co., commission merchants and receivers and shippers of grain. He is an active and enterprising business man, and has, by his energy and ability, built up a large trade. His present partner is George H. Menden. Mr. Bryant has been a member of the Board of Trade since January, 1872, and in January, 1873, was elected a member of its board of directors.

FRANK G. LOGAN is a native of Wayne County, N. C., where he was educated. At the age of nineteen years, he came West, locating in Chicago in November, 1870. For over five years, he was employed in the dry-goods business, and in the spring of 1876 entered the employ of D. Elwell & Co., grain commission merchants, remaining with them until in October, 1877, when he established the firm of F. G. Logan & Co., brokers and commission merchants. His partner is Frank E. Dunn. Mr. Logan became a member of the Board of Trade in October, 1877, and in 1884, was elected a member of its Committee of Arbitration. He was also for some years a member of the Chicago Open Board of Trade, and a member of its Board of Directors for about three years. He has been very successful in his operations, and by uniting push and enterprise has built up a large business.

MICHAEL CONSIDINE was born in County Clare, Ireland, on the December 23, 1831, and is the son of Michael and Susan (O'Gorman) Considine. He attended the common schools of his native country until he arrived at the age of sixteen, when he left school, to work on a farm. He soon after came to America, and landed at New York on May 14, 1853; thence he went to Princeton, N. J., and worked for a farmer a short time. He came to Chicago during the same year, and, after travelling through the Northwest, returned to this city, and obtained employment with a farmer in the suburbs, where he worked for two months, and then sought and secured a position with Frisky Bros. as salesman in a trading store. He remained with this firm for a year, when he established a commission business for himself at No. 44 Market Street. About 1870, he moved to his present location, No. 118 West Lake Street. In 1853, he purchased a membership on the Board of Trade, but did not become an active member until 1871, since which year he has maintained a regular standing. Besides his commission business, he has dealt in real-estate, and now owns much valuable city property as well as several stock farms in LaSalle County. Mr. Considine was married, in 1860, to Miss Catherine Follon, of Chicago. They have five children,—James J., Mary E., Michael J., John F. and Susan.

WILLIAM W. WATKINS is a dealer in hops, barley and malt. He was born at Trenton, Oneida Co., N. Y., on July 24, 1834, and was the oldest child of Phineas and Sarah Watkins. His early education he received in the public schools, finishing his studies in the academy at Prospect, N. Y. At the age of fourteen, he had the misfortune to lose his father by death, and for four years later his mother died, so that at the age of eighteen he was left alone to battle with the world. He chose the occupation of a clerk, and entered a general merchandise store at Prospect, receiving only the small compensation of $15 a month. His aptness for business was soon apparent, and made his services so valuable to his employer that his salary was rapidly increased. At the age of twenty-two, five years from the time that he commenced life for himself, by the honest earnings, he had accumulated enough money to enter into the general merchandise business at Prospect, with his half-brother. The partnership lasted about four years when he bought out the interests of his brother, and continued for himself four years longer. Disposing of the same, he removed to Franklin, Penn., purchased

the United States Hotel there, and conducted it until April, 1867. He next went to Indianapolis, Ind., bought out what was then the Palmer House, and presided over it until July, 1868, when he removed to Macon City, Mo., and purchased the North Missouri Hotel, which he managed until 1873. In September of that year, he came to Chicago, and bought a one-third interest in the hop, barley and malt firm of Mr. Lidell, afterwards known as Hull, Lidell & Watkins. Their warehouse and office was at that time situated at Nos. 131-33 Lake Street. The partnership continued about four years, when Mr. Watkins bought out the interests of his partners, and is, for the past three years, he and Mr. Watkins became a member of the Board of Trade in 1876, and is now one of its most active promoters. He is a member of Landmark Lodge, No. 422, A. F. & A. M.; of Fairview Chapter, No. 161, R. A. M.; of Montjoie Commandery, No. 53, K. T.; and the Union League and Douglas Clubs. He represented the people of the Fourth Ward in the City Council for one term. Mr. Watkins has always been identified with the Episcopal Church. He is now, and has been for nine consecutive years, treasurer of St. Mark's Church of this city. He was married, in 1862, to Miss Joanna Fretts, of Richfield Springs, N. Y. He has a beautiful residence at No. 3536 Lake Avenue, which he built the year he came to the city. Mr. Watkins's career has been a success in every sense of the word. He began life at the very lowest round of the ladder, elevating himself, by his own efforts, into position and influence, in this the great metropolis of the plains. He has preserved his honor unshaken, accumulated a handsome fortune, and won the esteem and confidence of the thousands who have known him.
HISTORY OF CHICAGO.

212

The developments of the wonderful growth and prosperity of the City and the Northwest. The cereal crops of the country, excepting wheat, though abundant, were not quite equal in their value, but of a better quality. There was an increase of corn receipts of fifty per cent. The movement in oats was larger than ever before, and also in barley. There was not only a gratifying increase in the number of cattle and hogs received over 1879, but an extraordinary increase in their value, over any previous year, in the history of this important branch of Chicago trade. The foreign trade of the country continued to exhibit an increasing balance sheet, in favor of the United States, although the aggregate tonnage of direct exports from Chicago to Europe was less than in 1879.

Ocean Carrying Trade.—The total foreign tonnage entered at the seaports of the United States in 1860 amounted to 1,608,291 tons, in 1880, to 12,112,160 tons, while the American tonnage so entered was actually less in 1880 than in 1862. Within that period the tonnage engaged in the American trade, owned by the greatest customer, Great Britain, has steadily increased, and now constitutes more than half of the whole; but the most notable changes have been in vessels carrying the flags of other European nationalities. Scandinavian tonnage has increased from 42,672 tons in 1860, to 1,304,070 in 1880; German from 2,562,828 to 1,080,740; Italian from 31,501 to 612,584; Belgian from 640 to 226,349; Austrian from 5,494 to 20,349; all maritime nations largely increasing their tonnage, excepting our own. A very large portion of this trade is carried in bottoms not only foreign to us, but also to the nations to or from which the cargoes are taken. The question of remedying this condition of things, humiliating as it is to the people of the United States, is daily growing in importance, and its solution is engaging the serious attention of American merchants and statesmen.

Transportation.—The carrying trade continued much the same as in 1879. The successful entrance into the city of two new railroads, the Grand Trunk, in February, and the Wabash, St. Louis & Pacific, in August, gave increased facilities to shippers, and added new complications, rendering combinations and pooling more difficult of success.

More Room.—The question of enlarging the accommodations of the members for doing business had been raised and discussed as early as 1872. Each year it was debated with increasing interest, the advocates for a change at length constituting a majority. After the last annual meeting, steps were taken by the Board of Directors to purchase the ground and erect a new building at the south end of LaSalle Street, and a proposition to that effect was submitted to the members, at the annual meeting of 1881.

Commissions.—The following is the schedule of commissions adopted by the association and now in force as proper charges for selling grain and property:

For selling seeds in quantity............ 2 per cent.
For selling dressed hogs in car-loads..... 1 1/2 per cent.
For selling bran, shorts and mill stuffs..... $5 per car.
For selling corn meal and mixed feed..... $4 per car.
For selling broom corn.................. 10/G per lb.

Edward & Guhl.—This firm of commission merchants was established in 1879, by Ebenezer Edwards and Frederick H. Guhl, who were, prior to their embarkation in business, employees of commission houses on South Water Street, for a number of years. The firm, besides a specility of vegetable produce, and only handles car-load lots, its business being principally directed to the supply of other States, chiefly the Southern markets. It pays particular attention to the supply of potatoes, and has large bulk houses in different foreign seaports. Its quarters on South Water Street are conveniently situated, being located on the river and at the foot of Dearborn Street. It employs eleven men and in about the present, and does a business they consider successful.

Ebenezer Edwards was born in Wales, Great Britain, on September 20, 1851. He was brought up and educated on English soil, and after completing his studies at the grammar schools, entered business life as a clerk. In 1877, he came to America, and located in Chicago, going into the employ of J. M. Kingwell & Son, commission merchants. He was with that firm two years, at the end of which time, in company with his present partner, F. H. Guhl, he established his existing business. Mr. Edwards is one of the energetic business men of South Water Street, and has already built up a large trade in his line. He is a member of the Produce Exchange; also of Covered Wagon Lodge, No. 54.

Mr. Edwards was married, at Northampton, England, on August 2, 1871, to Miss Mary Baker Martin. They have three children,—

Annie May, William and Herbert.

Frederick H. Guhl was born in Germany, on January 22, 1839. His parents came to this country in 1858, and located near this city, where M. Guhl was educated in the common schools. In 1870, he commenced business life by going into the commission business, and becoming a partner in the firm of Handy & Co., at Nos. 213-15 South Water Street. This house was quite successful until the fall of 1871, when its business was swept away. M. Guhl lost all, and was unable to resume business for himself until some years after the great fire. In 1875, he formed a co-partnership with a Mr. Howes, under the firm name of Howes & Guhl, at No. 31 South Water Street. They continued in business for about two and a half years, when, in the spring of 1878, M. Guhl took a position in the commission house of Thomas Morehouse, where he remained three years. In 1879, he went into business with Ebenezer Edwards, his present partner; they have been very successful in the prosecution of their business. M. Guhl is a member of St. Bernard Commandery, K.T., and is also identified with the Turn-Gemeinde of the North Side. M. Guhl was married, in this city, on November 19, 1873, to Miss Agnes Blasheg. They have three children, William, Edward and Edith.

William Taylor Baker, of the firm of William T. Baker & Co., commission merchants in grain and provisions, is the son of Wm. and Matilda Baker, and was born at West, Winn, O., on September 11, 1841. He began commercial life at fourteen years of age, as clerk in a country store at Groton, N. Y., with H. K. Clark; afterward he was employed six years by D. B. Marsh & Co., of New Haven, N. Y. In 1861, he came to Chicago, Ill., a bookkeeper with Hinckley & Handy, commission merchants, who were then in the old Board of Trade Building, on South Water Street, with whom he remained several years, succeeding to an interest in the business upon the retirement of Mr. Handy. In the following year the firm of Hinckley & Baker dissolved partnership, Mr. Baker continuing the business. During 1868, he formed a partnership with C. A. Knight and W. P. Cobb, under the firm name of Knight, Baker & Co., which continued until 1872. When Mr. Knight retired and the firm was known as W. T. Baker & Co. Immediately after the fire of 1871, the firm occupied temporary quarters in the Wigwam on LaSalle Street, afterward moving to No. 86 LaSalle Street, where they remained seven years, when they removed to offices in the Chamber of Commerce. In the spring of 1885, upon the completion of the new Board of Trade Building, the firm removed to 240 LaSalle Street, the present location of the firm. Mr. Baker is a genial, pleasant gentleman, of sterling integrity and worth, and is held in high esteem by business and social circles.

Walter Franklin Cobb, of the firm of W. T. Baker & Co., commission merchants in grain and provisions in grain at the present time, was born at Newburyport, Vt., on January 18, 1844. When he was two years old, his parents came West, and settled in this city, where he received an excellent business education. In 1861, he began his career as a messenger and clerk in the banking establishment of J. M. Adsit, on Clark Street, with whom he remained until the deprecation of State currency rendered his services unnecessary, his duties being in that department. He then engaged as bookkeeper with C. S.
Hutchins & Co., commission merchants on South Water Street, where he continued four years, subsequently becoming a partner in the firm of C. A. Knight & Co. He was afterward connected with the firm of Knight, Baker & Co., and upon the retirement of Mr. Knight, in 1872, he continued the business with Mr. Baker, as a member of the firm of W. T. Baker & Co. They were located at No. 36 LaSalle Street for seven years, and removed from their offices in the Chamber of Commerce, in the spring of 1885, to their present quarters, No. 240 LaSalle Street. Mr. Cobb was married on May 31, 1877, to Miss Carrie J. Fish, niece of C. P. Kellogg, of Chicago.

William M. Gregg was born at Carlisle, Penn., on January 11, 1831, and received his education there. His parents came West in 1836, locating at Monmouth, Ill. He began his business career in the employ of the First National Bank of Monmouth, and was for some years cashier of that institution, remaining in its employ about five years; after which he was extensively engaged in the lumber trade until August, 1851. A year later, he came to Chicago, and entered the commission business, as a partner in the firm of T. W. Hallam & Co. In 1871, he became associated with David Kankin, under the style of Gregg & Kankin. This concern dissolved in 1876, and Mr. Gregg established the firm of Gregg, Son & Co., of which he is still the senior member, his son Charles O. Gregg being his partner. The firm does a large business, and is well and favorably known to the trade. Mr. Gregg has been a member of the Board of Trade since his arrival, here, and was elected a member of the Committee of Appeals in the spring of 1883, for a term of two years.

1881.

A very considerable change occurred in the membership this year, which numbered, at its close, one thousand nine hundred and thirty-six. Of these seventy-four were admitted by initiation prior to the advancement of the fee from $1,000 to $2,500, in February, and sixty-nine immediately preceding the advance in October, from $2,500 to $5,000. Two hundred and fifty-two new members were admitted by approved transfers. The mortuary list numbered eighteen, including the names of George Armour, a former president of the Board, and George F. Rumsey, for many years its treasurer. The assets of the association at the close of the year were as follows:

```
Invested securities .................................. $167,995 54
Cash on hand ........................................ 122,563 87
$290,559 41
```

The current year's receipts and disbursements, showing a very large increase, were as follows:

```
RECEIPTS.
For annual assessments, 1896 members, at $20.00 each ................................ $38,720 00
 Fees from 252 transfers ................................... 2,520 00
Sale of tickets .......................................... 9,830 00
Table and drawer rents and fines ...................... 7,921 00
Interest and dividends .................................. 13,918 12
 Initiation fees (7 at $1,000, 69 at $5,000) ........ 246,500 00
Total .................................................. $319,419 12
Cash on hand ........................................... 6,247 34
$325,666 46
```

```
DISBURSEMENTS.
For rent, water, heating, salaries N. and elevators .................................. $43,302 77
Market and annual reports, and telegraphing ......... 6,896 98
Stationery, printing, postage, gas and ice .......... 1,444 93
Taxes, repairs, statistics and tlers. .................. 3,116 74
Expenses of lavatory and sundries .................... 1,725 10
Legal expenses and counsel fees ...................... 2,571 40
Expenses Commercial Building ......................... 1,675 19
```

The proposition to erect a new Board of Trade Building having been accepted, $40,000 of the above mentioned sum was appropriated for a site therefor, and $100,000 to the Board of Real-Estate Managers as a basis for a building fund.

BOARD OF REAL-STATE MANAGERS.—This body was created by Rule No. 2, adopted this year, and to it is committed the control and management of the real-estate owned by the Board. It is composed of the president and four other persons of special qualifications, two of whom are elected annually on the first Monday of March, to serve two years. It was authorized to accept plans and estimates for the construction of the new Exchange Building, to borrow money, arrange for a deed of trust, and to issue bonds for said purpose.

The year 1881 was one of varied experiences, of unusual excitement and extraordinary events. The winter of 1880-81, was intensely cold, of long duration, and was followed by remarkable overflows and floods in the spring. Added to this was a protracted railroad war, and the assassination of President Garfield. Each one of these occurrences had a direct and tangible effect upon the business of the country. It was a year of short crops, and in some sections, especially in Illinois, the failure was severely felt. Having to contend against a bounteous harvest in Europe, the exports of cereals was reduced 69,000,000 bushels; yet the shortage in this country gave an increased value to the produce marketed, and although the trade was much less in volume than in 1880, the money value was enhanced.

Trade in other departments of business, outside of produce, was of a larger volume than in any previous year. As an index to the growth of commercial transactions, the clearings of the associated banks of the city which, in 1877, were $1,044,678,475 had advanced to $1,725,684,894 in 1880, and to $2,249,097,450 in 1881, more than doubling in five years.

TRANSPORTATION.—The combination of leading railways for the maintenance of agreed rates, which had heretofore existed, was disrupted in June, from which time special rates were made as circumstances might seem to warrant, regardless of existing tariffs. In some instances, rates as low as ten cents per one hundred pounds from Chicago to New York were conceded. The contest over freights was extended to passenger rates, and they were lower to Eastern points than ever before known—as low indeed as $5 for fare to New York and Boston. The shipment of grain to New Orleans, which attracted considerable attention in the early part of the year, diminished as the season advanced, so that, as an aggregate, the entire movement of the year, by that route, was only about eighty-three per cent. of what it was in 1880, becoming still more insignificant in the closing months.
FRANK G. KAMMERER is one of the very few business men of Chicago who, in a comparatively short period of time, have been able to firmly establish themselves among the ablest and most untiring competitors of the most enterprising city in the world. Coming here only six years ago, from Washington County, Penn., where he had risen to the position of a leading merchant and manufacturer, Mr. Kammerer at once engaged in the grain and provision trade, and, by his energy and business foresight, he has made the house of F. G. Kammerer & Co. a synonym for fair dealing and stability. He has been a prominent member of the Board of Trade since coming to Chicago, in 1878, and in January, 1884, was honored by being elected a member of the Committee of Arbitration.

Charles B. Eggleston, dealer in grain and provisions, was born at Cincinnati, Ohio, on August 23, 1850. His father, D. Eggleston, was in the transportation and general commission business at Cincinnati, and acquired a large property. He freighted goods from New Orleans and intermediate points, by steamboat to Cincinnati, by canal to Toledo, by lake to Buffalo, and by the Erie Canal and Hudson River to New York. He owned a line of canal-boats, and did a very large and successful commission and forwarding business for many years. He died in November, 1878. Charles was his only son. At the age of sixteen he left school, and went into the grain, flour and provision trade, and by attention to business and strictly fair dealing he had accomplished success before he sold out to come to Chicago. He came here in the winter of 1871, and until 1876 was in partnership with his father, under the name and style of D. & C. Eggleston. In the latter year, they separated, although the style of the firm remains unchanged. Upon the organization of the National Elevator and Dock Company, in November, 1855, Mr. Eggleston was chosen vice-president—which office he still retains. He has been a member of the Board of Trade since 1871. He is a member of the Methodist Episcopal Church on Michigan Avenue, and belongs to Oriental Lodge, No. 33, A.F. & A.M.

Mr. Eggleston was married to Maggie B. Ward, a daughter of Dr. D. E. Ward, of Cincinnati, on May 8, 1871. They have one child.—Charles Evans.

Edward Lees, of the firm of Lees, Hendricks & Co., meat packers and dealers, was born at Buxton, Derbyshire, England, on July 25, 1839. Until he was fourteen years of age, he attended school, gaining an excellent commercial education, and then began business life as an apprentice in the meat-packing trade. In 1857, he came to this country, and was engaged in the same business with Charles Taylor, in New York, until 1863, when he came to Chicago as meat inspector for J. K. Fisher, on South Water Street, with whom he remained one season. He took charge of the packing house of R. M. Graves & Co. in 1864; they were succeeded by Davis, Pope & Co., and he continued in the employ of the latter firm two years. At the end of that time, he began business at Twenty-second and State streets, and conducted the same until 1872, when he associated himself with A. J. Conigan, O. M. Huff and R. J. Hendricks, under the firm name of Lees, Conigan & Co., at Nos. 467-69 Canal Street. In the following year, the firm was changed, by the retirement of Mr. Conigan, to Lees, Hendricks & Co., Mr. Huff continuing with the firm until 1875. After a temporary suspension of active business, the firm resumed at Nos. 2639-37 State Street, with Thomas H. Miller as a member. Mr. Lees was married, on October 17, 1864, to Miss Ellen Elliott, of New York. They have one child.—William H.

1882.

This year the number of members remained the same, after two hundred and seventy-two transfers and ten removals by death. There were no initiations.

The assets of the Board were invested as follows:

<table>
<thead>
<tr>

The increased expenditures for the year arose from the extraordinary amounts paid out for law suits. Among these were proceedings to nullify the vacation of that portion of 12A Selle Street, on which the Board proposed to erect its new Exchange Building. Other suits also grew out of the proposed removal from the Chamber of Commerce building. The Board was also made defendant in a number of suits by parties interested in "bucket shops," the claim being made that they had a right to all the information secured through telegraphic communication with the exchange room. The result of this litigation was in favor of the Board, the courts deciding that it had a right to control its own market reports.

The business of Chicago for the year 1882, while it had its drawbacks, uncertainties, and solicitations as to its final outcome, was by no means a period of less than considerable prosperity. The wheat crop was saved in fine condition, and was unprecedentedly large, while the yield of corn, notwithstanding the wet and cold weather of the fall, was greater in this State, and in the United States, than in 1881. The grain and provision market was active during most of the year, having an unusual speculative tendency; and while the trade of the city in agricultural products generally was less in volume than for several recent years, it had a greater monetary value than ever before.

Manufacturers.—Local manufacturing interests were prosecuted with increased vigor, and were generally in a prosperous condition, excepting, perhaps, such as were engaged in the production of iron. This branch of business seems to have been overdone, and in addition was greatly embarrassed throughout the country by demands of operators for increased wages.

The export trade was far less in volume and value than since 1879, while there was an increase in imports of over $50,000,000. A very large decline is also to be noted in the quantity of produce shipped from Chicago to Europe on through bills of lading, the aggregate being but 332,279 tons, against 616,718 tons for 1881. Transportation.—There was substantial harmony between railway lines in carrying freight to the seaboard. An arrangement was concluded during January which resulted in the maintenance of uniform rates. For several weeks near the close of the year a war of rates between the railway lines extending into Minnesota prevailed, and was carried on with bitterness for some time, in regard to which producers made no complaint. Lake freights averaged even lower than in 1881. Rates to Buffalo were not quite so low, but the season of low rates lasted much longer. Ocean freights, owing to light shipments hence to Europe, ruled unprecedentedly low.
united after midsummer. In the spring months grain was taken for ballast to a considerable extent, and in some instances a small premium was paid for the privilege of carrying it. The withdrawal of a large number of steamers in service of the English government caused an advance in rates, which were thereafter well maintained.

Milton C. Lightner was born in Montgomery County, Penn., in December, 1840. His father was an Episcopal clergyman, and sent his son to Racine, Wis., in 1860, to complete his education at the well-known Episcopal institution, Racine College, where he graduated in 1871. Mr. Lightner spent his vacations in Chicago, and shortly after his graduation he took up his permanent abode here, entering, in the summer of 1871, the employ of the Second National Bank, and remaining with that concern until its failure in 1873. He was then with the Merchants' National Bank until April, 1875, when he entered the employ of McCormick, Adams & Co., commission merchants. In January, 1876, he became associated with Ernest Smith, and formed the commission firm of Smith & Lightner, which was succeeded, on November 1, 1881, by Ellis & Lightner. This firm built up a very large business, and were the principal brokers in the famous "McGeech land deal." In the summer of 1883, the failure of which ruined them, and in August of that year the firm dissolved. In the following September, Mr. Lightner associated with him his present partner, Marshall P. Woolburn, under the style of Lightner & Woolburn, grain and provisions. The senior partner in the firm has been a member of the Board of Trade since December, 1873, and in January, 1883, was elected a member of the Committee of Arbitration. He is also a member of the Chicago Stock Exchange, the Chicago and Union clubs, and is a director of the latter. In 1881, he was elected a member of the board of trustees of Racine College, being the first of its graduates to hold that distinguished position.

Charles Floyd, dealer on the Board of Trade, was born in the City of New York on November 27, 1828, and is a son of Jra and Sarah (Mitchell) Floyd. He was educated at his native place. After leaving school, he went to Mexico, where he fought under General Winfield Scott in the Mexican War. Upon the close of hostilities, he lived in Texas four years, and was one of the Texas Rangers. He then went to Richmond, Va., and engaged in busi ness, which he continued until the commencement of the War of the Rebellion, when he entered the Confederate Army, and served as a major under Generals Lee and Johnson until the close of the War. He returned to Chicago, and in 1866 commenced opera ting on Board of Trade, which he has since continued with that varying success attached to all lines of business. Mr. Floyd is a member of Richmond-Randolph Lodge, A.F. & A.M., of Richmond, Va.; also of the Commandery of Knights Templar, Petersburg, Va. In 1835, he married Miss Helen Parmelee, a native of Vermont. They have seven children.

Charles Edwards is the son of Dr. E. W. and Catherine R. (Dif- fendener) Edwards, and was born at Baltimore, Md., on November 11, 1834. His father came to Chicago in 1860, and Mr. Edwards, who came here with him, after attending public and private schools, entered the University of Chicago in 1868, but left it in 1870, and commenced operations on the Board of Trade. He was first in the employ of Culver & Co., in the old Board of Trade building, where he remained for two years; then with Dennis & Ingham, No. 157 Washington Street, until 1876. In May, 1877, he began business for himself, under the firm name of J. A. Edwards & Co., having an office in the Watson Building; next the old Board of Trade Building, on Washington Street, where he remained until the new building was opened, when he moved to the Counselman Building, on LaSalle Street. He is a member of Ashlar Lodge, No. 908, A.F. & A.M.; of Lafayette Chapter, No. 14, A.O. of the Chicago Branch of the Commandery of K. T. Mr. Edwards was married to Minnie E., daughter of J. E. Paine, of Brooklyn, N. Y., on April 12, 1882, and one boy, who died in infancy, was born to them.

1883.

The number of members who paid their annual assessments was one thousand nine hundred and thirty-six. Of these three hundred and fifteen were admitted by approved transfers. There were no new members by initiation, and the death list numbered fifteen. The assets were as follows:

Invested securities......... $ 83,725 78
Cash on hand.............. $5,178 99

The receipts and disbursements for the year were as follows:

**Receipts.**
Annual assessments................ $ 53,720 00
Transfers of membership........... 3,215 00
Clerks' and visitors' tickets....... 41,298 00
Table and drawer rents and pre miums........................... 6,070 00
Interest and dividends............. 10,664 57
Sale of securities................. 148,026 25

**Total Receipts**........................................... $315,506 41

**Disbursements.**
Rent, heating, salaries and elevator $ 47,297 57
Market and annual reports and taxes................................. 8,723 70
Printing and stationery............... 1,162 47
Repairs, lavatory and sandries........ 3,019 83
Legal and court expenses............. 17,557 80
Taxes on new building................. 5,901 59
On account of law investigations..... 3,266 74
Interest on bonds issued for building 34,611 25
Miscellaneous items.................. 3,759 47
Paid real-estate managers........... 100,000 00

**Total Disbursements**.......................... $281,506 41

At the beginning of the year the Board found itself involved in about sixty law suits, which accounts for the large item of legal expenses in the above table. Among these were the "bucket shop" suits, before mentioned, and others involving the validity of contracts for future delivery, and the right of the Board to discipline its members. All of these were decided in favor of the Board. The question as to whether or not memberships are personal property, subject to taxation and attachment, or simply franchises, as contended for by the members, was also ruled in their favor.

An additional sum of $100,000 was appropriated towards the construction of the new Exchange Building. In consequence of the increased expenses incidental to the change of location, the directory advanced the annual dues to $30.

During the year the rules, which were found to be in bad condition from frequent modifications, were revised and reprinted.

**Clearing-house.**—Under these revised rules a clearing-house was established, and the committee having the same in charge made frequent reports of progress and of the successful workings of the institution. This meets a want which has long been unsupplied.

**General Trade.**—The transactions of the Board of Trade in 1883 point to the fact, that while it was a fairly active year in business affairs, indicating in many directions a healthy growth and the accumulation of substantial wealth, yet in some branches of industry there was more or less of stagnation and depression. The receipts of wheat in Chicago were less than in any year since 1877; the trade in farm products as a whole, however, was larger in the quantity handled than in the last year, the increase being large in oats, corn, rye and barley. The receipts of corn were the largest in the history of the trade except in 1880-81, and more than fifty per
cent. over those of 1882. The receipts of live stock show an increase in every kind except hogs. There was a radical shrinkage in the price of hogs and cattle, and a large falling off in the prices of wheat and corn. The receipts of lumber and salt were less than last year, with an increase of $2,000,000 in tints.

Shipsments from Chicago to Europe on through bills of lading, were greater by 132,000 tons than in 1882, Fresh beef, which is largely shipped in this way, is not billed through from the city, and hence is not included in the above estimate.

Prohibition of American Pork—France, followed in March by Germany, issued a decree entirely prohibiting the importation to those countries of American pork for consumption. The alleged cause of the prohibition is the assumed unhealthfulness of that article of food. This action in France was regarded as being so unwise and impolitic that, in November, the decree was rescinded by the Ministry, but was immediately re-enacted by the Chamber of Deputies. It has been urged that the real object of the prohibition, thus disguised, was to protect the home product of these countries against the cheaper meats of the United States. A commission was appointed by the President of the United States to make a thorough investigation of the whole subject, for the action of our Government.

Transportation.—The Chicago & Atlantic Railroad was opened for traffic eastward early in the year, forming, with its connection, the New York, Lake Erie & Western, a direct line to the seaboard. Lake freights on grain averaged higher than in 1882, and the larger class of vessels were operated with fair profit.

A renewed interest was awakened in reference to the continuation of the Henry Clay & Mississippi River canal. The Government survey ordered by Congress was most satisfactory, the report of the engineer showing the project to be not only feasible but less expensive than it had been supposed.

George F. Stone, secretary of the Chicago Board of Trade, was born at Newburyport, Mass., on April 24, 1836, and is the son of Jacob and Eliza (Atkins) Stone. He was reared in his native town, receiving his preliminary education in its public schools. Here he afterward attended Dunham Academy, at which place he finished his academic studies. He then went to Boston, and entered the counting-room of Denny, Rice & Gardner, a large and wealthy dry-goods commission house, which is still in existence. In 1850, he was enabled to enter business on his own account, and he established the firm of Lord, Stone & Co., flour, grain and produce commission merchants, and in a short time the house was among the largest firms in that line of business. In 1853, Mr. Stone had the distinguished honor of being elected to the presidency of the Corn Exchange of the City of Boston, and was re-elected to the same office the following year. He had previously served as director and vice-president, and his election to the presidency indicated the esteem and favor in which he was held by the business men of Boston. He resided at Melrose, a beautiful suburban seven miles from Boston, while he was a merchant in the latter city, and was actively identified with the history and development of that town. For several years he was a member of the Board of Selectmen, chairman of the school committee, and served in different positions connected with the vital interests of the place.

Mr. Stone, during all his life, has been greatly devoted to literary pursuits and studies, and as an orator he has been somewhat conspicuous, having, during his residence at Melrose, Mass., delivered several addresses on notable occasions. Upon the invitation of the citizens of Melrose, he delivered the address upon the dedicating of their new Town Hall, on June 17, 1874. Mrs. Louisa Parsons Hopkins, author of "Motherhood," "The Path of Field and Shore," and other poems, also a distinguished writer on the science of Pedagogy, is a sister of Mr. Stone. During the Rebellion, he was very active in supporting all war measures, by contribution of money and dollars, and by speeches upon the question of the day, arousing much enthusiasm among the Eastern people, and always devoting his energies to the great cause and the aid and comfort of the soldiers and sailors of the Union. Two brothers, Captains Goodwin A. Stone (salutatorian of the 1862-class of Harvard), of the 21 Massa-
DISBURSEMENTS.

CALL BOARD.—This organization was dissolved this year, immediately following which event an afternoon session of the regular board was established, for the purpose of filling late orders, aiding largely in doing away with irregular trading and curbstone quotations.

GENERAL TRADE.—The year 1884 was one of general business depression and diminished values, not only in Chicago but in all the marts of commerce in this country. Its disappointments, failures and disasters were foreshadowed by the great fall in prices of 1883, and the gradual wasting of surplus earnings. There were 11,620 failures, being an increase of twelve per cent. over 1883, and a greater number than was ever before recorded. Undue speculation began in 1879, increasing each year without regard to well established conditions, and, being out of proportion to surplus revenues, could but have an unprofitable and disastrous termination. Reckless speculation in Wall Street, complicated by the grossest frauds, was followed by the failure of Grant & Ward, the Marine Bank, and the serious crippling of others. Then came the shrinkage in the value of stocks, and a further decline in wheat, corn and provisions and nearly all kinds of merchandise. Add to these the further facts of a plethora of goods in the hands of the manufacturers, large crops all over the world, and that this was a presidential election year, and the unfavorable commercial record of the period is complete.

The business of the exchange, though sharing in the general depression, was exempt from any serious embarrassment, and its members were able to handle the immense crops which were poured into the city, with their usual energy, sagacity and success.

The receipts of wheat were 26,397,587 bushels, an increase, over 1883, of 6,933,432 bushels; and the shipments amounted to 21,046,577 bushels, which were 9,317,823 in excess of the previous year. The exports exceeded those of the last year by 7,183,800 bushels. The average price for No. 2 spring was 83 3/4 cents per bushel. The movement of corn was less than in 1883. There was a wide range in the price, being from 34 3/4 to 87 cents. In September, a control of the market was perfected, and prices went up or down as the operators desired. So completely masters of the situation were the managing brokers, that they would bid 90 and 95 cents, with no corn to be sold. The average price for the year was 51 1/2 cents.

The crop of oats, 583,628,000 bushels, was the largest ever grown in this country, and that of Illinois, viz. 125,314,958 bushels, was larger than that of any other State. Prices averaged from 23 to 34 1/2 cents.

The following table shows the highest and lowest prices for No. 2 spring wheat, No. 2 corn, and oats, each year since 1872:

The amount of direct shipments to Europe was somewhat in excess of the average for the last three years, but 52,869 tons less than in 1883, the decrease being mostly in excess, flour, cheese and oil cake. There were about 300,000 bushels more of wheat, and 1,000,000 pounds more of butter exported than in 1882.

TRANSPORTATION.—Rates of railway freights are recorded for this year "vaccillating and disturbing," with by no means a strict adherence to published tariffs. Lake and canal rates were lower than for many previous years. In August, the average rate by Lake for wheat was 4 3/4 cents per bushel from Chicago to Buffalo, and for corn 3 8 cents. From Buffalo to New York, by canal, the rate was 1 94 for wheat, and 1 69 for corn.

Following is a table from the valuable report of Secretary Stone, giving the rates on wheat and corn by lake and canal from Chicago to New York, since 1872:

| Year | Lake | Can.

THE RECEIVERS' ASSOCIATION.—This is an organization which has been formed to act directly and especially in view of the interests of shippers and receivers, and the maintenance of such regulations as will promote the interests of both these departments of business. It is efficiently managed by George M. How, president; George H. Stickwell, vice-president; A. M. Henderson, treasurer; H. H. Carr, secretary.

A. H. B. Hewett was the son of Jephtha and Lurancy (Butler) Hewett, and was born in Peru, Clinton Co., N. Y., in 1820. After completing his education at an academy in Plattsburg, N. Y., he entered the Redford Glass Company, at Redford, N. Y., for two years, and then for various parties during the next four years, when he opened a general merchandise store at Plattsburg. He carried this on for about seven years, and then went into the foundry business, abandoning this, three years later, for the milling and flouring business, which he gave up in 1857, and moved to
Milwaukee, Wis., where he carried on a wholesale grocery store for about thirteen years. Subsequently, for about three years, he followed the same line in New York City. He came to Chicago in 1873, and at once became a member of the Board of Trade, and engaged in the grain and commission business. He was married to Frances H., daughter of Kesselaar Bailey, a pioneer of Chicago, in 1869, and has one son.

William N. Brainard, who has been a resident of Chicago for twenty-eight years, and during that time prominently identified with important interests, was born at Dekyuter, Madison Co., N. Y., on January 7, 1823. His education was acquired at the DeKuyter Institute, from which school he graduated. The first twenty-two years of his life were spent in and around the neighborhood of his native town. He taught school during the winters and read law, finally being admitted to the bar. In 1845, he moved to Rome, N. Y., and engaged in the warehouse and transportation business until 1850, when the fame of "Golden California" induced him to visit the Pacific coast. He did some mining on the North Fork of the American River, near what is known as Cape Horn, on the Central Pacific Railroad. He then went to Sacramento, and engaged in the produce commission business, which he followed until 1856, when he was elected city treasurer. At the expiration of his term, the following year, he returned to the "States," and in the spring of 1858 made Chicago his permanent residence. He then entered the grain trade, with which he has been more or less connected until the present time. Mr. Brainard has filled almost every position in the gift of the Board of Trade, of which he is a member, having been a director, member of the committees of appeals and arbitration, vice-president of the Board, and president of the call-board. In 1857, he was appointed canal commissioner by the Governor, and served until 1861. During his term of office, the Peepers Creek lock and dam was built. In 1858, he received the appointment of railroad commissioner from Governor Hamilton, a position he filled until 1859, when his term expired. Mr. Brainard is a pleasant companion, with a large fund of reminiscences, which are interesting to hear. He carries his sixty-two years easily, and does not look his age as he walks jauntily step along the street. Mr. Brainard was married, at Syracuse, N. Y., on May 4, 1853, to Melinda B. Coley. They have had two children,—William Vallejo, named after the famous General Vallejo, who was an intimate friend of Mr. Brainard; and a daughter, Frances M.

1885.

On two occasions only since the War of 1861-65 has any one member of the Board been honored by a re-election to the office of president. The first of these was in 1872, after the destruction of the old Chamber of Commerce, by fire, and the erection of the new building when J. W. Preston was re-elected; and the other in 1885, while the new Board of Trade building was being constructed, when that honor was accorded to E. Nelson Blake. James H. Milne was elected vice-president, George F. Stone re-appointed secretary, and Orson Smith, treasurer.

Charles S. Fellows was appointed assistant secretary.

The number of members at the close of the year was nineteen hundred and twenty-five. There were one hundred and ninety-three transfers, and the honorary list numbered twelve. The assets of the Board were $500,000 of the stock of the Chamber of Commerce, which cost $18,792.32, and the cash on hand.

The financial statement for the year is as follows:

The financial report of the real-estate managers, to November 15, showed, receipts $351,351.45, and disbursements the same, including $48,385.74 for expenses of the new building.

The assessment of dues for 1886 was fixed at $75. The outlook at the beginning of 1885, was gloomy and discouraging. Over-trading and over-expansion in previous years led necessarily to a general cutting down of expenses, the discharging of employés, and curtailment of business. These measures, in many instances, were followed by labor strikes, and for a while the furnace was out of blast, and the smoke-stack of the manufacturer gave forth no sign of busy work. Three months were occupied in making indispensable repairs, then came signs of improvement. Whatever else may happen, there is a constant and certain increase of population, and the consumption of needed merchandise and products must continue; reduced stocks, to supply the demand, must needs be replenished, and then the wheels of trade and commerce once more begin to move. The business of the merchant and manufacturer revived. The low price of materials, and the difficulty of finding profitable employment of money in other directions, gave a renewed stimulus to building.

Although failures during the year were numerous, but not equaling those of 1884, those on the Board of Trade were few and unimportant. Numerous attempts were made to obtain organized control of the corn market, but none of them succeeded.

Hog-Packing and Provisions.—In this important branch of trade Chicago continues to maintain its pre-eminence as against any other point in the world. In the capacity of its packing houses, in the number of hogs received and actually handled, in the enterprise of the capitalists and dealers engaged, and in the amount of money invested and employed, Chicago occupies the leading position in the meat trade, without a rival. The daily killing capacity of the packing houses in the city is 75,000 hogs. In the slaughtering business the capital invested is $12,000,000, the number of hands employed from 12,000 to 15,000, and the amount of money disbursed in wages aggregates over $3,500,000. During the calendar year of 1885, the number of hogs packed was 5,002,663, as against 3,834,688 in the year 1884. The tendency of prices was downward throughout the year, and it required close figuring and untiring vigilance to make a small margin of profit.

An Era of Low Prices.—The lowest average of prices for the past twenty-five years, counting the relative values of articles consumed, is that of 1885. The general level for the year was twenty per cent, below that of May, 1866. In 1878, the lowest prices were reached; previous to which, the general average was eighty-three, compared with one hundred in 1861. The average for 1885, as compared with 1866, was 78.53.

The following table shows the average annual prices
of a number of leading articles, in the Chicago market, since 1872. It is compiled from the yearly averages given in the Chicago Tribune’s annual reviews for each of the years named.

**Important Action.—** Among the important acts of the Board, during 1885, were the following:

The action taken to prevent the "bucket shops" from obtaining quotations, which led to a controversy with the "Open Board."

The rules were amended permitting the trading in small lots in grain and provisions, the effect of which was to add largely to the business of its members.

The penalty prescribed for doing business at less than a stated rate of compensation was abolished in November.

The "call board" being restored, after removal into the new building, was, after a brief trial, discontinued.

The new Board of Trade building was opened for business on May 1.

**New Board of Trade.—** The new temple of commerce, undoubtedly the most splendid and costly structure of the kind in the world, was formally dedicated on April 29. The ceremonies were brilliant and imposing. Delegates and invited guests were present, in large numbers, from Liverpool, Toronto, Montreal, New York, Philadelphia, Boston, Baltimore, St. Louis, Milwaukee, St. Paul, Minneapolis, Nashville, Providence, Richmond, Denver, Indianapolis, Sacramento, Mobile, Dubuque, and other places. These, with the members, composed an audience of over four thousand persons.

President E. N. Blake presided. The exercises began by the dedicatory prayer by Rev. Dr. Clinton Locke. Following this, John R. Bensley, on behalf of the Board of Real-Estate Managers, delivered the keys, and turned the building over to the Board of Trade in an appropriate address. This was responded to, in behalf of the association, by its president. Hon. Emery A. Storr, then delivered the oration of the day, in which the history, objects, and achievements of the Board and its members were eloquently portrayed. Speeches were then made by Hon. Edward Kemble, of Boston; Hansford White, of Liverpool, England; C. B. Stone, of San Francisco; J. H. Herrick, of New York; E. O. Stannard, of St. Louis; Sidney D. Maxwell, of Cincinnati; W. Welch, of Philadelphia, and others. In the evening, a banquet was given at the Grand Pacific Hotel, at which four hundred and fifty-seven guests enjoyed the closing festivities of this interesting and memorable occasion.

The erection of this splendid structure was commenced in 1882, the corner-stone having been laid on December 13.

It has a frontage of 175 1/2 feet on Jackson Street, at the south end of La Salle, and extends south 225 feet. The rear portion, occupied by offices, is 160 feet high, and the front, containing the exchange hall, is 140 feet in height, and is surmounted by a tower 310 feet above the ground—the tallest in the city. The tower is 32 feet square at the base, and is built of masonry 225 feet, where each face is supplied with a conspicuous clock-dial. From this point to the pinnacle the construction is of iron. The entrances are large door-ways, supported by polished columns of gray granite. The edifice is built of Fox Island granite, and its entire cost was $1,730,000. The exchange hall is 152 x 161 feet, and 80 feet high. The offices and rooms are elegantly finished in mahogany, with artistic wood mantels, and are finely frescoed. Taken as a whole (the hall, rooms, exterior and interior finish, furnishing and decorations), it far exceeds any other building of the kind ever erected.

1886.

At the thirty-eighth annual meeting for the election of officers, held on January 4, 1886, A. M. Wright was chosen president, and George D. Runsey, vice-president. At the annual meeting of the Board of Directors, Sidney Smith was appointed attorney of the Board, and John C. Black, treasurer.

Privileges of membership have sold, during the past year, as low as $1,650, but the price has ranged generally from $1,950 to $3,300—the selling price in January, 1886, being about $2,100.

The members have entered upon the work of the new year with encouraging signs on the commercial horizon, and are determined, by their vigilance and industry, to promote the growth and prosperity of the great city, whose progress is so well illustrated by their organization, in the coming years as in the past.

### THE OPEN BOARD OF TRADE.

The objects of this association, as expressed in its rules and by-laws, are the same as those of the regular Board. That such an organization was demanded by the advancing trade and commerce of the city, many far-sighted men busily thought before its successful operations established it on a firm foundation. One of its principal features at the beginning was to enable its numbers and customers to deal in smaller amounts of staples than was permitted on the older board, and yet preserve as strict integrity in all transactions. It commenced business, in a rather informal way, on December 15, 1877, but was not incorporated under the laws of the State until May 12, 1880. At first, a room was occupied on the Board of Trade alley; then, for two years, the basement No. 121 LaSalle Street was used, and afterward its business was conducted under the Chamber of Commerce Building. In 1882, steps were taken to erect a building of its own. A lot situated on Pacific Avenue, between Jackson and Van Buren streets, 110 x 110 feet, was leased for ninety-nine years, and an elegant and spacious building has been erected thereon, at a cost of $150,000. It is six stories in height, with a handsome face of superior pressed brick, relieved by brown-stone and terra-cotta trimmings. The main hall on the first floor is 110 x 110 feet. The Secretary's office and clearing-house are on the second floor. The offices are all connected with the
lower floor by speaking tubes. A convenient club-room for the members is at the east side, on the sixth floor.

The methods of trading are practically the same in both Boards, and many leading firms belong to both.

The number of members on January 1, 1886, was four hundred and ten. The initiation fee is now $250, provision being made in the rules that said fee shall be $500 when the membership reaches five hundred. The yearly assessment for expenses is $50. The annual elections are held on the second Tuesday in May, and the elective officers are a president and vice-president, for a term of one year, and eight directors for two years, four being elected each year.

The following is the financial statement of the association for the year ending April 30, 1885:

**LIST OF OFFICERS FROM 1850 TO 1883.**

**THOMAS MARSHAL BAXTER,** commission merchant, son of Dr. John and Cassandra H. Baxter, was born at Mount Vernon, Ohio, on November 11, 1840. Until he reached the age of six months, he was living in Michigan. He attended the public schools of his native town, and then entered the Michigan University, at Ann Arbor, from which he graduated, with honors, in the class of 1862. With the view of adopting the law profession, he attended one term in the University, and afterwards, for a time, the department of his Alma Mater, but becoming dissatisfied with so sedentary a life he went to Detroit, and became a member of the firm of Edwards & Baxter, dealers in rubber goods, etc., Wood-av-19. In 1865, the firm was dissolved, and Mr. Baxter came to Chicago, and during the ensuing years operated on Board of Trade. It was during the year 1877 that Mr. Baxter projected the idea of an Open Board of Trade; and it was through his exertions and energy that the plan took form and was placed in active operation. On account of the business failure of his colleagues shortly afterward, he was obliged to assume the entire responsibility and control of the organization, and for some time he carried on the business alone. He succeeded in inaugurating another formal organization in the spring of 1878, and, with the stimulus thus gained, the Open Board of Trade became a success and has since been in a prosperous condition. Until the building now occupied by the Open Board was erected, Mr. Baxter was located at No. 127 LaSalle Street; in May, 1884, he moved to his present quarters. Mr. Baxter was honored with the presidency of the Open Board during the four years subsequent to its organization, and has since been tendered the same honor, which he has declined because of the demands of his private business. Mr. Baxter was married, in March, 1853, to Miss Mary L. Danforth, of Ann Arbor, Mich., daughter of Hon. George Danforth.

**HENRY C. GRAY** is the son of John and Mary (Cole) Gray, and was born at Burlington, Iowa, in 1842. He was educated at Burlington College, in his native town. When about 1842, he became a clerk in the general merchandise store of George W. Gray, at Lansing, Iowa, where he remained for about three years, when he moved to Chicago, and finished a commercial college course of study. He soon was engaged in the employ of Charles Biss, who had then a cutlery store on Lake Street, and three months later he enlisted in the Army, becoming a member of the famous Mercantile Battery, composed entirely of business men of Chicago. He was taken with a branch of the service, seeing some hard fighting under Grant, in the battles and sieges which led to the capture of Vicksburg, until the battery was lost in the ill-fated Red River Expedition under General Banks. He also served under Generals Sherman and McClernand, and in the latter years of the War was under General Grierson on his expedition through Georgia and Alabama. Having served through the entire War, he returned to Chicago in 1865, and entered the employ of Biggs, Spencer & Co., cutlery, at No. 44 Lake Street, remaining with that firm until 1871, when he commenced the cutlery business for himself, having as partners Joseph H. Williamson and James F. Chess, the firm name being Williamson, Gray & Co., and their place of business at No. 34 Lake Street. The firm dissolved in 1874, and Mr. Gray entered the employ of E. R. Hood & Co., grain and commission merchants, where he remained until 1876. He was next with S. E. Spencer & Co., in the same business, for about a year, and then he established himself in the commission business at No. 133 LaSalle Street, but soon moved to No. 162 Washington Street, where he remained until the new Board of Trade building was completed, when he changed to his present quarters. He was one of the founders of the Open Board of Trade, and has been a director since 1879. He was married to Mary E., daughter of Elijah Mason, of Chicago, in 1872, and has been a member of the Board of Trade since 1875.

### MILLING AND FLOUR BUSINESS.

The growth of this industry in this country for the past fourteen years is one of the marvells of the age. Chicago, however, which has maintained, or advanced, its position as the leading manufacturing city of the West, has notably fallen behind in the manufacture of flour. There was not as much flour milled in the city, from 1871 to 1885, as in the preceding fourteen years, by over one and a quarter million of barrels; and in no year since 1871 has the product been equal to city consumption. Improved methods in the manufacture of flour from spring wheat, and the use of water power, made it possible for the enterprise of Minneapolis,—in the very center of the wheat region and using the most perfect machinery in the world—to defy all competition in the manufacture of flour; and in the last year her twenty-six mills, having a daily capacity of thirty-three thousand barrels, manufactured five million of barrels of flour against the half million of Chicago. The fact also that the price of wheat in the latter city almost always ranges higher than flour, does not invite special effort in this direction. Only six mills in the city are largely employed, and great discrimination and judgment is required in the grades handled to enable them to realize a profitable return on the capital invested.

</table>
CLINTON BRIGGS, president of the Star and Crescent Milling Company, was born in Cayuga County, N. Y., on May 27, 1821, and is a son of Gilbert and Martha (Pace) Briggs. He worked on his father's farm and attended school until he was twenty-one years of age, when he left home and started for the West. After spending two years in Cincinnati, where he was employed as a clerk, he moved to Rockford, Ill., and commenced business, but soon sold out and went to St. Louis, where he filled a clerical position for eight years. In 1856, he came to Chicago, and became a partner in the firm of Ewing, Briggs & Co., with Caleb Groves. This house did a large and profitable trade until 1870, when they closed up their business. Mr. Briggs, in company with Thomas Heermons, soon after bought a milling interest on West Holroyd Street, which they carried on together until Mr. Heermons' death, in 1880. Mr. Briggs continued the business alone until 1883, when a corporation was formed with the following officers: Clinton Briggs, president; C. R. Cole, vice-president; Z. T. Cole, secretary and treasurer. Henry C. Cole is also a stockholder and director. Mr. Briggs was elected treasurer of the city under Mayor Heath in 1875-77, and in the administration of this public trust exercised the same care and circumspection that have characterized his conduct of the large interests of the Star and Crescent Mills. He was a member of the large Board of Trade for twenty-eight years, one of its board of directors for several years, and was first vice-president in 1861. In 1865, Mr. Briggs married Sarah Jane Wray, daughter of Robert Wray, a retired Irish physician, who yet resides at Pittsburgh, Penn. Mrs. Briggs died in 1884, leaving two children,—Martha and Jennie.

BAKERS—Some sketches of the more prominent of this class of manufacturers are given, a perusal of which will convey an idea of the magnitude of the business in this city.

MECHANICAL BAKERY.—In 1855, Dr. Berdan, the famous sharpshooter, invented an oven for baking crackers, which worked automatically and continuously, greatly adding to the productive capacity of a bakery. It was brought to the attention of some of the representative capitalists of this city, and a joint-stock company was formed for putting it into practical use. Among those interested were the late J. J. Pentz, president, who became principal stockholder, and the late C. R. Cole, president of the company and its general manager, Runsey Bros. & Co., and the late E. C. Larred, the company was incorporated under the name of the Chicago Mechanical Bakery Company. They erected a building on Clinton Street, between Lake and Randolph, with three stories and basement. The oven alone cost $40,000, and the investment was money going affairs, but so complicated that it was liable to get out of order, and, in consequence, was expensive to keep in repair. It was very successful from the first, and bade fair to revolutionize the entire cracker business of the country. The company also made bread and pies, and did a general baking business for the city trade. Henry C. Childs was superintendent; William W. Shaw, now of Blecke, Shaw & Co., had charge of the books; George Pyte, now of Hay & Pentz, was shipping clerk; Eliza W. Case, of Case & Martin, had charge of the pie department; Alexander Moody and Charles E. Waters were employees; and, indeed, nearly every other prominent man in the baking business, near or far, was in one way or another. Besides the great Berdan oven, they ran four common ovens for bread, pies, etc. They employed about one hundred hands, ran fifteen teams, and kept two men on the road. Soon after the War broke out they opened a branch house in Louisville, Ky., and, obtaining a large contract from the Government, devoted the cracker department exclusively to the making of hard-bread for the Army. This was a fortunate stroke for the company, and while the War lasted they made money; but, it was a clumsy corporation, and it had a shrewd and active opponent in the person of J. M. Duke, who, forecasting the end of the War, was busy building up a permanent trade all over the Northwest; and, therefore, when the War closed, Mr. Duke had the trade and the corporation had its "plant." The result was, Mr. Duke rented the whole establishment for five years, at a yearly rental of $7,500, solely to get rid of it. He took it into his own hands and disposed of it, subletting it to various persons, for all sorts of uses, and closed the career of the Mechanical Bakery, after an existence of about fourteen years. The costly machinery of the oven was finally sold for old iron, and the building was bought by Mr. Phillips, the well-known dealer in hams, and it is now noted as Phillips' ham house.

THE DAKE BAKERY.—This bakery has become, if not the largest, at least one of the largest, and best equipped institutions of its kind in this country. Its building situated on the corner of Adams and Clinton streets, is 66 by 200 feet, and is four stories and a basement. The power is furnished by a Corliss engine of 350 horse-power. Since the fire, the company have baked no bread, but confine their attention to the manufacture of all kinds of crackers, snaps, jumbles, cakes, etc. One hundred and fifty persons of both sexes and of various ages are employed in the bakery, and their pay-roll amounts to about $1,200 a week.
sive of amount paid to their travelling men. They have four recl-
erooms, open steadily day and night, and annually use thirty-five
thousand barrels of flour, twelve hundred barrels of molasses, two
thousand tiers of lard, and other articles in proportion. Their
pounds keep ten years, and they travel on the road continually,
who travel from Lake Superior to the Gulf of Mexico and from
Pittsburgh to the Rocky Mountains. The capital required to carry
on this business is in the neighborhood of $260,000. This was
known to be so large when we first saw it in 1861 by J. M. Duke, on the
alley in the rear of McVicker’s Theater. In the fall of 1868, Mr.
Duke rented the Mechanical Bakery, at a large rent, for the purpose
of leasing it to them, and on the 15th of the same month, he turned
his affairs over to Mr. Gettridge. He was a very energetic and prac-
tical man, and his name and his goods had acquired a wide reputation at the
days of his life, which occurred in June, 1866. In the settlement
of the estate, the firm of Blake, Herdman & Co., which was composed of E. Nelson Blake, F. M. Herdman,
T. B. Walker and Kirby Page. Before the great fire of 1871, Mr.
Herdman retired, his interest was purchased by W. W. Shaw
and members of the firm, and the style of the firm was changed to
Blake, Walker & Co. They had added a branch factory to the
business, which was situated on the corner of Illinois
and Dearborn Avenues, but both buildings were swept away by the fire.
The loss to the company was about $100,000, but, within ten days,
it had broken ground for a new building on Clinton Street,
between Lake and Randolph streets, and it is said, by the
work making contractors. In January, 1879, Mr.
Walker retired, when Mr. Shaw increased his interest to an equal
share with the remaining partners, and the firm name was changed to
the Chicago and Pacific Coffee Co., just ten years
to the fire, the business had long outgrown the restricted quarters on
Clinton Street, and the company bought a 100 x 200-foot lot, and
put up the buildings they now occupy. In April, 1875,
Mr. Marshall, who was for some years a traveling salesmen for
the company, bought an interest in the business, which he sold in 1880,
but re-purchased, with an additional amount, on March 1, 1884.
On January 1, 1885, Mr. Page retired, leaving him as the
Mr. Blake is a member of the Board of Trade, and does the purchasing of flour for
the company. Mr. Shaw attends to the business, leaving
the general financial manager; while Mr. Marshall is the general
superintendent, and attends to the manufacture of the goods and
other details of the business.

William H. Shaw was born at Swineshead, near Spalding,
Lincolnshire, England, on December 14, 1832. He is the eldest son of Robert Shaw, a well-to-do farmer of Lincolnshire, who, at
the age of seventy-seven years, is still managing his estate of four
hundred acres, with the assistance of his youngest son. William
received a good common school education at home, and came to
this country in the fall of 1853, having a great desire to see what
there was to be done in its business. His initial year was spent
about Cleveland, Ohio, where he first assisted in the survey of the
railroad between Cleveland and Tiffin; he afterward went into the
freight office of the Columbus & Cincinnati Railroad, and
worked for four years. In 1854, he came to Chi-

E. R., Robert and Walden W. An English abolitionist by hered-
ity, Mr. Shaw naturally inclined to the principles and tenets of the
republican party from his first year, and always has been a party ever since. But while Mr. Shaw is a thinking and
observant man, and alive to the abuses and disadvantages of uni-
versal suffrage, his opinions in favor of the English Reform
have not been so pronounced as to have been called for years that he has
never been naturalized. His interest, however, in the last Presi-
dential campaign was so great, and his chagrin that he could not vote
for his favorite candidate, Mr. Lincoln, so intense, that he has
resolved to be ready with his vote in 1888. In 1876, Mr. Shaw again visited England, this
time in company with his wife, and after sojourning at the principl
places of interest at home and abroad, remained in En-
land for three months. He is a member of the Second Baptist
Church, and is an earnest and willing worker in every good cause.
He now resides in a pleasant home, at the southeast corner of
Ave. and Van Buren Streets.

Caleb H. Marshall was born at West Bridgewater, Mass., on
July 16, 1840, and was the third son of Benjamin Marshall, one of
the oldest farmers in that vicinity. Mr. Marshall left school at the
age of twelve, and, following the fortune of many boys in the
region of Boston (that of working in leather), went into the boot
and shoe factory of Edward Tisdale, an old and well known manufac-
turer in the village of Cohasset, Mass., commencing at the small
salary of twenty-five cents a day. He remained there three years,
receiving $1.25 a day during his last year, which, at that time
was considered good wages. Three years more was spent as clerk in
the proprietor’s store in the same town, and after spending enough to
start in business for himself, and after taking a term
at Spear & Sawyer’s Commercial College, at Boston, he bought
out a stock of goods at South Milford, Mass., thirty miles from
Worcester, and ran an independent business for a couple of years, also acting as postmaster.
In the spring of 1863, he sold out, and went to Boston with the intention of visiting the city of Washington; but fell ill
there and remained some time. He returned home, and took
his seat in the city’s salesroom, and offered him $9 a week, which
young Marshall thought he would accept for three months, and
this gave him a chance to see a little of Western life, but he
remained with that house three years. He then visited his old
home. Returning to Chicago, he was employed by the Star
and Crescent Flouring Mills, at Randolph-street bridge,
and was representative on changing, buying the wheat and selling the prod-
uct of the mill, which had a capacity of six hundred barrels of flour a day, and
fitted this position for three years. He went
on the road as salesman for Blake, Herdman & Co., and the
company ran successfully until January 6, 1884, when it was burnt
out, and Mr. Marshall sold his stock to other parties and returned
to Blake, Shaw & Co. Buying a much larger interest than he had
thus far accumulated, he assumed control of the company, and laid
his hands to the work for six weeks, barely escaping with his life. This was pretty rough on
the English had, who had been accustomed to the comforts of a good
home; however, he persevered, and found employment in the flour
and feed store of Potter & Vincent, on the northwest corner of
Canal and Randolph streets, where he remained for three years.
In the meantime he became acquainted with, and married, Miss
Mary Ann Harrison, from his native town, who had preceded him to
Chicago. At her suggestion, he gave up his situation, entered Bell’s Commercial College, and, by dint of application, mastered the
whole course in about four months, and graduated from that
institution at the head of his class. He then took a situation as
bookkeeper in the Mechanical Bakery, and remained with that con-
tinued twelve years, beginning with a salary of $8 a week and ending
with $2,000 a year. In the fall of 1868, Mr. J. M. Duke, finding the
Mechanical Bakery a formidable undertaking, succeeded to
control by renting it, and Mr. Shaw took charge of his books. On
the death of Mr. Duke, in June, 1869, he followed the fortunes of the
stock, becoming a partner in the house. On the retirement of Mr. Herdman, he became a partner in the
business, and has been connected with it ever since. In 1859, Mr.
Shaw had the misfortune to lose his wife, and taking his only
son, William, in 1862, then but four years of age, he returned to
England, and spent six months among the scenes of his boyhood.
After four years of widowhood, he was again married, on March 1,
1862, to Miss Sarah Elizabeth, daughter of Mr. Eli Bogardus, the
broom-corn grower of Belvidere, Ill.; they have three children,—
established himself in the baking business at Cairo, Ill., but after nine months came back to Chicago. Here he established himself in the bread trade, running a large number of wagons and obtaining his supplies of the Dake and Woodman bakeries. In 1871, he had secured a large line of customers, and when the great fire burned out Woodman, Dake and others, he saw he must look elsewhere for his supplies or lose his trade. With commendable foresight and dispatch, before eight o'clock of Monday, October 10, he had rented a part of the old Mechanical Bakery, and had men at work fixing it up. Within forty-eight hours thereafter, he was supplying his old customers with his own bread and cakes. In the spring of 1872, he

FREDERICK BURCKY, one of the oldest bakers in Chicago, was born in Gelhausen, Germany, on June 9, 1814, the son of John Burcky, a physician. He became a pupil at the common school, and at the age of fourteen was apprenticed to learn the trade of a baker. His apprenticeship continued two years, and in 1830 he came to America, with his family, which consisted of the parents and eight children. They landed at New Orleans late in the fall of 1830, and remained there during the winter, and in the spring of 1831 went to Cincinnati. In 1833, Jacob Burcky, a brother, bought a farm in Illinois midway between Hennepin and Peru, and one year later was followed by his two brothers, Daniel and Frederick, who

opened a grocery store at Hennepin in 1836, continuing it two years. At the end of that time, Mr. Burcky's health failed, and for two years he was an invalid on the farm of his brother Jacob. Daniel Burcky was for many years identified with the business interests of Chicago, and was devoted to the establishment of German educational institutions in this city. In 1840, Frederick Burcky came to Chicago, and for three years worked for Winship & Howe, bakers. In 1843, he bought a bakery of a Mr. Barstow, on LaSalle Street, between Randolph and Lake streets, which he continued three years. He then moved to Wells Street, where the Times Building now stands, and started a bakery and coffee house, the first of that kind in Chicago. He continued business there until the great fire, and, suffering heavy losses, established again at No. 93 Halsted Street, selling out his business in 1871. The following year he opened a bakery at No. 180 Randolph Street, which he continued three years, when he sold out and retired from business. In 1843, Mr. Burcky became a member of Lafayette Lodge, No. 2, A.F. & A.M. He was one of the seven founders of the Germania Lodge, No. 15, A.F. & A.M., and is the only one of the seven now alive. On December 20, 1853, he was made an honorary member of that lodge. He is also a member of Chicago Commandery, No. 19, K.T., and of Oriental Consistory, S.P.K.S., 32. Mr. Burcky was married, on October 27, 1839, to Miss Susan Berdell, of Fachbach, Germany; she died on March 6, 1858. They had five children, only one of whom—Mary, wife of John Sheldon—is now living.

The Board of Trade.

VIEW OF ASHLAND AVENUE, NORTH FROM MONROE STREET.
The F. A. Kennedy Company, cracker bakers, etc., at Nos. 42 and 50 Des plaines Street, was a bank of a similar establishment, under the same name, at Cambridgeport, Mass. The parent house was founded, in 1839, by Artemas Kennedy, the father of F. A. Kennedy, the president of the company; the branch was established and commenced in 1857, mainly through the exertions of Hon. Obed C. Chidester, the secretary, treasurer and general manager, who is also a stockholder in the company. (F. G. Cass is its vice-president, and, with its president, is in the balance of the stock.) Although the company has been in the bakery line for thirty-six years in the field, this establishment is one of the largest in the country. The branch was at first only a depot, at No. 41 River Street, for the goods manufactured in Massachusetts. In January, 1857, it was necessary to build a bakery, which was a double its original capacity in August, 1853. On January 6, 1884, this bakery was consumed by fire, but was immediately re-built and its capacity trebled, so that by July it was again running, with better facilities than before. The present establishment is on the site of the former, and has dimensions of 82 x 150 feet, with six stories and a basement; the power is furnished by a sixty-horsepower Corliss steam engine. The company employ one hundred and twenty-five hands in the factory, and have seventeen men on the road selling the goods. The territory covered extends from Detroit and Cincinnati to the Pacific coast, and from Canal to the Gulf. Exclusive of the expense of their travels their average pay-roll amounts to about $6,000, even in dull times like the present. When running at the full capacity, the bakery consumes five hundred thousand pounds of flour a day. In the active consumption, however, averages about forty thousand barrels of flour annually, which is supplied in proportion. To convert all these raw materials into manufactured goods, requires six of the largest size reel-ovens, together with the most improved machinery, sold of the time, to Mr. Kennedy, the president, purchased in England. The company make a specialty of the finer line of biscuit, of which they make upward of three hundred varieties.

Henry H. Case, the secretary, treasurer and general manager of the F. A. Kennedy Company, was born at Rochester, N. H., in 1859. When nine years of age, his parents moved to Charlestown, Mass., where he entered a common-school education. At the age of seventeen, he came to Chicago, reaching here on August 21, 1876. He could not at first hit upon anything to do which suited him, but, after a time, bought a horse and delivery wagon, and began to sell the goods from other bakeries to grocers. In 1875, he was remarkably successful, and before the fire had a large and remunerative trade. That which was a calamity to so many others was to him, in common with all who dealt in the necessities of life, a harvest, and he profited by it. In 1875, he began to handle the goods of the F. A. Kennedy Company, of Cambridgeport, Mass., and the superior quality of their goods greatly enlarged his trade and necessitated the establishment of a depot, or warehouse, at No. 41 River Street. From this time on his trade began to assume commanding proportions; and the brand of goods he had introduced became so widely known and so firmly fixed in popular favor, that the company sold it to its maintainers and future proprietors that a factory be built in this city. The Eastern house coincided with his views, and in 1881, a suitable building was erected on the site of the present one. The business has grown from its small beginning, and now stands at the head of all in the branch of the manufacturing institutions of our city.

Charles S. Sawyer.—Among those who have been instrumental in building up the large business of the F. A. Kennedy Company, mention should be made of Charles S. Sawyer, who has charge of the manufacturing department. Mr. Sawyer was born on April 12, 1850, at Portland, Me., and there he learned the baker's trade. Coming to Chicago in 1872, he worked at his trade until the Kennedy Company built their factory here, when he took the position he now occupies. He has had twenty-five years' experience in his chosen calling.

Orville S. Gaz has charge of the office of the Company. He was born at Dubuque, Iowa, in 1839. He came to Chicago in 1851, and at once assumed his present position.

Edward H. Cass purchases all the supplies for the company. He was born at Cornell, Me. For many years he was employed in the grocery business at Bangor, Me., and came to Chicago in 1884, to accept the position he now occupies with the Company. Mr. Cass is an old soldier of the War of Cuban Rebellion, having been captain of Co. "H," 71st Maine Volunteers.

N. B. Chidester, sole representative of Chidester & Co., was born at Norwich, Conn., in 1825, and is the son of Stephen ODgen and Eliza (Hazen) Chidester. His father was a warm and energetic man of business, who carried on a farm, the manufacture of lumber and of shoes, and maintained a tannery. As might be expected, his sons were brought up to active life, receiving such education as the common schools of New Jersey could give. Mr. Chidester was fourteen years of age, Mr. Chidester entered a general store at Stanford, as clerk, and remained until 1850, when he went to New York City and worked in a dry goods store. In 1856, he returned and entered the great wholesale and commission business as a member of the firm of Rose & Chidester, continuing therein until 1861. He then purchased several hundred acres of woodland on Lake Hopatcong, shipping the wood cut on his property to the New York and to Chicago markets, the efforts of Mr. Chidester and his associates having been instrumental in establishing the iron furnace at Lockwood, N. J. At the beginning of the War, he was commissioned an enrolling officer for the fourth district, and continued in that capacity until the end of the war. In 1865, he left the commission business. In 1867, he came to Chicago, and commenced the manufacture of Holmes's Patent Cream Crackers, of which he owned the patent-right, associating with him Richard S. Holmes, under the name of Holmes & Chidester. That co-partnership was continued for two years, at No. 67 North Halsted Street. In 1869, the firm dissolved, and George A. Farnum became a partner, when the business title was known as Farnum & Chidester. Their business increased so rapidly that in the spring of 1869, they erected a large factory at Nos. 61-63 North Halsted Street, where, in June, 1869, they were partially burned out, but had their bakery and machinery in full running order within three days thereafter. When the fire of 1871 devastated Chicago, their steam bakery was the only one of that kind that escaped the conflagration, and they were compelled to run at night and on Sundays for two years, until they could erect another one. In 1874, Mr. Chidester sold out, in consequence of poor health, to William H. Aldrich & Co., who continued the business. Mr. Chidester then engaged in settling up his business affairs, in attending to a large number of enterprises in connection with the management of other commercial interests, until November, 1880, when he re-entered the baking business at No. 370 West Harrison Street. Among his associates, he chose Mr. Chidester, located, where he carries on an extensive manufacture of his justly celebrated products, under the firm name of Chidester & Co.

George A. Farnum, the oldest practical cracker baker in Chicago, was born at Smithfield, R. I., on February 18, 1829, and is the son of Welcome and Martha B. (Tallman) Farnum. He received his education at the Prospect Street School, at Providence, and at the age of fourteen was there apprenticed to A. D. Yeomans, a baker of that town. When Mr. Yeomans died, and Mr. Farnum continued in the employ of his successors for nearly five years. At the end of that time, he went to Elmira, N.Y., returning at the end of one year to take a position in the bakery in which he had previously been connected as an agent, until coming to Chicago, in 1853. On his arrival in this city, he sought to establish a cracker bakery, and built two ovens at the corner of Clinton and Madison streets, which he sold the same year, and, in February, 1864, bought a home bakery, at No. 85 State Street. Mr. Farnum built up an extensive trade by furnishing bread to the Soldiers' Home and the Soldiers' Rest. At the close of the War, he sold out his interest in State Street, and in company with N. B. Chidester, bought a bakery at No. 74 N. Halsted Street. About two years later, the firm built a bakery at the corner of Halsted and Fulton streets, and, in 1875, sold out to C. B. Markell, Mr. Farnum continuing as manager under the name of the firm name of Farnum, Fisher & Co., and for one year was connected with a flour mill on Market Street. In that venture, Mr. Farnum overstepped his usual good judgment, and the financial results of his enterprise were very disappointing. In 1876, he formed another partnership with W. H. Aldrich, and together they purchased the bakery he had built some years previously at the corner of Fulton and Halsted streets. In 1882, Mr. Farnum sold his interest to his partner, and retired temporarily from the business. In May, 1885, he bought the bakery of Hugh Templeton, which he continues at the present time. In 1882, Mr. Farnum became part owner of two well-known pleasure boats on Lake Geneva, the "Icicus Newberry" and the "Lady of the Lake," but sold his interest on May 1, 1885. For a number of years he has been interested in several business and speculative ventures, and at the present time is a stockholder in the Mississinewa Valley, Site, Company, founders of the enterprising village of Fairbanks, Duk. He also has landed interests at Pierre, Dak., and in undeveloped districts in Indiana. He is a prominent Mason, and is a member of Harlem Lodge, No. 54, A. F. & A. M., Grover Chapter, No. 180, R.A.M.; and of Solano Commandery, No. 54, K.T. Mr. Farnum was married, in Webster, Mass., in 1853, to Miss Nancy Kingsbury; but his wife, Mrs. F. F. King, has, since 1884 been interested in business enterprise in his name.

Connecticut Pie Bakery.—On April 26, 1869, Elisha W. Crabtree, and Stephen W. Martin established, under foregoing title, one of the most extensive and well known pie-making concerns on the corner of Lake and Wood streets. In 1872, they were obliged to enlarge their facilities for manufacturing, and to this end erected a building they now occupy. They have three of Yale's sixteen-foot rotary-ovens, employ about fifty hands, and have two horse waggons. Their bakery has a capacity of ten thousand pies.
daily. Thelard used by them is rendered fresh every day; and it is a sufficient commentary on the reputation of Connecticut pies, to say that they are the market alphabet of that variety of any other brand. During the first year of this firm's existence, the average number of pies manufactured and sold was seventy-seven daily. At that time, Case & Martin were the only ones reaching it in a day; and their anticipations were realized in July, 1870, when they sold a daily average of twelve hundred and fifty-three during that month. In 1874, the daily average reached twenty-three hundred and thirty; and in the twenty-fourth of February, eighty-two; and in 1880, thirty-seven hundred and thirty-seven. The wagons used in delivering pies were brought into use in 1870, as an invention of the junior member of the firm, and since their introduction, have been duplicated by firms doing business on number of Western cities. The wagons are handsomely painted with fruit and forest scenes, have a carrying capacity of two hundred and fifty pies, and cost $500 each.

When he was the founder of the Connecticut Pie Bakery, was born on the 3rd of August, 1833. He received a common school education in his native town. His elder brother, Charles A. Baker, in company with the old established Coe in Norwich, and largely supplied the New York market every morning by boat. His trade in the great metropolis growing rapidly, he found it to his advantage to move there, and, in 1849, Elisha entered upon a business of his own, in connection with his younger brother with him, and established business at No. 72 Millawaukee Avenue, near Halsted Street. This was, at that time, "away out of town." The building was formerly an old cooper shop, in which the brothers persuaded about 20 cents with C. Culver, they could turn it about so as to face the avenue, to put it in excellent repair, and to build an oven for them; which he did, and they paid him $25 a month for it until 1856. The brothers found it very difficult to get an experienced apprentice to learn the trade. When the Bakery was started, about 1858, the Case brothers closed out their private business, and took the pie department of that concern, making pies, on contract, for one cent each. In July, 1856, E. W. Case gave up his interest in the Bakery, and moved to his farm in Clinton County, Iowa, where he spent about three years, and then returned to Chicago. The Mechanical Bakery, in the meanwhile, having closed, Mr. Case started business on his own account, on April 26, 1860, at the corner of Lake and Wood streets, with S. W. Martin, his present partner. The early ventures of the Case brothers, and their subsequent connection with the Mechanical Bakery, have established for that firm an excellent reputation for Connecticut pies, causing a demand which no one but the original founder could supply. When Mr. Case returned to Chicago, there was no excelsior, when he became a steward on river vessels, working in that capacity two years. In 1855, he came to Chicago, and obtained employment, as machinist, with H. A. Pits, manufacturer of the Pits threshing machine. He had served no previous apprenticeship to the trade, but, his natural adaptability to mechanical work enabled him to make himself very useful to Mr. Pits, and he remained with him for eleven years. At the end of that time, his health failed, and he decided to engage in teaming and fruit raising, and to stand at the corner of Wood and Lake streets, about 1865. He was, at the end, after erecting his building, he found himself with but one dollar and a half to invest in stock. From so small a beginning he built up a prosperous trade in the incredibly short space of two years. He continued the business for three years, when he opened a grocery store, selling out his stock, in 1869, to form a co-partnership with E. W. Case. Mr. Martin was married, in 1858, to Miss Susan Waters. They have one daughter. Mr. Martin is a spiritualist, and is living example of that faith. He is also an active temperance reformer.

The Chicago Pie Company was established in July, 1882, by John A. Spooner, Mr. Mooray & Waters at the time, but, believing that they saw an opening for themselves in an independent business, joined their fortunes, and established their bakery on the North Side. The building is in a style of very high order in the city. They then occupied a space of 25 by 40 feet. They then occupied a space of 25 by 40 feet. Shortly after, they removed to a large building on the corner of Lake and Dearborn streets, and occupied a space of 25 by 50 feet. They then occupied a space of 25 by 50 feet. Shortly after, they removed to a large building on the corner of Lake and Dearborn streets, and occupied a space of 25 by 50 feet.
HISTORY OF CHICAGO.

They have seven children,—William J. Moody, now in business at No. 242 South Morgan Street; Alexander J., John E., Charles H., Mary E., Frank F. and Lilly A.

Joseph E. Water was born at Utica, N. Y., on February 10, 1842. He came West, with his parents, in 1846, and, after a year spent in Iowa, settled in Chicago. In the fall of 1848, when alter sixteen years of age, Charles went into the pie department of the Mechanical Bakery, to learn the business, and only left it to enlist in the army at the opening of the War of the Rebellion, in April, 1861. He was one of the first to answer the call for three months' men, and then re-enlisted for three years, or during the War. He served in Co. A., Illinois Cavalry, and was one of General Grant's escort, or body-guard, during his term of service. Just before the siege of Vicksburg, Mr. Waters received his discharge on account of disability arising from insufficiency, and returned home. He went back to his place in the Mechanical Bakery as soon as he had sufficiently recovered, and remained with the firm until the closing up of the establishment. He then found employment in the City Bakery until the firm of Moody & Waters was formed, in September, 1872. Mr. Waters was married, on December 19, 1863, to Miss Evelina Martin, of Scotch descent, and the daughter of Augus Martin. They have had six children,—Gertrude, Charles William, Jessie Martin, Evelinda, and Hiram.

Josiah Swartz, No. 302 Ogden Avenue, is engaged in the manufacture of a variety of hard crockery, known as table-ware. They are so called from the town of Littitz, in Lancaster County, Penn., where they were first made in this country. The dough is simply of water and flour, very stiff. It is then cut into small sections, square, by machine, and rolled by hand to about a little rolls about a foot long, and curiously curled into uniform and artistic shapes by the dextrous fingers of boys and girls. The peculiarities of shape are then put upon by hand, and the dishes are taken to dry, or sear, in the sun, then taken to dry, or sear, in the oven. When they are immersed in a kettle of boiling yale to give them color, sprinkled with coarse salt, and immediately put into the oven. They emerge a crisp, brown, toothsome article that finds ready sale wherever introduced. Mr. Swartz runs two ovens, employs fifteen or twenty hands, and keeps two wagons running. He is a native of Lehigh County, Penn., and was born December 6, 1837. He is the son of Peter Swartz, who was a farmer, died when Josiah was seventeen years old, and in his memory served an apprenticeship of two years at the blacksmith's trade, which, being too severe however for his strength, he had to abandon it for lighter employment. He started a restaurant at Allentown after a time, and followed the business for twenty-two years. In 1878, he came to Chicago, and, in company with a Mr. Becker, engaged in the manufacture of plate at the place he now occupies. Mr. Becker only remained with him about a year and a half, since which time he has maintained the business alone. Mr. Swartz was married, in 1864, to Miss Eliza Frederick; they have three children,—Arnbrose, Thomas and Charles.

Alexander J. Fish, manufacturer of bakers' and confectioners' machinery and tools, also of Vale's rotary, reel, portable and furnace ovens, at No. 57 Lake Street, was born at Brooklyn, N. Y., on February 14, 1825. When but one year old he came to Illinois, where his parents, who settled on a farm in Boone County, about fifteen miles north of Belvidere. When sixteen years old he was apprenticed to a local mason's trade. He remained in that trade for three years, and worked for the last two years for seven cents a day, and at the end of that time his employer offered him $8 a day to remain with him, but he refused. He first went to Waterloo, Wis., and took contract work for two years, and after that he spent a year or two with his relatives in Illinois and Michigan. In 1879, he returned to Chicago and followed contract building until 1874. In 1875, he began to put up Vale's rotary, ovens, and finding this business remunerative, finally gave up contract work and has since devoted himself to the development of his present line of business, in which he has been very successful. The Vale oven is a specialty of his, and he claims that it possesses many advantages over any other in the market. During the war, Mr. Fish twice stood the draft and paid for his substitute to represent him in the field.

Edward C. Price, the well-known manufacturer of Dr. Price's baking powder and flavoring extracts, was born at Troy, N. Y., on November 13, 1832. He received his preliminary education in the public schools of that city, and graduated at a leading Eastern University in 1852. Soon after he had obtained his medical degree, he received his degree in 1856. In 1860, he moved to Waukegan, Ill., and engaged in the practice of his profession, meeting with pronounced success. Dr. Price had enjoyed unusual advantages while prosecuting his studies in chemistry. The natural bent of his mind inclined him to this science, and the chemical laboratory of his Alma Mater was one of the places all of which he delighted to be. While a student, he made many discoveries to discover a chemical combination for a baking powder that should be at once healthful and adapted to universal use. He was fortunate enough to discover the ingredients which met these requirements. In 1865, he formed a partnership for the manufacture of this article. The firm established its offices and laboratory on West Water Street, remaining there for two years; then removing to East Lake Street, near Market, where they were burned out. They resumed their business at Nos. 47-49 West Lake Street, where they remained for three years, when they moved to the corner of First and South Water Street, occupying those premises until May 1, 1876, when they established themselves in their present quarters. They now occupy six floors, comprising an area of forty thousand square feet, and are remarried by four floors on another terrace, the building having a thousand square feet. At the commencement of their business, they sold, as it were, by ounces, tons being now the unit of measurement used for daily manufacture, which embraces, also, flavoring extracts. Of the volume of their trade, it is not too much to say that they stand in the front rank of (if they do not lead) the manufacturers of the world. They at first employed half a dozen persons, but now they have two hundred in their service, the production being increased by the use of the best machinery. Dr. Price purchased the interests of his partner in February, 1884, when a company was incorporated under the name of the Dr. Price Baking Powder Company, Dr. Price being chosen as president and treasurer and R. C. Price as secretary. This company has a branch house in S. Louis, and a depository of their goods in San Francisco, Cal., and Portland, Ore., and are now producing at a daily rate of ninety barrels. The factory is situated in the heart of Chicago, and is now assisting his partner in conducting the business. Dr. Price's third son is W. V., who was born in 1852, and who is now attending the High School at Waukegan. His two daughters, Ida and Emma, have both graduated from school; the former from Kemper Hall, and the latter from the Buffalo (N. Y.) Female Seminary. Mrs. Price, since her husband's arrival in the West, has resided at Waukegan, Ill.

GRAIN WAREHOUSING.

The phenomenal growth of the grain trade in Chicago up to 1870 rendered it necessary for the State to assume control of the grading and warehousing of grain. The XIXth clause of the Constitution, adopted in that year, gave the General Assembly power to enact a warehouse law, which came into effect, October 25, 1871. It aimed at securing uniformity of inspection and the registration and cancellation of warehouse receipts for grain. A chief inspector for grain and a warehouse registrar were the chief executive officers under the Board of Railway and Warehouse Commissioners. The proprietors of elevators were required to procure licenses from the Circuit Court of the county in which they were situated, and to file a bond of $10,000 for the faithful discharge of their duty as public warehousemen; to conform to the rate of warehouse charges for storage fixed by law; to furnish such information to the warehouse registrar as would enable him "to keep a correct account of the grain received and delivered"; and "to keep a full and correct record of all receipts issued and cancelled." Great difficulty was experienced for a number of years in enforcing these provisions, although some of them were confirmed by a court of law which denied the constitutionality of the law, but found it convenient to avail themselves of certain of its provisions. Many warehousemen claimed that it was an unnecessary and unwarrantable interference with their private business. Meanwhile, on August 26, 1872, at a meeting of warehousemen and bankers, a system of cancellation of receipts was adopted, and henceforward reports were made promptly and satisfactorily. A clause of the agreement provided that "the cancelled receipts are
shown to the registrar and by him cancelled off with their statements. Those in turn are checked with the reports of shipments by the local inspectors at the elevators, and thus it will be impossible for a shipment of grain to be made without the cancellation of a corresponding amount of receipts or an exposure of the fraud."

This measure was resorted to in consequence of the frauds discovered at the time of the Iowa elevator district. Three hundred receipts covered a much larger quantity of grain than was in store.

Meanwhile suits were immediately instituted in the courts, to determine the validity of the warehouse law. In the case of Munn & Scott vs. The People of the State of Illinois, its constitutionality was affirmed in all the State courts, and, on appeal to the Supreme Court of the United States, that body, in 1877, sustained the judgment of the lower court, Justice Field and Justice Strong dissenting. There was now no course open to the warehousemen but to take out their licenses and conform to the legal rates for storage, which they all did.

The Board of Trade inspection fees were adopted by the Commissioners, but, were from time to time, reduced to meet the requirements of the law that the department should be only self-sustaining and not productive of revenue. The cost of inspection has never exceeded about one-fifth of a mill per bushel, a sum so insignificant as not to be mentioned in comparison with the advantages that have resulted from the inspection.

The principle of grading and inspecting established by the Board of Trade, was continued by the Commissioners, with such alterations in detail as the varying conditions of trade required.

In November, 1876, grades 1 and 2 spring wheat were required to weigh not less than 53 pounds to the bushel. In 1878, the rule in case of mixture of spring and winter wheat was changed, by designating it as mixed wheat. Many changes of an important character were made in subsequent years, designed to raise the standard of inspection. The policy of the Commissioners, however, has been to maintain an uniform standard of grading, and as few modifications have been made as possible, having regard to the increasing volume and varying quality of grain receipts from year to year. Notwithstanding the persistent opposition that the system of State grain inspection encountered in its infancy, it was not long in establishing a character at the leading export grain points in the States and Canada. Many States established a department for the purpose, fashioned after the Illinois plan, and New York, Boston, Philadelphia, Baltimore, Montreal and other parts accepted Chicago inspection as almost infallible. In 1876, Northwestern spring wheat was first sold in eastern ports, for export, subject to Chicago inspection.

There were in all thirty-eight grades of grain received here in 1880, distributed as follows: Ten winter and seven spring wheat, nine corn, four oats, three rye, and five barley. In 1884, there were twenty-four grades of wheat, ten of corn, six of oats, three of rye and eight of barley. New rules governing the inspection were adopted by the Commissioners on September 1, 1883, wherein many radical changes were effected.

The year following the adoption of these rules, the "rejected" grade was abolished, upon the suggestion of the Receivers' Association of the Board of Trade, and No. 3 or No. 4, as the case might be, substituted instead. Three grades of Colorado wheat were established. An important change was made also in the grading of corn, "higher mixed" being designated "yellow." These changes were made upon the well ascertained views of receivers and shippers, and consequently met with their approbation.

During the past five years the inspection department has reached a high degree of efficiency, as may be gathered from the fact that during the seasons of 1883 and 1884, when huge quantities of corn were in store in Chicago, not one bushel of inspected No. 2 corn (the contract grade) got out of condition, while nearly every corn market in the country had hot and damaged corn of the same grade—a result that was never before experienced in the history of the corn trade in Chicago.

A Committee of Appeals was established by way of amendment to the warehouse law which was adopted in April, 1873. This committee was empowered to take into consideration all appeals from the grading of the inspection department and all disputes in connection with that department which might be referred to it, and its decisions were decreed to be final. On July 1, following, the Board of Commissioners appointed H. C. Ranney, J. R. Bensley and John P. Reynolds, members of the Committee. In September, Mr. Ranney having resigned, T. T. Gurney was appointed in his stead. During the first year the grading of seventy-eight cars was appealed from and the inspection department was sustained in forty-three. When it is considered that 90,000 cars of grain were marketed that year, errors in the inspection of forty-three will appear insignificant, and an indirect, though none the less emphatic, proof of the efficiency of the department. The number of appeals increased with the growth of the trade, but the proportion of palpable errors has not increased, so far as the reports of the Commissioners show. In 1876, the committee was composed of P. W. Dater, S. D. Foss and D. W. Irwin. Up to July 1, 1879, the committee divided the fees received on appeals equally among its members. That date the Commissioners fixed the salary of each member of the committee at $1,000 per annum, and directed the large sum annually received for fees into the treasury of the Board. Shortly afterward, S. D. Foss resigned and was replaced by George Field; in October, T. H. Seymour and C. A. Phelps resigned, and were replaced by John Walker and P. W. Dater.

The offices first occupied by the registrar and inspector, were destroyed in the fire but, through the vigilance of Stephen Clary and Charles W. Deane, all the valuable papers and documents were saved. New officers were improvised at Nos. 34-36 Canal Street. Subsequently the offices were removed to the corner of Canal and Washington streets.

After the fire in 1871, the want of adequate storage compelled several railways to decline grain freights. Added to the inadequacy of the storage capacity of the
city, a few speculators succeeded in cornering all the grain in the market for about three months. No shipments out were made, and the consequence was that the elevators were practically locked up. Aside from this, the season of 1872-73 marked the most decided advance in the grain trade of Chicago. The confidence of the public in the inspection department was steadily growing. Warehouse receipts, which heretofore were regarded with suspicion, came to be currently accepted by banks and capitalists and to be considered by them as among the very best securities. The system of registration was so perfected as to render the placing a fraudulent receipt upon the market, without immediate detection, wholly impossible. The paid crops of the four years following, necessarily reduced the receipts of grain. The crop of 1875 was the worst for a dozen of years previous, and the minimum of receipts and shipments was reached in that year. The years 1876 and 1877 were also low, but a decided advance was made, and in 1878 the receipts had doubled those of 1875. One of the distinguishing features of the movement of grain in Chicago that year, was the unusually large amount transferred on track, mostly in the winter and spring months, to cars, for eastern shipment, without going into store. There was a double incentive to this,—the avoidance of the terminal charges of the railway companies for switches and for trimming when in the process of loading, and the warehouse charges for transferring. This mode of transferring, although at a less cost, did not result to the satisfaction, peculiarly, of the owners of the grain, owing to the frequently considerable discrepancies in weight. The railways subsequently abolished the terminal charges, so that one incentive to a continuance of this innovation was removed. In the years prior to 1878, Chicago had lost her prestige as a market for winter wheat, but the receipts in that year, of about 4,800,000 bushels of that cereal, in a measure re-established it. In 1879, the excess of grain inspected over any previous year was 8,316,718 bushels. The inadequacy of the storage capacity of the warehouses was again sensibly felt. Vessels were utilized in many cases for the purpose. Large quantities of grain were shipped past Chicago, to other markets, on this account alone.

Chicago continued to grow in importance as a winter wheat market. A new variety of wheat, known as Turkish winter wheat, was received in large quantities for the first time in 1882. It was a long red-berried variety, but was quite unlike the red-berried wheat the market was before acquainted with, and a difficulty was presented in inspection, which the new rules obviated. It was very hard, with good milling qualities, and in great demand among the millers of Wisconsin. Cleaned or "scraped" wheat began to be a feature of the market in 1882, and it was inspected at the "hospital," where cleaned, until 1884, when it was inspected in the regular way on tracks. There was a decrease in the number of bushels inspected in 1882, for the first time in seven years, accounted for by the low prices which held, owing to the abundant yield in European countries which compete with America in supplying the great markets of the world, and also to the prosperity of western farmers, which enabled them to hold their grain for better prices. The short crop of 1883 reduced the receipts of 1884 by about 25,000,000 bushels. During the corn "corner" of 1884, cars were re-inspected from points East and South, where they had previously been sent from Chicago.

The subjoined tabulated statements succinctly exhibit the growth of Chicago as a grain market from 1872 to 1884, inclusive:

</table>
ELEVATOR CAPACITY.*

* The above table shows an increase since the fire—including those destroyed—of eleven elevators in number, and 17,450,000 bushels in capacity.

* Made available in times of emergency, by order of the directors.

PETER HASKILL WILLARD, retired merchant, son of William and Lucy Haskell Willard, was born at Lancaster, Mass., on October 7, 1805. Until he was fifteen years of age he assisted his father in farming, during which time he obtained several years' instruction in the district schools of the vicinity. He began commercial life in the country store of Calvin Haskell, of Harvard, Mass., with whom he remained nearly five years. He then went to Littleton, Mass., and was engaged in mercantile pursuits four years; then removed to Lowell and went into the wholesale and retail grocery business. Four years later he succumbed to the Western fever, and, disposing of his business, went to St. Louis in 1836, which then was a city of not more than fifteen thousand inhabitants. He established himself in the wholesale grocery trade on Front Street, which then faced the levee and is now called Water Street. The destructive policy of President Jackson's administration brought about the failure of 1837, during the following year, and Mr. Willard was among the sufferers, but shortly afterward he resumed business. In 1845, in connection with Ira V. Munn, he extended his business to various points in the West and established branch stores in Peoria, Spring Bay, Matamoras, etc. During 1846, the firm closed out, and Mr. Willard came to this city. He purchased a lot near the junction of Lake Street and the river on the west side, and erected the second elevator built in Chicago, and continued in the elevator business during that year, and returned to St. Louis in 1857. Forming a partnership with James O. Goodrich, he engaged in the wholesale grocery trade until business was interrupted by the excitement of the times in 1861, when he purchased the stock of the firm and removed to this city. Under the firm name of Willard & Childs he continued business until 1869, when he retired from the firm, which then became Childs & Briggs. Two years later that firm became involved, and, in order to protect his interests, held by them, he assumed its management, and through his efforts the firm was placed upon a sound financial basis. He continued as manager of the firm until the fire of 1871. In that conflagration he lost $25,000 in currency and unregistered bonds, but was soon enabled to re-establish himself in trade, which he continued until 1879, since which time he has not taken an active part in business. Mr. Willard was married on April 4, 1846, to Miss Elizabeth Osgood Goodrich, of Vermont, a lady of culture and marked literary talent, well-known as the author of "Sixology," who died in 1872, leaving him five children—Gardner G., William L., Charles G., Monroe L., all of whom are prominent business men, and Clara G., now deceased. In 1874, he was married to Miss Mary E. Daniels, of Chicago, who has one daughter by her first marriage.
HISTORY OF CHICAGO.

THE UNION STOCK-YARDS.

The old "Bull's Head" stock-yards, situated at the corner of Madison Street and Ogden Avenue, were opened in 1845, and gave to Chicago its first regular cattle market. In 1854, the Michigan Southern Railway opened stock-yards upon the Ulrich property, at the corner of State and Twenty-second streets, which were placed under the management of Thomas Nicholes. Mr. Nicholes was superseded in 1856 by Ira Smith & Co., who continued in the management until the close of the years in the spring of 1866. John B. Sherman saw what was, up to 1856, the boldest venture in this direction in opening the Myrick yards on Cottage Grove Avenue, with a capacity for five thousand cattle and thirty thousand hogs. The Michigan Central and Illinois Central railways had switches running into these yards. The Fort Wayne yards, at the corner of Stewart Avenue and Mitchell Street, and the Cottage Grove yards of C. F. Loomis & Co., were small and inadequate, and never came into much prominence, although the latter was the principal yard here during the War.

After the failure of the Chicago, Burlington & Quincy Railroad stock-yards (which had been established a mile and a half west of the city by that company, J. H. Dole and other capitalists) to attract business to any extent, it became manifest that the stock interests of Chicago should be concentrated in some sure quarter, to facilitate and lessen the expense of transfers of cattle and hogs. The delays occasioned by the location of the yards at long distances from one another suggested the enterprise of the Union Stock-Yards and Transit Company. A prospectus was issued in the autumn of 1864, which resulted in the subscription of stock to the extent of $1,000,000, the major portion of which ($925,000), was taken by the nine railways chiefly interested in the stock trade, viz. Illinois Central, Michigan Central, Chicago, Burlington & Quincy, Michigan Southern, Pittsburgh, Fort Wayne & Chicago, Chicago & Alton, Rock Island, Chicago & Danville and Chicago & North-Western. A special charter was granted by the State Legislature, which was approved on February 13, 1865. John L. Hancock, Virginiius A. Turpin, Rosell M. Hough, Sidney A. Kent, Charles M. Culbertson, Lyman Blair, M. L. Sykes, Jr., George W. Cass, James F. Joy, John F. Tracy, Timothy B. Blackstone, Joseph H. Moore, John S. Barry, Homer E. Sargent, Barton C. Cook, John B. Drake, William D. Judson, David Kreigh and John B. Sherman were the incorporators. Upon the organization of the company, Timothy B. Blackstone was chosen president, F. H. Winston as secretary, and Robert Nolton as assistant secretary.

The site chosen for the location of the Yards was at Halsted Street, in the Town of Lake, and three hundred and twenty acres, being the north half of Section 5, Township 35 N., Range 14 E., were purchased from Hon. John Wentworth, the price being $100,000. This land was considered an almost valueless marsh, impossible to be drained. Work was commenced on June 1, 1865, and by Christmas of that year the yards were thrown open for business. The yards were laid out as a rectangular figure, with streets and alleys crossing one another at right angles. About one hundred and twenty acres were covered with pens when the yards were opened, and the growth of the enterprise since has necessitated additions from time to time, making the present acreage of the pens two hundred and eighty acres, of various sizes, some being of the capacity of one car-load and others of the capacity of ten car-loads. In the early history of the yards, one thousand two hundred cattle-pens and one thousand hog and sheep-pens were sufficient for the accommodation of stock, while to-day two thousand six hundred of the former and one thousand six hundred of the latter barely satisfy the demands made upon their capacity. The pens were all originally planked, and only a few have since been paved with stone. About thirty miles of alleys and streets, some macadamized and others laid with gravel and cinders, connect these pens with the loading and unloading chutes of the railroads. Thirty-five thousand cattle, two thousand hogs, ten thousand sheep and fifteen hundred horses may find quarters at the yards.

The company has spared no effort and no expense in repairs, and in augmenting the facilities for the handling of stock, as may be gathered from the fact that the repair and construction accounts range from $100,000 to $300,000 a year. In 1879, an elevated roadway was constructed over the yards, for the purpose of more easily effecting the transfer of stock to the slaughtering-houses. From time to time feeders have been built to this main viaduct, as they were required. The system of drainage has been brought to a high state of perfection, and the sanitary condition of the yards insures the health of stock. Fifty miles of sewers have been laid, which carry all surplus water out into the Chicago River and thence into the lake.

The water for the stock is obtained from six artesian wells, sunk at various times, as an increased supply was required. This was one of the chief difficulties the management had to meet when the yards were opened. The first well was sunk between May 14 and October 30, 1866, when water was found at a depth of one thousand and thirty-two feet. The average depth of the wells is one thousand three hundred feet. The water, on account of its mineral properties, can be used only for watering stock, and is not available for mechanical purposes. In the first well sunk, the water was found to be impregnated with sulphur. Another well, only fifty-nine feet away, was charged with an oxide of iron. The average capacity of the wells is six hundred thousand gallons a day. The supply-pipes are constructed of wrought iron, coated on the inside with bitumen to prevent corrosion.

Every railroad entering Chicago is connected directly with the Stock-Yards. All the tracks are owned and laid by the company, and the total length of track, which is being increased constantly, is now about one hundred miles. Iron rails were used at first, but steel was substituted subsequently.

One thousand feet of platform are assigned to each railway, equipped with loading and unloading chutes, so arranged that an entire train may be unloaded at once as easily as a single car.

A passenger station, with water-tanks, turn-tables, coal bins, and all the appointments of a first-class railway station, is a feature of the Yards.

The unnecessary loss in time and money sustained in the transfer of through freights between Eastern and Western railroads created a problem which was solved by the completion of the Freight Transfer and Stock-Yards canal, in 1872.

The erection of a huge warehouse, in 1874, furnished an accessible center for the storage and trans-shipment of freights. The route of the canal, which was built in furtherance of this plan, is from the South Branch of the Chicago River to Halsted Street, in a direct line with Egan Avenue, and thence to the western end of which was closed as a street for the purposes of the canal. The width of the channel is one hundred and twenty feet,
and its depth sixteen feet, thus being navegable by the largest lake vessels. The canal is being extended year by year, so as to afford increased water frontage, and it is now about a mile and a half west of the Yards. It is lined with docks, coal-yards, etc., and although the original plan has not been carried out in its entirety, the several railroads having built transfers of their own subsequently, yet the trade which is carried on by means of this waterway is enormous.

The Exchange Building is situated nearly in the center of the Yards, and is of plain construction. Three wings have since been added to the original building. The offices of the company, together with the offices of some eighty commission firms, are located in these buildings. There are also telegraph offices and a restaurant.

The Union Stock-Yards National Bank was opened for business in June, 1869, and it is practically a clearing-house. Its capital is $200,000, with an additional $100,000 at rest. Nearly all the drovers and commission men who have business at the Yards have an account with the Bank. The successive presidents have been William F. Tucker, M. Talcott, Edward S. Stickey and Elmer Washburne. Edward S. Stickey was the first cashier, and on his accession to the presidency he was succeeded by G. E. Conrad. The present board of directors consists of Samuel N. Nickerson, Lyman J. Gage, Stephen B. Booth, John W. Kelley, George T. Williams, and Elmer Washburne. A post-office building and a printing-house (which is occupied by the Daily Drover's Journal, issued by H. L. Goodall & Co.) were built in 1875. These buildings are situated just outside the main entrance to the Yards.

The Transit House, formerly known as the Hough House, is owned by the company, and was opened by them for the accommodation of those interested in the stock trade. It is situated on Halsted Street, near the entrance to the Yards.

The vigilance of the company prevented the great fire from making headway on their property. The Morris slaughter-house, situated just southwest of the Yards, was discovered to be in flames some days after October 8. The wind was then blowing from the southwest, but the progress of the flames was arrested before much damage was done. Patrols were on watch, day and night, and several prairie-fires in the vicinity of the yards were extinguished. The fire, however, did not detrimentally affect the live-stock trade.

The company employs constantly over one thousand men, a number larger than the total population of the village of Lake when the yards were opened.

The slaughtering and packing-houses, which are all situated in the vicinity of the Yards, have no connection with the former, except that their supplies of stock are received through the Yards. There are twenty-nine large packing-houses, besides several smaller establishments. These furnish almost constant employment to between twenty-five and thirty thousand men and boys.

by the presidents of the Union Stock-Yards and Transit Company have been T. B. Blackstone, up to 1866; J. M. Douglas (resigned 1866); B. B. Chandler, up to 1873; James M. Walker, up to 1881; and Nathaniel Thayer, Jr., who is now president. F. H. Winston, the first secretary, was succeeded, in 1874, by George T. Williams, the present secretary. T. E. Bryant, the first superintendent, was succeeded, in 1874, by George T. Williams, the present secretary. T. E. Bryant, the first superintendent, was succeeded, in 1874, by George T. Williams, the present secretary. T. E. Bryant, the first superintendent, was succeeded, in 1874, by George T. Williams, the present secretary. T. E. Pork Packing.
ICE. One of the most important articles in use in the packing business is ice, and following are presented sketches of some of the leading dealers in that commodity:

JAMES P. SMITH & Co.—This company dates its formation back to 1847, the present proprietors being the real successors to the original owners. In that year, Augustus Frisbie and Mr. Burrows commenced the ice business in Chicago, obtaining their supply from the North Branch of the Chicago River, and having an icehouse located at Seventy-third Avenue, was sold to Mr. and Mrs. Hiram Joy associated with A. Frisbie, the firm being Joy & Frisbie. One wagon was employed to supply the entire city, then containing, in all its divisions, only about twenty-eight thousand inhabitants. From this time they have become the largest ice company in the world, and have increased their business so rapidly that they now depend almost entirely on retail business. This firm was merged into what was known as the Chicago Ice Company, in 1860, J. Parker Smith constituting the company, and at the dissolution of the firm in 1865, it became a stock company, with J. Parker Smith as president and manager. Beginning, as they did, in a small way in 1857, the business of the present firm has assumed proportions that place it among the valuable industries of the city. The age consists of twelve large houses at Fond du Lac, Wis.; at Batavia, Ill.; at Anna; six at Chicago; five on the Calumet River, and sixteen at Calumet Lake, and they constantly have buildings under construction to provide for an increased business. They supply many packers at the Stacks-Yards, having commenced this trade as early as 1837, and also do a large business supplying refrigerator cars. They furnished the first car that was loaded with dressed beef for Providence, R. I., as an experiment, in 1869. They ship large consignments of Ice South, it being preferable to the manufactured ice in the Southern States, and they are supplied with all kinds of tools and conveniences for rapidly loading cars.

A. S. PIPEPER & Co.—This firm was first organized in 1853, to carry on the ice business, and was composed of three brothers, Anson, Thomas, and Seth, sons of Seth Piiper, and the composer is father still living at the age of seventy-eight years. They had foresight enough to grasp the importance of this branch of trade, that other business men overlooked, and in a small way they commenced to build what has now become a large and profitable business, having at the present time nearly fifty teams engaged in delivering ice during the summer. Their supply is obtained from Willow Street and Yorkville, Ill., Little Surgeon Bay and Green Bay, Wis., and the main office is at No. 83 West Twelfth Street.

While operating the ice business, they discovered a demand for special tools for that industry, for marking out the blocks, cutting and breaking, and for wagons and drivers, and in 1854, they employed George A. Shufeldt, Jr., Henry H. Brown, F. W. Gates, Henny Greenbaum, Daniel W. Page, Carlisle Mason, Amasa F. Dwight, William Phillips and John C. W. Bailey, and the following officers were organized: Henry Piiper, superintendent; Seth Piiper, secretary; A. F. Croseky, treasurer; W. T. B. Read, superintendent. The superintendent was living at Alton, Ill., at the time the well was first projected, and was sought after on account of his superior mechanical knowledge and his ability as a business and financial manager. He carried the project through very successfully, and had it not been for the speculative disposition of many of the controlling parties in the company, it would undoubtedly have remained the property of the original investors, but they were continually speculating in cotton, wool, etc., and finally became involved, and the real estate, fixtures, etc., in 1872, became the property of J. C. Cowden & Co., with Mr. Piiper as superintendent, with the property of the forty acres costing him in the aggregate $1200. Soon after that Mr. Read, the superintendent, purchased a half interest and commenced to operate the ice business, and at the time of Mr. Cowden's death, in 1875, he had nearly all of the firm's property, except the forty acres, for his portion. The property has since been divided, Mr. Read having twenty-five acres and the widow of Mr. Carmichael fifteen acres. The ice business at the present time is operated by W. T. B. Read's Sons, the father retaining a supervisory interest.

William T. B. Read was born at Providence, R. I., and received his education in the schools of the early day of that country. He is the son of Jonathan and Nancy (Bicknell) Read, with whom he remained until after leaving school, when he was regularly apprenticed to the jewelry trade. After leaving his trade, he went to New York City, where he purchased a stock of dried goods, and then opened a store at Newburg, N. Y., where he remained about two years. Disposing of his store, he took up his residence in Mobile, Ala., where he again entered the same business. He remained South for about twelve years, and came to Illinois in 1842, to the interests of the late R. W. McIlvaine, and in the firm of E. C. McIlvaine & Co., in 1844, and afterwards entered into business for himself, and after the death of Mr. McIlvaine, continued the business until 1853, when he removed to Chicago. In 1865, he came to Chicago, and became interested in the boring of the artesian wells intended at that time to be built. He visited, in the fall of that year, Allegheny, the salt fields of Pennsylvania, fully informing himself of all the points required for a successful completion of the Chicago wells, and became the head of the enterprise, which he has never abandoned up to the present time. He was married to Miss Jane (Carmichael), the eldest daughter of W. T. B. and Adéle (Carmichael) Read, was born at Alton, Ill. He received his preliminary education in the public schools of Chicago, subsequently attending the Illinois State University, at Champaign, for

THE BOARD OF TRADE.
several years. He then returned to Chicago, and remained at home for some time, when he commenced his study of lithography in the establishment of the Sherwood in the city, where he is still employed. He was married in Chicago, in 1853, to Miss Lizzie Greenhood, daughter of J. C. Greenhood, the well-known deaf school teacher, and has one daughter, Annie Eliza.

Harry J. Read, the second son of William T. B. Read, and an active member of the Artesian Well Ice Company, was also born at Alton, Ill., and came to Chicago when quite young. He received his education in the public schools of this city, and afterward attended for four years the State University, at Champaign, Ill. He returned to Chicago and began assisting his father in the management of the ice business, taking from him much of the responsibility which he had for years borne. He is at the present time the leading spirit in the business.

Benjamin F. Read, the junior member of the Artesian Well Ice Company, is a native of Illinois, and was born at Alton. He came to this city when quite young, and attended a private seminary known as the German-American School. While receiving his education he was an assistant on his father’s business, and thus became qualified for the position he at present occupies.

E. A. Shedd & Co. commenced the ice business in 1874, beginning in a small way; running the first season only two wagons, but gradually enlarging and purchasing the business of several of the smaller companies and finally absorbing one of the oldest and largest companies in the city. In January, 1885, they formed a stock company called the Knickerbocker Ice Company, with $50,000,000 of stock, and are now doing a business of nearly $40,000,000 per annum, and employ about sixty men in the summer, and a much larger force in the winter in preparation for the warm weather. They have their offices and warehouses at 1314 & 1316 Madison Avenue, and are doing a large business there. The officers of the Knickerbocker Company are E. A. Shedd, president; J. S. Field, vice-president; C. B. Shedd, secretary and treasurer. They own the large ice-house and the large warehouse in the 1300 block of Lake Street, Indiana, said to be the largest in the world, and also have large houses on the Calumet River and at Calumet Lake, besides others of lesser note, and are one of the largest companies doing business in the city of Chicago.

In 1867, he came to Chicago and engaged in the ice business, and has remained in it to the present time, being elected, in January, 1885, vice-president of the Knickerbocker Ice Company.

Warehousing and Storage.—In addition to the vast business transacted through the elevators of this city, the private warehouse and storage-room is a valuable means to commerce, and a means of preserving perishable articles not handled by the elevator companies. Descriptions of some of these are subjoined.

Sturges, McAllister & Co. established a warehouse at Nos. 7-9 Rush Street, at the southwest corner of Kinzie Street, some time in the ‘sixties, for the storage of wool, and in 1867, they were succeeded by Taylor, Dickinson & Smith, the members of the firm being Z. B. Taylor, William P. Dickinson and Alfred Smith. This company managed the business for two years, the building then being known as the Empire Warehouse. At the expiration of this time the firm became Dickinson & Taylor, Mr. Smith having withdrawn. The firm was subsequently changed to Dickinson & Son, Mr. Dickinson associating his son William with him, and by them the building was continued until the fire of 1882; the building was destroyed. It was re-built by Messrs. Brown and (Avery) Moore, and afterward sold to H. N. Rust, in 1873, who, in 1879, took his son, Frank N., into partnership under the firm name of Rust & Co., and so continued until March 13, 1881. This firm was owned by Judge Manierre, deceased, acquired the property, and continued the business for a short time, when he organized, under the general name of the Central Warehouse Company, of which he was the president. This company continued in existence from January 1, 1882, when Mr. Manierre wound up its affairs and conducted the business himself.

W. H. Prendergast, the second son of Judge George and Ann H. (Reid) Manierre, was born at Chicago on April 25, 1827, at the old homestead, corner of Jackson Street and Michigan Avenue, where the family occupied up to the fire of 1871, when the land was leased for the Gardner House, now the Leland and Lake Hotel. After receiving a partial education at the University of Chicago, he enlisted on May 10, 1864, under the last call of President Lincoln, as a private in Co. "D," 144th Illinois Volunteers, and was mustered out on October 25 of the same year. Mr. Manierre completed his education at the Union College of Law, from which he graduated in 1875. He soon afterward associated himself with Richard J. Prendergast, now county judge, under the firm name of Manierre & Prendergast. In this firm he practiced law, and became the proprietor of the Central Warehouse, near Rush street bridge. He was elected, in the spring of 1885, alderman of the part of the city south of the Loop, for two years. Mr. Manierre was married on April 20, 1875, in New York City, to Julia O. Edson. They have three children,—George, Marguerite and Julia Edson.

The Garden City Warehouses were established by Dike Bros. & Minkler, which firm was changed to Dike Bros. & Baker. Warehouse "B" is located at Nos. 230 to 243 Jackson Street; Warehouse "A" at Nos. 180 to 184 Quincy Street. Determining to incorporate as a charter was secured by Dike Bros. & Minkler in 1883, and a company was formed with the following officers: N. H. Jones, president; H. L. Ware, vice-president and secretary; and H. J. Dike, treasurer. In a short time the affairs of the incorporation became involved, and the property was placed in the hands of a receiver, A. H. Burley, from whom Messrs. Hamilton and Gedde purchased the buildings. Mr. Hamilton retired from the firm in April, 1885, Mr. Gedde retaining sole control. The warehouses are used for storing general merchandise, and have a capacity of forty thousand square feet.

O. E. Gedde was born in Fredericksfald, Norway, on May 10, 1849, with parents, Christian and Catharina Gedde (Veit), who were natives of that country; Mr. Gedde was president of the Bank of Norway and president of the "Dalslands Railroad." Mr. Gedde received a portion of his education at his birthplace, and completed it in England and Germany. In 1885, he came to Chicago from England, and engaged in his present business.

M. J. Leeland is the manager of the Garden City warehouses, a position which he has held since the opening of the buildings in 1852. Mr. Leeland was born at Holliston, Middlesex Co., Mass., on May 12, 1849. His parents, Benjamin M. and Hannah J. (Leeland) Leeland, were natives of that town. Benjamin was a manufacturer of boots and shoes, and after educating his children at the Aldephi Academy, Brooklyn, N. Y., he took him into his office, and gave him a thorough training preparatory for the battle of life. At the age of twenty-two, young Leeland left home and entered a stockbroker’s office in New York City. Later he went to Minneapolis, and several portions of the United States, with a view to permanent settlement, but at length returned home to New Jersey, whither his father had removed. Mr. Leeland assumed the dairy business for five years, and then came to Chicago. In 1870, he married Agnes E. Thomas; they have three children.

The Globe Warehouse is situated on the North Pier, east of the Illinois Central Railroad viaduct, and was erected in 1856, by David Wylie, and is still owned by him. It has a capacity for storing eight hundred car-loads of grain, seeds or general merchandise, and is connected with both railroad and lake transportation. The Globe receives and stores general merchandise, and after receiving its in at Buffalo, Ogdensburg and Montreal during the season of navigation, is convenient and well adapted for warehousing purposes, and is admirably located for the traffic intended. David Wylie is also proprietor of Wylie’s bonded and general warehouse, erected in 1856 at Harrison Street and Pacific Avenue. This building was erected by the Lake Shore & Michigan Southern Railroad Company for the purpose of taking advantage of an Act of Congress permitting importated goods to come West without appraisement in New York or other ports,—bonded goods coming through, the duties on which were to be paid here, with an idea of encouraging our merchants in more direct importation. Mr. Wylie leased the building from the railroad company when completed, and has conducted it since for the above purpose. The building is constructed in accordance with the directions from the customs department of the United States. It is as near fire-proof as is possible to make it, and a capacity for receiving five hundred car-loads. The tracks of the Michigan Southern road run into the building and connect with all roads running north of the city.

David Wylie was born in Cambellsown, Scotland, on April 8, 1814; and is a son of Alexander and Agnes (Colville) Wylie, natives of the above place. Alexander was a distiller and malster most of his life; he died in Jotteting, Edinburg, Scotland, and came to Chicago, and died here on December 23, 1855, aged eighty years. David Wylie was educated in the common schools of Scotland. He came to America in 1857, and located at Toledo, O., taking a position with the Lake Shore & Michigan Southern Railroad Company, which he held for two years. In 1859, he came to Chicago and became an employé with A. E. Goodrich, of the Goodrich Transportation Company, as a general clerk, a situation which he resigned in 1865 to accept that of inspector of mineral oils, which being received, he joined the firm of J. & J. Rice, mayor of the city; he held the office during...
Mr. Rice's administration and that of Hon. R. B. Mason. After this he engaged in the warehouse business, which he still continues. In 1867, he married Miss Naomi, daughter of Thomas Dougall, of this city. By this marriage there are three children.—Alexander, Elizabeth and Mr. Wylie, and wife are members of the Fourth Presbyterian Church. Mr. Wylie is a member of Blaney Lodge, No. 271, A.F. & A.M.; of Lafayette Chapter, No. 2, R.A.M.; and of Apollo Commandery, No. 1, K. T. He is also a prominent member of the Illinois St. Andrew's Society.

Chicago Cooling Rooms.—Chicago is a city where enterprise always keeps pace with the public demand, and to meet the urgent need of men and masters who have perishable stock they require to be kept, the Chicago Cooling Rooms were established. These were instituted in 1876, at No. 131 South Water Street, by J. W. Kepler, with a capacity which was about one-eighth now denominated by his customers, and which has enabled the augmented demand of the capacity of the warehouses, so that now (1853) his rooms are occupying Nos. 131–33 South Water Street and Nos. 225–29 North Franklin Street. Mr. Kepler has experimented with all the processes for the purpose of preserving his stock, and, from the experience then acquired, has invented and patented a process which is practically perfect and is authentically designated as one of the most desirable and economical refrigerators known.

J. W. Kepler was born at Milton, Northumberland Co., Penn., on June 18, 1842, where he was educated and began business as a salesman in Lewisburg, Penn., where he remained until the outbreak of the War. He then enlisted as a private in Co. "A," 131st Pennsylvania Volunteer Infantry. After the battle of Antietam, he was promoted to second lieutenant, and first lieutenant after the battle of Fredericksburg. This regiment was raised for the nine months' service, but remained for ten months serving through the battles of South Run, Antietam, Fredericksburg and Chancellorsville. After he was mustered out, the State made a call for three months' men, and Mr. Kepler enlisted in the 26th Pennsylvania Volunteers, and was in the battle near Gettysburg. After the expiration of this term of service, he accepted an appointment in the post-office at Cincinnati, and remained there six months. He then re-entered the service and took several hundred men into the Hancock Veteran Corps, and was made captain of Co. "A," 192d Ohio Volunteer Infantry, and went into the Grant campaign around Richmond. He was mustered out three months after the close of the War, and then became a travelling salesman from Cincinnati and remained as such until 1876. From that year until 1876 he was engaged in the wholesale grocery trade at Chicago. Mr. Kepler is a member of Covenant Lodge, No. 526, A.F. & A.M., and is also a member of Port Dearborn Lodge of the Royal Arcanum.

Cognate Industries

Hides and Leather.—This important branch of commercial interest suffered but little in the fire of 1871, most of the tanneries being located in portions of the city visited by the conflagration. Since that time there has been a remarkable progress in the industry, the production having trebled in a few years, although the tendency has been to centralize and enlarge individual enterprises. In both receipts and shipments, a steady increase has been maintained for the past fourteen years, while every branch of the interest in manufacturing lines has progressed phenomenally.

In 1870, there were in Chicago fifteen establishments engaged in the manufacture of tanned leather, employing three hundred and fourteen workmen, who received $162,565 wages for the year. The amount of capital represented was $705,000; the materials consumed were valued at $1,194,310, and the products $1,618,501.

In curried leather manufacture, there were twelve establishments, employing two hundred and fifty-nine workmen, and paying $138,255 wages, in operation, the capital involved aggregating $86,400, the materials consumed $1,402,785, and the products $1,714,620. By 1886, the number of establishments had not materially increased, although the number of employees and the capital invested had more than doubled. The establishments doing a business in curried leather were nine, capital invested $851,022, two hundred and twenty-five workmen employed, $129,169 wages paid, $1,762,756 expended in material, and $2,146,500 given as the value of products.

In tanned leather, nineteen establishments were in operation, one thousand one hundred and nine workmen employed, $1,932,998 capital invested, $841,184 wages paid, $5,799,522 value of materials used, and $4,914,550 the value of products. During the year, the receipts of hides were larger than ever before, the city consuming 409,000 hides and 440,000 sheep and calf skins, much less than the city slaughtering.

The year gave a great impetus to the industry, especially in the departments which consumed the manufactured material, such as harness, trunks and belting establishments, eighty-two of which did a business of $7,16,247, being excellent in manufacture by nearly half a million dollars by five representative manufacturers two years later. The product of whips alone increased in value, in the period stated, from $1,369 to $55,000. The trade in pelts, leather and buffalo hides increased in proportion, and in 1882, the following table shows the remarkable development of the business:

<table>

The movements of imports and exports in hides and leather since 1871, are given only in an itemized form by years, as no comprehensive tabulated report is published.

In 1872, the imports included calf-skins bearing a duty of $2,135.25; 636 bales of pelts were received, and 1,285 bales shipped by lake. In 1873, calf-skins valued at $124,650 and duty imposed at $2,372.50 were imported, and 4,266 bales of pelts shipped by lake.

In 1874, the imports to Canada were 2,522 bales of hides, valued at $15,100, and 3,018 bales of pelts received by lake.

In 1875, the exports to Europe included 788 bundles of green hides, 4,356 bales of pelts received by lake, and 2,725,164 pounds of hides, and 325,044 pounds of leather exported directly to Europe. In 1876, 95 bundles of green hides were imported, and 193 bales of pelts received, and 4,725 bales shipped by lake. In 1877, 121 bales of green hides were imported, 455 bales of pelts received, and 8,120 bales shipped by lake, the direct exports from Europe being 2,224,647 pounds of hides, valued at $153,884, and 179,056 pounds of leather. In 1878, 51 bales of hides were imported, and the direct exports to Europe were 214,080 pounds of hides and 191,055 pounds of leather. In 1879, the imports of leather were 8,573 pounds, valued at $203.15, and the direct exports to Europe were 119,210 bales and 21,270 pounds of leather. In 1880, the imports were 12,558 pounds of manufactured leather, valued at $615,610, and 921 bales of hides, and the direct exports to Europe were 222,580 pounds of hides. In 1882, the imports of manufactured leather were 209,287 pounds, valued at $90,560.15, and 792 hides, while the direct exports to Europe were 220,525 pounds of hides and 20,570 pounds of leather. In 1883, imports of manufactured leather were 150,242 pounds, valued at $70,743.35, 1,399 packages of bone, and 26 cases of leather goods and saddlery. In 1884, imports of manufactured leather were 112,035 pounds, valued at $52,167.21, and 51 cases of leather goods and saddlery, and the exports direct to Europe were 2,539,200 pounds of hides and 320 pounds of leather.

William H. Greiner.—The leather tannery belonging to this gentleman is situated at the corner of Webster Avenue and Dominick Street, and is doing an extensive business, and ranks among the leading houses of its line in Chicago, the present capacity of the tannery being six hundred sides per week. Mr. Greiner first started a tannery in Chicago in 1857, on Bremer Street; from there he moved to the North-avenue bridge, on the North Branch of the river, in connection with H. Hach, they having formed a copartnership, under the firm name of Hach & Greiner, with a salesroom at No. 53 South Franklin Street. There he remained up to 1861, when the firm was dissolved; he then started on his own account at his present location. William H. Greiner was born in 1825, on the Rhine, in Germany; he received his education abroad, commencing his business career by learning the trade of tanning. Owing to some political trouble in his country, he came to America in 1849, and started at his trade in the employ of T. P. Howell & Co., at Newark, N. J.; from there he went to Sullivan County, N. Y., where he ran a tannery until 1856, when he came to Chicago. Mr. Greiner is married, in 1854, to Miss Mary Schmitt, of Sullivan County, N. Y. They have four children.—William H., Amelia, Julia and Mary.

Walker, Oakley & Co. are dealers in leather and hides, and have been established in business on the west side of the city, since 1857, R. J. Walker and J. H. Oakley, then doing business at 46 Franklin Street. They remained at that location until 1871, when they removed to No. 172 Lake Street, where a little later they were burned out in the great fire, sustaining losses aggregating between $50,000 and $100,000. They then took temporary quarters at No. 37 South Canal Street, and shortly afterward removed to Nos. 239-41 Lake Street, where they remained five years, and, in 1885, removed to Nos. 179-81 Lake Street. In 1873, Thomas C. Hammond became a partner, although he had an interest in the house from 1872, the style of which remained as before, Walker, Oakley & Co. This house, ranking among the largest of its kind in the city, has a branch establishment in Brooklyn, N. Y., besides doing and operating two extensive tanneries in this city, in which about three hundred and fifty men are employed. An idea of the growth of the business may be gleaned from the statement that, in 1867, the total amount done did not exceed $350,000, while it now reaches $1,500,000 per annum. J. H. Walker is the non-resident member of the firm, and resides at Worcester, Mass., where he looks after the Eastern interests of the house.

Thomas C. Hammond, of the firm of Walker, Oakley & Co., and prominently identified with the leather trade in Chicago and Boston, is a native of Ontario, Canada, born at Brampton, County of Peel, in December, 1832. He grew up and spent his early life in his native place and afterward entered his father's tannery. In 1863, he went to Dubuque and remained a short time. He then went to Detroit. In January of the following year, he saw the commencement of the Chicago Hide & Leather Company, remaining with this company over one year, at the end of which time he and his brother David engaged in the leather-finishing business. In January, 1872, he became a partner in the firm of Walker & Oakley, and since then, for the past twelve years, has been interested in this well-known house. The firm of Walker, Oakley & Co., is one of the largest manufacturers of leather in this country, the Annual product of the establishment being a large, uniform quality, attaining a high standard in the leather market and among the boot and shoe factories of the East and West. Mr. Hammond has a practical experience of over a quarter of a century, and is thoroughly familiar with all the different processes of manufacturing leather of the highest standard. In 1860, Mr. Hammond was married to Miss Lizzie Bell, a native of Brampton, Ontario, Canada. They have four children.—George B., Jennie R., Fred E. and Thomas H.

Franklin Sawyer, of the firm of Franklin Sawyer & Co., dealers in hides at Nos. 202-7 Kinzie Street, began business in 1861, and is the oldest house conducting a line of trade in the city. He has withstood all commercial fluctuations and reverses, including a loss of one hundred thousand dollars by the fire of 1871. Very soon after the fire, he began business again, and may be now said to be one of the largest (if not the largest) dealers on the street, his sales amounting to about one-half a million dollars annually. Mr. Sawyer was born at New Salem, Mass., on May 22, 1823, and is a son of Aaron and Laura (Thayer) Sawyer, both natives of Massachusetts. The family came to Chicago in July, 1861, and the following August his father died from the effects of a sun-stroke, in his fifty-seventh year. Franklin was educated in Hinsdale, Mass. In 1850, his family moved to New York, and where he attended the Eighth Presbyterian Church. Mr. Sawyer is a member of the Covenant Lodge, No. 356, A. F. & A. M., and of Corinthian Chapter, No. 69, R. A. M.

Turner & Kay.—This well-known house was founded in 1858. In that year William H. Turner* and Leverett B. Sidway commenced a wholesale leather and saddlery business at No. 208 Randolph Street. In 1864, they sold their saddlery department to A. N. Sawyer & Co. of which Leverett B. Sidway was a member. In 1865, Turner & Sidway sold the leather business to Turner, Bristol & Co., the partners in the latter firm being William H. Turner, Charles Bristol and William J. Kay. Then Leverett B. Sidway became a partner in the Turner & Sidway Leather Company. Sidway being president and Mr. Turner secretary of the corporation. They operated a large tannery on the west side of the city, at 35-39 Lake Street, for a number of years, and finally disposed of their interests in that line to the Union Hide and Leather Company, which is yet

*For a personal sketch of Mr. Turner, see Masonic History.
in operation. In 1867, Fred A. Ray bought out the interests of Mr. Kay in the firm of Turner, Bristol & Co., and the name was changed to Turner, Bristol & Ray. It continued until 1872, when Mr. Bristol left the firm. This was the last of the leather business, remaining to the present time. Thus it has been this firm has been closely allied to the history of Chicago for the past twenty-five years, and during that time no house has maintained a better reputation than that of Turner & Ray. When Turner & Sidway sold out to Turner, Bristol & Co., the business was transferred to No. 40 Lake Street, where it remained until the great fire of 1871. Turner & Ray removed to new quarters, at No. 40 Randolph Street, in 1871, and occupied the one hundred and seventy-five feet in size. They carry a heavy stock of leather and shoe findings, and aim to have everything necessary to supply a shoe dealer or manufacturer. So absolutely impossible are efforts to keep full stock of the ever-changing modes and styles, that it tries the ability of the most experienced buyers to supply their needs. But Messrs. Turner & Ray are gentlemen of lengthy experience, practical in every detail of their business, and fully realize the demands of their trade, which now aggregates $200,000 annually.

William Gardner was born in Kilmarnock, Ayrshire, Scotland, on May 24, 1846, and is the son of James and Janet (Gowan) Gardner, natives of the above-named place. James followed mining through life, and himself and his wife died in their native town. William was educated in Scotland, and commenced the business of dealing in boots and shoes in Mexico in 1867, he was with nineteen years of age, at which time he went to New York City, where he maintained a business until he was with the firm of Keck & Mosser, dealers in hides and leather. He then came to and opened an office in company with Mr. Geer, as a hide-broker. Mr. Geer was with him in the store in New York and came here with him. On June 19, 1873, Mr. Gardner married Miss Marcella, daughter of James and Eliza Foster, natives of Ireland; they came to America some years ago. In Jersey City, N. J., in 1870, he married Miss Sayers, one of the above marriage there were five children, of whom William is the only one now living. Mr. Gardner is a member of the First Scotch Presbyterian Church, also of the Knights of Honor and the Calvary Commandery, in which latter he is a member.

Grey, Clark & Engle.—In 1845, this business was started as the firm of C. F. Grey & Co., at No. 151 Lake Street. Soon afterward they established a tannery on the North Side, at what is now the State street bridge. They then built their present tannery corner of Halsted Street on the North Branch. In 1856, C. F. Grey retiring, the firm became Grey, Marshall & Co., composed of William L. Grey, James M. Marshall and Bruce C. Engle. In 1862, Mr. Marshall retired; it then became Grey, Clark & Co. Five years later Bruce Clark died, and was succeeded in the firm by John M. Clark, his brother, who is still a member. In 1880, the firm of Edward Engle & Co., in which there had been in the leather trade business for many years, dissolved, and Edward Engle then became connected with the present house of Grey, Clark & Engle, which organized as a company under the incorporation laws of Illinois; William L. Grey, President, Edward Engle, Vice-President, John M. Clark, Secretary, and James Marshall, Treasurer. They now operate two large tanneries in this city, the annual output of which amounts to over $1,500,000 per annum. They also employ from three hundred to three hundred and fifty men.

William L. Grey was born at Buffalo, N. Y., in 1833. In 1850, he came to Chicago and engaged in the leather business. He married Sarah D. Dellenbaugh, daughter of Samuel Dellenbaugh, M. D., of Buffalo, N. Y.; they have three children, Jesse, Florence and Walter C.

Edward Engle was born in Alsace, France, in 1836. In 1854, he came to America and settled in Berks County, Penn., where he remained for two years, and then went to Boston, Mass., and engaged in the leather business with William Quirin & Co. In 1856, they closed out their business and interests and went to Ottawa, Ill., engaged in the leather business until 1862, when the firm dissolved. Mr. Engle then came to Chicago, and, with N. B. Bristol, formed the firm of Bristol & Engle. In 1866, he formed a partnership with Mr. Clark, and opened a new and extensive house of Grey, Clark & Engle. In 1871, Mr. Engle married Miss Julia H. Vette, of Ottawa, Ill. They have two children, Cora A. and Edward V.

Joseph Klein was born in the province of Alsace, France, on August 1, 1821. He was brought up in one of the manufacturing towns of that populous region, and, like most of the boys of that time, served his apprenticeship at one of the factories. He learned the trade of shoemaker, and when eighteen years old decided to come to America. He landed in Boston in 1839, and after spending some time in learning the American methods of the business, came west to Ottawa, Ill., in 1860, and was employed as superintendent for his brother, Edward Engle, and William Quirin, who were engaged in the leather business as the firm of William Quirin & Co. In 1862, upon the dissolution of the firm, Mr. Engle accompanied Mr. Quirin to Boston, and remained with him as superintendent for the business. In 1866, when Mr. Engle came to Chicago he and his brother, Edward Engle, who had, in 1862, come to Chicago and formed a partnership with N. B. Bristol, in the leather business, as the firm of Bristol & Engle. In 1868, this firm changed its name to Engle & Co., and Mr. Engle continued in business as the firm of Engle & Co., directory in the leather business, as the firm of Engle & Co., and carried on the business of manufacturing leather. They dissolved partnership in 1880, and Augustus Engle withdrew from active business life, and engaged on a large farm, in which he has devoted to the erection of a large and beautiful residence on State Street, near Lincoln Park. Mr. Engle married on December 18, 1863, to Miss Charlotte Vette, daughter of John D. Vette, one of the early settlers of Ottawa. They have one son Walter.

Nahum Garley was born in Oswego County, N. Y., on August 5, 1840, and is a son of Daniel and Lydia (Ritch) Garley, Daniel is a native of Rutland, Vt., and Lydia was born at Oswego, New York, where she died in 1856. Daniel married again and moved to Danville, Ill., where he still resides; he has been in the lumber trade the greater part of his life. Nahum was educated at the town academy in Danville, and then became an engineer, and at twenty-five years of age, when he obtained money and went to Plattsburg, DuPage Co., Ill., and attended the Northwestern College one year. At twenty-two years of age, he came to Chicago, and in 1864, began work for Mr. Grey, Marshall & Co., tanners, where he remained until 1871. After the fire, he engaged in the hide business, and, in 1873, formed a partnership with Martin C. Klein, in the hide brokerage business. In 1875, their company changed to a regular commission business. This is one of the principal commission houses in the Northwest, averaging about one million five hundred thousand dollars annually. In 1869, Mr. Miller married Miss Eliza, daughter of William and Abbe A. (Miller) Straub, farmers, Estella, Ohio. Mr. and Mrs. Miller belong to the Methodist Church.

Martin C. Klein, of the firm of Miller & Klein, was born in Prussia, on the River Rhine, on April 16, 1828. He is the son of Martin and Katharina (Burrs) Klein. He was educated in the schools of his native country and after his school days, engaged in a hardware store, where he remained for three years. Then he went into a hotel and remained three years. In 1854, he came to America, locating in Chicago, and worked for Mr. Grey, Marshall & Co., tanners, where he remained for about eighteen years and a half, under various changes of proprietors. In 1873, Mr. Klein engaged in the hide commission business in company with John Miller, in which they have since continued. In 1854, Mr. Klein married Miss Angelina Barben, who was also a native of Prussia, their wedding tour being a trip to this country. There were six children by this marriage, which were the following, Margaret, and Christine. Mrs. Klein died in 1863, and, in 1864, Mr. Klein married Caroline, daughter of Nicholas and Katherina Niederkor. There are four children by this marriage, John P., Nicholas C., Minus Joseph and Rosa Say.

Furs.—The great fire of 1871 swept away nearly every fur-dealing and fur-manufacturing establishment in Chicago, but a revival and progress in the trade became manifest as soon as the city was re-built, until, in 1886, there were ten establishments engaged in the business of dressed furs. The report of that year gives the capital invested by the proprietors of these places as amounting to $166,500, the number of em-
groves as 1,339, the amount of wagers paid $31,539, the material used valued at $927,000, and the product as $333,000. These figures, as representing the industry, as one year later a report of the trade shows the dealings of the two firms engaged exclusively in the exportation of raw skins and furs as amounting to nearly one and one-half millions of dollars. In 1888, there were two firms engaged in the tanning of raw furs and in the manufacture of the same to order.—Charles Glanis and M. J. S. Peroulon & Co. There were also three firms engaged exclusively in the fur business, and of firms which handled No. 1 skins manufactured on a large scale and shipped to the west coast. Most of the furs used come from North America, although seal, sable, and numerous cheap furs, like the corny, hare, Persian lamb and stone marten, are imported in large quantities from Europe. During a period of six years, the importations of dressed furs were as follows:

The total value of raw furs brought to Chicago varies annually from a million to a million and a half of dollars, about one-third of which are used here, the balance being shipped to their natural states to other cities.

Charles P. Peroulon, tanner, was born at Chicago in 1836. He was educated in the schools of the city, and learned that trade at the age of twenty, having served his time in the tannery of Solomon & Co., at 571 North Market Street. He is married and has two children.

The firm of Charles Glanis, tanner, and Charles Glanis & Co., are the largest tanners in the city, having an annual business of $1,000,000. They employ 250 men and women, and manufacture the finest leather in the country. They are located at 1122 and 1124 N. 11th Street.

HISTORY OF CHICAGO.

was established by him in 1834, at St. Paul, Minn., when dealing in hides was his principal business and the handling of furs a secondary consideration, and was so continued for several years. Mr. Ulman so controlled that interest that he was called the "father of the hide business." Finding that the furs were increasing, he abandoned dealing in hides and devoted his attention to the fur trade, disposing of much of his stock in Chicago through an agent. In 1860, he established his Chicago business. He ten years later established a house in New York, and for many years shipped to an agent in London, who sold his furs at the regular sales. Soon learning that his furs were shipped to Leipzig, he was the largest fur house in the city and opened a fur house for himself. Though meeting with severe opposition from the Leipzig merchants, he overcame all obstacles, and now resides there. This is probably the largest fur house in the world, and is the largest firm of its kind. The firm of Charles Glanis is managed by Isadore Rose; that in Chicago, for a number of years, was under the management of S. Minnichord, but lately has been largely controlled by Emanuel S. Ulman, a son of the founder. Mr. Minnichord, the New York house is managed by another son, Samuel Minnichord; while the one in Leipzig is presided over by Joseph Ulman, son of the founder of the entire business, assisted by his son Charles and Robert Mayer. Joseph Ulman is a native of Prussia, near Mulhouse, Alsace, France, where he was born in 1829, and came to this country in 1844, landing in New Orleans. He lived for a time in St. Louis, and then went to St. Paul and engaged in the hide and fur business, which he has maintained to the present day. He has purchased considerable property in this city, owning, at one time, the Michigan Avenue Hotel, which sold to John R. Tuckahoe. This building was burned in the July fire of 1875. In 1875, he married Amanda Solomon and had five children. His family is of Jewish descent, and he is a member of the Jewish congregation, of which he is a member.

CHARLES GLANIS, partner of the house of Charles Glanis & Co., was born in 1832, at Wismarburg, Germany. He went to school there until he was sixteen years old, when he left for London, where he was apprenticed for a term of three years to learn the trade of tanner. In 1848, he came to America and settled in New York City as a tanner until 1852. He then commenced business for himself in this city, staying there until 1854, when he removed to Chicago. Here he formed a co-partnership with his brother, Charles, and since then have been in business continually, under the firm name of Glanis Brothers. During 1866, Peter Hoffman, of Chicago, brother-in-law of Charles Glanis, was admitted to the firm, the new concern assuming the name of Glanis & Hoffman, formerly the name of Glanis & Glanis. In the first of 1874, the firm, then located at No. 203 Lake Street, was burned out. In the following year, Louis Glanis entered, and the remaining partners, taking the name of Glanis & Hoffman, continued the business, and thus the firm of Glanis & Hoffman was formed. During this time they removed, in 1871, to No. 246 Fifth Avenue, staying there until 1874, when they again moved, this time to their present store.

In 1862, the firm of Glanis & Hoffman was incorporated, and has since then conducted the business alone. On February 12, 1884, he was burned out, losing his entire stock, which, however, was well covered by insurance. This reverse in no way deterred him, and he at once resumed business at the same place, under the name of Glanis Bros. & Co., and since then has been a large and successful concern. He is now engaged in a retail business in stores of all sorts, and he makes a specialty of made-up work in leather goods for the retail trade. In 1884, the business was entered into by W. Glanis, and the name changed to W. Glanis & Co., and the firm has since then conducted the business alone. In 1884, the business was entered into by W. Glanis, and the name changed to W. Glanis & Co., and the firm has since then conducted the business alone.

Chief of Chicago, in 1852, occupied the position of the chief wool merchant in the United States. The narrow canvas within which it is necessary to compress the present review of the progress of the trade forbids more than a brief mention of the salient points of its history.

The exportation of wool in Chicago during 1852 was valued at $5,284,000, being 2,384,000 pounds. Prices during the year were unprecedentedly low, and which tended to check shipments, the result being the remaining of a large proportion of the year's clip in either first or second hands.
This circumstance exerted a beneficial influence upon prices, which were well maintained: and, in consequence, the receipts of the following year were 3,369,039 pounds, an increase of 617,201 pounds over the preceding year. The shipments for 1855 exceeded the entire receipts of the years 1854 and 1855, owing, no doubt, to the large retention of stocks in second hands, as already noticed. The variation in prices for the years 1852 to 1855 were as follows: 1852, 18 to 37; 1853, 38 to 45; 1854, 20 to 31; 1855, 22 to 38.

From 1855 to 1859, the trade in wool gradually decreased. Not that wool-growing in the Northwest had diminished. 1859 was the year's business in the West was most of the clip was purchased employed agents in the country to purchase directly from growers, who either sent to the nearest lake port for shipment, or forwarded by railroads not touching at Chicago. As is shown in the accompanying table, the receipts and shipments of wool had fallen to 918,319 and 934,595 pounds, respectively, and the following year witnessed a still farther falling off. The tables present in succinct form a statement of the fluctuations in the trade, as regards receipts, shipments and prices. The reader will not fail to notice the extraordinary, and somewhat abrupt, increase in receipts and shipments in 1871 as compared with 1870. Two facts may be mentioned in explanation. In the first place it must be borne in mind that, while the figures there given are taken from statements contained in the reports of the Board of Trade, no daily reports of current business are made to that body or its officers, and, in the absence of specific data, resort must be had to approximation and estimates. In the second place, the opening of many new "ranches" in the far West caused an increase in shipments from the Pacific Slope.

The next noticeable comparative annual advance occurred in 1874, and is to be accounted for by the following circumstances: Old stocks had been nearly exhausted before the new clip began to move. Woolen goods were depressed, and it was believed that the prices of new wool would be generally low. A high tariff and high prices abroad, however, diverted foreign-grown wool from this country. Hence, manufacturers had to depend chiefly on the domestic clip, and the West was invaded by Eastern buyers. The receipts at, and shipments from, Chicago, although largely in excess of those of the previous year, would have been still greater, had not many of these buyers purchased directly from growers, thus diverting the wool of the Northwest from its natural centre. The crop of the year, however, was smaller than that of 1873, and Chicago manufacturers secured a fair proportion of the entire volume of business. The following brief table presents a comparative view of the production in eight Western States (Illinois, Indiana, Iowa, Kansas, Minnesota, Missouri, Ohio, Wisconsin) for 1873-74, together with importations from New York and Boston during the first three-quarters of the years 1873-75, inclusive:

| Product in 1873 | 36,502,544 pounds |
| Product in 1874 | 35,727,841 pounds |
| Importations in 1872 | 81,380,536 pounds |
| Importations in 1873 | 101,106,313 pounds |
| Importations in 1874 | 151,097,453 pounds |

Another remarkable increase in the amount of the annual business done appears to have occurred in 1876, which year presented some noteworthy features in the trade's history. The season was a surprise. At the opening of the year, the outlook was not encouraging. Woolen goods were low and manufacturers were carrying heavy stocks. The latter, however, found relief from the results of over-production by immense auc-

J. SHERMAN HALL was born in Litchfield County, Conn., on March 12, 1836, and is a son of George E. and Julia A. (Sherman) Hall. His father moved to Wisconsin in 1839, when, in 1840, the family came to Illinois, and located on a farm in Jefferson. After living there for five years they removed to Chicago. J. Sherman Hall was educated in the common schools of Connecticut. After leaving school, at sixteen years of age, he obtained a situation in the wholesale store of A. T. Stewart & Co., of New York City, where he remained for two years. He then went, with his parents, to Wisconsin and was on a farm with his father for one year, after which he again entered mercantile business, this time at Richland City, Wis., as salesman. He remained a clerk a few months, when he bought out the concern, and continued it two years. In May, 1856, he disposed of it and came to Chicago and established a commission business, in connection with the C. H. Sherman, of Woodbury, Conn., under the firm name of Sherman & Hall. Mr. Sherman died in 1865. In 1853, William J. Pope be-
came a partner and the firm name was changed to Sherman, Hall & Pope, and so continued until 1866, when J. W. Lybrand, of Richland Center, Wis., came into the firm, and the name was again changed to Sherman, Hall & Co. Mr. Hall bought out his partners and carried on the business one year alone, under the name of Sherman, Hall & Co. He then associated with him, in 1867, a young man named John H. Pixley, of Brooklyn, N. Y., a son of the Methodist minister, John Pixley, Jr., who had been educated in England and had retired to the United States. Mr. Pixley had been large since he first began—averaging from three to five million dollars, annually, the first ten years. The fire of 1871 destroyed all of his property and he also suffered severely by the panic of 1873; but, being determined to push on resolutely forward, he has kept in business where less resolute men would have failed, and now has an excellent trade. He has been largely identified with the domestic wool trade, and for ten years was the leader in the Northwest in this branch of business.

He retired from this trade in 1874, and removed from the corner of Michigan Avenue and South Water Street, where he had been located since 1864, to the corner of Dearborn Avenue and Michigan Street, the center of the wool trade. He is now doing a wool commission business exclusively. The handling of wool always formed a large portion of his business, he having handled as much perhaps, as any house in that trade. In 1856, he married Miss Frances E. Whitlock, of Chicago. They have had eight children, of whom there are six living: Eugene S., Grace W., Harriet L., Frank L., and Louis J. Mr. and Mrs. Hall are members of the Union Park Congregational Church.

A. M. Lewis, senior member of the firm of Lewis & Howard, wool dealers, was born in Philadelphia on February 28, 1828, at Madison, Madison Co., N. Y., and is the son of the late Dr. Jabez Lewis, Jr., of New York, who was educated in the classical schools and Academy of his native town. He remained at home, working on the farm, until he was nineteen, when he learned the Daguerrean business, which he followed for about three years. He then engaged as clerk with the firm of Lucas & Coe, who kept a general store and managed the post-office in Madison, N. Y., remaining with them six years. In the spring of 1856, he came West, and, after spending ten months in travelling over the Western country, he accepted the position of bookkeeper for Hall & Lewis, lumber dealers in this city, continuing with them on March 1, 1857. The hard times, in the summer and fall of 1857, necessitated his vacating the position of bookkeeper. March 1, 1858, by mutual consent of the parties, he entered the firm of Hall & Lewis, near the first year of his employment, in consequence of which his position as bookkeeper was necessarily vacated. Shortly after this he formed a partnership with H. B. Lewis and B. H. Newell, and in March, 1858, this firm commenced business as dealers in hides, pelts and wool under the firm name of Lewis, Newell & Co. This continued some two years, when Mr. Newell withdrew, and the business was continued by H. B. Lewis and A. M. Lewis until 1863, when William H. Brooks, Jr., was admitted into the firm, the name of which was changed to Lewis & Brooks, and under this name transacted a wool business exclusively up to the spring of 1871, when the firm dissolved. At this time, H. B. Lewis, A. M. Lewis and Mr. Brooks withdrew from the business. In 1871, A. M. Lewis continued it alone until about the third week of October, 1871, when A. B. Tuttle, of Utica, N. Y., became his partner under the firm name of Lewis & Tuttle. In 1876, J. H. Howard was admitted as a silent partner, and so remained until the spring of 1880, when Mr. Lewis and Mr. Howard bought out Mr. Tuttle's interest, and, under the firm name of Lewis & Howard, they have continued in wool trade, in which they are still (1885) engaged, at Nos. 153-160 Washington Street. As showing the rapid growth and present magnitude of this branch of Chicago's trade, Mr. Lewis said: "When I began the wool trade in Chicago in 1858, the annual receipts in this market were less than 200,000 pounds, while, in 1821 they were over 40,000,000, and during this period of war, panic, and the fire of 1871, I have seen the prices vary from 20c. to $1.00 per pound." In September, 1856, Mr. Lewis married Harriet F. Tolles, of Boston, Mass., daughter of Elisha and Harriet (Frissie) Tolles, natives of Connecticut. They have two daughters, Mrs. Marion M. and Bertha C. A. M. Lewis is a member of the firm of Lewis & Howard, wool dealers and commission merchants, Nos. 154-164 Western Avenue.

He was born at Lawrence, Mass., on June 17, 1849, and is the son of John H. and Clarissa (Hayward) Howard. Mr. Howard comes from a family noted for longevity; his father's mother on the paternal side is now living (1885) at the age of one hundred years; she claims to be a direct descendant of General Putnam of Revolutionary fame. The family are among the descendants of the founders of Massachusetts, as the following inscription on a tablet in the family burial lot at North Reading will show: "Jabez Hayward, who lived on his farm one hundred years." One branch of his descendants still writes the name in the old style, "Hayward." John H. was educated in the High School at Lawrence, Mass., and in Phillips Academy, Andover, Mass.; afterward taking a course in the business college at Douglassville, N. Y. His first work was in the Methuen Woolen Mills, Mass., where he remained for three years and acquired an extensive knowledge of the wool business. On November 1, 1869, he arrived at Detroit, Mich., and worked eight months for Holmes, Butler & Co., wool dealers. In September, 1870, he came to Chicago, and soon engaged in the wool trade. In 1872, he formed a partnership with J. H. Lewis, and the firm continued in the wool trade, at No. 118 South Water Street; the fire in October during that year dissolved the firm. In three days after the fire, Mr. Howard again started this business on West Lake Street; he continued in a large way of business and in 1874 took over all the wool interests and business, which he conducted alone until February, 1876, at which date he became a partner in the firm of Lewis & Tuttle, the style of the firm remaining Lewis & Tuttle until March 26, 1876, when Mr. Lewis and himself purchased Mr. Tuttle's interest, and the firm name was changed to Lewis & Howard. Edward B. Howard, the only brother of John H. Howard, is also in the wool business with this firm. On December 28, 1876, J. H. Howard married Louisa A., daughter of Ruel and Mehitabel (Kinder) Fry; they have four children,—Hattie E., Mildred R., Henry B. and Edward C. Mr. Howard is a member of Ashlar Lodge, No. 208, F. & A. M.

THOMAS W. HALL, of the firm of T. W. Hall & Co., dealers in wool, Nos. 176–80 Michigan Street, was born in Jefferson County, Ohio, on July 12, 1815; he is a son of Joseph and Dilla (Moore) Hall. He came to Ohio from Virginia in 1805, and from there to the Far West. His father was a Methodist Episcopal clergyman for sixty-one years, and was known as a man of great piety and zeal in the cause of Christ. He died in Monroe, Wis., in 1860, his wife having died in Medina, Ohio. Mr. Hall has been extensively interested in the wool trade, having been a wool dealer in Ohio. In 1839, he went to California on foot with an ox-team, and remained until 1854, selling goods and buying wool in Savannah, Ashland Co., O., where he remained seven years. In 1847, he moved to Madison, Wis., and continued the sale of groceries for two years. In 1849, he went to Chicago, and engaged in the wool trade with Jesse McAllister and Jonas Livmore of Philadelphia, the firm name being McAllister, Hall & Livmore, which continued until 1854, and then by mutual consent. Soon after this, Mr. Hall went into partnership with B. F. Pickley and John Kinsey, the firm name being Pickley, Hall & Kinsey until 1868, when two of Mr. Hall's sons bought out Messrs. Pickley and Kinsey, and the firm became T. W. Hall & Co., which was burned out by the fire of 1871, losing fifty-two thousand dollars. T. W. Hall soon resumed business, the other son going out of the company, and a younger brother, Charles, coming into partnership with the father, with which he continues. This is the third oldest wool house in the city, and is probably the second largest house in the trade. They have handled about $50,000,000 worth, and in the year 1884, On April 16, 1859, Mr. Hall married Miss Catherine, daughter of Adam and Elizabeth (Castle) Smith, who came to Ohio from Pennsylvania at an early day. Mr. and Mrs. Hall have had nine children, of whom are yet living: Mrs. John H. Howard (formerly a partner of his father), married and living at New York; Mr. and Mrs. Hall are members of the Methodist Episcopal Church. Mr. Hall is a regular attendant of the People's (Mr. Thomas's) Church.
THE BOARD OF TRADE.

in 1885, since which time Mr. Rielly has been in the wool-pulling business for himself, at the corner of Noble and Division Streets. On October 7, 1887, the shipments by lake being 3,853 bales. In 1882, the exports to Canada were 222,392 pounds, value $15,720, in 1877, the total shipments by lake being 3,853 bales. In 1876, the shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales.

RICHARD STREET was born on September 5, 1825, in Banockburn, Scotland: he is a son of William and Lucy (Anderson) Street, who were natives of Yorkshire, England. Richard was educated in Scotland. Soon after completing his schooling, he engaged in the manufacture of woollens, and in that native place, which he continued until 1825, when he came to the United States, first through a route for Grange, Wis., where he engaged in farming, and continued that business for four years. He then engaged in the manufacture of woollens, which he maintained until 1851, when he retired from that industry and came to Chicago. After his arrival here, he went into partnership with his son, Robert R., in cotton and woolen mill supplies, dyes and chemicals, and cotton and woolen yarns. They are doing a heavy and extensive trade, receiving from California and Oregon, and east to Pennsylvania, averaging about $400,000 annually. In 1837, he married Miss Elizabeth, daughter of Robert and Helen (Dougall) Robertson, natives of Scotland, where Helen died. Robert came to America, and died in Grant County, Wis., at the advanced age of ninety years. There were ten children by the above marriage, nine living—William, married and living in Janesville, Wis.; Robert R., married, and living in Chicago; Helen D.; John, living at home, Wis.; Lucy S.; W. R. Kendrick, of Waukesha, Wis.; Isabella J., wife of A. E. McCornery, of Stillwater, Minn.; Richard W., married, and living in Chicago; George W. is in the United States Navy, on board the flagship in the Mediterranean; and Charlotte J., married. Mr. and Mrs. Street and wife are members of the Centennial Baptist Church. Mr. Street is a Knight Templar, and member of Utica Commandery, No. 3, and is also a member of the Royal Arcanum.

BROOM CORN.—The broom corn interest, considered as a separate branch of commercial enterprise, had no history in Chicago previous to the fire of 1871. It assumed some importance as early as 1865, when the veterans in that line, Judge Samuel Boyles and T. F. Dunton, opened a market for its sale in this city. It was not until after the fire, however, that the handling of the commodity was made a specialty, and this business has grown in magnitude and importance, until there are now ten large dealers engaged in the trade in this city, namely, Samuel Boyles, T. F. Dunton, John Fishbaugh, John C. S. Hancock, J. I. Strahanam, A. D. Ferry & Co., J. P. Griswold, W. L. Roseboom, and H. F. Vehmeyer. In 1871, broom corn was worth $110 a ton, and there were 6,500 tons sold in Chicago. In 1875, the price was $80 and the sales 12,000 tons. The principal sources of supply for this market are Kansas, Nebraska, Missouri, and Illinois. The bulk of the article shipped here is sent to Indiana, Ohio, the Eastern and Middle States and Canada. Not over 1,200 tons are worked up in Chicago. The reports of the shipments of broom corn and the receipts of the same are very meagre, but a few items of interest have been collated from such sources as are available and reliable.

In 1871, the shipments amounted to 653,500 pounds. In 1872, the shipments amounted to 705,500 pounds, and the receipts to 461,700 pounds, valued at $13,377, the shipments by lake being 3,853 bales. In 1872, the exports to Canada were 222,392 pounds, value $15,720, in 1877, the total shipments by lake being 3,853 bales. In 1876, the shipments by lake being 3,853 bales. In 1876, the shipments by lake being 3,853 bales. In 1876, the shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales. In 1875, the total shipments by lake being 3,853 bales.

Frank went on a farm and worked for one year, and then learned the trade of a broom maker. He came to Chicago in 1854, and soon after went to St. Charles, Kane Co., Ill., and engaged in the factory of E. D. Ferry. He later worked for W. W. Warner, of Chicago, and again returned and worked for Mr. Ferry. He then went to Williamsville, N. Y., and worked at his trade until 1862, when he enlisted in the 27th New York Battery, and served until the close of the War, when he was honorably discharged, on June 22, 1865, at Buffalo. He was in many severe battles, including those at Spottsylvania, the Wilderness, Cold Harbor and many other engagements. After his discharge he went to work at his trade and remained one year in Buffalo. In 1867, he came to Chicago, worked several years at his trade, and also worked a number of years in Indiana. In 1875, he began the manufacture of brooms in Chicago, and continued his business, with the addition, in 1884, of dealing in broom corn. In 1885, he married Miss Matilda, daughter of Nelson Panquette, a native of Canada. They have two children,—Frank and George. In 1886, Mrs. Rich died, and, in 1890, Mr. Rich married Miss Elizabeth, daughter of Patrick and Elizabeth Murphy. By the latter marriage there have been nine children, seven now living,—Ida, William, Harry, Clara, Nellie, Lizette and Gertrude.

**Butter and Cheese.** Few persons realize how large is the commerce of Chicago in dairy products. The receipts and shipments at this market have steadily increased for a long series of years, and both butter and cheese are exported from this city to Europe, directly, in very considerable quantities. In 1872, the butter trade had assumed such proportions that monthly statistics of receipts and shipments were prepared under the direction of the Board of Trade, in like manner as other leading articles of commerce. And, in 1873, the secretary of that body, in his general review of the year's business, deemed the subject of such importance as to deserve the following comment:

"In the products of the dairy a very marked improvement has been discernible, both in the volume of the business and in the character of the goods sent to market. Increased and more careful attention to the manufacture of butter and cheese, in this and the adjoining States, seems to be receiving its just recognition and reward. It is hoped and believed, that in a few years the Northwest will become as noted for fine qualities in dairy products, as it has been, in the not distant past, for its large production of the lowest grades worthy the name of butter and cheese."

The organization, in 1872, of the Produce Exchange, its membership being composed largely of dealers in the minor agricultural products, proved a success and exerted a beneficial influence on the trade in dairy products. The manufacture of butter and cheese in Illinois increased from 1872, and it was assumed large proportions, while, with the increase in production, came also a vast improvement in the quality of these articles. Large quantities of Illinois dairy products began to be exported to Europe, and rapidly established a reputation abroad which promised a liberal increase in that branch of agricultural industry.

The history of the trade from that date furnishes no items of extraordinary interest. It presents a story of constant and remarkable growth until 1885, which is shown by the following tables. The reason for this diminution in the export trade is found in the successful Canadian competition and in increased production in Europe.

**P. Moran & Co.** are dealers in butter and cheese, the house having been organized in 1873, and composed, at that time, of Patrick Moran and Issley C. Dow, one of the well known manufacturers of dairy products in the Western Reserve, Ohio. The partnership remained in existence sometime, when Mr. Issley withdrew and two of his sons took his interest, continuing the business until 1877, when their share was purchased by Mr. Moran. In 1877, A. E. Woodhill also became a partner, being succeeded, in 1878, by the sons of Mr. Moran, Edward P., William J., and Robert H., forming the present firm, under the old firm name of P. Moran & Co. Patrick Moran, the senior member of the firm, came West in 1856 in the interest of Mr. Dow, of Ohio, and passing through Chicago became satisfied of its future greatness. Returning to Ohio, he told this to his friends, and they persuaded him to establish a business in Chicago, in order to sell their products on commission. Then commenced the development of the dairy interest of the West. In 1878, Mr. Moran, A. Devine and a H. Vanzer built factory "A" at Elgin, Ill., and commenced the manufacture of cheese and butter, but, on account of their being westerners, it seemed impossible to sell these articles, and finally they placed the goods upon the market on their merits and did not brand them, when they found a ready sale, being taken in preference to Western Reserve cheese or Orange County butter. They afterward built factories "A" and "B," and then other factories sprung up like mushrooms. Then followed in their lead Wisconsin, which proved to be just the climate for curing cheese, and through the influence of the Chicago parties, Sheboygan and vicinity became the center of cheese-making. Iowa followed in the wake, but, on account of the climate being unsuited to the curing of cheese, dairymen of that State confined their labors to producing butter. Then Minnesota also commenced the dairy interest, and latterly Nebraska. The firm of P. Moran & Co. found that it was necessary to increase the demand for these products, for they were receiving about fifteen hundred cheese and five hundred tubs of butter daily, as they opened a branch at New York, finally at Boston, and commenced the export business. In this way they provided for the surplus, and were the means of attracting buyers from London and other cities, and at the present time there are eight buyers from London and Scotland in Chicago, making it necessary for the London branch to be maintained.

**Patrick Moran** was born in the west of Ireland in 1853, and is the son of Patrick and Bridget (Quinn) Moran. He received a common school education in his native land, and at the age of eighteen left Ireland. His father was a farmer, and, in the year of the famine in Ireland, seemed by intuition to foresee the blight of the potato in his country, and at the age of eighteen, having saved a little, and did much to supply the wants of the poor suffering people, by grinding the grists of grain that were dealt out to them, being sent...
THE BOARD OF TRADE.

347

from the United States. Patrick was the only son in a large family, having eight living sisters. He came to New York City in 1843, and remained only a short time, when he went to Ohio, locating on the Western Reserve, and commenced work for Mr. Dow (who was afterward his partner in Chicago) for eight dollars a month. He commenced business on a very small scale in Chicago, but, by strict attention to its interests and great energy, he has succeeded in building up a fine business. He was an early member of the Board of Trade in Chicago, when the membership cost only $5, and has been a constant member on change of residence. When the tide of prices swept off the business of South Water Street, it left him a ruined man financially, being heavily in debt, but, to his credit it is said, he paid every dollar of his indebtedness with interest until paid. Mr. Moran was married in Pittsburgh, Penn., in 1855, to Barbara McGuire; they have four sons, Edward P., William J. and Robert (active partners in the firm of P. Moran & Co.), and George D.

Artificial Butter.—The manufacture of artificial butter has, for several years, exerted a disturbing influence upon the butter market of Chicago, as upon that of other cities. Two varieties of the product are made here, butterine and oleomargarine. Probably few consumers recognize the difference—which is marked—the two being confounded in the popular nomenclature.

Butterine is simply a compound of refined and neutralized lard, mixed with butter in certain proportions. Oleomargarine is more or less a modification of a process devised by an eminent French chemist, whose method of procedure may be briefly described as follows: Finely minced beef suet was mixed with carbonate of potash and fresh sheep's stomachs, cut into small fragments. Under the influence of heat, the pepin in the sheep's stomachs separated the fat from the cellular tissue; when cool, the fatty matter was removed, and subjected to powerful hydraulic pressure, separating it into stearine and oleomargarine. About ten pounds of the latter product were mixed with four pints of milk and three pints of water, and the whole churned together. The resulting compound, when well washed, resembled in appearance, taste and consistency, ordinary butter. The product was approved, on dietetic grounds, by French officials, who imposed upon its manufacture and sale taxes identical with those levied upon natural butter.

Strenuous efforts have been made, from time to time, by dairymen and others, to secure legislation in Illinois prohibiting both the manufacture and sale of artificial butter, but they have not hitherto been crowned with success. There can be little doubt that the product, in some form, has a place upon the tables of many Chicago families who would promptly exclude it from the household dietary list, were it not for its prevalence. Its sale as natural butter, however, is to be attributed rather to retailers than manufacturers, who, as a rule, sell their goods without pretense. It is impossible to state, with absolute accuracy, either the number of artificial butter manufacturers in the city, or the volume of business. It may be said, however, that there are at least ten establishments who are regarded as "leading," and that the trade is annually growing. From a careful comparison of obtainable data, it may be said that the average capital invested in the industry is between $5,000,000 and $6,000,000, and that the sales, during 1885, did not fall far below $24,000,000.

G. W. Clark & Co.—This firm commenced the manufacture of butterine in October, 1875, the company consisting of G. W. Clark and John J. Murray. This was the first establishment of the kind in the city, and the factory was located at that time at No. 256 South Water Street. Subsequently the firm, having recognized the value of introducing butterine, and the sales were small and confined to a few grocers and to some of the restaurants. At the end of the first year the partnership ended, and C. Y. Robison was taken into the firm. Mr. Murray, acting as manager, and the factory was moved to No. 177 Jackson Street, where the business was continued through the season. In the spring of 1879, it was changed to No. 69 Market Street, and there were made from three to five hundred pounds a day. It was discovered at this time that the prejudices against the butterine were giving way, and sales began to increase. The present firm of G. W. Clark & Co. then retired for the summer, and, in October, 1879, Mr. Holmes was admitted into partnership. They commenced business at No. 127 Fifth Avenue, a factory having a capacity of eighteen hundred pounds each day, and could sell every pound they could make. They continued in that location until the spring of 1880, and then moved to the basement of Squire's packing house, where, from above, they could not only make their butterine but damage their works to a large amount. They took up their quarters then at the corner of Jackson and Market streets, and made there from two to four thousand pounds a day, remaining until the early spring of 1885, when they removed to 500 and 513 Michigan Avenue. They occupy the six-story and basement brick, having twenty-five thousand square feet of surface and being able to turn out twenty thousand pounds of butterine daily. They formed a new partnership at that time, under the style of G. W. Clark & Co., composed of Mr. Clark, J. S. Meister, and K. Hexter, which still continues.

George W. Clark was born at Meadville, Erie Co., Penn., on April 21, 1845, and is a son of Joel and Lucinda (Illis) Clark. He was educated at the public schools of Erie, and after completing his studies was variously engaged as a clerk and a salesman, remaining in Erie until 1864, when he enlisted in the Navy at that point. He served on a steamer called "Silver Lake, No. 23, of the Mississippi Squadron," being appointed to a position as purser's steward. When the War terminated, he was discharged from service, being at that time on the steamer "Michigan." Returning to Erie, he remained in that city until 1878, when he came to Chicago with the intention of engaging in the butterine business, and concluded it would be a good point to commence the manufacture of a uniform article that would be a healthful substitute, buying the first pound of lard for that purpose in October, 1878. Having associated himself, previously, with Mr. Murray, who understood the manufacture of butterine, they at once commenced, and have continued in the business up to the present time, having had the satisfaction of accomplishing the success of an enterprise, in which so many resolute men would have years before relinquished as hopeless. Mr. Clark was married in Philadelphia, Penn., in 1873, to Miss Rebecca Stinson, and has four children: David A., George W., Edgar and Lillie.

Grocers, etc.—The condition of the grocery trade, at the opening of 1871, may be described as fairly flourishing, as is shown by the following statement, which approximates very closely to absolute accuracy:

<table>

</table>

A falling off of about fifteen per cent. in prices from 1869 (mainly caused by the decline in the gold premium), naturally tended to reduce profits. On the other hand, the increased consumption, resulting from the augmentation of population and lowering of prices on foreign goods, increased the volume of the retail grocery business nearly, or quite, fifty per cent., which, of course, acted directly upon wholesale dealers. A noticeable feature of the trade at this time, was the constant increase in direct importations of teas and coffees by Chicago merchants. Coffees were then selling at the same prices as obtained in New York, Baltimore and New Orleans, while teas from Japan were selling in this city at prices from two to three cents a pound lower than were paid for the same qualities in New York.

It is interesting to note the growth of the trade within the five years following. In making a comparison, however, between the statement for 1871 and the receipts for 1875, it must be remembered that the former figures relate to the entire volume of business, both wholesale and retail, while the latter have reference only to wholesale trade. In that, the capital invested at the close of 1875, was $8,000,000; the sales for the year aggregated $75,000,000, as against $70,000,000 in 1874.
and $80,000,000 in 1871. Direct importations by Chicago merchants had continued to increase, the percentage of increase in tea alone, within five years, reaching nearly thirty per cent. The jobbing sales of this commodity, during the year, reached 110,000 packages, as against 100,000 in 1874, of which from 25,000 to 30,000 were imported by dealers in this city. It is also worthy of the remark, that the sales of Japanese teas in Chicago slightly exceeded those of any Eastern port of entry. Perhaps one explanation of this circumstance is to be found in the shortening of the distance (in time) between Yokohama and Chicago by the Pacific Railroad system.

The increase of fifteen to twenty per cent., above mentioned, relates to the quantity of goods handled; the augmentation in their value was only between seven and ten per cent., the disproportion being the result of a reduction in prices. The number of jobbers was not increased, but neither were there any failures in the wholesale trade.

Few fluctuations in prices occurred in 1876, and the year was one of average prosperity. From seven to ten per cent. increase occurred in the quantity of goods sold, but no similar percentage of gain was noticeable in the cash receipts for sales, which did not greatly exceed $75,000,000. The capital invested remained about the same ($80,000,000), the number of jobbers was not increased, and but only two important failures occurred during the year, both of which were attributable rather to outside speculation than to depression in trade. No fresh capital—or, rather, no additional capital—embarked in the business during 1877, and the aggregate sales were about the same as in 1876. Prices continued to fall, and certain lines of staple goods sold lower than at any time since 1866. A prolonged labor strike, beginning in July, seriously affected retailers and the wholesale trade, and by no especial change characterized the business of 1878, either in sales or capital, the year was noteworthy for the adoption of a more conservative policy on the part of dealers, in consequence of which, despite a falling market, the business of the year was fairly profitable.

To trace the history of the grocery trade in Chicago, year by year, would be merely to weary the reader by repetition. It would be a bare record of the multiplication of small retail establishments, a growth accompanied by a prodigious increase in the variety of staples handled, by numerous failures, an account of uniform shrinkage of values, and a story of comparative stagnation. The condition of the trade at the close of 1885, may be briefly outlined as follows:

The year was, without doubt, the most disastrous in the history of the trade up to that time. It had been generally suspected, at the opening of the year, that prices could not fall lower, yet the decline in a majority of goods during the twelve months following averaged a little over nine per cent. For the first half of the year, country buyers were very timorous and a partial paralysis of business ensued, but the sales of the last six months swelled the total volume of the year's business to about ninety-five per cent., of that of 1884, the total tonnage being somewhat in excess of that of the previous year. Sales by wholesale houses aggregated about $33,000,000. These figures, however, include sales made by Chicago dealers to points without breaking bulk. The capital invested in the wholesale and jobbing trade was about $60,000,000. An exception to the general prostration should be noted in the case of the tea trade. Tea merchants were, on the whole, satisfied with the year's business, the demands having been active and prices (especially of lower grades) having generally tended upward. The annual consumption of tea in the United States is about 100,000,000 pounds, fully half of which is sold by Chicago dealers.

Among the most prominent of the large grocers of this city may be cited: Franklin MacVeagh & Co.; Reid, Murdock & Fischer; H. C. Durand & Co.; Corbin, Macy & Co.; Sprague & Webster; Higgins, McKindley, Gilchrist & Co.; Merriam, Collins & Co.; John A. Tolman & Co.; W. M. Hoyt Co.; Henry Horner & Co.; Deane Bros. & Lincoln; Gray, Burt & Kingman.

Samuel A. Tolman was born at Camden, Me., on February 5, 1835, and is the son of Daniel and Mary A. (Achorn) Tolman, who were also natives of Maine. He was educated in the common schools of Maine, and removed to Chicago about ten years of age, when he took the position of a civil engineer, for which he had fitted himself. He continued his work for a time, and then engaged in mercantile business, in Boston. He came to Chicago in 1857, and engaged in the real-estate business, which he continued until 1860, when he entered into the fancy grocery and tea trade with H. B. Pinkham, which business lasted about five years, when they changed into the wholesale drug business, and continued one year. He then bought out Mr. Pinkham, and took in Frank Crosby and John A. King, continuing one year under the firm name of Tolman, Crosby & Co. He then bought out Mr. Crosby, and the firm name became Tolman & King, who were burned out, at No. 35 South Water Street, in the fire of 1871, but resumed again immediately, the first to resume business, in their new premises, at 35 and 37 South Water Street. They suffered, starting a store on West Lake Street, three hours after their establishment, at No. 35 South Water, was burned. Among the first stores built in the burned district was No. 51 Lake Street, where they moved before the building was completed. This business was carried on very successfully until 1882, when Mr. Tolman, being in poor health, sold his interest in the firm and has since remained in retirement. In 1860, Mr. Tolman married Bessie, daughter of William H. and Clarissa (Hath) Roberts, natives of Connecticut, N. Y. In their marriage there is one child living,—Gracie A. Mr. Tolman, and his wife and daughter are members of Immanuel Baptist Church.

Merrill, Collins & Co.—The house of which this is the successor was founded in 1865, by Whitaker, Harmon & Co., and was composed of James A. Whitaker, Isaac N. Harmon, John Messer and Franklin MacVeagh. The first place of business was at No. 52 River Street, where but one store-room was occupied; and the firm and its successors have remained in that vicinity to the present time. The business was originally carried on in a much smaller way than at present, and the changes in the personnel of the house have contributed to the continuous development of the trade until it now has very large proportions. In 1872, the partnership of Whitaker, Harmon & Co. expired by limitation; immediately a new firm was organized under the name of Harmon, Messer & Collins by the individuals Isaac N. Harmon, Isaac L. Scott and Isaac S. Collins. They continued business relations as a firm until the death of Colonel Messer, on January 6, 1874. The firm was then changed to Harmon, Merriman & Co., with Isaac N. Harmon, Charles W. Merriman, Isaac S. Collins and Henry Dexter as partners. On January 1, 1885, Mr. Harmon withdrew, and the remaining members continued the business under the name and style of Merriman, Collins & Co., the title of the concern at the present time. The business of the house is that of wholesale dealers in groceries, flour and fish, and the premises occupied by them are partly located on the original site of Whitaker, Harmon & Co. The wholesale grocery occupies a building at Nos. 50-52 River Street, with a frontage of sixty-six feet and an extension of one hundred and fifty feet to the river embankment. This is four stories and basement in height, and is used exclusively for the grocery department of the business. The second story is a fine building sixty by one hundred feet, three stories in height, fronting on River Street, which is devoted to the wholesale flour and baking departments.

The Porter Brothers Company was established in 1869, under the firm name of Porter Brothers, and continued under that name until January 1, 1885, when it was made a joint-stock company, under the laws of Illinois. The following officers were elected: W. G. Porter, president; E. N. Salsbury, vice-president; and James S. Paton, secretary and treasurer. The capital stock was $250,000. The business is wholesale dealing in fancy, foreign and California fruits, and this firm shipped the first car-load of fruit from California ever brought to this city. Last year the firm packed, and shipped from California for eastern markets, three hundred car-loads of peaches, prunes, plums, nectarines, apricots, quinces and grapes, and is at present doing a business of over a hundred tons annually. F. C. Porter was connected with the firm until January
THE BOARD OF TRADE.

1838, when he retired from active participation on account of poor health, but still remains a director of the company. He was born on February 15, 1838, in Boone County, Ill., and married Miss Ada A. Williams, who died at Cincinnati, Ohio.

Washington Porter, president of the Porter Brothers Company, was born in Boone County, Ill., on October 26, 1844, and is a son of Thomas W. and Charlotte (Lane) Porter, natives of England, who came to America about the time he was engaged in mercantile pursuits. In 1838, Thomas W. came to Illinois, and bought a farm in Boone County, where he lived until his death, which occurred when he was seventy-nine years of age. His wife died at the age of seventy-five. The Washingtons still reside in the West. He was in many severe battles, such as Champion Hills, the siege of Vicksburg, and was all through the Red River expedition. He was wounded at the battle of Guntown, by a minie ball through the shoulder, and went to a hospital for one month. He was then furloughed for sixty days, and after returning to the field was placed on detached service at Memphis, where he remained until his time expired. He was mustered out in May, 1865. Returning to Illinois he managed the home store for three years. The following winter he attended school at Belvidere, and then bought a livery stable, running it for one year, and selling it at a handsome profit. He then went West looking over the country, and at Freeport decided to start a store there. The scheme failing, he became a conductor on a Pullman dining-car for one year. During this time, in 1860, himself and brother, Frank, went to Chicago, a California freemason. Commencing business, he made a capital of only one hundred dollars, when he came out of the Army in 1865, they have continued the business and are now wealthy. In the fall of 1867-68, the brothers built a cheese factory at Garden Plain, which was the center of the largest cheese-making in the West, and has made heavy investments in real-estate, and now owns many of the choicest and most desirable stores in the city. He is a member of Masonic Lodge, No. 60, and Chapter, No. 90, of Belvidere.

A. S. Salsbury, vice-president of the Porter Brothers Company, was born at Freeport, Ill., on April 6, 1855, and is a son of Elias and Celestine (Rawson) Salsbury. His father was an attorney, and one of the pioneers of the State of Iowa, dying in Webster County, in 1863. He received a liberal education at High School in Illinois, and attended a State Normal School in Belvidere, and obtained his first business experience in the mercantile line, after which he became a travelling man. In 1874, he came to Chicago and traveled for the fancy-goods store of C. E. Webber & Co., for seven years, when he became a partner in the house and so continued until January 1, 1885, when he formed his present commercial connection. On July 14, 1881, he married Miss Susan M. Talbot.

Elisea A. Robinson, Jr., is a wholesale grocer at Nos. 275-299 South Water Street. This house was established in 1876, by Mr. Robinson, with H. C., John M. and Calvin Durand as partners. They operated a store until 1891, when Mr. Robinson has since been alone in business. His sales average about one million dollars annually. He keeps no travelling men, and deals in general staple and fancy groceries, flour being a large item of business. Last year's sales reached forty thousand barrels. Mr. Robinson was born at Narragansett, R. I., on March 11, 1855, a son of Elisea A. and Mary (Hall) Robinson, of Rhode Island, and lived on a farm which the Robinsons came into possession of in 1600, several generations having lived and died there. The land had never been sold or deeded until a recent date, when Elisea A. gave the first deed since the land was obtained from the Narragansett Indians. Mr. Robinson was educated in the public schools and a seminary in his native State. He remained on the homestead until 1865, when he came to Chicago, and engaged with the Durands, where he remained for several years, and then went into partnership with the firm. In 1873, he married Miss Abbie, daughter of John R. and Martha (Lewis) Proud, of Rhode Island. They have two children, Annie P. and Natalie A. He is a member of Oriental Lodge, No. 33, A.F. & A.M.

Albert A. Child was born at Pittsfield, Vt., on May 27, 1832, and is the son of Horace S. and Mary P. (Rice) Child. He attended the schools of his native place and subsequently entered Castleton (Vt.) Seminary, where he acquired a good acade-
Two years later, the factory was destroyed, and the loss severely crippled him financially. In 1856, Mr. Ingraham concluded to try and regain his wealth in the West, and came to Chicago. He accepted the position as travelling salesman for the wholesale grocery house of Proctor & Company. At the end of the first year, when Mr. Flanders withdrew from the firm, Mr. Ingraham purchased an interest and became the company of McKendree & Co. The business remained successful until 1866, when it was sold to McKendree, Ingraham & Co. Between 1860–65, the business of the firm grew to gigantic proportions and their trade throughout the Northwest was immense; but Mr. Ingraham, owing to his constant hard work, gradually impaired his health, and invested a large share of his wealth in real-estate, he withdrew from active business and retired for rest and recuperation. When the firm of Corbin, May & Jones was organized, Mr. Ingraham became a special partner, furnishing the firm with large amounts of property. Mr. Ingraham was the junior partner, Jones, was found to be a defaulter, and Mr. Ingraham at once set about reorganizing the firm and its business. The change was in the interest of Mr. Ingraham and his partners, and he commenced at once to rebuild their defunct house and re-establish their grocery house. He opened temporary quarters in his store, near Elizabeth Street, until he completed the erection of a new building. Immediately after the fire a new warehouse was erected on Morris Street, between La Salle and Clark Street, and business was re-opened. Mr. Ingraham actively identificed with the wholesale grocery trade until 1875, when he withdrew from active participation in the business. He then spent the remainder of his life in retirement. The Commercial Hotel property came into his hands about this time, owing to an unpaid indebtedness, and to it he directed his attention. The hotel was badly run down, but, with the assistance of his friend, Mr. Ingraham, a large hotel was built in a prominent location. Mr. Ingraham has accumulated a large amount of real-estate, and to this interest he devotes his attention. He is also a large stockholder in the Illinois Union Bank and Trust Company, and is heavily invested in gold, silver mining property in Old Mexico and Colorado, and is one of the first subscribers to, and is at present a stockholder of, the Washington Park Driving Club. In politics he is an advocate of democracy, but is not in any way a politician or a campaigner. In 1854 he was an ardent supporter of the democratic candidates, and presented one hundred marching suits to the Cleveland and Hendricks clubs of Hyde Park, of which organization he was president. In 1854, his only son, Hiram Foster Ingraham, died. In him all the loving affection and cherished hopes of his parents were centered, and he had reached that age where the mantle of the father was about to be assumed upon him. Bright, ambitious and proud of the opportunities before him, he failed. On June 15, 1855, death came to him, and with it such sorrow as the loving mother never rallied from, and which left a bereaved husband and father. In the following years of his life Mr. Ingraham passed in poor health. On December 12, 1882, he married Miss Harriet A. Foster.

Miss Harriet A. Foster was a tea import. She was the daughter of Mr. and Mrs. A. V. Wright, and was born at Boston, Mass., on August 18, 1826. He received a liberal education, and at the age of nineteen began business life in the wholesale grocery trade with the firm of Winslow, Wright & Co., at Boston, of which firm he afterward became a member, the style of the firm being changed to Winslow, Wright, Co. & Son. In 1865, he came to Chicago and purchased the wholesale grocery business of C. G. Wacker & Co., corner of Dearborn and South Water streets, and formed a partnership with F. Taylor, the firm being known as Taylor & Wright, which continued until 1872, when Mr. Taylor retired, and Mr. Wright formed a new firm, under the style of J. A. McNeil & Co., tea importers. The firm continued until 1877, when Mr. Wright retired for several years, being subsequently engaged in the wholesale grocery business with his brother, and then in the wholesale commission business, which position he now occupies. Mr. McNeil is a man of great business ability, and always takes an active and prominent part in promoting the interests of the retail commission committee, having served for four years as an alderman of Boston, and was for four years a member of the public institutions of that city; but joined the democratic party upon the anathematizing of Daniel Webster at his party. He was married in Boston, in 1848, to Miss Georgiana Smith, daughter of the late George Stearns. They have three children,—Mary L., Winslow and George. Mr. McNeil is a member of the Masonic fraternity and honored by all who have known him during his useful and busy life.
Daniel Morrison is a member of the firm of D. & A. M. Morrison, which conduct a grocery business at No. 3547 Wentworth Avenue. This business was originally established in 1876, by John Thien, on the opposite side of the avenue. He conducted it for two years, and, in the fall of 1878, its present proprietor, Mr. William C. Stoeckel, took the good-will and stock in trade and continued the business for three years, removing it, in 1875, to its present location. Daniel was born in Glasgow, Scotland, on January 25, 1841, and is a son of Murdoch and Elizabeth (Murry) Morrison, Thos. 4th, who came to the United States in 1852, and located near Chicago, in Kane County, where they purchased a farm and resided for some years; afterward moving to Dundee, and from thence to Elgin, and subsequently to this city, where they died. Daniel received his education in Elgin and Chicago, and commenced business as a painter, which he followed for three years, and then clerked in different stores for five years; after which he became an engineer on a railroad for eight years, and subsequently engaged in his present business. In 1850, he married Caroline Delroc.

Alexander M. Morrison was born at Dundee, Kane County, Ill., on October 6, 1854. He was educated in Chicago and commenced his clerical career as a clerk in a dry-goods store, where he remained for three years. He then clerked and followed that business for seven years, running a train as conductor much of the time. He afterward entered into partnership with his brother Daniel, as has been stated. In September, 1880, he married Alma Sydney, a native of Kankakee, Ill.; they have two children, Claude Alexander and Jennie E. Mr. Morrison belongs to the Masonic fraternity, being a member of Dearborn Lodge, No. 310, A. F. & A. M.

Philip Maher is a grocer at the corner of Indiana Avenue and Thirty-fifth Street. He established his business in 1874, and does an excellent trade. He was born in County Tipperary, Ireland, at the village of Adare, and is the son of (Stapleton) Maher, natives of the same county, who came to the United States in 1845. Mr. Maher was educated in Albany, N.Y., and commenced business as a clerk in a grocery, where he remained six years, and then came to Chicago, where he continued for ten years, in the fancy grocery trade. In 1874, he began business for himself, which he has since continued. In 1872, he married Isabelle Conley, a native of Mr. Morris, N.Y. There are eight children by this marriage: Stephen A., Isabella, Ellen, Allen, Philip, Edith May, Eddy, Philip and May. The family are members of the Roman Catholic Church.

Smith & Malam, wholesale and retail grocers at Nos. 250-52 Milwaukee Avenue, began business in 1863, at No. 542 Halsted Street. The firm did business under the style of Smith & Brother, and was composed of S. M. Smith and Thomas M. Smith; they continued associated together until 1872. In 1866, they moved to Milwaukee Avenue, where the business has since continued. In 1872, S. M. Smith went out of the firm, Edward Malam buying his interest. He is now continuing an active partner; and the firm has since continued as Smith & Malam, who do a general grocery business, which averages about $250,000 annually.

Thomas M. Smith was born in Liverpool, Lancashire, England, on September 20, 1843; he is the son of Samuel and Elizabeth (Malam) Smith, natives of Cheshire, England. His father was a farmer, and died at the age of thirty-eight years, in Cheshire. His mother died at fifty-two years of age. Thomas was educated at the Royal Naval Academy, and then apprenticed to the grocery trade in Liverpool, and engaged in business for himself in Newcastle, Staffordshire, among the potteries, and was financially successful. In 1860, he sold out his interest, and came to the United States. He travelled for several years, after which he opened the grocery in Chicago. In 1865, he married Miss Sarah, a daughter of Thomas and Jane (Medealf) Kitchen, natives of Lancaster, Eng. Mrs.
Mr. Dougall was married at present being eight. The business is confined in the city, at this time, to four or five large establishments. One of these deals in general merchandise, two in furniture, and one in boots and shoes. One of these houses carries a stock of $250,000, and its sales run up to nearly $2,000,000 a year. The sales of two others amount to from $400,000 to $500,000 per annum, the others to about $200,000. Thus, while the number of firms is less than formerly, the amount of business transacted is much larger. Official or court sales, foreclosures, etc., are made by officers, for which no auctionee’s license is required.

Colonel John A. Elison, one of Chicago’s oldest, best known and most popular auctioneers, was born at Philadelphia, on December 1, 1827, and is the son of William and Maria (Adams) Elison. William Elison was a manufacturer and wholesale dealer in boots and shoes, and was one of the leading merchants of Philadelphia. After amassing a competency he retired from business a number of years before his death,—which occurred in February, 1865,—being succeeded in business by his son John A., who continued it until the commencement of the War of the Rebellion. In the fall of 1861, he went into the service as regimental quartermaster, with the rank of first lieutenant. After being in the field one year, and at the battle of Cedar Mountain, he was detailed as an aide to the general commanding, and was appointed captain and assistant quartermaster. He was ordered by the Secretary of War to build a convalescent camp, near Washington, where he expended millions of dollars for the Government in the erection of this hospital, with a capacity for twenty thousand persons. He was employed about eighteen months in erecting and managing this hospital, and was then promoted to the rank of colonel and chief quartermaster of the Department of Washington. He served there until ordered to Chicago as chief quartermaster of the Northwest, with headquarters at Chicago. He was mustered out in December, 1865, the Secretary of War refusing to accept his resignation until the camps in the Northwest were all closed and their equipage, such as horses, mules, wagons, harness, clothing, tents, cooking utensils, and everything pertaining to Army life, were sold.

Colonel Elison disposed of millions of dollars worth of Government property, selling at Camp Douglas, Chicago, at Camp Butler, Springfield, Ill.; at Madison and Indianapolis, Ind.; and at Milwaukee. Madison and Prairie du Chien, Wis. Twenty thousand dollars and horses were sold at the corral, corner Twenty-second and State streets, in this city. Colonel Elison having lived in our city so long as a soldier, concluded to settle here as a civilian. He accordingly, having had so much experience as an auctioneer, entered into business in that business on May 1, 1866, and has continued in it for nineteen years with marked success, winning many friends by his urbanity and strict integrity. On June 16, 1860, he was married to Sarah Black, daughter of John and Cornelia (Dallas) Black, natives of Philadelphia. Mrs. Black was a sister of George M. Dallas, vice-president of the United States under President Polk. Mr. and Mrs. Elison have had seven children, six daughters and one son; one daughter only is now living. Colonel Elison is a member of the Masonic fraternity, belonging to a lodge, chapter and commandery at Philadelphia, Penn.
MERCANTILE AGENCIES.—For the protection of commerce, mercantile agencies were established in America early in the present century, and among those which have stood in the front rank for nearly half a century is that of Tappan, McKillop & Co. That firm opened an office in Chicago away back in the "fifties," and it has served its purpose faithfully to the great trade of this commercial center through all these years. In 1872, William Baker purchased the entire business, and has since been at the head of the enterprise, personally supervising the management of the same. The two departments—reporting and collecting—are under the direct superintendence of two competent gentlemen, and through this long-established institution comes a large share of the trade reports furnished to the business houses of Chicago. With its branch offices located in the principal cities of America and Europe, the Tappan & McKillop Company has exceptionally fine facilities for securing commercial reports accurately and promptly.

The JOURNAL OF COMMERCE, now in its forty-sixth volume, was established by William Baker in 1852. The business of the city at that time was not sufficient to demand a trade journal of any great size, but from its advent into the commercial world the JOURNAL OF COMMERCE has steadily progressed, until it now ranks with the best trade papers of America. Originally a large, unwieldy "blanket sheet," the modern changes have wrought it into a handsome, compact, splendidly printed and well-edited sheet. It has been published regularly every week since its foundation and finds subscribers to the number of from ten to fifteen thousand in all parts of America and Europe. The Journal is essentially a complete trade exponent, devoting an earnest interest to the progress of every industry and the development of every resource of our country.

William Baker, publisher of the Journal of Commerce and proprietor of the mercantile agency of the Tappan & McKillop Company, of this city, is an Englishman by birth, but thoroughly American in ideas of progress and enterprise. Mr. Baker was born on a farm, near the little village of Chippenham, England; on February 12, 1825, when eleven years of age he removed to America, and, his family locating in Oswego County, N. Y. They resided there for a few years and then removed to Canada, where the son was educated in a private school. At the age of twenty Baker boldly entered into business on his own account, and from the first his various ventures were eminently successful. He engaged in grain and produce, and made his entire shipments to the European market. As the demands, which were first started in Sterling, Canada, developed itself, it became apparent to Mr. Baker that a larger city, having greater transportation facilities, would prove more beneficial to his interests and accordingly he went to Cincinnati, where he remained until 1861, when he came to Chicago. Since that year, Mr. Baker has been continuously a resident and business man of Chicago. Mr. Baker was first married on February 12, 1850, to Miss Elizabeth Gould, at Kingston, Canada. They had four children, all of whom are now living: Fannie S. (now Mrs. James S. Peirson, of Wheaton, Ill.), William H., George B. (lawyer), and Emma Maria (now Mrs. Edward Billiard, of Chicago). Mrs. Elizabeth Baker died at Sterling, Canada, in July, 1860. Mr. Baker was again married in July, 1862, to Miss Mary Seymour Lyen, of Sterling, Canada. Their children are Linda M., Edward Lyon, Frank Nelson and Mary Berenice Baker. Mr. Baker has been a member of the Masonic order since he became of age and has taken every degree, receiving the last degree at Bellevile, Canada.

On October 1, 1872, the Gardner House, on Michigan Avenue, was finished, and was the first American hotel opened in the burned district. Two months previously, Kuhn's European Hotel (now Windsor), on Dearborn Street, had been opened, being the first hotel operated in the center of the city after the fire. The Grand Central, on Market Street, and the Commercial, on Lake Street, soon followed; and, during 1873, the Clifton, Tremont, Sherman, Pacific and Briggs were re-opened at their old locations.

From the year last named, up to 1885, the activity of the hotel interest in Chicago has been remarkable. New enterprises have been planned and executed on a scale hitherto undreamed of; and although the aggregate capacity has been so greatly augmented, the hotels of the city are still scarcely adequate to accommodate the immense tide of travel which daily ebbs and flows through Chicago. Probably no other city in the country has, proportioned to its size, nearly the capacity for entertaining transient guests, yet, on the occasion of any special gathering every house is filled to overflowing. At the time of the fire there were less than a dozen standard hotels, their value not exceeding $5,000,000. At the end of 1885, there were listed in this class over twenty hotels, besides more than one hundred of minor importance.

During the fourteen years since the great fire, the record of accidents and fires in hotels has been a brief one. The conflagration of 1871, by giving a lesson in carefulness, led to the construction of many fire-proof hotels and the adoption of improved safeguards against fire. In the time stated, only three hotels have been destroyed, these being the Langham (formerly Burdick) House, on Wabash Avenue, in 1885, and the St. James and the Wabash, in the fire of July 14, 1874.

The fire of 1871, although subjecting hotel proprietors to great immediate loss, really advanced the hotel interest several years and caused the speedy execution of already formed projects which, otherwise, would have developed slowly. The era of progressive hotelkeeping had already dawned, and the year 1871 had witnessed the adoption of many improvements in the interior economy of the hotels, as well as the construction of two new houses of note. The Grand Pacific and Potter Palmer's hotels were destroyed, almost on the eve of opening, and, added to the list of burned structures (embracing the Tremont, Sherman, Clifton and others, some of which were never re-built), left the city with only one real hotel building, the Gault House, in the West Division. The Sherman House had not ceased burning ere its proprietors were seeking new quarters; and by the second night after the conflagration they had leased the Gault House, which was re-named the Sherman House. Such of the destroyed hotels as could, secured temporary quarters in various portions of the city. The Tremont found refuge in a row of residences, hastily connected and re-arranged, on Michigan Avenue; the Clifton leased a brick building on West Washington Street; the Briggs was re-opened on West Madison Street; and minor hotels were scattered over the South and West divisions in such structures as could be transformed to accommodate them. Meantime, there was no delay in re-building, although the work seemed slow on account of the substantial and extensive character of the new edifices. The Grand Pacific on the original site and the Palmer in a new location (the latter on a scale of magnificence and completeness unparalleled in Western hotel history) were long in course of construction.

HOTEL HISTORY.
any detail of solidity and convenience. It has stone fronts on Randolph and Clark streets, and is seven stories in height; has three hundred rooms; and can accommodate five hundred guests. The first lessee of the property after its completion was Charles Munson, who operated the hotel from May 4, 1873, until the fall of the same year, when the trustees and heirs of the estate took charge of it temporarily. In 1874, Bissell & Hubert secured control. Since the death of Mr. Bissell, in July, 1882, Mr. Hubert has been sole proprietor. The property is now owned by J. Irving Pearce, who purchased it, after many years of involved litigation, in July, 1882.

GRAND PACIFIC.—The Grand Pacific Hotel was just completed on the site of the present structure—the block bounded by Jackson, Quincy, LaSalle and Clark streets), when the fire of 1871 entirely destroyed it. At that time it was regarded, in dimensions and the proposed scope of its operations, as something mammoth, and many believed the time had not arrived for a hotel of its magnitude, especially in its location. Undeterred by fire losses and adverse opinions, however, the Pacific Hotel Company, indorsed strongly by the Michigan Southern and Chicago, Rock Island & Pacific railroad companies, began re-building immediately after the fire, and the present structure was completed and opened as a hotel in June, 1873, at a cost of one and a half millions of dollars. The first lessees were Gage Bros. & Rice, who operated it until the fall of 1874, when John B. Drake, its present proprietor, purchased the lease and furniture, taking formal possession on January 1, 1875. It has since enjoyed a high and probable class of patronage, sheltering some of the most eminent men of the age, and at various times being the headquarters of leading political and commercial organizations. The Grand Pacific is the second largest hotel in Chicago. It consists of six stories and basement. The leasehold is valued at $600,000, and the cost of the furniture was $560,000.

PALMER HOUSE.—The Palmer House was known anterior to the fire as a model establishment, although it was a comparatively small building, view by the present splendid hotel, which is the largest in Chicago. Potter Palmer, the founder of the house, began re-building shortly after the fire, but, on account of the extensive character of the structure designed, it was slow of completion, and was not opened to the public until late in the fall of 1873. The building has three frontages, on State Street, Monroe Street and Wabash Avenue respectively, covering in all 76,550 square feet of ground. It is six stories in height, and, with additions made recently, has eight hundred and fifty rooms, and can accommodate one thousand guests. Mr. Palmer has operated the hotel since its establishment. The cost of the property was over three and one-half millions of dollars, which comprises one million as the value of the ground, two millions as the cost of building, and half a million for the furniture.

WILLIAM W. PHILPS, financial manager of the Palmer House, has been more or less identified in business with Potter Palmer for the past thirty years. He is a native of Schoharie County, N. Y., where he was born on June 17, 1825. His father, George W. Phelps, was one of the best known residents of the county. Mr. Phelps was educated in the county in which he was born, and commenced his business career as clerk in a country store, which position he held for ten years. He came West and located in Chicago in 1852, and, from that time to the winter of 1865, was employed by, and interested with, Potter Palmer in the dry goods business. In 1865, he bought the interest of the junior partner of Hollister & Wiggins, carpet merchants, which then became known as Hollister & Phelps. On the death of his wife in 1871, he retired from business and went to Europe. Eight years later he assumed the position of financial manager of the Palmer House, which he successfully fills at the present time. He was married in Albany County, N. Y., in the fall of 1866, to Miss Lydia Palmer, sister of Potter Palmer. She died at her home in the fall of 1871. In the fall of 1873, he was married in Walworth County, Wis., to Miss Cornelia A., daughter of Alfred Hubbard, an old resident of that county. Mr. Phelps is a director of the Miller's National Insurance Company of Chicago.
TREMONT HOUSE.—The present building, and the fourth structure of that name, was completed two years after the fire, and opened in 1873. It is a 500-room hotel, having on the ground, with a frontage of over five hundred feet, and is six stories in height, with Amberl sandstone front, ornamented in the French Renaissance style of architecture. The architect was J. M. Van Horne, property belongs to the Boston Bar, and was leased by the heirs to Jewett Wilcox, who operated it for six years, making way for its present proprietor, John A. Rice, who assumed management in January, 1879.

He is the third son of Anson and Lucy (Sherman) Rice, and was born on February 22, 1828, at Northboro, Mass. Mr. Rice's father was a country trader, and the son's earliest years, after a moderate education in the village school, were passed in the considerably better training and influence of the well-known and successful business lives. Mr. Rice's first experience in the hotel business was at the Clinton House, in Ithaca, N. Y., which he entered in 1850. When twenty-two years of age, he was called to the Weidell House, of Cleveland. After remaining in that city for a few years, he went for one season to the Mt. Vernon Hotel, the largest at that time in the world, at Cape May, and then was with General James Mitchell at the famous Congress Hall at Albany.

When the new Sherman House of this city opened in 1861, Mr. Rice and Samuel Hawke, late of the Windsor, New York, were associated, and they organized the handsome structure, throughout, into ten years since has been the very foremost hotel in the American hotels. His associates in the Sherman, after the withdrawal of Mr. Hawke, were Gage Brothers, and later on Charles C. White came into the partnership. Ten years after the opening of the hotel, the Grand Pacific, the Rice Hotel was projected, and the Sherman House patrons were drawn to it. Mr. Rice took hold of the enterprise early, and the crowning perfecions secured to the Pacific were mainly due to his skill and knowledge of his calling. The Miller House, the new building, and the Pacific he built for himself.

The re-construction of the Grand Pacific made it handsomer and costlier than before, and was built under Mr. Rice's guidance. The opening of the hotel was one of the most important events of the re-opening of Chicago, but it passed into other hands. At about this time, the Centennial was in preparation at Philadelphia, and among the features was the immense Globe Hotel of one thousand feet, designed to illustrate the immensity of the American hotel system. Its projectors called on Mr. Rice as the best demonstrator of the art of keeping an hotel, and he forthwith took the management. Among the visitors to the Globe in that year was E. J. Baldwin, of San Francisco, who urged Mr. Rice to visit his city and organize and open his hotel, the Baldwin. After two years in the management of that hotel, Mr. Rice returned East, and, when the Tremont was about to change hands, in 1879, he bought out the entire interest. In the season of 1881, he took charge of the great Rockaway Beach Hotel, which was the largest and most notable hotel undertaking of the time. At the close of the season, Mr. Rice returned to the Tremont, and for some time which he has remained there. Mr. Rice for many years has had a million dollars for pet hobbies that were his relief and recreation, and when he parted with his library, for nearly $50,000, it was proof that his purse had been followed. He has formed the collection of the Chicago Historical Society with what it had cost him, about $25,000, but the Society was unable to accept his generous offer. He now devotes his attention to pictures, and has already formed a quite a gallery, which may in time become as noted as his library. Mr. Rice was married at Aurora, Caryga Co., N. Y., on November 1, 1855, to Miss Margaret Van Slyke Culver; they have three children,—Wallace de Groot, Margaret Sherman and Lewis Anson. Mr. Rice is a member of the Chicago and Washington Park clubs, and is always interested in such affairs as are material to the welfare of the city.

HOTEL RICHELIEU.—When unlimited wealth, original ideas and genuine artistic taste are combined upon one object, the result is almost certain to reach, if it does not exceed, one's highest anticipations. It is such a combination that has produced for Chicago the truly sumptuous Richeieu Hotel, of which the name has become a synonym of enterprise and progress to all Chicagoans, opened, in 1885, the Hotel Richelieu, which, in its elegance and magnificence beggars description. The hotel and its grounds cover from $57-$88, Michigan Avenue, a block, and sixty feet and extends back one hundred and eighty-five feet. The building is in reality two distinct buildings, one front and one rear, separated by a court fifty-four feet, by thirteen feet, and bridged by a covered passage connecting both halways of six stories. The object of this arrangement is to lessen the danger in case of fire, guests being able to escape from one building to the other, with ease and safety. The front is built of handsome pressed terra cotta, with a skylight in the center and a statue of Jean du Plessis, Cardinal de Richelieu. The statue is of white marble, six feet and six inches high, from the chisel of Le June, the French sculptor, and is an exceptionally fine piece of work.

The interior of this hotel is a revelation of the extent to which decorative art can be carried. The entrance leads to a veritable palace, with mosaiced floor, bronze casings large center pieces of onyx; the walls are of Lenzurina-Walton and the ceiling of paper-mâché. At the right is the grand office; to the left, the elegant cafe. The former is floored with white marble, and the walls are of mahogany and French oak, from the Couch estate. The cafe will seat two hundred people. The room is lined with mirrors seven feet high, and the ornamental work is paper-mâché, with designs in bold relief. In a conspicuous corner in this room is a magnificent marble group of the Venus of Milo, by Larkin G. Mead, costing more than $5,000. The balance of the first floor of the hotel is devoted to parlors, private dining rooms, and club rooms, all magnificent in furnishings and decorations. The hotel is decorated with thousands of dollars' worth of glass and china, collected by Mr. Bemis in his foreign travels, and holds such relics as plates that the French Napoleon used, and the great room is furnished with a table from the ten, including that from the table from the Great Hall, and printed with thousands of dollars and set with a dinner service valued at $1,000.

In another room an eight-seat table holds a dinner service valued at $1,000. In the ladies' ordinary, the same extravagance holds sway. In the front parlor is a $4,500 piano, paintings worth many thousands of dollars each, tables of glass, mantels of tiles, mammouth vases, settees upholstered with the very finest material, and a hundred and one appointments equally rich and unique in quality and design. The bedrooms, of which there are one hundred, are mostly in suites, and are each decorated and furnished like a parlor.

The building itself is handsomely decorated in Lenzurina-Walton and paper-mâché. A large section of each hall is floored with glass, which admits light to all floors from skylights in the roof. The court between the buildings is spanned by a bridge, the court is carried away by the Pacific he built for himself.

The Richelieu Art Gallery is maintained in connection with this magnificent caravansary, and is an unusual feature of a hotel. Built by his extended family, Mr. Bemis is the owner of the great room, and he himself is the designer of the hall which extends from the building.

The picture shows the great room, and is the designer of the hall which extends from the building.

older members than Mr. Bemis, and certainly few who have had larger legitimate dealings. He is a prominent turfman and has owned many valuable horses. His interest in turf matters caused him to loan money largely to the Chicago Driving Park Association, and, when it became involved, he bought out all other interests and became sole owner of the property. In 1882, however, he sold it, and relieved himself of its management. In 1894, he bought the Chicago Horseman, organized the Chicago Horsemanship and many valuable horses. His interest in turf matters required a person possessing every characteristic of energy and determination. Mr. Clair continued in the control of the hotels for over nine years, and only retired at the end of that time to become connected with the Richelieu of this city.

HISTORY OF CHICAGO.

company with a paid-up capital of $50,000, and is now editor-in-chief of the paper as well as president and treasurer of the company. On October 27, 1869, Mr. Bemis was married to Miss R. A. Armstrong, of Lynchburg, Va. He is a member of the Iroquois Club.

HENRY CLAIR is manager of the Richelieu Hotel, and, as a partner of Gregory P. Harte, a lessee of the same, Mr. Clair was a protegé of Alexander T. Stewart, the deceased millionaire, of New York. During the greater part of his early life, Mr. Clair was connected with the famous Stewart dry goods establishment and was one of the most trusted employes of the proprietor. Mr. Stewart's confidence in Mr. Clair's executive ability was such that, in 1875, he turned over to him, under a lease, the management of the entire chain of hotels, which included the Grand Union and Windsor hotels at Saratoga Springs and the Metropolitan and Park Avenue hotels at New York City. To enter upon the management of such mammoth enterprises required a person possessing every charac-

been associated with large capitalists, and for the post ten years has been identified with the heavy interests of William T. Coleman, one of the wealthiest men. Mr. Coleman, who served that great
corporation, had a very close and confidential relations during that time, building the San Rafael water works and superintending the greater part of the improve-
ments in the beautiful town of San Rafael, California, a place where he spent a large amount of money. He was the president of Mr. Harte, as a financial manager, were long ago recognized by eastern capitalists, and at one time he was importuned to locate in this vicinity and handle the large and valuable business of one of the large New England banks. He declined, but in the fall of 1883, he received a lease of the already famous Richelieu Hotel, and came here to make his home and become identified with Chi-

The Clifton Hotel.—Prior to the great fire, W. A. Jenkins and Albert A. Holmes were proprietors of the Clifton House, and when this hotel went down, Mr. Jenkins secured the building at the northwest corner of Washington and Halsted streets, and opened it as a hotel, which he called The Clifton. He continued in its management until the early part of 1873, when M. E. Vic-

the name, the appearance. In 1876-77, Mr. Coleman spent a large amount of money in refurni-
ishing the hotel. The Clifton has always been among the most popular houses in the city, and under its present management is a prosperous and well-paying property.

Maler A. Loring was born at Princeton, Mass., on October 8, 1821, and was brought up and educated in his native town. When he was twenty years old he went into the United States Navy as a sailer, and was in the service, on board the man-of-war "Cir-
cassian," of the West Gulf Squadron, for two years. In 1845, upon his return to civil life, he went to the City of Boston, taking a position as night clerk. Mr. Loring evinced decided ability, and within three months he was made day clerk; a short time later he was promoted to second clerk, and within a year he was given the clerkship. As he was well known to the public, when he arrived in Chicago and took the position of day clerk in the old Matteson House, then owned by Robert Hill and managed by John L. Woodcock. At the time of the great fire, Mr. Loring was chief clerk, and when the Matteson was swept out of existence he took the chief clerkship of the Grand Central Hotel, on Michigan Avenue, which had been improvised as a hotel out of four or five residences. He remained there until the new Matteson House was completed by Mr. Hill, and then returned to his old position on the

day of the opening, February 3, 1873. On May 1, 1875, in accordance with the promises made by Mr. Hill previous to the fire, Messrs. Woodcock & Loring were made partners in the business, and the style of the firm became Robert Hill & Co. In 1876, owing to Mr. Hill’s failing health, he withdrew from active participation in the management, and, in 1877, when the death of that gentle-
man occurred, his name was changed to Woodcock & Loring. Mr. Loring was married on September 11, 1833, to Mrs. Mattie Balch, of New York. They have one daughter, Mildred. Mr. Loring belongs to the Masonic order and is a member of the Washington Park Club.

Matteson House.—This hotel is one of the few in the city that was not re-built on the original site. It was among the first and most successful, being established in 1872, and opened, under the same old name, on February 3, 1873. Robert Hill, who operated it for one year, when he took as partners John L. Woodcock and Malek Loring, the hotel man-
aging their business as Robert Hill & Co. Upon the death of Mr. Hill, the surviving partners secured control, and remained in charge until January 1, 1882, when the hotel was closed for repairs during seven months. It was then re-opened by Mungar Brothers, its present proprietors. The hotel is six stories in

height, containing one hundred and seventy-five rooms. Recently the property has been sold to Carile L. Mullin, of this city.

Charles A. Briggs Hotel.—On the site of the present hotel, its proprietors, Wentworth & Woolworth, opened the West Side Briggs House. Immediately after the great conflagration, Mr. Moss commenced the erection of the present Briggs House, which was completed in 1877, and opened on the corner of Fifth Avenue. The building has a frontage on the former through-
fare of 80 feet and extends back on Fifth Avenue, 144 feet. It is six stories in height, built of handsome red brick with stone facings. The ground, offices, reading-room, billiard and bar rooms and

gerber shop are situated on the main floor. The dining-room, 40 x 75 in size, and the parlor and reception-rooms, are placed on the second floor. The other upper stories are devoted to guests' rooms, and the lower story almost one hundred and seventy-five rooms. There are accommodations for nearly three hundred guests. The building cost about $100,000 and the furniture $75,000. It was opened in 1873, by Richard Briggs, who managed it for about a year and a half, when they failed. For the following six months, the Briggs was closed, and then re-opened by John H. Cummings, who managed it till the spring of 1881, when he sold out to the present proprietor, Frank Upman.

Frank Upman was born at Milwaukee, Wis., on January 20, 1852. His parents went to Minnesota two years later, where they remained till 1862, when he came to this city. Shortly after the arrival here, Frank Upman purchased a building on the northwest corner of Madison and Summit streets, and in 1877, by purchase and building had put up a hotel, then called the Chicago House, staying there two years. In 1864, his father, D. Upman, opened a small hotel, called the Central House, at Nos. 180-82 Randolph Street, and Frank went with his father, remaining there for two years, after which time he moved to Chautauqua, Tenn., and opened the Chautauqua House, for the following six years Frank Upman was the chief clerk. In 1874, Mr. Upman sold out his interests in the South, went to St. Paul, and bought a small hotel, which he then took as manager and chief clerk, and so remained until 1879, when his father retired from business. He then opened Upman's Hotel on Third Street, in St. Paul, and continued in that quite successfully for the following two years. In the spring of 1881, he came to Chicago, after disposing of his interests in St. Paul, and bought the Briggs House. Mr. Upman’s long experience has well fitted him for the difficult task of managing a hotel in a great city. Chicago has built up a splendid reputation for his house and consequently a large business. In the spring of 1885, he spent $25,000 in altering and improving the hotel. Mr. Upman was married on February 10, 1879, at St. Paul, to Miss Kate Campbell, of Ottumwa, Iowa.

Commercial Hotel.—The Commercial Hotel was established in 1872, in a part of the structure that now bears that name. In that year the Cook estate, William H. Ward, trustee, erected a five-story and basement stone-front building at the northwest cor-
ner of Dearborn and Lake streets, for the American Express Company, to be used after completion, and Messrs. High & Magie, owning the west adjoining sixty feet, uniting with the Cook estate, added the four-story buildings to the corner structure. Howell Pulling and A. F. Douglass, then the proprietors, leased it as a hotel. On January 1, 1872, Mr. Ingraham died in 1874, and his partner, Granville S. Ingraham, assumed his interest, in 1876, securing entire control of the house. In November, 1880, C. W. DAbb, formerly of the Palmer House, became a partner in the enterprise, and in 1884, organized the firm of C. W. DAbb & Co., as proprietors, he acting as manager. The hotel can accommodate five hundred guests, and has had as many as seven hundred and three in one day. It contains two hundred and seventy-five rooms.

The Leland Hotel was formerly known as the Gardner House. The building was erected shortly after the fire of 1871, by Horatio H. Gardner, now treasurer of the Gardner & Dyer Lumber Company, and cost, including the ground, about $600,000. It was opened in October, 1872, by Mr. Gardner and Frederick Gould. They continued in the management until about 1875, when Captain Albert E. Goodrich became proprietor. Then followed changes, occurring annually, as follows: In 1876-77, Charles H. Gabeut was proprietor; 1877-78, Luther B. Brady; 1879-80, J. D. Harlon; in the latter part of 1879, Jewett Wilcox became manager; and, in 1880, George H. Ingraham. In the latter part of 1881, Mr. Ingraham’s house was sold, and a hotel was not first-class. In the early part of 1881, Warren F. Leland, late of the Delavan House, Albany, N.Y., came to Chicago, and purchased the Gardner House for $225,000. The hotel was altered and perfectly repaired, and has made it one of the most handsome buildings in Chicago. It is an imposing brick structure, the basement arches, and the huge and massive solid in appearance. It is essentially fire-proof, and the main fronts are provided with iron balconies and fire-escapes, accessible from hallways, which afford easy mediums of escape in case of fire. The building contains two hundred and sixty-six rooms, and under
its new manager has become one the most popular hotels in the Western country.

Kuhns was born at Land's Grove, Va., on June 1, 1845. He is a descendant from the family that has become noted all over America as famous hotel-keepers. The Kuhns were formerly from Vermont, and Warren's grandfather, Aaron Kuhns, purchased the hotel near the Ohio River, by which the admission of Indiana to the Union took place, just twenty years before the birth of Mr. Kuhns, and opened the Green Mountain Coffee House. Aaron Kuhns had six sons,--Lewin, Aaron, Jr., Simeon, William, Warren and Charles. The firm became, and are now succeeding business house, continued

The four or five stories, and sixty-six or seventy rooms, and can accommodate two hundred guests.

Kuhns's European Hotel.—The building occupied by this hotel was erected in 1872, by C. H. Thompson, and is owned by his estate at the time of his death, in 1883. In 1883, the house was opened as a hotel by James Anderson, in 1880, and for two years was known as Anderson's European Hotel. In April, 1882, the present proprietor, William J. Kuhns, secured control of the establishment, and changed its name, in 1883, taking in his son, Frank C. Kuhns, as a partner. The south building adjoining was added to the hotel, it being a four-story structure, built in 1872, by A. Crocker. The main building is two hundred and sixty-six rooms, and can accommodate two hundred guests.

Windsor Hotel.—The Windsor Hotel was the first.

European Hotel. From the burned district after the fire of 1871. Within a few days of that occurrence, Mr. Mackin and Samuel Greyston, owners of the lease of the land, whose location in the school section and rented on a ninety-nine years' basis, formed plans for a hotel, and the north part of the present structure, seventy feet front, was built. The house was opened in August, 1872, by William J. Kuhns, and is known as Kuhns's European Hotel. Later, Mr. Kuhns took in J. H. Thomas, and the hotel was operated until 1879, when the name of Mr. Kuhns & Thorpe was given.

The Windsor is very well known throughout the West. The original building was a four-story brick structure, to which has been added the adjoining stone-front building, which was erected and owned by Mr. Peabody, of the firm of Gallup & Peabody. It was built in 1872, and added to the hotel two years later. The Windsor has one hundred and forty-two rooms for guests. The hotel was given its present name in 1878.

Burke's European Hotel.—This hotel was built the year after the fire, by its present owner, Mr. Burke, who had been engaged in the same business previous to the fire. In 1879, Mr. Burke operated the house, which gained a wide reputation among travelling men, and won a fortune for its founder. In 1879, William McCoy took charge of the establishment, and the same success five years later. A business establishment comprises William B. Brown, and Charles W. Brinkman. The building is four and five stories in height, has sixty-one rooms, and a restaurant attached which accommodates three thousand people daily. From 1870 until 1884, the hotel was known as McCoy's European Hotel, but in the latter year was given its original name.

McCoy's European Hotel.—William McCoy, proprietor of McCoy's European Hotel, is a native of Ireland, and was born on September 24, 1834. His parents resided there until 1840, and then emigrated to America, locating in the city of Rochester, N. Y. There, William was brought up and given a common school education, and when seventeen years old he enlisted in Co. C of the 14th New York Volunteers, and served for the term. He was thus engaged for three years, participating in the battles in which the Army of the Potomac was engaged, and participated in the battle of Chancellorsville. Afterward he received an honorable discharge from the Army, and the West and located in Toledo, Ohio. There he obtained employment with the Wabash & Western Railroad, as a carpenter, and remained with them for nearly a year. In 1875, he came to Chicago and made it his permanent home. For the first five years, he followed his trade as a carpenter, and, in March, 1879, became engaged in the bakery business. He was located at No. 1710 N. Harrison Street, and when the structure was commenced the spring after the great fire, he had a splendid business from the very start, and in a brief time McCoy's Bakery and its products became known to Chicago people. He continued the manufacture of bread supplies until he became the operator of the hotel, at Nos. 140-42 Madison Street, and went into the active management of the business. He was equally, if not more, successful in this department than the bakery, and thus the accumulated wealth. In 1852, he changed the name to McCoy's European Hotel. He continued that hotel until October, 1854. In January of that year, however, he commenced the erection of the present present structure, which which the name of McCoy's New European Hotel. This is unquestionably the best-appointed and most elegant hotel west of New York City, conducted exclusively on the European plan. Its location, at the corner of Clark and Van Buren streets, is such that the public, in close proximity to the Board of Trade, post-office, and Rock Island and Lake Shore depot, and quite near to the public thoroughfare to places of amusement. The locality in which it is situated has wonderfully improved since the hotel was opened. The building is surrounded by structures equally handsome and massive with itself. The building has a frontage of ninety-five and a half feet, and is a hundred and ten on Van Buren. It is seven stories high above the basement, and is crowned with three handsome towers. The outside walls are of red pressed brick, and the columns, trimmers, gables, and stairways are made entirely of iron. On each front of the building is a large double fire-escape. In the court the rear of the building is a large double fire-escape. In the court in the rear is a complete iron stairway, extending from the top of the building to the ground below, and this forms another mode of escape in case of fire. The court also has special attention to the arrangement of fire protection. The system of alarm, by which every guest may be immediately notified, is used solely by Mr. McCoy, there being no other hotel in the world using the same device. The building is located on the second floor, and are reached by wide entrances from both streets and a hydraulic elevator at the Van Buren Street entrance. The parlors, reception and club rooms are also situated on this floor, and are so arranged that all can be thrown into one grand saloon, at pleasure. The restaurant is located on the first floor, on Clark Street, and has a seating capacity of about two thousand persons. The fire-escape stairways are devoted to guests' rooms, and each is furnished and fitted to all modern conveniences. The cost of the hotel was $500,000, and represents a value of the ground added thereto. McCoy's property represents a cost of about $500,000.
HOTEL HISTORY.

is a member of the Ulysses S. Grant Post, No. 28, G. A. R., the Iroquois Club, Young Men’s Social Club and Irish-American Society.

BREVOORT HOUSE.—This hotel was built by a prominent Chicago banker, and was originally known as Anderson’s European Hotel. It was opened as such by Anderson Brothers in 1873, who operated it a short time, when it passed into the hands of William Thompson, who gave it its present name. On January 1, 1882, the present proprietors, S. S. Benjamin and Frank W. Wentworth secured the lease from George W. Forfarson, and have controlled its operations up to the present time. The hotel has a large and exclusive line of patronage, is five stories in height, has one hundred and thirty-one rooms, and can accommodate four hundred and fifty guests.

DEWING EUROPEAN HOTEL.—This hotel was opened December 25, 1885, and occupies the same building in which Brown’s Hotel was started ten years prior to that date. The present hotel is owned by J. M. Hazlett & Co., with R. Deming as manager. It is four stories in height, with a frontage on both Madison and Clark streets, has one hundred and fifty rooms, and can accommodate two hundred and fifty guests.

ATLANTIC HOTEL.—This hotel was built in 1873 by John Keller, and was opened as a hotel on October 1 of the same year, by William L. Newman. The latter operated the house for seven years, being succeeded, on February 1, 1880, by W. P. F. Meserve. In May, 1885, the present proprietor, John Gill, assumed the management. The hotel is five stories in height, stone front, and has one hundred and twelve rooms.

REVERE HOUSE.—In the second volume of this work is a full history of the Revere House, from the date of its establishment until its destruction in the fire of 1871. The new building was erected, in 1871-72, by Thomas Mackin. The old Revere House, before the fire, occupied the present site of the McCormick Block, at the corner of Kinzie and Clark streets. After the fire, the McCormick estate purchased this ground and erected on it the McCormick Block, and the present Revere House was then built on the adjoining premises, on the opposite side of the alley, and one-half block further north. It was completed and opened in 1873, by E. S. Finney, who remained its proprietor until March, 1884, when he was succeeded by J. D. Fanning. Under Mr. Fanning’s manage-
The Continental Hotel, on the southeast corner of Wabash Avenue and Madison Street, occupies the site of the Clifton House before the fire of 1871. Messrs. Jenkins & Holmes had the lease of the hotel at the time, and they removed their property when they were burned out, and on the site of the present Clifton House, the building that was erected on the site of the old Clifton was occupied for the use of the officers of the army. Twenty years ago he landed in Chicago a young man without means or friends, and began in his chosen calling at the very bottom of the ladder. He has made his way to his present position by his honesty, industry and unceasing perseverance. His success is obvious, and his popularity is admired by all who have the pleasure of his acquaintance. Mr. Fanning was married, in 1850, to Miss Mary Moore, daughter of Robert Moore, of this city. They have two children.

City Hotel.—After the fire had swept away the old City Hotel, which stood at the corner of Lake and State streets, the present site of a hotel he came to one necessary, and proprietor, J. W. Towne, bought the lease of the building on the corner of State and Sixteenth streets, and converted the structure into a hotel. This was called the City Hotel, and, in 1874, the owner, Jacob Harris, erected a large addition. The dimensions of the present building are forty-five feet front on State Street, and one hundred and forty-eight feet on Sixteenth. It is four stories high above the basement, and contains one hundred single and double rooms. It is well-ventilated and furnished with every facility for comfort of guests, and has become of late years the headquarters for stockmen and shippers. About 1875, Silas Dutton became the proprietor, after which it was known as the Dutton City Hotel, and in 1876, it became known as the City Hotel. In 1883, William F. Orcutt was made manager, and since that time the hotel has been conducted by Mr. Orcutt, who is a genial man and a genial host. He has conducted the hotel so efficiently that it is one of the most popular hotels in the city. His management has been such as to make the hotel a favorite resort for stockmen and shippers.

Bernard Dake Spencer is a son of D. A. and Belle Spencer, and was born at Oakdale, Monroe Co., Wis., on March 19, 1861. While yet an infant, his parents went to Rutland, Vt., where they resided for three years, and then went to Chicago, where Mr. Spencer was educated. There, young Bernard attended the public schools until thirteen years of age, and then began to make his own way in the world by working in the hotel business. He is the owner of the well-known Riggs House. His activity and good bearing were soon recognized, and at the tender age of thirteen he was given the care of the ladies' entrance, and then made elevator boy. He had continued in the employ of the Riggs House for about two years when he went to the attention of Vice-President William A. Wheeler, who took him over to the White House, one of the hotels in the arrangement, and introduced his protégé to Secretary of the Navy Thompson, whom he requested to procure a position for him, in pursuance to which Vice-President Spencer was now received an appointment to Annapolis. As he was but fifteen years of age, he was obliged to wait a year before he could be admitted to a cadet, which time he applied himself industriously to his studies. At the age of sixteen, he went to college, and was graduated in two years. In June, 1880, he came to this city, and entered the employ of Goodrich & Dow, druggist, at the corner of Cottage Grove Avenue and Orchard Boulevard, and in 1882, he became manager of the Southern Hotel, Wabash Avenue and Twenty-second Street. During the first part of that year he was with the Merchants' Hotel management, and in October, 1882, became manager of the Continental Hotel, subsequent to which he became manager of the European Hotel, No. 33, A.P. & A.M., of the intermediate bodies and of Oriental Consistory, S.P.K.S., 32.

The Gloire European Hotel is one of the latest acquisitions to the numerous hotels in this city, having been opened on May 1, 1884, by S. A. Ray and B. F. Owen. This hotel is located at Nos. 355-57 State Street, having a frontage on that thoroughfare of sixty feet, and extending back about one hundred and seventy-five feet. The hotel proper occupies the three upper stories, and the office and restaurant are located on the first floor, the entrance to these rooms and the hotel being directly from the street. The parlors, reception-rooms and double apartments are located on the second floor, and in all there are sixty-five guests' rooms. The accommodations are for about one hundred and seventy-five people. The firm of Owen & Ray dissolved partnership in the spring of 1885, Mr. Owen retaining Frank D. Ray had the European Hotel. The Clarion Hotel.—Before the great fire of 1871, Nos. 150-62 North Clark Street were occupied by a building known as the Clarion Hotel, of which H. M. Miller was agent and manager. This hotel was opened in the spring of the year 1873, on the same site in 1873. It has a frontage on Clark Street of one hundred feet, and faces Ontario Street on the south, extending back one hundred feet. The building is four stories and a basement in height, and the three upper floors are used for a hotel, and accommodates eighty to one hundred guests, is run on the American plan, and is the permanent home of a number of families. After the fire, the hotel was operated by W. J. White, who ran it until 1875, when Harvey M. Thompson took it over, and in May, 1882, Frank D. Ray took charge, and he has continued the management up to the present time. The hotel was renovated and re-furnished.
throughout upon Mr. Ray's advent as landlord, and it has been kept on a high standard of excellence since that time.

F. D. Ray, manager of the Clarendon and Globe European hotels, was born in Cattaraugus County, N. Y., on April 4, 1850. His family resided there until he was ten years of age and then, coming West, located at De Kalb, Ill. He resided there until 1864, and then came to Chicago to make his home. Mr. Ray received a grammar school education, and on coming to this city went into the employ of Hunt, Harbour & Hale, wholesale dry goods merchants, at Nos. 5-7 Lake Street. He remained with them until 1873, and then went to New York to take a position as general manager, for New York State, for the Howe Sewing Machine Company. He was thus occupied until 1872, when he went to California and became travelling agent for the Howe Company for the Pacific coast. He remained in their employ until 1876, and then returned to Chicago, and took a lease of the Burdick House, on Wabash Avenue, afterward known as the Crawford House and Langham Hotel. Mr. Ray conducted that hotel until 1880, and in the summer of that year sold out and went to Colorado. He became proprietor of the Grand Central Hotel, at Denver, but remained there less than a year, returning in the fall of 1881. The Clarendon changed hands in the spring, and was opened on May 1, 1882. Mr. Ray then becoming its manager. On May 1, 1884, S. A. Ray and B. F. Owen leased the Globe European Hotel, and in the spring of 1885, Mr. Owen retired and Mr. Ray became manager of this hotel in conjunction with the Clarendon. He was married on December 13, 1876, to Miss Sarah Pettie, of Syracuse, N. Y. They have two sons,—Horton and Fred.

The St. Charles Hotel, which is located at Nos. 15-17 Clark Street, is among the oldest houses in the city, having been in existence many years before the fire. At the time of the great conflagration, Messrs. Raggio Brothers were proprietors of the St. Charles, but when it was re-built, in 1872, the hotel was opened by Phil. Conley, who conducted it until 1878, when Messrs. Raggio again took possession, since which time they have made it a popular hotel, which has proved profitable to them. The building is six stories high above basement, with two-storied towers extending above the body of the structure. It is built of brick, with a handsome stone front, and was constructed for the purpose for which it is used. The hotel has a frontage of fifty feet and extends back one hundred feet, and contains one hundred and twenty-five guests' rooms. Its location is such as at once makes it popular with the public, and being conducted upon the American and European plans gives to the transient guests an option as to their accommodation. The hotel is provided with a new passenger elevator, and is fully equipped with the latest and most modern improvements.

Raggio Brothers.—This firm consists of Charles A. and John G. Raggio, both natives of the city of Genoa, Italy, who, with their parents, located in this city in the fall of 1855. Charles A. Raggio was born on January 17, 1847, and John A. on December 20, 1849, and both were, therefore, but young lads when they came to Chicago, where they have since resided. In 1868, they opened a large restaurant on the southeast corner of Randolph Street and Fifth Avenue. In the following year they also bought the St. Charles Hotel, which with the restaurant, they conducted very successfully until the great fire, when both of their establishments were destroyed. Within ten days after the conflagration they re-opened their restaurant on Canal Street, near Randolph, where they remained till 1873, when they removed to a new building on West Madison Street, near Curtis Street, and opened up a fine a restaurant as there was on the West Side. In 1878, the Raggio Brothers disposed of that business and re-purchased the St. Charles Hotel. They gave it a thorough overhauling, renovating it from top to bottom, after which they re-furnished it and opened a first-class hotel. The senior of the firm, Charles A. Raggio, was married on July 25, 1872, to Miss Mary Arato, of Chicago. They have one son, Charles A., Jr.

Massasoit House.—The former hotel of this name, described in the second volume of this work, was one of Chicago's well-known hotels, and in view of that fact, the present house of that name, built, in 1872, by Albert Longley, possesses some his-
HISTORY OF CHICAGO.

RESTAURANTS.

This business is one of enormous magnitude in this city, and one wherein a large amount of money is invested. Sketches of some of the prominent gentlemen engaged therein are herewith presented.

H. H. KOHLSAAT became established in business in Chicago in 1880, when, as a junior partner in the firm of Blake, Shaw & Co., he became connected with the Bakey Bakery, at Nos. 106-9 Clark Street. In 1882, the firm established a small business in counter in connection with the bakery, and, on July 1, 1883, Mr. Kohlsaat succeeded to their interest by purchase, and since that time has continued the business alone. He has built up an exceedingly prosperous house, and, during the year 1883, served eighty and twenty five thousand nine hundred and eleven meals, making a daily average of two thousand eight hundred. On March 15, 1885, he opened three branch houses, one at No. 204 Clark Street, and the other at Lake Street. In that big city, sixty-six men are employed, and, undoubtedly, is the largest bakery of fancy pastry in the United States. Mr. Kohlsaat was born in Eyll, Ill., on March 22, 1853, the son of Reiner Kohlsaat, who settled in that country about 1825. His mother was Sarah Hall, an English lady who came with her father to Illinois as early as 1820. Mr. Kohlsaat received his early education in Galena, III., where his father had moved in 1854, and at twelve years of age came to Chicago with his parents. He attended the Scammon and the Skinner schools, and, in 1868, became a book-keeper for Carson, Frie & Co., then was cashier for the same firm for two years. Two years afterward connecting himself with Richmond, Crumbaugh & Shaw, until 1871. For one year preceding, he sold safes for S. H. Harris upon the road, and for five years was a traveling salesman for Blake, Shaw & Co. In 1880, he married Miss Mabel E. Blake, daughter of E. Nelson Blake. They have one child, Pauline.

Colonel John N. Wilson began business in Chicago in 1873, at Nos. 7 and Madison streets, establishing Wilson's Oyster House, now known as the Boston Oyster House. He remained there three years, and at the end of that time leased the Tivoli Gardens, comprising the entire space now occupied by the Chicago Opera House. After three years he moved to No. 140 Dearborn Street, enlarging his appointments, in 1880, to comprise the adjoining building. In February, 1885, he established a headquarters for his immense catering business at No. 29 Washington Street. Though not the oldest caterer in the city, he has turned his attention for a number of years to the profession, and has made it his study, his specialty being the handling of shell fish. He is probably the only caterer in Chicago to bring live lobsters, or to market to be served. He has facilities for carrying on his business, which he has perfected by careful study, and his coffee is one of the most fashionable in the city. Two reasons are assignable for the fact: the perfection of his cuisine and the Colonel's great personal popularity.

Charles E. Reeder first became connected with the restaurant business in Chicago when he accepted the position of cashier for J. M. Hill, in the Boston Oyster House in 1873, when that place was first opened to the public. He afterward took the management of the house, working in that capacity for about two years. He then became assistant manager of the Dearborn Car Company, as a conductor, remaining in the service of that company for nearly eight years. At the end of that time, he accepted a more lucrative position with the Pennsylvania Railroad Company, as assistant superintendent of the Chicago division, maintaining that position for two years. He then opened his oyster house at the corner of Clark and Monroe streets, and enjoyed an instantaneous success, his present patronage being among the first in the city. On June 1, 1885, he opened a branch house in the new Birch, and his houses are among the most popular in the city. Mr. Reeder was born at Lewiston, N. Y., on May 26, 1844, the son of George W. and Anna (Hewson) Reeder. His father was for a time a proprietor of a house at Lewiston, N. Y. Mr. Reeder received his education in Lockport, N. Y., attending the academy, from which he graduated in 1862. Soon after leaving school, he enlisted in the 125th N. Y. Volunteers, and was connected with the 2nd New York and 1st New York Battery. Porter. On August 22, 1862, he went to Baltimore, where he joined the Army of the Potomac, being in the Second Brigade of the Second Division and Second Corps, under General Winfield Scott. He was mustered out of the service in June, 1865, and was then immediately employed as a clerk in the War Department, remaining there three years. At the end of that time he went home, and was married to his wife, who were living at Superior, Wis., in 1872. Mr. Reeder was married in 1869, to Miss Louisa Peterson, of Washington. They have two children.

Francis and George W. Henrici came to Chicago in December, 1869. He obtained employment as a teacher in a private English school at the corner of Twenty-third Street and Cottage Grove Avenue, and, later in the German-American school at the corner of Chicago and LaSalle avenues, where he taught Latin, French, mathematics, and German literature up to 1886. At that time he went to Burlington, Iowa, and for three years was principal of the German school in that city. He then purchased The German Adventurer, a weekly newspaper published at Burlington, which he conducted for three years. Desiring a larger field for newspaper work, he bought the Daily and Weekly Tribune of Quincy, Ill., one of the oldest German newspapers in the country, and also the Illinois German Newspaper, a daily and weekly paper published at Indianapolts. That venture did not prove as successful as he had anticipated, and, after two years as editor and proprietor, he sold both papers and came to Chicago. On his return to this city, he opened a restaurant, cafe and hotel, known as Henrici's Hotel, at Nos. 70-72 Randolph Street, continuing it until the present time. Mr. Henrici is a native of Germany, and was born on August 24, 1830, the son of Daniel and Theresa (Blauser) Henrici. Until he arrived at the age of thirteen he was a pupil at the common schools, afterward learning the trade of a miller and a baker with his father. After four years' apprenticeship, he left his home and came to New York, working for a baker. In 1853, he returned to Chicago, at the end of which time he came to Chicago. He was married in 1873, to Miss Anna Mullike, a daughter of John H. Mullike, of the first dry goods merchants in Chicago. They have four children.

Philip Henrici and his family who for generations have followed the profession of restaurateurs, caterers and bakers. He is one of three brothers now engaged in the business in this city, and came to Chicago in 1864. He first entered the Briggs House and a pastry cook, and, in 1873, he became his assistant with the same capacity. He established, in 1869, at No. 71 State Street, the first coffee house in Chicago, as they now exist. He had in connection therewith a fancy bakery, continuing until the great fire. After the fire, he commenced his business again at No. 152 Madison Street, selling out in the following year. Subsequently, he located at No. 154 Madison Street, and later at No. 174, removing to his present location, at No. 152 Madison Street, in 1873. He has at present, in connection with his elegant cafe, a fancy bakery, from which he supplies a number of restaurants throughout the city. Mr. Henrici was born in the Rhine province, Germany, on July 13, 1836, the son of Daniel and Theresa (Blauser) Henrici. Until he arrived at the age of thirteen he was a pupil at the common schools, afterward learning the trade of a miller and a baker with his father. After four years' apprenticeship, he left his home and came to New York, working for a baker. In 1853, he returned to Chicago, at the age of sixteen, and at the end of which time he came to Chicago. He was married in 1873, to Miss Anna Mullike, a daughter of John H. Mullike, of the first dry goods merchants in Chicago. They have four children.

Wilhelm Henrici came to Chicago in 1864, and for a short time was employed in the mill of Mehring & Pundt. He next connected himself with his uncle, a grocery dealer, with whom he remained in business for about one year, after which time he purchased a grocery store on Clark Street, and remained there for about nine years. In 1879, he purchased property at the corner of Clark and Monroe streets. He then erected a four-story building, which was completed in 1880. The business was then transferred to this location, and the property has been increased by additions ever since. Mr. Henrici has been in the grocery business for about forty years, and has succeeded very well. Upon his sister's marriage, he purchased her
